Churches, convents, synagogues, schoolhouses, educational institutions, hospitals, public buildings, and their contents (excepting institutions whose inmates are under legal restraint).

(b) Twenty-five per cent on brick buildings and contents occupied for mercantile purposes, office, public, or lodge halls and not exclusively for dwelling purposes above the first floor, and all other risks not coming under class C as hereinafter provided for.

(c) Twenty per cent on all risks specifically rated as special hazards.

(d) The commission on the premiums of policies covering ground rents, leases, rents, use and occupancy, profits and commission to be the commission applicable to the building wherein or whereon or to which such ground rent, lease, rent, use and occupancy, profits and commission insurance applies, builders' risks shall take commission applicable to class for which the building when completed is intended.

(e) Each and all of the foregoing commissions to include all agency expenses, such as postage, exchange, advertising, solicitors' fees, personal local license fees, clerk hire, rent, services in adjusting losses under the policies issued at the agency, and all other agency charges whatsoever, excepting only maps, map corrections, advertising required by law, local board expenses and taxes, salvage corps taxes, and agent's and solicitor's State license fees.

(f) A contingent commission of 5 per cent on the net results of the business of each agency for each contingent year to be computed as follows:

By deducting from the gross premiums written by the agent for the company:

(1) Cancellations and return premiums;

(2) The commissions described herein (which commissions cover agency expenses already described herein);

(3) The amount of losses and loss expenses incurred on business in force on the books of said company at the agency, whether placed there by the present agent or turned over to him for supervision and attention at expiration, and on all business hereafter written by said agent for said company;

(4) All other agency expenses and charges whatsoever, including local board expenses, State and local taxes and licenses, maps, and map corrections, and advertising as required by law; and

(5) Premium consideration for reinsurances effected by or at the request of the agent; and

(6) By adding all collections for losses and loss expenses on reinsurance effected by or at the request of the agent.

(7) Any contingent commission paid shall not be treated as an agency expense in computing the contingent commission of any subsequent contingent year.

(g) At the expiration of the contingent year, or upon the termination of the agency, the company will make up the contingent account, and on request will remit (all premiums for the contingent period being paid to this company and not otherwise) the amount found to be due, if anything, or may request said agent to charge the same in his next monthly account current.

(h) In view of the fact that the agent is not charged with unearned premium in computing the net results for the contingent year he shall have no compensation, contingent or otherwise, on the business or its profits after the termination of the agency.

BROKERAGE.

(i) Brokerages shall be 10 per cent less than commission applicable to each risk, as above set forth, or 10 per cent on the 20 per cent class, 15 per cent on the 25 per cent class, and 20 per cent on the 30 per cent class.

(j) Class 1 members shall not allow nor class 2 accept or pay compensation (commission, contingent or brokerage) greater or different than that above set forth, except that:

(k) An agent representing one company only may receive an annual salary from that company, but no company shall have more than one agent compensated by a salary who shall be counted as one of the six agents provided for in article 11 and who shall be governed by the brokerage rule of the association; and except that:

(l) A principal agent supervising the business of and responsible for other subagents who must write their own policies may receive an overriding commission of 5 per cent on the business only of such subagents, who may receive the regular graded commission and contingent herein set forth, but no contingent shall be paid the principal agent on the subagents' business, all subject to article 11 of the by-laws, the principal agent counting as one agent under that rule, and no class 1 member availing itself of this method may have any direct reporting agent or agents in addition to its principal agent.

ARTICLE 10.

Dwelling-house rates.

The rate on brick dwellings, unexposed other than by brick or frame dwellings and under fire department protection, shall be 15 cents for one year, two annuals for three years (that is to say, 30 cents), and three annuals for five years (that is to say, 45 cents); the rate on the contents of such brick dwellings shall be 25 cents for one year, with the same term rule and rate on frame dwellings and their contents unexposed other than by brick dwellings and under fire department protection shall be 35 cents for one year, with the same term rule. Frame dwellings and contents in rows shall be specifically rated.

ARTICLE 11.

Number of representatives.

No class 1 member shall have more than six representatives compensated at greater or different than brokerage rates. All over that number shall be compensated only by the brokerages as set forth in article 9. Head offices of local companies shall count as one agency under this rule. Class 1 members shall in writing give, whenever required, the names of their agents compensated at greater than brokerage rates.

ARTICLE 12.

Stamp clerks.

Class 2 members shall submit all daily reports and canceled policies to stamp clerks, who shall inspect at reasonable intervals the books of local companies for the purpose of verifying policies not reported by daily reports. Daily reports or other records shall indicate the commission and brokerage, if any, applicable.

When publishing rates the manager shall cause to be noted on each card or schedule of rates opposite each risk or part of risk as listed a letter indicating the grade of commission or brokerage chargeable: (A) indicating 30 per cent grade, (B) 25 per cent grade, and (C) 20 per cent grade.

ARTICLE 13.

Order of business.

SECTION 1. At the stated meetings of the association the following shall be the order of business:

1. Calling of the roll by company.
2. Reading of the minutes.
3. Report of governing committee.
4. Unfinished business.
5. New business.
6. Elections.

The roll by company shall be called upon request of any member.

PARLIAMENTARY RULES.

SEC. 2. This association shall be governed by the rules laid down in Cushing's Manual.

SEC. 3. The chairman of the governing committee, or in his absence the vice chairman, shall preside.

ARTICLE 14.

Agreement.

This constitution and these by-laws shall become effective and in force when all the regular stock companies licensed in the District of Columbia shall have subscribed hereto; or if any company or companies does not or do not hereto subscribe, then when each and every agent of such nonsigning company or companies shall have become an associate member of this association and personally subscribed hereto.

The subscribers hereto, by our signatures, affirm our support and membership in the Underwriters' Association of the District of Columbia. We agree to submit any doubtful questions as to rates, rules, commission, and (or) brokerage that may arise under this agreement to the committee, and we bind ourselves to abide by their decision, whatever it may be, subject to appeal to the association, to the end that harmony and good fellowship may continually prevail.

Mr. ADAMSON. Mr. Chairman, does the gentleman from Illinois desire to use further time?

Mr. MANN. No. I suggest that the gentleman ask unanimous consent that general debate be now closed.

Mr. ADAMSON. Mr. Chairman, I ask unanimous consent that general debate be now closed.

The CHAIRMAN. The gentleman from Georgia [Mr. ADAMSON] asks unanimous consent that the general debate be closed. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

SEC. 2. That the duties of the division of mental hygiene shall be to study and investigate mental disorders and their causes, care, and prevention. The duty of the division of rural sanitation shall be to investigate and encourage the adoption of improved methods of rural and industrial sanitation, and disseminate information among farmers and others for the prevention and suppression of communicable diseases.

Mr. ADAMSON. Mr. Chairman, does the gentleman from Illinois desire to offer the amendment suggested, or does he prefer that the gentleman from Virginia [Mr. MONTAGUE], in charge of the bill, offer it?

Mr. MANN. I would rather have the gentleman from Virginia do it.

Mr. MONTAGUE. Mr. Chairman, I move that, on page 2, line 4, the last two words on that line be stricken out.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Virginia [Mr. MONTAGUE].

The Clerk read as follows:

Amend, page 2, line 4, by striking out——

Mr. MONTAGUE. Let me state the entire amendment. It is that the last two words on line 4, and the first five words on line 5, and the last word on line 5, and the first word on line 6, and the last three words on line 6, together with the first four words on line 7, be stricken out, so that the sentence will read as follows:

The duty of the division of rural sanitation shall be to investigate improved methods of rural sanitation and the prevention and suppression of communicable diseases.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Virginia. Will the gentleman offer it again? The Clerk did not catch it.

Mr. ADAMSON. Let the form of the motion be to "make the sentence read as follows," and then read what it should be.

Mr. MANN. I suggest to the gentleman that he move to strike out all after the word "prevention," in the section, and insert what is desired.

Mr. MONTAGUE. The sentence then would read as follows:

The duty of the division of rural sanitation shall be to investigate improved methods of rural sanitation and the prevention and suppression of communicable diseases.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend section 2 by striking out the words "mental hygiene"——

Mr. MANN. No; strike out all after the word "prevention," in line 3.

The Clerk read as follows:

Strike out all after the word "prevention," in line 3, page 2, and insert the following: "The duty of the division of rural sanitation shall be to investigate improved methods of rural sanitation and the prevention and suppression of communicable diseases."

Mr. MONTAGUE. That is right.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Virginia.

The amendment was agreed to.

Mr. MONTAGUE. Mr. Chairman, I move that the committee do now rise and report the bill with amendments to the House, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HARRISON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 16637) to provide divisions of mental hygiene and rural sanitation in the United States Public Health Service, had directed him to report it back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. ADAMSON. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The SPEAKER. The gentleman from Georgia [Mr. ADAMSON] moves the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. MONTAGUE, a motion to reconsider the vote whereby the bill was passed was laid on the table.

MINING EXPERIMENT AND MINE SAFETY STATIONS.

Mr. FOSTER. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 15869) to provide for the establishment and maintenance of mining experiment and mine safety stations for making investigations and disseminating information among employees in mining, quarrying, metallurgical, and other mineral industries, and for other purposes, with amendments.

The SPEAKER. The Clerk will report the bill and read the amendments into it.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized and directed to establish and maintain in the several important mining regions of the United States and the Territory of Alaska, as Congress may appropriate for the necessary employees and other expenses, under the Bureau of Mines and in accordance with the provisions of the act establishing said bureau, 10 mining experiment stations and 15 mine safety stations, movable or stationary, including those already established, the province and duty of which shall be to make investigations and disseminate information with a view to improving conditions in the mining, quarrying, metallurgical, and other mineral industries, safeguarding life among employees, preventing unnecessary waste of resources, and otherwise contributing to the advancement of these industries: *Provided*, That not more than three mining experiment stations and mine safety stations hereinabove authorized shall be established in any one fiscal year under the appropriations made therefor.

SEC. 2. That the Secretary of the Interior is hereby authorized to accept lands, buildings, or other contributions from the several States offering to cooperate in carrying out the purposes of this act.

The SPEAKER. Is a second demanded?

Mr. MANN and Mr. FERRIS demanded a second.

Mr. FOSTER. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from Illinois asks unanimous consent that a second be considered as ordered. Is there objection?

Mr. MANN. Reserving the right to object, I should like to ask the gentleman if there is any print of the bill as reported?

Mr. FOSTER. With the amendments, there is not.

Mr. MANN. How many amendments are there?

Mr. FOSTER. There are three amendments. I will state them to the gentleman, if he wants to know what they are.

Mr. MANN. I will not take the time now.

The SPEAKER. Is there objection to considering a second as ordered?

There was no objection.

The SPEAKER. The gentleman from Illinois [Mr. FOSTER] will have 20 minutes and the gentleman from Illinois [Mr. MANN] will have 20 minutes.

Mr. STAFFORD. I ask unanimous consent that the amendments be reported separately, so that the House may know what they are.

The SPEAKER. The Clerk will report the amendments.

The Clerk read as follows:

On page 1, in line 6, after the word "Alaska," insert the words "as Congress may appropriate for the necessary employees and other expenses," so that it will read:

"That the Secretary of the Interior is hereby authorized and directed to establish and maintain in the several important mining regions of the United States and the Territory of Alaska, as Congress may appropriate for the necessary employees and other expenses, under the Bureau of Mines—"

And so forth.

Also the following:

Page 1, in line 9, after the word "stationary," insert the words "including those already established."

Also the following:

On page 2, in line 6, after the word "industries," strike out the period and insert a colon and the following:

"*Provided*, That not more than three mining experiment stations and mine safety stations hereinabove authorized shall be established in any one fiscal year under the appropriations made therefor."

The SPEAKER. The gentleman from Illinois [Mr. FOSTER] is recognized for 20 minutes.

[Mr. FOSTER addressed the House. See Appendix.]

Mr. FOSTER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD.

There was no objection.

Mr. TAYLOR of Colorado, Mr. RAKER, Mr. HOWELL, Mr. POWERS, Mr. SUTHERLAND, Mr. EVANS, Mr. FARR, Mr. KIRKPATRICK, Mr. CASEY, Mr. GRAHAM of Illinois, Mr. SELDOMRIDGE, and Mr. FOWLER were granted leave to extend remarks in the RECORD.

Mr. COOPER. Mr. Speaker, I would like to ask the gentleman from Illinois a question.

Mr. FOSTER. I yield to the gentleman.

Mr. COOPER. How many men are there actually at work in all these mines in the United States; what is the total number of men?

Mr. FOSTER. About 2,000,000 men in the United States.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent to print a letter to me from the director of the geological survey.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

The letter is as follows:

OKLAHOMA GEOLOGICAL SURVEY,
Norman, January 29, 1915.

Hon. SCOTT FERRIS,
House of Representatives, Washington, D. C.

DEAR SIR: A few days ago I sent you a telegram concerning House bill 15869, which provides for the establishment of experiment stations and the installation of mine rescue cars.

I have been informed that this bill, known as the Foster bill, did not come up for consideration on the date referred to in the telegram, but I find that Mr. FOSTER will be the first Member recognized on Monday, February 1. I wish to again call the matter to your attention, urging your support for the bill.

Yours, very truly, C. W. SHANNON, *Director.*

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken, and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

PENSIONS.

Mr. RUSSELL. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 21037) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, with an amendment.

The Clerk read the amended bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provision and limitations of the pension laws—

The name of Emanuel Pollard, late of Company E, First Regiment United States Colored Volunteer Heavy Artillery, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Abner Brooks, late of Company F, Seventh Regiment Tennessee Volunteer Mounted Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Prior P. Baird, late of Company A, First Regiment Tennessee Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Elvin A. Estey, late of Company C, Fourth Regiment Wisconsin Volunteer Cavalry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Moses Miller, late of Company K, Twenty-second Regiment New York Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Benjamin F. Hall, late of Company F, Fourth Regiment Tennessee Volunteer Mounted Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Elizabeth Thurston, widow of George E. Thurston, late of Company C, Forty-third Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Sylvester Rumsey, late of Company D, Ninth Regiment Michigan Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Sarah P. Deem, widow of Edward W. Deem, late of Company D, Fourteenth Regiment West Virginia Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Catharine Mann, widow of Jonathan Mann, late of Company I, One hundred and forty-seventh Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $12 per month in lieu of that she is now receiving.

The name of James A. Carter, late of Company G, One hundred and thirty-fourth Regiment Ohio National Guard Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Rachel Thompson, widow of William H. Thompson, late of Company I, Eighty-fifth Regiment New York Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Orion P. Howe, late of Company C, Fifty-fifth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of James Hunter, late of Company C, Fortieth Regiment Kentucky Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Catharine Casler, widow of Henry Casler, who served as a seaman in United States Navy, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Samuel P. Beck, late of Company B, Eleventh Regiment Michigan Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Thomas G. Butner, helpless and dependent child of Samuel Butner, late of Company E, Sixth Regiment Missouri Volunteer Cavalry, and pay him a pension at the rate of $12 per month.

The name of Daniel Snider, late of Company A, Ninth Regiment West Virginia Volunteer Infantry, and Company B, First Regiment West Virginia Veteran Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of George W. Guthrie, late of Company D, One hundred and sixty-first Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $21 per month in lieu of that he is now receiving.

The name of Effie A. Smith, helpless and dependent child of Joseph Smith, late of Company A, Eightieth Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Sue S. Benson, former widow of Jacob R. Rabb, late of Company E, One hundred and nineteenth Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Cassius M. Rose, late of Company E, Fifty-seventh Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Daniel C. Derby, late of Company H, Forty-fourth Regiment Wisconsin Volunteer Infantry, and pay him a pension at the rate of $27 per month in lieu of that he is now receiving.

The name of Richard S. Carr, late of Company C, Fifth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Jennie A. Work, widow of Robert A. Work, late of Companies I and A, Forty-ninth Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of George W. Noah, late of Company H, First Regiment Oregon Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Abraham S. Foster, late of Company A, Seventy-second Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Johanna Miller, widow of Friedrich Miller, late of Company A, Cape Girardeau Battalion Missouri Home Guards, and pay her a pension at the rate of $12 per month.

The name of Ira B. Timmons, late of Company G, Twenty-fifth Regiment, and Company K, Seventeenth Regiment, Kentucky Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of James M. Osborn, late of Company K, Twelfth Regiment Kansas Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Logan McDaniel, late of Company G, Forty-eighth Regiment Missouri Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of John Dryman, late of Company F, Fourth Regiment Tennessee Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Elijah Hill, late of Company F, Seventh Regiment Ohio Volunteer Cavalry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of William A. Morris, late of Company F, One hundred and twenty-ninth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Horace E. Jones, late of Company H, Second Regiment Connecticut Volunteer Heavy Artillery, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Robert B. Martin, late of Company H, Forty-sixth Regiment Missouri Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Daniel McLaughlin, late of Company F, Ninety-first Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Rhoda J. Wright, former widow of Adam S. Wright, late of Company F, Twenty-fourth Regiment Missouri Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Loyd G. Harris, late of Company C, Sixth Regiment Wisconsin Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of John W. Hinds, late of Company C, Sixty-seventh Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of William Cagney, late of Company D, Eleventh Regiment New York Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Eliza J. Butler, now Elliott, former widow of Simon P. Butler, late of Company B, Third Regiment, and Company G, Thirty-third Regiment, Ohio Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Malinda J. Wall, former widow of John H. McMillin, late of Company B, Ninety-first Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Henrietta H. Blodgett, widow of Frederick Blodgett, late of Company E, Sixth Regiment Connecticut Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Susan A. Phillips, widow of William H. Phillips, late of Company H, Fifteenth Regiment Missouri Volunteer Cavalry, and pay her a pension at the rate of $12 per month.

The name of Charles Schultz, late musician Eighth Regiment Missouri Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of William Hemstreet, late of Company A, One hundred and seventy-seventh Regiment New York Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Charles Shanley, late of Company E, Fifth Regiment New Hampshire Battalion Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of James P. Miller, late of Battery F, Independent Pennsylvania Volunteer Light Artillery, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Daniel Diefenbaugh, late of Company D, Thirty-fifth Regiment, and Company C, Eighteenth Regiment, Ohio Volunteer Infantry, and pay him a pension at the rate of $27 per month in lieu of that he is now receiving.

The name of Henry M. Benson, late of Company C, One hundred and ninety-third Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Thomas J. Black, late of Company C, Sixty-second Regiment, and Company F, Sixty-seventh Regiment, Ohio Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Melissa W. Shaw, former widow of Johnson J. Shaw, late of Company H, Third Regiment Maryland Volunteer Cavalry, and pay her a pension at the rate of $12 per month.

The name of Barbara Theiring, widow of Anton Theiring, late of Company G, One hundred and thirty-first Regiment Ohio National Guard Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Margaret A. Hardin, widow of William H. H. Hardin, sr., late of Company E, Sixteenth Regiment, Company H, Fiftieth Regiment, and Company G, Tenth Regiment, Illinois Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of George O. Steadman, late of Company A, Thirty-first Regiment, and Company B, Seventeenth Regiment, Iowa Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Mary A. Shirey, widow of Peter Shirey, late of Company G, Fortieth Regiment Iowa Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Fredus H. Aldrich, late of Company A, Forty-fourth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $22.50 per month in lieu of that he is now receiving.

The name of Ambrose E. Beardsley, late of Company H, Twentieth Regiment Connecticut Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Jonathan J. Boyer, late of Company F, Eleventh Regiment Illinois Volunteer Cavalry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Harriet C. Martindale, widow of Stephen Martindale, late of Company C, Third Regiment Delaware Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of James A. Hight, late of Company H, Eighth Regiment Missouri State Militia Cavalry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Bonaparte Hunnell, late of Company C, One hundred and fifty-fourth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Elizabeth Venning, widow of Henry Venning, late of Company C, Seventy-eighth Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Thomas A. Moore, late of Company C, Fifth Regiment Provisional Enrolled Missouri Militia, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Augustus E. Dodds, helpless and crippled son of William A. Dodds, late of Company H, Seventy-eighth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $12 per month.

The name of Mary E. Skelton, now Gillespie, former widow of John Skelton, late of Company A, Fifty-eighth Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Alfred Nicholas, late of Company D, First Regiment Tennessee Volunteer Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Catharine McDermott, widow of Patrick McDermott, late of Company H, Third Regiment New York Volunteer Light Artillery, and pay her a pension at the rate of $24 per month in lieu of that she is now receiving: *Provided*, That in the event of the death of Emma McDermott, helpless and dependent child of said Patrick McDermott, the additional pension herein granted shall cease and determine: *Provided further*, That in the event of the death of Catharine McDermott, the name of said Emma McDermott shall be placed on the pension roll, subject to the provisions and limitations of the pension laws, at the rate of $12 per month from and after the date of death of said Catharine McDermott.

The name of Maggie Adams, widow of John Adams, late of Company K, Forty-seventh Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Parthenia E. Brown, widow of Charles H. Brown, late of Company B, Twentieth Regiment Connecticut Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Henry Feindt, late of Company F, Tenth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Thomas Moore, late of Company L, Fourteenth Regiment Pennsylvania Volunteer Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John Papst, late of Company E, Tenth Regiment Michigan Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Edward Z. Williams, late of Company B, Fifty-ninth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of George W. Plank, late of Company C, Webster County Missouri Home Guards, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John Fralick, late of Company H, One hundred and twenty-third Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Andrew J. Grant, alias Jackson Bowman, late of Company E, Third Regiment North Carolina Volunteer Mounted Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Martha J. McMiller, former widow of John McMiller, late of Company H, Eighty-fourth Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of Albert C. Worthington, alias Amzi W. Cowles, late of Company G, Twenty-fifth Regiment Wisconsin Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The SPEAKER. Is a second demanded?

There was no demand for a second.

Mr. RUSSELL. I ask, Mr. Speaker, to insert in the RECORD the reports on the amendment that has been read into the bill.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The reports are as follows:

H. R. 6386. William M. King, aged 69 years, served as a private in Company I, One hundred and sixty-seventh Regiment Ohio Infantry, from May 5 to September 8, 1864—4 months and 7 days—and is now a pensioner under special act at $30 per month from August 23, 1913.

He was formerly pensioned under the act of February 6, 1907, at $12 per month; also, under the act of June 27, 1890, at $8 per month, for left inguinal hernia, loss of vision of right eye, and eczema.

Address, 17 Grant Place, Washington, D. C.

Board of surgeons, January 5, 1907, found impaired vision, slight hernia, slightly impaired hearing, eczema, and loss of teeth.

Medical testimony indicates that the claimant is totally blind. Financial testimony indicates that he has no source of income but his pension.

An increase to $40 per month is recommended.

H. R. 7404. Thomas Brewer, aged 75 years, served as a private in Companies I and F, Thirty-first Regiment Enrolled Missouri Militia, from August 10 to December 8, 1862—3 months 29 days—and is now a pensioner under special act at $12 per month from June 6, 1896. No. 910372.

Address, McFall, Mo.

Board of surgeons, November 28, 1894, found epilepsy, disease of heart, asthma, and piles.

Claimant's applications under acts of June 27, 1890, and May 11, 1912, were rejected by the Bureau of Pensions on the ground of no title, for the reason that the above-named organization was never mustered into the service of the United States.

Medical and other testimony filed in this action indicates that the claimant is incapacitated for the performance of manual labor by reason of spinal irritation, affecting the nervous system and other vital organs, supplemented by the testimony of others indicating he has a small home place but no other property nor income from any source except his pension, which it is recommended by the committee be increased to $24 per month.

H. R. 10414. Ada J. Bevell, aged 58 years, is the widow of Benjamin T. Bevell, who served as a private in Company G, Twenty-third Regiment Missouri Infantry, from January 25, 1862, to January 24, 1865. Post office, Topeka, Kans. Daily Capital Building. No. 989441.

The soldier was a pensioner at $24 per month for disease of lungs, under the general law.

He and this claimant were married June 21, 1887. They appeared to have lived together as husband and wife until on or about June 1, 1896, when, it is alleged, the soldier deserted her. She filed a claim for one-half his pension, under the act of March 3, 1899, and after a thorough special examination of the claim the same was allowed and she was paid one-half his pension until April 16, 1907, when her name was dropped from the rolls, the soldier having surreptiously secured a decree of divorce from her in another State, in the circuit court of Jackson County, Mo. The soldier died January 9, 1909; subsequent thereto this claimant filed a bill to have the decree of divorce set aside by the circuit court in which the decree was rendered, which was done June 14, 1912.

That part of the decree reciting the findings of facts indicating the cause for relief and the grounds on which the decree of divorce was vacated and set aside and setting forth the relief granted reads as follows:

"The court finds that during all the time Bevell lived in Kansas City, Mo., he knew where this plaintiff was; that he knew where their said children were, and other relations of this plaintoff living in Savannah, Mo.

"The court finds that Benjamin T. Bevell filed his suit for divorce against this plaintiff on December 15, 1906, in this court, and that the allegations in said petition as a ground for divorce were for abandonment and indignities. The court finds that these grounds and others alleged in the petition did not exist and were wholly false and untrue and that the said Benjamin T. Bevell was not the innocent and injured party nor entitled to the relief prayed for. That service in said cause was obtained upon this plaintiff by publication. That said order of publication was granted upon an allegation in the petition as follows: 'Defendant is an nonresident of the State of Missouri and has concealed herself and can not be summoned by the ordinary process of law in this State.' This allegation was sworn to by the said Benjamin T. Bevell. The court finds that said Bevell did know where his wife was at the time of making this affidavit and that such affidavit was false; that he knew that she was nursing their said daughter, Mrs. Webster, in Burlingame, Kans., through a spell of sickness.

"The court finds that the said Benjamin T. Bevell committed a fraud upon this court and deceived this court in the very act of obtaining said decree of divorce; that he violated the rule of this court in divorce cases wherein service by publication the plaintiff is required to give to defendant personal notice of the bringing of said divorce suit; that the said Bevell was notified of the rule of court by his said attorney; that said Bevell committed a fraud upon the court when he testified at the trial of said divorce suit that he did not know where this plaintiff was. The court finds that he did know where she was at said time, but that he falsely testified that he did not know where she was and fraudulently and secretly kept such fact from the court at the time he obtained said decree of divorce. The court further finds that said Benjamin T. Bevell testified at the trial of said divorce suit that the charges and allegations made by him in his petition for divorce against this plaintiff were true, but the court further finds that the said Benjamin T. Bevell's testimony was false and charges and allegations against his wife were false and untrue.

"The court finds that he secretly and fraudulently kept the fact of the pendency of said suit and the obtaining of said decree of divorce from this plaintiff until after the March, 1907, term of this court had passed, nor was her pension stopped until after said term had passed.

"The court finds that through the secret and fraudulent acts of Benjamin T. Bevell this plaintiff was kept away from this court and was kept in ignorance of said divorce proceedings until after the term of court had passed; that the process of this court was used by the said Benjamin T. Bevell for the purpose of effecting fraud upon the rights of plaintiff and to deprive her of all opportunity to contest the justice and the merits of the divorce proceedings and deprived her of her one-half interest in the pension aforesaid; that the said Bevell practiced a gross fraud upon this court in obtaining said decree.

"The court finds that defendant, Benjamin T. Bevell, died on January 9, 1909, owing no debts and owning no real or personal property.

"It is therefore adjudged and decreed by the court that by reason of the secret, wrongful, and fraudulent acts and false swearing of the said defendant, Benjamin T. Bevell, that the said pretended default decree of divorce heretofore granted in this court, to wit, No. 17596, on the 15th day of April, 1907, be, and the same is hereby, set aside and for naught held, and is adjudged to be void and of no effect, and that this plaintiff, Ada J. Bevell, is restored to all the rights she had prior to the granting of said decree of divorce, and that all costs herein be paid by and that execution issue therefor against the defendant."

Following the judgment of the court setting aside the decree granting the soldier a divorce from the claimant, she filed a claim for pension as his widow, which claim was denied and rejected August 5, 1912, "on the ground of no title, the soldier having procured a divorce from the claimant April 16, 1907. This bureau declines to accept the decree of annulment of her divorce from the soldier obtained since his death." An appeal to the honorable Secretary of the Interior was entered December 2, 1912, who affirmed the action of the Bureau of Pensions in the following language:

"The bureau refused to consider the vacating decree for the reason that the court was without power to render it. The only question is, therefore, whether the court had such power.

"The law of Missouri is plain and explicit relative to the power of courts to vacate, modify, or review a decree of divorce. By section 2931, Revised Statutes (1899), appeals in divorce suits must be allowed at the term at which the judgment or decree was rendered or a writ of error must be sued out within 60 days after the rendition of the decree.

"Section 2932 provides as follows:

"'No petition for review of any judgment for divorce rendered in any case arising under this chapter shall be allowed, any law or statute to the contrary notwithstanding; but there may be a review of any order or judgment touching the alimony and maintenance of the wife and the care and custody of the children or any of them as is in other cases.'

"The appellate courts of Missouri hold that under section 2932 where the necessary jurisdictional facts appear of record and are found by the court to exist the opposite party in a divorce suit is precluded from showing that they do not exist as a matter of fact except upon proceedings by appeal or writ of error. (See Salisbury *v.* Salisbury, 92 Mo., 683; Childs *v.* Childs, 11 Mo., App., 395; Nave *v.* Nave, 28 Mo. App., 505; Hansford *v.* Hansford, 34 Mo. App., 242; Smith *v.* Smith, 48 Mo. App., 612.)

"In Salisbury *v.* Salisbury the supreme court held:

"'A decree of divorce becomes final and conclusive as against a petition for review whether under a statute or based upon the ground of fraud after the expiration of the term at which it was obtained where the court had jurisdiction of the parties and the subject matter.'

"From the cited decisions it clearly appears that under the law of Missouri a court is without power to vacate a decree of divorce except as provided by section 2932, where no jurisdictional defects in the proceedings appear of record.

"The decree of the circuit court on the bill of the appellant vacating its decree divorcing the appellant and the soldier contains no finding of any jurisdictional defect appearing in the divorce proceedings. It does contain findings, expressly dehors the record in said proceedings, that the soldier did not have a cause for divorce and that the law as to notice was not complied with. But if the soldier, as a matter of fact, had no cause for divorce and the law as to notice was not actually complied with, inasmuch as the record shows such cause and a compliance with the law as to notice, the appellant could not be afforded relief on motion, a bill for review or any proceedings in equity as relief by said methods is expressly prohibited by section 2932. The vacating decree on her bill for review was rendered in direct violation of said section and is therefore void and of no effect."

The records and files of the Bureau of Pensions show the claimant was duly notified of the termination of her right to draw one-half of the soldier's pension April 16, 1906, and it does not appear that she made protest to the dropping of her name from the rolls or to validity of the judgment and decree of the court granting the divorce until something like five years after such action had been taken and about three years after the soldier's death. She apparently acquiesced in the decree of divorce during his lifetime of which she had full knowledge, and admitted its probity in her claim for reimbursement filed February 24, 1909, and which was allowed and paid her from the soldier's accrued pension; and from all the evidence in the case it is manifest she procured the annulment of the decree of divorce for the specific purpose of giving her status for pension as the soldier's widow.

It is clear, however, from the evidence in the case that because of the dishonest and disreputable conduct of the soldier in securing the divorce from the claimant by concealment and fraud must, under existing laws, operate to the claimant's loss and disadvantage, and to deprive her of her rights as his widow, and whatever her legal status under existing pension laws, adverse though it be, it appears to this committee she may have an equitable title to pension.

Testimony filed with this committee indicates the claimant is without means of support; that she has no property of any consequence nor income from any source except her own labor, which amounts to, approximately, $7 per week.

It is recommended by this committee she be granted a pension of $12 per month.

H. R. 18495, Charles A. Detrick, aged 71 years, served as a private in Company A, Thirty-eighth Regiment Iowa Infantry, from August 14, 1862, to September 21, 1863; length of service, 1 year, 1 month, and 8 days; post office, Alvin, Tex.

The claimant is now pensioned by special act of Congress at $24 per month, approved February 13, 1911. He was formerly pensioned under the general law at the rate of $17 per month for chronic diarrhea and resulting disease of rectum, dyspepsia, and disease of lungs, and disease of mouth result of scurvy. He was last examined by a board of surgeons June 4, 1913, when rated at $8 for diarrhea, $4 for dyspepsia, $8 for disease of heart, and $4 for disease of rectum. A rate of $30 per month was recommended by the board. On that certificate his claim for increase to $30 per month under the disability clause of the act of May 11, 1912, was denied on the ground he was not unable to perform manual labor by reason of the diseases for which formerly pensioned under the general law or diseases of service origin.

The claimant presents this committee with the testimony of a physician et al., indicating the claimant is unfitted for and unable to perform labor by reason of disease of ears (total of one ear and only able to hear watch tick with the other) and disease of stomach and bowels, which is supplemented with other information in writing indicating he possesses but "little property and is practically dependent on his pension."

It is therefore recommended his pension be increased to $30 per month.

H. R. 20512, Minnie S. Rector, aged 70 years, is the widow of John E. Rector, who served as a sergeant in Company F, Fiftieth Regiment Missouri Infantry, from August 10, 1864, to July 5, 1865 (10 months and 25 days).

Post-office address, Sedalia, Mo.

The soldier was pensioned at $15 per month under the act of February 6, 1907.

He and this claimant were married December 7, 1893, and were recognized as husband and wife to the date of his death, June 17, 1912. She was paid his accrued pension, but has no status under existing laws, by reason of her marriage to soldier subsequent to the passage of the act of June 27, 1890. It does not appear that she has remarried.

The testimony filed in this action indicates that the only property the claimant owns is a small house, presumably made use of as a home; that she has no other means of support and depends upon the kindness of her friends and relatives for her maintenance.

It is recommended by this committee that she be granted a pension of $12 per month.

The SPEAKER. The question is on suspending the rules and passing the bill.

Mr. CALLAWAY. Mr. Speaker, I demand the yeas and nays.

The SPEAKER. The question is on ordering the yeas and nays.

Mr. CALLAWAY. Mr. Speaker, I make the point of no quorum.

The SPEAKER. The gentleman from Texas makes the point of no quorum. Evidently there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

Mr. GARNER. Mr. Speaker, is the question on the passage of the bill?

The SPEAKER. It is; all those in favor of suspending the rules and passing the bill will answer "aye" and those opposed will answer "no," and the Clerk will call the roll.

The question was taken; and there were—yeas 235, nays 39, answered "present" 12, not voting 138, as follows:

[Roll No. 54.]

YEAS—235.

Mr. SPARKMAN with Mr. SAMUEL W. SMITH.

Mr. VINSON with Mr. WINSLOW.

Mr. WILSON of Florida with Mr. TREADWAY.

Mr. DRISCOLL with Mr. TEMPLE.

The result of the vote was announced, as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will unlock the doors.

Before taking up the next bill the Chair desires to make a statement. The rules of the House prohibit smoking inside of this Hall. Complaint has been made to the Chair more than once about Members smoking in the Hall. Now, there is plenty of space outside of this Hall for gentlemen to smoke. And, while the Chair is at it, he will suggest it is a good thing for Members to keep their feet down from the tops of the seats. [Applause.]

Mr. KEY of Ohio. Mr. Speaker, I move to suspend the rules and pass the bill H. R. 21089.

The SPEAKER. The Clerk will report the bill, with amendments in it.

The Clerk read as follows:

A bill (H. R. 21089) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Mary E. Dougherty, widow of Frank Dougherty, late of Company G, Twentieth Regiment United States Infantry, War with Spain, and pay her a pension at the rate of $12 per month, and $2 per month additional on account of each of the minor children of the said Frank Dougherty until they reach the age of 16 years.

The name of Mary Nachbar, widow of Mathias C. Nachbar, late of Company H, Twelfth Regiment Minnesota Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month, and $2 per month additional on account of each of the minor children of the said Mathias C. Nachbar until they reach the age of 16 years.

The name of Floyd L. Campbell, late of Company M, Second Regiment Oregon Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Edward J. Prime, late of Company B, Forty-third Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Thomas D. O'Shea, late of Company L, Forty-seventh Regiment New York Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of John H. Bostick, late of Company D, Second Regiment Louisiana Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of George W. Burleson, late of Company A, Eleventh Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Herman Grasse, late of Company C, Second Regiment Wisconsin Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Rebecca Horn, late nurse, Medical Department United States Army, War with Spain, and pay her a pension at the rate of $12 per month.

The name of James P. McClintock, late of Company K, Second Regiment West Virginia Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Ross Robison, late of Company I, Thirty-fourth Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of John Rielly, late of Company K, Twenty-seventh Regiment, and Company D, Ninth Regiment, United States Infantry, Regular Establishment, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of James Frank Sanderson, late of Company G, Twenty-first Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Willis S. Richey, late of Company D, Second Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $8 per month.

The name of Elmer E. Frederick, late of Company L, Ninth Regiment Pennsylvania Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Bridget Moran, dependent mother of James L. Moran, late of Company K, First Regiment Connecticut Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month.

The name of Henderson Ramey, late of Company L, Eleventh Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Grant W. Berry, late of Company E, Fiftieth Regiment Iowa Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of William Miller, late of Troop F, Third Regiment United States Cavalry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Bridget Gaffney, widow of Patrick Gaffney, late of Troop K, Fifth Regiment United States Cavalry, Regular Establishment, and pay her a pension at the rate of $12 per month.

The name of Robert Wilson, late of Company F, Second Regiment Arkansas Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Edmund P. Miller, late major, One hundred and sixtieth Regiment Indiana Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Julia Ward, dependent mother of Michael J. Ward, late of Company C, Forty-third Regiment United States Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month.

The name of John H. Turpin, late of Company K, Second Regiment Oregon Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of Maurice J. Gordon, late of Company B, Eighth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $8 per month.

The name of Robert G. Knox, late of Troop L, First Regiment United States Volunteer Cavalry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Henry W. B. Mechling, late of Troop H, Seventh Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Berdie Sarratt, widow of Ralph Sarratt, late of Company F, Fifth Regiment Illinois Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month, and $2 per month additional for each of the minor children of the said Ralph Sarratt until they reach the age of 16 years.

The name of Charles J. German, late of Company D, Ninth Regiment Pennsylvania Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of William M. Hairston, late of Company E, Third Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of William H. Bohan, late of Company B, Thirteenth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Daniel A. Kanipe, late of Company C, Seventh Regiment United States Cavalry, Regular Establishment (Custer's brigade, Indian war), and pay him a pension at the rate of $17 per month.

The name of Eugene F. Clements, late of Company B, Twelfth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Harry Yates, late of Troop B, Eleventh Regiment United States Volunteer Cavalry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Chester A. Walker, late of Company H, Thirty-eighth Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

H. R. 20999. Marian E. Keyes.

The SPEAKER. Is a second demanded on this bill? If not, the Chair will put the question.

The question was taken; and the Speaker announced that in the judgment of the Chair (two-thirds having voted in favor thereof)——

Mr. CALLAWAY. Mr. Speaker, I demand the yeas and nays.

The SPEAKER. Those in favor of ordering the yeas and nays will rise and stand until counted. [After counting.] Seven gentlemen have risen, not a sufficient number.

Mr. CALLAWAY. Mr. Speaker, I make the point of no quorum.

The SPEAKER. The Chair will count. [After counting.] One hundred and seventy-one gentlemen are present, not a quorum. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 241, nays 30, answered "present" 9, not voting 144, as follows:

[Roll No. 55.]

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The Clerk announced the following additional pairs:

Until further notice:

Mr. SMALL with Mr. BARTHOLDT.
Mr. ADAMSON with Mr. CALDER.
Mr. SCULLY with Mr. BROWNING.
Mr. EAGAN with Mr. DRUKKER.
Mr. CARAWAY with Mr. HUGHES of West Virginia.
Mr. CLARK of Florida with Mr. LEWIS of Pennsylvania.
Mr. LINTHICUM with Mr. AINEY.
Mr. McKELLAR with Mr. ANTHONY.
Mr. O'SHAUNESSY with Mr. BROWNE of Wisconsin.
Mr. PRICE with Mr. CHANDLER of New York.
Mr. RAGSDALE with Mr. GUERNSEY.
Mr. RAUCH with Mr. HAMILTON of New York.
Mr. SHERLEY with Mr. FAIRCHILD.
Mr. STEDMAN with Mr. JOHNSON of Utah.
Mr. STEPHENS of Nebraska with Mr. McGUIRE of Oklahoma.
Mr. TALBOTT of Maryland with Mr. MORIN.
Mr. WATSON with Mr. PETERS.
Mr. DOOLING with Mr. STEENERSON.

Mr. CALLAWAY. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. The gentleman from Texas moves that the House do now adjourn.

The question was taken, and the motion was rejected.

Mr. KEY of Ohio. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 21218) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and the widows of such soldiers and sailors.

The SPEAKER. The Clerk will report it and read the amendments into the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Otho Peterson, late of Company I, Twenty-seventh Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Eugene P. Twiford, late of Company M, Thirty-second Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Giles A. Woolsey, late of Company H, Tenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Daniel L. Watson, late of Fifty-eighth Company, United States Coast Artillery, War with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Fred B. Perkins, late of Company G, Thirty-fifth Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of John W. McAndrew, late of Hroop B, Fourth Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of William Schahn, late of Troop C, Fifteenth Regiment United States Cavalry, War with Spain, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of Peter Burns, late of Troop I, Seventh Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of James J. Gardner, late of Troop F, Eighth Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Elmer E. Sprague, late of Company E, Sixty-fifth Regiment New York Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Frank Doering, late of Troop A, Seventh Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Lauchling McDonald, late of Company B, Thirty-third Regiment Michigan Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Minnie A. Cullen, widow of William Cullen, late of Company G, Fourth Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $12 per month, and $2 per month additional on account of the minor child of the said William Cullen until it reaches the age of 16 years.

The name of Maurice Downey, late cabin steward of the United States Navy, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Thomas Coriam, late of Battery C, Third Regiment United States Artillery, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Alphonsus L. Crook, late of Companies D and L, Fourteenth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Andrew Mospens, late of Company B, Second Regiment Kentucky Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of George E. Egan, late of Company K, Sixth Regiment Massachusetts Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Daniel Madigan, late of the United States Marine Corps, United States Navy, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Zenas A. Hinson, late of Battery A, Third Regiment United States Artillery, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Thomas J. Moore, late of Company E, Twenty-sixth Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Thomas D. Parks, late of Company L, First Regiment United States Cavalry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of John W. Ramey, late of Company C, Seventh Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $14 per month in lieu of that he is now receiving.

The name of Clay A. Armstrong, late of the Hospital Corps, United States Army, War with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Allen M. Jackson, late of Troop C, First Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Dudley C. Griswold, late of Company F, Third Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of William J. Mester, late of Battery E, First Regiment United States Artillery, and Company M, Third Battalion United States Engineers, War with Spain, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of Ellis Ames, late of Company D, Third Regiment Illinois Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Violet P. Winslow, widow of Richard P. Winslow, late captain, United States Coast Artillery Corps, Regular Establishment, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving, and $2 per month additional on account of the minor child of said Richard P. Winslow until it reaches the age of 16 years.

The name of Homer C. Dodd, late of Hospital Corps, United States Army, War with Spain, and pay him a pension at the rate of $12 per month.

The name of John O. Lind, late of Battery F, Fourth Regiment United States Artillery, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Gertrude M. Haydon, widow of Thomas L. Haydon, late second lieutenant Company D, First Regiment Kentucky Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month, and $2 per month additional on account of the minor child of the said Thomas L. Haydon until it reaches the age of 16 years.

The name of William A. Bowen, late of Company E, Third Regiment Georgia Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Artaminca A. Conner, widow of Andrew J. Conner, alias Andrew J. Levi, late of Company D, First Regiment Kentucky Volunteer Cavalry, War with Mexico, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Mary A. Shannon, widow of John Shannon, late of Capt. Witherup's company, Pennsylvania Militia, War of 1812, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Gertrude S. Kessler, widow of William S. Kessler, late of Company I, Eleventh Regiment United States Infantry, War with Spain, and pay her a pension at the rate of $12 per month, and $2 per month additional on account of three minor children of the said William S. Kessler until they reach the age of 16 years.

The name of Marcella Matlock, widow of John Matlock, late of Company D, Fourth Regiment Kentucky Volunteers, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Louisa M. Johnson, widow of William S. Johnson, late of Capt. Holmes's company, First Regiment Georgia Volunteer Infantry, War with Mexico, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The foregoing bill is a substitute for the following House bills referred to the Committee on Pensions:

H. R. 1378. Otho Peterson.	H. R. 15344. Daniel Madigan.
H. R. 3313. Eugene P. Twiford.	H. R. 15979. Zenas A. Hinson.
H. R. 3622. Giles A. Woolsey.	H. R. 16428. Thomas J. Moore.
H. R. 6273. Daniel L. Watson.	H. R. 16971. Thomas D. Parks.
H. R. 6759. Fred B. Perkins.	H. R. 17280. John W. Ramey.
H. R. 7203. John W. McAndrew.	H. R. 18120. Clay A. Armstrong.
H. R. 9057. William Schahn.	H. R. 18208. Allen M. Jackson.
H. R. 9641. Peter Burns.	H. R. 18777. Dudley C. Griswold.
H. R. 10351. James J. Gardner.	H. R. 19333. William J. Mester.
H. R. 10622. Elmer E. Sprague.	H. R. 19465. Ellis Ames.
H. R. 10774. Frank Doering.	H. R. 19576. Violet P. Winslow.
H. R. 11371. Lauchling McDonald.	H. R. 19837. Homer C. Dodd.
H. R. 11437. Minnie A. Cullen.	H. R. 19996. John O. Lind.
H. R. 13034. Maurice Downey.	H. R. 20228. Gertrude M. Haydon.
H. R. 13384. Thomas Coriam.	H. R. 20483. William A. Bowen.
H. R. 14102. Alphonsus L. Crook.	H. R. 20564. Artaminca A. Conner.
H. R. 14148. Andrew Mospens.	H. R. 21038. Mary A. Shannon.
H. R. 15342. George E. Egan.	H. R. 21087. Gertrude S. Kessler.

The SPEAKER. Is a second demanded on this bill?

A second was not demanded.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and (two-thirds having voted in the affirmative) the rules were suspended and the bill was passed.

Mr. SLAYDEN. Mr. Speaker, I move to suspend the rules and——

Mr. MANN. Mr. Speaker, I make the point of order that there is no quorum present.

Mr. KEY of Ohio. Mr. Speaker, I have here a report in support of the two last amendments that I would like to have inserted in the RECORD.

The SPEAKER. It can not be done unless the gentleman from Illinois [Mr. MANN] withholds his motion.

Mr. MANN. I will withhold it until that is done, if my motion is taken up afterwards.

The SPEAKER. Without objection, the statements will be inserted in the RECORD.

There was no objection.

The statements are as follows:

H. R. 21028. Marcella Matlock, 819 South Cecil Street, Louisville, Ky., widow of John Matlock, deceased, who served during the War with Mexico, in Company D, Fourth Kentucky Volunteers, from October 2, 1847, to July 25, 1848. (W. C. 14629.)

The soldier died January 9, 1907, and the widow was pensioned at $8 per month from the day following his death, under the act of January 29, 1887, and the rate of her pension was increased to $12 per month by the act of April 19, 1908, which she now receives, and which is the maximum allowed by existing law. It is shown by evidence filed with the bill, consisting of affidavits of the petitioner and several competent witnesses, that she possesses no property, is 73 years of age, and depends on her pension of $12 per month for a living.

H. R. 19750. Louisa M. Johnson, Gainesville, Ga., widow of William S. Johnson, deceased, who served during the War with Mexico in Capt. Isaac Holmes's company, First Georgia Volunteers, from June 1 to September 19, 1846. (W. C. 9310.)

The soldier died February 11, 1861, and the widow was pensioned at $8 per month from January 29, 1887, under the act of that date. The rate of her pension was increased to $12 per month by the general act of April 19, 1908, which she now receives, and which is the maximum allowed by existing law. It is shown by evidence filed with the bill, consisting of affidavits of the widow and several competent witnesses, that all of the property which the petitioner possesses consists of a note for $700, from which she receives $56 a year, and that she depends on this and her pension of $12 per month for a living. It is also shown that she is over 82 years of age, and very feeble and infirm in health.

The SPEAKER. The gentleman from Illinois makes the point of order that there is no quorum present.

ADJOURNMENT.

Mr. CARLIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 10 minutes p. m.) the House, under its previous order, adjourned until Tuesday, February 2, 1915, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. Letter from the Secretary of the Treasury, transmitting copy of a communication of the Secretary of the Interior submitting an estimate of appropriation in the sum of $2,000,000 toward the construction and operation of railroads in Alaska (H. Doc. No. 1538); to the Committee on Appropriations and ordered to be printed.

2. Letter from the Chairman of the Interstate Commerce Commission, transmitting report of the Chief of the Division of Safety concerning a test of the automatic train-control system of the American Train Control Co., Baltimore, Md. (H. Doc. No. 1541); to the Committee on Interstate and Foreign Commerce and ordered to be printed, with illustrations.

3. Letter from the president of the Washington & Old Dominion Railway Co., transmitting the report of the Washington & Old Dominion Railway for the year ended December 31, 1914 (H. Doc. No. 1542); to the Committee on the District of Columbia and ordered to be printed.

4. Letter from the president of the Potomac Electric Power Co., transmitting report of the Potomac Electric Power Co. for the year ended December 31, 1914 (H. Doc. No. 1543); to the Committee on the District of Columbia and ordered to be printed.

5. Letter from the president of the City & Suburban Railway of Washington, transmitting report of the City & Suburban Railway of Washington for the year ended December 31, 1914 (H. Doc. No. 1544); to the Committee on the District of Columbia and ordered to be printed.

6. Letter from the president of the Georgetown & Tennallytown Railway Co., transmitting report of the Georgetown & Tennallytown Railway Co. for the year ended December 31, 1914 (H. Doc. No. 1545); to the Committee on the District of Columbia and ordered to be printed.

7. Letter from the president of the Washington Railway & Electric Co., transmitting report of the Washington Railway & Electric Co. for the year ended December 31, 1914 (H. Doc. No. 1546); to the Committee on the District of Columbia and ordered to be printed.

8. Letter from the Secretary of the Interior, transmitting statement showing the quantity of useless and discarded books and papers which had accumulated in the bureaus of that department and in the office of the Civil Service Commission, and the disposition thereof (H. Doc. No. 1547); to the Committee on Disposition of Useless Executive Papers and ordered to be printed.

9. Letter from the president of the Washington Gas Light Co., transmitting detailed statement of the business of the Washington Gas Light Co., with a list of its stockholders for the year ended December 31, 1914 (H. Doc. No. 1548); to the Committee on the District of Columbia and ordered to be printed.

10. Letter from the Board of Regents of the Smithsonian Institution, transmitting a memorial on the need of a national advisory committee for aeronautics in the United States (H. Doc. No. 1549); to the Committee on Naval Affairs and ordered to be printed.

11. Letter from the treasurer of the Washington-Virginia Railway Co., transmitting report of the Washington-Virginia Railway Co. for the year ended December 31, 1914 (H. Doc. No. 1550); to the Committee on the District of Columbia and ordered to be printed.

12. A letter from the Secretary of the Treasury, transmitting detailed estimates of expenses made necessary under the provision of an act approved January 28, 1915, which are in addition to the estimates in the annual Book of Estimates already submitted for 1916 under the separate heads of Revenue-Cutter Service and Life-Saving Service, also an estimate for the Coast Guard for the fiscal year 1916 (H. Doc. No. 1551); to the Committee on Appropriations and ordered to be printed.

13. Letter from the Secretary of the Treasury, transmitting copy of the communication of the Secretary of the Interior submitting two estimates of appropriations for the protection and improvement of Rocky Mountain National Park, Colo. (H. Doc. No. 1552); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. CARAWAY, from the Committee on the District of Columbia, to which was referred the bill (H. R. 1718) to require all transportation companies, firms, and persons within the District of Columbia to provide separate accommodations for the white and negro races and to prescribe punishments and penalties for violating its provisions, reported the same with amendment, accompanied by a report (No. 1340); which said bill and report were referred to the House Calendar.

Mr. RAYBURN, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (S. 4522) to amend an act entitled "An act to amend an act entitled 'An act to regulate commerce,' approved February 4, 1887, and all acts amendatory thereof, and to enlarge the powers of the Interstate Commerce Commission," approved June 29, 1906, reported the same without amendment, accompanied by a report (No. 1341); which said bill and report were referred to the House Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 20008) granting an increase of pension to John Murphy, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. KIRKPATRICK: A bill (H. R. 21271) to provide for the issue of bonds to be known as the popular Government loan; to the Committee on Ways and Means.

By Mr. MARTIN: A bill (H. R. 21272) repealing section 4 of an act to provide for the entry of agricultural lands within forest reserves, approved June 11, 1906, and for other purposes; to the Committee on the Public Lands.

By Mr. HAMLIN: A bill (H. R. 21273) to provide an elective remedy and compensation for accidental injuries, resulting in disability or death, to employees of common carriers by railroads engaged in interstate or foreign commerce or in the District of Columbia or the Territories of the United States, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ROBERTS of Massachusetts: Joint resolution (H. J. Res. 413) to authorize the appointment of an advisory committee for aeronautics; to the Committee on Naval Affairs.

By Mr. FERRIS: Memorial of the Legislature of the State of Oklahoma, favoring the passage of the Sheppard-Hobson resolution, proposing an amendment to the Constitution of the United States to prohibit manufacture, sale, transportation, exportation, and importation of intoxicating liquors; to the Committee on the Judiciary.

By Mr. THOMPSON of Oklahoma: Memorial of the House of Representatives and the Senate of the State of Oklahoma, asking Congress to pass the Hobson-Sheppard resolution proposing an amendment to the Constitution of the United States prohibiting manufacture, etc., of intoxicating liquors; to the Committee on the Judiciary.

By Mr. DAVENPORT: Memorial from the Legislature of the State of Oklahoma, urging the Congress of the United States to pass the Sheppard-Hobson resolution to prohibit the manufacture, sale, transportation, and importation of intoxicating liquors; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 21274) granting an increase of pension to John W. McDaniels; to the Committee on Invalid Pensions.

By Mr. FAIRCHILD: A bill (H. R. 21275) granting an increase of pension to Tillie C. Wood; to the Committee on Invalid Pensions.

By Mr. HELM: A bill (H. R. 21276) granting an increase of pension to Nancy J. Oaks; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21277) for the relief of the trustees of the Mount Moriah Christian Church; to the Committee on War Claims.

By Mr. HELVERING: A bill (H. R. 21278) granting a pension to Sarah Hicks; to the Committee on Invalid Pensions.

By Mr. JACOWAY: A bill (H. R. 21279) granting a pension to Frank W. Godsey; to the Committee on Pensions.

By Mr. RAUCH: A bill (H. R. 21280) granting a pension to Daniel B. Davis; to the Committee on Pensions.

Also, a bill (H. R. 21281) granting a pension to Herbert B. Holloway; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21282) granting an increase of pension to Buell M. Cobb; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21283) granting an increase of pension to John Derf; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21284) granting an increase of pension to Andrew C. Freshour; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21285) granting an increase of pension to David F. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21286) granting an increase of pension to Christopher C. Stevenson; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 21287) for the relief of the estate of Amon A. Miller; to the Committee on War Claims.

By Mr. THOMPSON of Oklahoma: A bill (H. R. 21288) granting a pension to Joseph W. Mitcham; to the Committee on Pensions.

By Mr. WALLIN: A bill (H. R. 21289) granting an increase of pension to James Hummel; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of United Garment Workers' Union, International Cigar Makers' Union, Boot and Shoe Workers' Union, Switchmen's Union, and International Brotherhood of Paper Makers, favoring passage of immigration bill; to the Committee on Immigration and Naturalization.

Also (by request), memorial of Democratic Club, King County, Wash., favoring passage of ship bill; to the Committee on the Merchant Marine and Fisheries.

By Mr. ALLEN: Petition of Helen Schrader and sundry citizens of Cincinnati, Ohio, favoring an embargo on war material, etc.; to the Committee on Foreign Affairs.

By Mr. ASHBROOK: Petition of the Illinois State Federation of Labor, the International Typographical Union, the United Mine Workers of America, the United Brotherhood of Carpenters and Joiners, the Switchmen's Union, the International Brotherhood of Paper Makers, the International Boot and Shoe Workers' Union, the Hotel and Restaurant Employees' International Alliance, the Bartenders' International League of America, the Cigar Makers' International Union of America, the Tobacco Workers' International Union, and the Commercial Telegraphers' Union of America, praying the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of Newark (Ohio) Grove, No. 41, U. A. O. D., favoring resolution to prohibit export of war material by United States; to the Committee on Foreign Affairs.

By Mr. BAILEY: Petition of O. H. Aichelmann, Juniata, Pa., favoring House joint resolution 377, placing embargo on arms; to the Committee on Foreign Affairs.

By Mr. BRUCKNER: Memorial of New York Commandery, the Naval and Military Order of the Spanish-American War, urging Congress to create a national-defense commission; to the Committee on Rules.

Also, memorial of the Merchants' Association of New York, protesting against the passage of House bill 18666, the ship-purchase bill; to the Committee on the Merchant Marine and Fisheries.

Also, petition of mass meeting of citizens of Louisiana, protesting against export of war material by United States; to the Committee on Foreign Affairs.

Also, memorial of Washington Central Labor Union, protesting against prohibition in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of Gertrude Welker, of New York City, favoring passage of the Palmer-Owen child-labor bill; to the Committee on Labor.

Also, petitions of sundry citizens of New York, protesting against the amendment to the Post Office appropriation bill, relative to freedom of the press; to the Committee on the Post Office and Post Roads.

Also, petition of members of Gumia No. 112, of New York, protesting against the passage of the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of Louis Marshall, of New York, protesting against the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of Anton Busch, of New York City, favoring the passage of House bill 9292, relative to employees of Bureau of Animal Industry; to the Committee on Agriculture.

By Mr. BURKE of South Dakota: Copy of resolutions of citizens of De Smet, declaration of St. Mary's Society of Salem, and petitions of sundry citizens of Delmont, Hazel, Mansfield, and Tripp, all of South Dakota, in favor of House joint resolution 377; to the Committee on Foreign Affairs.

Also, petition of citizens of South Dakota, favoring House joint resolution 377, to forbid export of arms; to the Committee on Foreign Affairs.

By Mr. BURKE of Wisconsin: Resolutions adopted by the Sheboygan Turnverein, of Sheboygan, Wis., with a membership of 150, asking for the passage of a law at this session of Congress to levy an embargo upon all contraband of war, save foodstuffs, wearing apparel, and surgical supplies only; to the Committee on Foreign Affairs.

Also, petition of M. Buerger and 13 other citizens of the vicinity of Jackson, Wis., asking for the passage of S. 6688, or any similar measure, to levy an embargo on all material useful in war, save foodstuffs, wearing apparel, and surgical supplies only; to the Committee on Foreign Affairs.

By Mr. DALE: Memorial of Woman's Board of Trade of Massachusetts, protesting against foreign labels on American-manufactured goods; to the Committee on Interstate and Foreign Commerce.

Also, petitions of Tobacco Workers' International Union and sundry organizations of workers of the United States, favoring passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of Chamber of Commerce of the State of New York, protesting against the passage of the ship-purchase bill; to the Committee on the Merchant Marine and Fisheries.

By Mr. DILLON: Petitions of sundry citizens, mostly of Madison, S. Dak., favoring passage of resolution 377, relative to export of war material; to the Committee on Foreign Affairs.

By Mr. DRUKKER: Petition of citizens of Paterson, N. J., favoring embargo on war materials; to the Committee on Foreign Affairs.

By Mr. EAGAN: Petition of G. Kleinschmidt, of Union Hill, N. J., favoring passage of resolution to prohibit export of war material; to the Committee on Foreign Affairs.

Also, petition of the Outlook Association of California, favoring passage of House joint resolution 344, for national marketing commission; to the Committee on Agriculture.

By Mr. FESS (by request): Memorial of Ohio Canners' Association, urging the passage of reciprocal tariff laws in reference to canned goods; to the Committee on Ways and Means.

By Mr. FITZGERALD: Resolutions of 12 residents of Brooklyn, N. Y., protesting against violations of the spirit of neutrality; to the Committee on Foreign Affairs.

Also, petition of citizens of Louisiana, against export of arms; to the Committee on Foreign Affairs.

Also, memorial of Philadelphia (Pa.) Bourse, against H. R. 18666, the ship-purchase bill; to the Committee on the Merchant Marine and Fisheries.

By Mr. FLOYD of Arkansas: Petition of citizens of Arkansas, favoring completion of system of locks and dams above Batesville, Ark.; to the Committee on Rivers and Harbors.

By Mr. GERRY: Petition of Frederick Kilguss, of Providence, R. I., urging passage of House joint resolution 377, to prohibit export of war material; to the Committee on Foreign Affairs.

Also, petition of United Brotherhood of Carpenters and Joiners, Providence, R. I., urging the passage of civil-service reform bill; to the Committee on Reform in the Civil Service.

Also, petitions of Henry and T. H. McCuskee and Thomas B. Flanagan, of Providence, R. I., urging protection for Catholics in Mexico; to the Committee on Foreign Affairs.

By Mr. GILMORE: Memorial of organized labor of Brockton, Mass., favoring passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of mass meeting of citizens of Louisiana, protesting against export of war material by United States; to the Committee on Foreign Affairs.

By Mr. GORDON: Memorial of North American Steamship Co., protesting against the passage of the seamen's bill in its present form; to the Committee on the Merchant Marine and Fisheries.

By Mr. GRAHAM of Pennsylvania: Petition of the Commercial Telegraphers' Union of America, favoring passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of the Merchants' Association of New York, protesting against the passage of the ship-purchase bill; to the Committee on the Merchant Marine and Fisheries.

By Mr. HAMLIN: Petition of C. J. Edmonson and other citizens of Walnut Grove, Mo., against placing the Rural Free

Delivery Service under the contract system; to the Committee on the Post Office and Post Roads.

By Mr. KENNEDY of Rhode Island: Petition of George J. Kilguss, of Providence, R. I., favoring resolution to prohibit export of war material by United States; to the Committee on Foreign Affairs.

Also, petitions of Mrs. W. S. Sims, of Newport, and Mrs. Carl Barus, of Providence, R. I., favoring the passage of the Palmer-Owen child-labor bill; to the Committee on Labor.

Also, petition of Thomas B. Flanagan, of Providence, R. I., urging protection for priests and sisters in Mexico; to the Committee on Foreign Affairs.

Also, petition of F. E. Chadwick, of Newport, R. I., favoring a bill to incorporate the American Academy of Arts and Letters; to the Committee on Patents.

By Mr. LIEB: Petition of Otto Baumeister, John Meyerholtz, Gilbert Hartke, William Eilert, Henry Eilert, Sam Sollmann, H. H. Hempe, Carl Nass, William Havemeyer, Ernest Ketler, Carl W. Meyer, Ernest Egbert, Ernest Meyer, Henry Meyerholtz, Charles Kielblock, Otto Burst, John T. Sollmann, H. H. Havemeyer, Ernest Meyerholtz, Frank Kempsen, Charles E. Corn, Herman H. Schumaker, G. W. Sollmann, C. H. Ketter, C. H. Poestker, H. O. Brewster, Herman Luker, Dewitt Corn, F. D. Collins, Bernard Carlisle, Wilburn Maxey, Jackson Maxey, Guy Barrett, H. L. W. Sollmann, W. G. Stork, Oliver Martin, H. L. Hartke, John Kranemeyer, jr., W. P. Corn, Frank Sakel, Oscar Krommeyer, C. H. H. Meyer, H. W. Nuhring, Christ Sollmann, Fritz Roundmason, William H. Bartlett, Louis Meyerholtz, Henry Kahle, George F. Heidorn, Fred Schumacher, Carl Havemeyer, Chris Egbert, Oscar Hogemeyer, Aurelius Wellmeyer, William H. Bauemeister, Paul Cornils, Louis Sollmann, John Lippoldt, George H. Hagemeyer, W. Caldemeyer, Henry Caldemeyer, J. H. L. McGlothlin, all of Stendal, Ind., favoring House joint resolution 377; to the Committee on Foreign Affairs.

By Mr. MACDONALD: Petition of citizens of Calumet and Laurium, Mich., in support of legislation to prohibit the shipment of munitions of war to foreign countries; to the Committee on Foreign Affairs.

Also, petitions of Polish Women's Society of Ironwood; Society Sly Wojciecha, of Calumet; Stanislawas Society, of Norway; Polish Society of Stambaugh; Tow Ks Jozef Poniatowski Society, of Wakefield; Polish Roman Catholic Union of Ironwood; Polish National Alliance, of Painesdale, all in the State of Michigan, against the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of citizens of Linden, Mich., favoring House joint resolution 377, forbidding export of arms; to the Committee on Foreign Affairs.

By Mr. MAGUIRE of Nebraska: Petition of 120 citizens of Nebraska, favoring House joint resolution 377, forbidding export of arms; to the Committee on Foreign Affairs.

By Mr. MAHAN: Petition of the Swedish-American citizens of Portland, Conn., favoring the erection of a suitable memorial in Washington, D. C., to Capt. John Ericsson; to the Committee on the Library.

By Mr. METZ: Memorial of the Merchants' Association of the State of New York and Chamber of Commerce of the State of New York, protesting against the passage of the ship-purchase bill; to the Committee on the Merchant Marine and Fisheries.

Also, memorial of Fulton Street Board of Trade, of Brooklyn, N. Y., favoring passage of House bill 5139, the Hamill bill; to the Committee on Reform in the Civil Service.

Also, petition of sundry citizens of Brooklyn, N. Y., protesting against export of war material by United States; to the Committee on Foreign Affairs.

By Mr. MOORE: Memorial of Barbaross Kruger Verein (Philadelphia, Pa.) Branch of the German-American Alliance and St. Peter's Young Men's Society, of Philadelphia, Pa., protesting against export of war materials, etc.; to the Committee on Foreign Affairs.

Also, memorial of Philadelphia (Pa.) Maritime Exchange, protesting against the passage of House bill 18666, the ship-purchase bill; to the Committee on the Merchant Marine and Fisheries.

By Mr. MORIN (by request): Petition of citizens and organizations, favoring passage of immigration bill; to the Committee on Immigration and Naturalization.

Also (by request), petition of the Outlook Association, Los Angeles, Cal., favoring House joint resolution 344, for a national marketing commission; to the Committee on Agriculture.

Also (by request), petition of Catholic Women's League of Pittsburgh, Pa.; L. Frederick and James A. McCann, of Pittsburgh, Pa., favoring exclusion of the Menace from the mails; to the Committee on the Post Office and Post Roads.

Also (by request), petition of citizens of Pennsylvania, favoring House joint resolution 377, to forbid export of arms; to the Committee on Foreign Affairs.

Also (by request), petition of Polish National Alliance, No. 38, of Allegheny County, Pa., against Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. NEELY of West Virginia: Petition of Rev. A. W. Weider and 52 other citizens of Wheeling, W. Va., favoring House joint resolution 377, forbidding export of arms; to the Committee on Foreign Affairs.

By Mr. J. I. NOLAN: Communications from the Cigar Makers' International Union of America and the Switchmen's Union of North America, favoring the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, communication from the American Federation of Labor, favoring the enactment of the immigration law with the literacy test included; to the Committee on Immigration and Naturalization.

Also, communications from the Commercial Telegraphers' Union of America; the Boot and Shoe Workers' Union of Boston, Mass.; the Hotel and Restaurant Employees' International Alliance and Bartenders' International League of America; the Illinois State Federation of Labor; the Iron City Central Trades Council, Pittsburgh, Pa.; the United Mine Workers of America; the United Brotherhood of Carpenters and Joiners of America; the Tobacco Workers' International Union of Louisville, Ky.; the International Typographical Union; and the Pattern Makers' League of North America, all favoring the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. POST: Petition of 60 citizens of Piqua, Ohio, favoring passage of immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. REILLY of Connecticut: Petition of citizens of Meriden, Conn., favoring House joint resolution 377, to forbid export of arms; to the Committee on Foreign Affairs.

By Mr. THACHER: Petition of sundry citizens of Plymouth, Mass., favoring embargo on all war material; to the Committee on Foreign Affairs.

By Mr. VOLLMER: Petitions of 1,327 American citizens, protesting against export of war material; to the Committee on Foreign Affairs.

Also, memorial of delegates of Evangelical Protestant Churches of Pittsburgh district; German-American Alliance of Scott County, Iowa; 16 American citizens of Muscatine and 8 citizens of Kingsley, Iowa, protesting against export of war material; to the Committee on Foreign Affairs.

SENATE.

TUESDAY, *February 2, 1915.*

The Senate met at 12 o'clock m.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we come in Thy presence at this time, we trust, with reverence and godly fear. We pray that Thy providence may surround us this day and that we may be led unto all truth. We have found in all our experience that fitness of character is fitness for service, and we pray for the graces of Thy Spirit, that every public act may be the expression of a character conformed to the will of God and that all the work done may have Thy favor and Thy blessing. Give us such strength of character, such purity of motive, as that our life may stand the test of public trial. May we so project the affairs of this great Nation that Thy favor may abide upon us, with peace and prosperity in all the way of our national life. Forgive our sins. For Christ's sake. Amen.

The Secretary proceeded to read the Journal of the proceedings of the legislative day of Tuesday, January 26, 1915.

Mr. SHIVELY. I ask unanimous consent that the further reading may be dispensed with.

Mr. GALLINGER. I object, Mr. President.

The VICE PRESIDENT. There is objection. The Secretary will proceed with the reading.

The Secretary resumed and concluded the reading of the Journal.

Mr. LODGE. Mr. President, I have no desire to oppose or delay the approval of the Journal, but there is a portion of the Journal which, if it were possible to do so, I should be very glad to have laid aside for revision. I do not think that there

is any practicable motion to accomplish this purpose; but I am sure that this Journal ought to be very carefully reviewed by the Secretary and compared with the stenographic record. I was unable to catch from the reading—I give this merely as an example—exactly what is recorded on Saturday just before I took the floor and addressed the Senate. The Senator from Oklahoma [Mr. OWEN] rose to a point of order—of course, quite properly—without asking my consent, although I had the floor. He was properly recognized to make his point of order, and he made the point of order that there was no quorum present. I am not sure whether or not that procedure is stated in the Journal in exactly that form, but I think that it is so stated in the RECORD. I use this case merely as an illustration; but the portion of the Journal which I think ought to be most carefully revised is that which covers the proceedings of last Friday evening before the Senator from Utah [Mr. SMOOT] took the floor.

For some hours, then, we were engaged in a somewhat rapid movement on questions of rules and parliamentary law. Some powerful and acute intellects in the Senate, which had never before been applied particularly to questions of parliamentary law, addressed themselves that evening to that subject, and they made, I may say, some changes, which, as it seemed to me, being more slow going, although beyond doubt dazzling, were a little confusing.

General parliamentary law in conjunction with the rules of a legislative body are essential to the orderly transaction of business. It is very necessary to know what the system is under which we are operating. I confess, after some of the decisions of Friday night, I am not very clear upon a good many points as to just what system of law and rules is now controlling us. Of course there is much to be said, no doubt, for the promptness and vigor of "hold-the-rail" and "strong-arm" methods in dealing with parliamentary questions, supported largely by lungs and language, but the general result of these operations is at first confusing.

I select as an illustration one very important ruling which was made during the night of Friday last. It was then decided by one of the occupants of the chair, there being an almost kaleidoscopic shifting in the chair going on, that when a call of the yeas and nays had been ordered no amendment to the pending substitute was thereafter in order. That, Mr. President, was a decision——

Mr. SMITH of Georgia. Mr. President, let me ask the Senator if he is not in error in that statement? Did not the occupant of the chair express that as his tentative opinion, and is it not true that the question was not at that time exactly before the Senate and that no ruling upon a proposed amendment was made?

Mr. LODGE. That is true of one of the occupants of the chair, but I think the Senator will find, if he examines the RECORD, that another occupant of the chair decided the question, and I venture to say that I think I am confirmed in that opinion, because the present occupant of the chair called my attention to the decision, and I think I am not mistaken in saying that it was decided by one occupant, but not by the occupant to whom the Senator from Georgia is now referring.

Mr. SMITH of Georgia. Was there an amendment offered and formally ruled out of order by the occupant of the chair?

Mr. LODGE. That is my very strong impression.

Mr. SMITH of Georgia. Or was it simply an expression of opinion?

Mr. LODGE. I think this very difference of recollection between the Senator from Georgia and myself, Mr. President, shows the necessity of the careful revision which I suggest. At all events my belief is that that ruling was made. I am sure that other Senators so understood and that the Senate acted in accordance with that belief.

That ruling then made, if I am right, and which was certainly made yesterday, was not only something wholly new to the practice of the Senate, but, to the best of my belief, it was a great and brilliant addition to the whole field of parliamentary law.

The right to demand the yeas and nays goes beyond any right conferred by the rules; it is a constitutional right, and it is vested in one-fifth of the Senators present, which may be much less than one-fifth of the whole Senate. Under the ruling made on Friday night, as I think, confirmed yesterday, power was placed in the hands of one-fifth of the Senators present to cut off all amendments on a given question, the demand for the yeas and nays being a constitutional demand, which can not be refused. So that if a number of alert and vigorous parliamentarians, like our friends on the other side, or an equal number on this side, wish to cut off all amendments to a bill, we will say an appropriation bill, by demanding as soon as the bill has been read the yeas and nays on ordering the bill to third reading under that ruling, and every amendment will be thereupon cut off. It is a species of hybrid previous question; but the previous question—which, of course, is an old and long-established practice—cuts off not only amendments, but debate. Under our system as proposed by this ruling of using the yeas and nays as a strange kind of previous question, the real previous question requiring a majority instead of one-fifth of those present, we cut off amendments and yet permit debate, while the true previous question is complete and brings a vote at once without debate.

Now, the right to amend is a great parliamentary right. It is included among the privileged motions. I think a change so radical and so startling, not only in the Senate rules but in parliamentary law as that involved in the decision to which I have referred really ought not to be made in the confusion of a struggle such as we had here Friday night. Yesterday the Chair, as I suppose, feeling constrained to follow the ruling of Friday night, from which the RECORD apparently showed no appeal——

The VICE PRESIDENT. Will the Senator from Massachusetts pardon the Chair just at this point and permit the Chair to put in the RECORD the reason for the ruling of yesterday?

Mr. LODGE. Certainly. I ask to have it read, Mr. President.

The VICE PRESIDENT. Yes; the Chair is going to read it, if there is no objection.

The Chair hopes that no Senator will deem what is about to be said as either inappropriate or impertinent. It is not being said for the purpose of criticism, but to place clearly upon the RECORD the reason for the ruling of the Chair upon the right of the Senate to recommit the pending bill; nor would this reason be placed in the RECORD if the Chair thought the action of the Senate was a mere construction of its rules, because no presiding officer should have any personal interest in the rules of the Senate or how the Senate will construe them. But the present occupant of the chair believes that the action of the Senate on yesterday was in direct contravention of the Constitution of the United States. Having known that Constitution when it was young and vigorous and able to take care of itself, now, in its old age and neglect, I feel constrained to speak a kind word about it.

By section 5, Article I, of that instrument, it is provided that "the yeas and nays of the Members of either House on any question shall, at the desire of one-fifth of those present, be entered on the Journal." It is not material for this dissenting opinion to pass upon the question as to whether the yeas and nays should have been ordered on this substitute bill. It is sufficient to say that they were so ordered. Until the yeas and nays were entered upon that question, in my judgment, all conflicting rules of the Senate were suspended, and no action could be taken which would prevent the entry on the Journal of the yeas and nays on the particular question on which they were ordered. The Chair does not want to be understood that the motion to recommit would not be in order immediately after the entry of the yeas and nays.

It has been suggested that if this view of the Chair be correct, it is in the power of one-fifth of the Members to prevent amendment and debate; but one-fifth have not seconded the request until the Chair so announces, and the present occupant, notwithstanding custom to the contrary, believes that the procedure should be altered so that while there is an amendment to be offered or an argument to be made the Chair would not announce that the request is seconded by the necessary one-fifth, but that when once announced a yea-and-nay vote upon the particular question, and that without debate, should immediately be had and entered upon the Journal.

Mr. LODGE. Mr. President, I am very glad to have that statement made to accompany what I was saying. I do not need to enter into a long discussion of this rule, which would take, I think, several hours, if properly debated by the Senate. I venture, however, to say, with all submission, that the Constitution gives the right to make the demand, but the recording of the vote is simply settling the method by which the vote shall be taken. A vote can be taken viva voce; it can be taken by a division and a count; it can be taken by a call of the yeas and nays; it can be taken, in the House, by tellers. It is a mere method which the House or the legislative body determines upon as the manner in which it desires to make its will known; and the fact that they have selected one method of making their will known in preference to another method does not, to my mind, constitute anything resembling the previous question.

The motion to recommit, as we all know, having examined parliamentary law, is in its essence—and it has been so held

by all the great authorities—a motion to amend, because the idea of recommittal carries amendment with it by necessary implication. The motion to recommit takes precedence of the motion to amend, but they are both rights secured by special rules of both Houses, and I think in all parliamentary bodies.

This new conception of the power of the order of the yeas and nays was submitted to the Senate yesterday and dissented from by a majority of the Senate. The Senate, by a decisive vote, set aside that rule and restored us to the ground hitherto held, not only in the Senate but, so far as I am aware, in all parliamentary law, and I suppose that judgment of the Senate will stand until the Senate changes it itself or, in some excited night session, some new parliamentarian gets possession of the chair who has not heard of the action of the Senate.

I did not mean when I arose to say even so much as this, Mr. President, but I wished to point out, if there is any way in which it could be done, that it is of very great importance, in the case of what was done on Friday night—and whether we agree to the rulings or not, we must have a complete record of what was done and said—that that portion of the Journal, before it is put into print, should be carefully compared with the stenographic notes. From my very imperfect examination of the RECORD, which is a very confusing one, it seems to me that there were many cases where Senators were recognized, and yet there appears to be no account of that recognition. I think that whole subject ought to be looked into.

I did not mean, as I said when I began, to make any opposition to the approval of the Journal. I think it ought to be approved, but I also think that in doing so we should understand that what was done on Friday night should be very carefully examined before it goes into permanent print.

Mr. BRANDEGEE. Mr. President, I should like to ask the Senator from Massachusetts whether it is his intention to allow the Journal as read to be approved now?

Mr. LODGE. Mr. President, I do not desire to prevent the approval of the Journal, but I know of no parliamentary method by which we can detach a portion of the Journal and postpone it for further examination. I wish that it could be done. I think that it ought to be done.

Mr. BRANDEGEE. So do I; but my inquiry was for information. I did not see, if we approved the Journal as it now stands, and as it has been read to the Senate, how any correction can be made in it if the stenographic notes show that there are errors in it. If the matter is of such importance as the Senator from Massachusetts thinks it is—and I agree with him in that—I wondered if it would not be possible, by unanimous consent, to leave the Journal unapproved, subject to action when it could be compared with the official reporters' notes, and then we could go on with business.

Mr. LODGE. There is no objection to that, and it would not delay the business this morning. I, of course, should be very glad if the Senator would make that request.

Mr. BRANDEGEE. I am only interested in the accuracy of the Journal. As the Senator from Massachusetts says, it raises grave constitutional questions and questions of the correct interpretation of the rules of the Senate. I have looked over the RECORD, so far as I have been able, of the occurrences of Friday night, and it is very confusing in the RECORD. I am not at all certain that the very hasty and partial reading of the Journal which was had this morning is even in accord with the RECORD, much less with the stenographic notes of the official reporters.

I have no interest whatever in the matter, except in the accuracy of the Journal of the Senate, which will be referred to during all time and is the authority upon which precedents are established. If there be no objection, and in order to ascertain that, I would proffer the request and ask unanimous consent that the approval of the Journal as read by the Secretary this morning be deferred until opportunity is had to compare it with the official reporters' notes, and that business in other respects proceed as usual in the Senate to-day.

The VICE PRESIDENT. Is there any objection? The Chair hears none.

ADVISORY BOARD FOR AERONAUTICS (S. DOC. NO. 797).

The VICE PRESIDENT. The Chair lays before the Senate two memorials from a committee of the Board of Regents of the Smithsonian Institution on the need of a national advisory board for aeronautics.

Mr. STONE. Mr. President, some time ago, at the last meeting of the Board of Regents of the Smithsonian Institution, a committee was appointed to take up and consider questions relating to aeronautics, and to make such recommendations as might be thought proper. A day or two ago the Senator from South Carolina [Mr. TILLMAN] introduced a joint resolution in duplicate relating to this subject, one of which resolutions was referred to the Committee on Naval Affairs, of which the Senator is chairman, and the other to the Committee on Military Affairs. A few days ago the committee appointed by the chancellor of the Board of Regents of the Smithsonian Institution, the Chief Justice of the United States, had a meeting and determined to present the memorials which have just been handed down by the Chair.

Without taking the time to state the general outline of the memorials I will ask that they may be printed in the usual form, and that one of them—the two being exactly alike—be referred to the Committee on Naval Affairs and the other to the Committee on Military Affairs, and that they be printed as a Senate document and that one of the memorials be printed in the RECORD.

Mr. SMOOT. May I ask the Senator if there are any illustrations in the document?

Mr. STONE. I think there are no illustrations.

The VICE PRESIDENT. There are no illustrations in it. It is a very brief document.

Mr. SMOOT. I have no objection to the printing. I was simply going to suggest to the Senator that if there were illustrations it would be necessary to have the matter referred to the Committee on Printing.

The VICE PRESIDENT. Without objection, the request of the Senator from Missouri will be complied with. One memorial will be referred to the Committee on Naval Affairs and the other to the Committee on Military Affairs. Memorials will be printed as a document, and one of the memorials will be printed in the RECORD.

The memorial referred to is as follows:

MEMORIAL ON THE NEED OF A NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS.

The United States is the only first-class Nation that does not have an advisory committee for aeronautics and suitable research laboratories placed under its direction.

This country led in the early development of heavier-than-air machines. To-day it is far behind. When the European war broke out France had about 1,400 aeroplanes, Germany 1,000, Russia 800, Great Britain 400, the United States 23. The Navy has 12 of these.

The Smithsonian Institution became interested in aeronautics in 1860. At a meeting of the Board of Regents held December 10, 1914, it was:

"*Resolved*, That a committee be appointed by the chancellor, to consist of four members of the board and the secretary, to consider questions relative to the Langley Aerodynamical Laboratory."

The chancellor, Chief Justice White, appointed the following: Dr. A. Graham Bell, Senator WILLIAM J. STONE, Representative ERNEST W. ROBERTS, Mr. John B. Henderson, jr., and Secretary Charles D. Walcott.

On January 30, 1915, the committee had under consideration a memorandum in relation to the Langley Aerodynamical Laboratory and the need of a national advisory committee for aeronautics. After discussion it was—

"*Resolved*, That the memorandum be approved and presented to Congress as a memorial in relation to the advancement of aeronautics in the United States by the appointment by the President of an advisory aeronautical committee."

MEMORANDUM ON THE NEED OF A NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS.

On May 1, 1913, the Regents of the Smithsonian Institution, approving a general scheme, authorized Secretary Walcott, with the approval of the executive committee, to reopen the Langley Aerodynamical Laboratory; to secure an advisory committee; to add, as means were provided, other laboratories and agencies; to group them into a bureau organization; and to secure the cooperation with them of the Government and other agencies.

The first action taken by the secretary was to request the approval of the President of the United States of the designation of representatives from the Departments of War, Navy, Agriculture, and Commerce to serve on an advisory committee. On May 9, 1913, the President approved the request, and the departments named designated members for the committee. A number of civilians were also selected for membership. The committee then organized, but before effective work could be undertaken a decision made by the Comptroller of the Treasury stated that under section 9 of the act approved March 4, 1909 (35 Stat., 1027), it was unlawful for any Government employee to serve on an advisory committee for aeronautics without authority being granted by Congress.

The Board of Regents of the Smithsonian Institution also authorized the secretary to send an estimate to Congress for the carrying on of operations in such a laboratory. The estimate was made and explained to the Committee on Appropriations of the House of Representatives in January, 1914 (hearings, sundry civil bill, 63d Cong., 2d sess, pp. 419–429). A statement was also made in relation to the desirability of having an advisory committee for aeronautics.

No action was taken by the committee or by Congress, and the United States remains to-day the only first-class Nation in the world that does not have an advisory committee or board on aeronautics and one or more aeronautical laboratories devoted to the solution of problems which the manufacturer and practical aviator meet with in connection with the advancement of aerial flight.

America invented and led in the early development of the heavier-than-air flying machine through Langley, the Wright brothers, Curtiss, and others, and a small grant was made by the Congress to the Navy Department for experimental work in aeronautics, but nothing was done to encourage or assist American inventors and manufacturers beyond the purchase of a few machines.

Prof. Langley wrote in 1897 (McClure's Magazine, June, 1897. Reprinted in Smithsonian Report for 1900), after describing the account of the flight of his first experimental machine made in 1896:

"And now it may be asked, What has been done? This has been done: A 'flying machine,' so long a type for ridicule, has really flown; it has demonstrated its practicability in the only satisfactory way—by actually

flying—and by doing this again and again under conditions which leave no doubt.

"There is no room here to enter on the consideration of the construction of larger machines or to offer the reasons for believing that they may be built to remain for days in the air or to travel at speeds higher than any with which we are familiar. Neither is there room to enter on a consideration of their commercial value or of those applications which will probably first come in the arts of war rather than those of peace; but we may at least see that these may be such as to change the whole conditions of warfare, when each of two opposing hosts will have its every movement known to the other, when no lines of fortification will keep out the foe, and when the difficulties of defending a country against an attacking enemy in the air will be such that we may hope that this will hasten rather than retard the coming of the day when war shall cease.

"I have thus far had only a purely scientific interest in the results of these labors. * * * For the next stage, which is the commercial and practical development of the idea, it is probable that the world may look to others. The world, indeed, will be supine if it do not realize that a new possibility has come to it, and that the great universal highway overhead is now soon to be opened."

Mr. Langley later, at the request of the War Department, undertook the construction of a large man-carrying machine, but owing to defects in the launching apparatus in its two trials in 1903 this machine was not successfully launched into the air. Means for further experiments not being available, no further trials were made with this machine until June, 1914, when it was sent by the institution to Hammondsport, N. Y., and successfully flown over Lake Keuka, bearing the additional weight of pontoons and supports amounting to over 300 pounds.

A list of the publications of the Smithsonian Institution relating to the subject of aeronautics will be found at the end of this paper.

The development of a biplane by the Wright brothers was one of America's great achievements; that was followed by the development of the Curtiss flying boat by Glenn H. Curtiss. Both the Wrights and Curtiss have expressed themselves as strongly in favor of an advisory committee for aeronautics, and came on to Washington to take part in the preliminary meetings looking forward to such an organization.

The Langley medal, established by the Board of Regents of the Smithsonian Institution, "to be awarded for specially meritorious investigations in connection with the science of aerodromics and its application to aviation," was presented by the Smithsonian Institution to Wilbur and Orville Wright, respectively, on February 10, 1910, "for advancing the science of aerodromics in its application to aviation by their successful investigations and demonstrations of the practicability of mechanical flight by man," and the same medal was presented, on May 6, 1913, to Curtiss in recognition of his advancing the art of aerodromics by the development of the hydroaerodrome.

The aeronautical service of the Navy Department took an active interest in the development of aeronautics as affecting the Navy, and established a small experimental plant at the Washington Navy Yard, under a grant by Congress of $25,000 in 1912, for the development of aviation for naval purposes, and an appropriation of $10,000 in each of the past three years.

European countries: As soon as Americans demonstrated the feasibility of flight by heavier-than-air machines, France took the matter up promptly and utilized all the available agencies, including those of the army, navy, and other public and private establishments. Large sums were devoted to the research work by wealthy individuals, and rapid advance was made in the art.

Germany quickly followed, and a fund of $1,700,000 was raised by subscription.

Later England established an advisory board, placing the manufacturing and the operation of flying machines in the charge of the army and navy, and turning over the working out of the numerous problems arising to the advisory board, an annual appropriation of $25,000 being made for expenses and investigations.

Russia also began serious investigations and construction under the Government, and encouraged private enterprise.

ADVISORY COMMITTEE.

At the present time the United States is proposing to appropriate a million dollars for the Navy and a large amount for the Army for the purchase and operation of flying machines, but there is no provision in law authorizing the appointment of an advisory committee for aeronautics, and the utilization of all of the resources of the Government and of private laboratories and manufacturing plants, as far as may be, in the development of aviation in America.

There does not appear to be any good reason why America should not be fully abreast of, if not in advance of, other nations in the development of aeronautics in a practical and useful way, not only for purposes of war but for other activities, where great speed in transit through the air, over mountains, bodies of water, or like obstacles, is desirable. If as rapid progress is made in the coming decade as has been made in the past 10 years, the flying machine will become as permanent a part of the means of rapid and safe transportation, within certain limitations, as the automobile to-day is in land transportation.

A national advisory committee for aeronautics can not fail to be of inestimable service in the development of the art of aviation in America. Such a committee to be effective should be permanent, and attract to its membership the most highly trained men in the art of aviation and such technical sciences as are connected with it.

Through the agency of subcommittees, the main advisory committee could avail itself of the advice and suggestion of a large number of technical and practical men.

The work for which the British advisory committee was appointed was defined in the announcement made by the prime minister in the House of Commons on May 5, 1909, which was as follows:

"The Government is taking steps toward placing its organization for aerial navigation on a more satisfactory footing. As the result of a report made by the committee of imperial defense, the work of devising and constructing dirigible airships and aeroplanes has been apportioned between the navy and the army. The admiralty is building certain dirigibles, while certain others of a different type will be constructed at the war-office balloon factory at Aldershot, which is about to be reorganized for the purpose. The investigation and provision of aeroplanes are also assigned to the war office. With a view to securing that the highest scientific talent shall be brought to bear on the problems which will have to be solved in the course of the work of the two departments, the national physical laboratory has been requested to organize at its establishment at Teddington a special department for continuous investigation—experimental and otherwise—of questions which must from time to time be solved in order to obtain adequate guidance in construction.

"It is no part of the general duty of the advisory committee for aeronautics either to construct or to invent. Its function is not to initiate, but to consider what is initiated elsewhere, and is referred to it by the executive officers of the navy and army construction departments. The problems which are likely to arise in this way for solution are numerous, and it will be the work of the committee to advise on these problems, and to seek their solutions by the application of both theoretical and experimental methods of research.

"The work desired thus falls into three sections:

"1. The scientific study of the problems of flight, with a view to their practical solution.

"2. Research and experiment into these subjects in a properly equipped laboratory with a trained staff.

"3. The construction and use of dirigibles and aeroplanes, having regard mainly to their employment in war.

"The advisory committee are to deal with the first section, and also to determine the problems which the experimental branch should attack, and discuss their solutions and their application to practical questions. The second section represents the work referred to the laboratory, while the duties connected with the third section remain with the admiralty and the war office."

The British Advisory Committee for Aeronautics was constituted as follows in 1914:

President: Right Hon. Lord Rayleigh.

Chairman: Dr. R. T. Glazebrook, director National Physical Laboratory.

Members: Horace Darwin, M. A., F. R. S., chairman Cambridge Scientific Instrument Co.; Sir George Greenhill, formerly professor of mathematics in Artillery College, Woolwich; Brig. Gen. David Henderson, director of military training; F. W. Lanchester; H. R. A. Mallock, F. R. S., consulting engineer of the ordnance board; Mr. Mervyn O'Gorman, M. Inst. M. E., superintendent of His Majesty's Army Aircraft Factory; Prof. J. E. Petavel, F. R. S., professor of engineering and director of the Whitworth laboratories, University of Manchester; Acting Com. C. R. Samson; Dr. William N. Shaw, director of Meteorological Office; Capt. Murray; F. Suetler.

Secretary: F. E. Selby, Bushy House, Teddington.

AGENCIES, RESOURCES, AND FACILITIES.

Smithsonian Institution: The advisory committee may be provided by the Smithsonian Institution with suitable office headquarters, an administrative and accounting system, library and publication facilities, lecture and assembly rooms, and museum space for aeronautic models. The Langley Aerodynamical Laboratory has an income provided for it not to exceed $10,000 the first year (of which $5,000 has been allotted), and $5,000 annually for five years.

United States Bureau of Standards: For the exact determination of aerophysical constants, the calibration of instruments, the testing of aeronautic engines, propellers, and materials of construction, the cooperation of the Department of Commerce, by the United States Bureau of Standards, would be invaluable. This bureau has a complete equipment for studying the mechanics of materials and structural forms used in air craft; for standardizing the physical instruments—thermometers, barographs, pressure gauges, etc.—used in air navigation; and for testing the power, efficiency, etc., of aeronautical motors in a current of air representing the natural conditions of flight.

In these general branches the technical staff of the bureau is prepared to undertake such theoretical and experimental investigations as may come before the advisory committee on behalf of either the Government or private individuals or organizations.

United States Weather Bureau: For studies of and reports on every phase of aeronautic meteorology, besides the usual forecasting, the committee should have the cooperation of the Department of Agriculture, through the United States Weather Bureau. This bureau has an extensive library of works on or allied to aeronautics, an instrument division for every type of apparatus for studying the state of the atmosphere, a whirling table of 30-foot radius for standardizing anemometers, a complete kite equipment with power reel, and a sounding-balloon equipment with electrolytic hydrogen plant, all of which are available for scientific investigations. For special forecasts, anticipating field tests or cross-country voyages, the general service of the bureau may be called upon.

War and Navy Departments: These departments, while especially interested in aeronautics for national defense, can be of service in advancing the general science. Each has an aeronautical library; each has an official representative in foreign countries who reports periodically on every important phase of the art, whether civil or military; each has an assignment of officers who design, test, and operate air craft, and who determine largely the scope and character of their development; each has its aeronautic station equipped with machines in actual service throughout the year. Besides various aviation establishments, the War Department has a balloon plant at Fort Myer, Va., and at Omaha, Nebr. The Navy has its marine model basin, useful for special experiments in aeronautics; its extensive shops at the Washington Navy Yard, available for the alteration or repair of air craft, or the manufacture of improved military types; and at Fort Myer three lofty, open-work steel towers suitable for studies in meteorology or aerodynamics in the natural wind. Furthermore, the Navy Department has detailed an officer for special research in aeronautics at one of the principal engineering schools.

Because of their fundamental interest in aeronautics, each of these departments would undoubtedly cooperate most effectively and be able to place at the service of the committee one or more skilled aviators and aeroplanes for systematic experimentation.

Aeronautical committee: There should be a national advisory committee for aeronautics, to be appointed, with the authority of Congress, by the President, the committee to consist of two representatives from the War Department, two representatives from the Navy Department, a representative of the Smithsonian Institution, the Weather Bureau, the United States Bureau of Standards, together with not more than seven additional persons who shall be acquainted with the needs of aeronautical science, both civil and military, or skilled in aeronautical engineering or its allied sciences. The period of service of the seven additional members of the aeronautical committee who are to be appointed by the President should be so arranged that one member retire each year. Appointments thereafter should be for a period of seven years each, and appointments made to fill vacancies occurring other than in the regular manner shall be made for the remainder of the period for which the vacancy exists.

The aeronautical committee should advise in relation to the work of the Government in aeronautics, and the coordination of the activities of governmental and private laboratories in which questions concerned with the study of the problems of aeronautics can be experimentally investigated.

Mr. TILLMAN. In this connection I wish to have printed as a public document a letter I received on yesterday from Hon. Charles D. Walcott, Secretary of the Smithsonian Institution, upon the same subject. I would also like to have the letter printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter is as follows:

SMITHSONIAN INSTITUTION,
Washington, D. C., February 1, 1915.

The Hon. BENJAMIN R. TILLMAN,
Chairman Committee on Naval Affairs,
United States Senate, Washington, D. C.

DEAR SIR: I have the honor to acknowledge the receipt of your letter of January 30, 1915, asking for a report showing what action has already been taken by the Smithsonian Institution regarding the joint resolution providing for the appointment of an advisory committee for aeronautics in the United States.

In response thereto I have the honor to submit the inclosed memorandum.

I am transmitting also a report on European aeronautical laboratories, which gives an outline of what was being done in Europe prior to the outbreak of the present war.

Very respectfully, yours,

CHARLES D. WALCOTT, *Secretary.*

MEMORANDUM.—A NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS.

HISTORICAL NOTE.

On May 1, 1913, the Regents of the Smithsonian Institution authorized Secretary Walcott, with the approval of the executive committee, to reopen the Langley aerodynamical laboratory; to secure an advisory committee; to add, as means were provided, other laboratories and agencies; to group them into a bureau organization; and to secure the cooperation with them of the Government and other agencies.

The first action taken by the secretary was to request the approval of the President of the United States of the designation of representatives from the Departments of War, Navy, Agriculture, and Commerce, to serve on an advisory committee. On May 9, 1913, the President approved the request, and the departments named selected their members for the committee. A number of civilians were also selected for membership. The committee was then organized, but before effective work could be undertaken a decision made by the Comptroller of the Treasury stated that under section 9 of the act approved March 4, 1909 (35 Stat., 1027), it was unlawful for any Government employee to serve on such an advisory committee without authority being granted by Congress. (SEC. 9. That hereafter no part of the public moneys, or of any appropriation heretofore or hereafter made by Congress, shall be used for the payment of compensation or expenses of any commission, council, board, or other similar body, or any members thereof, or for expenses in connection with any work or the results of any work or action of any commission, council, board, or other similar body, unless the creation of the same shall be or shall have been authorized by law; nor shall there be employed by detail, hereafter or heretofore made, or otherwise, personal services from any executive department or other Government establishment in connection with any such commission, council, board, or other similar body.)

The Board of Regents of the Smithsonian Institution also authorized the Secretary to make an estimate to Congress for the carrying on of operations in such a laboratory. The estimate was made and explained to the Committee on Appropriations of the House of Representatives in January, 1914 (hearings, sundry civil bill, 63d Cong., 2d sess., pp. 419–429). A statement was also made in relation to the desirability of having authority to appoint an advisory committee for aeronautics.

No action was taken by the committee or by Congress, and the United States remains to-day the only first-class Nation in the world that does not have an advisory committee or board on aeronautics, and one or more aeronautical laboratories devoted to the solution of problems which the manufacturer and practical aviator meet with in connection with the advancement of aerial flight.

America invented and led in the early development of the heavier-than-air flying machine, through Langley, the Wright brothers, Curtiss, and others, and a small grant was made by the Congress to the Navy Department for experimental work in aeronautics, but nothing was done to encourage or assist American inventors and manufacturers beyond the purchase of a few machines.

European countries: As soon as Americans demonstrated the feasibility of flight by heavier-than-air machines France took the matter up promptly and utilized all the available agencies, including the army, navy, and similar establishments, both public and private. Large sums were devoted to the research work by wealthy individuals, and rapid advance was made in the art.

Germany quickly followed, and a fund of $1,700,000 was raised by subscription, and experimentation directed by a group of technically trained and experienced men.

Later England established an advisory board, placing the manufacturing and the operation of flying machines in the charge of the army and navy, and turning over the working out of the numerous problems arising to the advisory board, an annual appropriation of $25,000 being made for expenses and investigations.

Russia also began serious investigations and construction under the Government and encouraged private enterprise.

When this European war broke out France had, exclusive of dirigibles, about 1,400 aeroplanes; Germany, 1,000; Russia, 800; Great Britain, 400; the United States, 23. The Navy has 12 of these.

ADVISORY COMMITTEE.

The joint resolution authorizing the appointment of an advisory commitee for aeronautics is based on the experience of the advisory committee of Great Britain and study given to the subject before asking the appointment of an advisory committee for the Langley Aerodynamical Laboratory of the Smithsonian Institution.

The amount of the appropriation asked is not large, but it will be sufficient to test the working possibilities of the committee, and the results obtained by it will determine if it will be of sufficient value to warrant an increase in the appropriations.

At the present time the United States is proposing to appropriate $1,000,000 for the Navy, and a large amount for the Army, for the purchase and operation of flying machines, but there is no provision in law authorizing the appointment of an advisory committee for aeronautics and thus leading to the utilization of all of the resources of the Government and of private laboratories and manufacturing plants, as far as may be, in the development of aviation in America.

The Navy Department will go ahead as best it can, the War Department as it can, and private interests as means and opportunity permit. With no central body or clearing house for the various agencies, no place to meet and discuss problems of research, no place to try out new ideas, and no body of expert advisers for the Government and civil in-

forests, aeronautics in America will be simply drifting and trusting to luck that all will come out well through sporadic and scattered efforts. What is needed is team work that may be rendered possible by a wisely selected advisory committee.

A national advisory committee for aeronautics can not fail to be of inestimable service in the development of the art of aviation in America. Such a committee to be effective should be permanent and attract to its membership the most highly trained men in the art of aviation and such technical sciences as are connected with it.

Through the agency of subcommittees the main advisory committee could avail itself of the advice and suggestion of a large number of technical and practical men.

The work for which the British advisory committee was appointed was defined in the announcement made by the prime minister in the House of Commons on May 5, 1909, which was as follows:

"The Government is taking steps toward placing its organization for aerial navigation on a more satisfactory footing. As the result of a report made by the committee on imperial defense, the work of devising and constructing dirigible airships and aeroplanes has been apportioned between the navy and the army. The Admiralty is building certain dirigibles, while certain others of a different type will be constructed at the war office balloon factory at Aldershot, which is about to be reorganized for the purpose. The investigation and provision of aeroplanes are also assigned to the war office. With a view to securing that the highest scientific talent shall be brought to bear on the problems which will have to be solved in the course of the work of the two departments, the National Physical Laboratory has been requested to organize at its establishment at Teddington a special department for continuous investigation—experimental and otherwise—of questions which must from time to time be solved in order to obtain adequate guidance in construction.

"It is no part of the general duty of the advisory committee for aeronautics either to construct or to invent. Its function is not to initiate but to consider what is initiated elsewhere, and is referred to it by the executive officers of the navy and army construction departments. The problems which are likely to arise in this way for solution are numerous, and it will be the work of the committee to advise on these problems and to seek their solution by the application of both theoretical and experimental methods of research.

"The work desired thus falls into three sections:

"1. The scientific study of the problems of flight, with a view to their practical solution.

"2. Research and experiment into these subjects in a properly equipped laboratory, with a trained staff.

"3. The construction and use of dirigibles and aeroplanes, having regard mainly to their employment in war.

"The advisory committee are to deal with the first section, and also to determine the problems which the experimental branch should attack, and discuss their solutions and their application to practical questions. The second section represents the work referred to the laboratory, while the duties connected with the third section remain with the Admiralty and the war office."

AGENCIES, RESOURCES, AND FACILITIES AVAILABLE FOR THE WORK OF AN ADVISORY COMMITTEE.

Smithsonian Institution: The advisory committee may be provided by the Smithsonian Institution with suitable office headquarters, an administrative and accounting system, library and publication facilities, lecture and assembly rooms, and museum space for aeronautic models. The Langley Aerodynamical Laboratory has an income provided for it not to exceed $10,000 the first year, of which $5,000 has ben allotted, and $5,000 annually for five years.

United States Bureau of Standards: For the exact determination of aerophysical constants, the calibration of instruments, the testing of aeronautic engines, propellers, and materials of construction, the cooperation of the Department of Commerce by the United States Bureau of Standards would be invaluable. This bureau has a complete equipment for studying the mechanics of materials and structural forms used in air craft; for standardizing the physical instruments—thermometers, barographs, pressure gauges, etc—used in air navigation; and for testing the power, efficiency, etc., of aeronautical motors in a current of air representing the natural conditions of flight.

In these general branches the technical staff of the bureau is prepared to undertake such theoretical and experimental investigations as may come before the advisory committee on behalf of either the Government or private individuals or organizations.

United States Weather Bureau: For studies of and reports on every phase of aeronautic meteorology, besides the usual forecasting, the committee should have the cooperation of the Department of Agriculture, through the United States Weather Bureau. This bureau has an extensive library of works on or allied to aeronautics, an instrument division for every type of apparatus for studying the state of the atmosphere, a whirling table of 30-foot radius for standardizing anemometers, a complete kite equipment with power reel, and a sounding balloon equipment with electrolytic hydrogen plant, all of which are available for scientific investigations. For special forecasts, anticipating field tests or cross-country voyages, the general service of the bureau may be called upon.

War and Navy Departments: These departments, while especially interested in aeronautics for national defense, can be of service in advancing the general science. Each has an aeronautical library; each has an official representative in foreign countries, who reports periodically on every important phase of the art, whether civil or military; each has an assignment of officers who design, test, and operate air craft, and who determine largely the scope and character of their development; each has its aeronautic station equipped with machines in actual service throughout the year. Besides various aviation establishments, the War Department has a balloon plant at Fort Myer, Va., and at Omaha, Nebr.; the Navy has its marine model basin, useful for special experiments in aeronautics; its extensive shops at the Washington Navy Yard, available for the alteration or repair of air craft or the manufacture of improved military types; and at Fort Myer three lofty open-work steel towers suitable for studies in meteorology or aerodynamics in the natural wind. Furthermore, the Navy Department has detailed an officer for special research in aeronautics at one of the principal engineering schools.

Because of their fundamental interest in aeronautics, each of these departments would undoubtedly cooperate most effectively and be able to place at the service of the committee one or more skilled aviators and aeroplanes for systematic experimentation.

Conclusion: There does not appear to be any good reason why America should not be fully abreast of, if not in advance of, other nations in the development of aeronautics in a practical and useful way, not only for purposes of war but for other activities where great speed in transit through the air, over mountains, bodies of water, or like obstacles is desirable. If as rapid progress is made in the coming decade as has been made in the past 10 years, the flying machine will become as permanent a part of the means of rapid and safe transportation, within certain limitations, as the automobile to-day is in land transportation.

While it is recognized that an advisory committee for aeronautics will not create or invent new machines, it may be the means of encouraging both governmental and civil activities in such a manner as to lead to results of great value to the Government and all who are interested in the development of successful aviation as an agency of peace as well as of war.

At the present time the thought of aviation is in connection with war, but there is no apparent reason why, as in the case of the automobile, the flying machine will not be of far greater service in peaceful pursuits than in war.

LIFE-SAVING SERVICE (S. DOC. NO. 803).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, submitting a proposed amendment to be included in the legislative, executive, and judicial appropriation bill in lieu of the clause providing for salaries for the office of the Life-Saving Service, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

USELESS PAPERS IN TREASURY DEPARTMENT.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of the Treasury, transmitting schedules and lists of papers, documents, and so forth, which are not needed in the transaction of business of the Treasury Department and which have no permanent value or historic interest. The communication and accompanying paper will be referred to the Joint Select Committee on the Disposition of Useless Papers in the Executive Departments. The Chair appoints as the committee on the part of the Senate the Senator from Vermont [Mr. PAGE] and the Senator from Oregon [Mr. LANE]. The Secretary will notify the House of Representatives of the appointment thereof.

USELESS PAPERS IN INTERIOR DEPARTMENT.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of the Interior, transmitting a statement of useless papers and discarded books, and so forth, which have accumulated in the Department of the Interior and which have no permanent value or historic interest. The communication and accompanying paper will be referred to the Joint Select Committee on the Disposition of Useless Papers in the Executive Departments. The Chair appoints as the committee on the part of the Senate the Senator from Vermont [Mr. PAGE] and the Senator from Oregon [Mr. LANE]. The Secretary will notify the House of Representatives of the appointment thereof.

USELESS PAPERS IN DEPARTMENT OF LABOR.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of Labor, transmitting a list of papers which are not needed in the transaction of business in the Department of Labor and have no permanent value or historic interest. The communication and accompanying paper will be referred to the Joint Select Committee on the Disposition of Useless Papers in the Executive Departments. The Chair appoints as the committee on the part of the Senate the Senator from Vermont [Mr. PAGE] and the Senator from Oregon [Mr. LANE]. The Secretary will notify the House of Representatives of the appointment thereof.

TIME STOP AND PREMIUM PAYMENTS (S. DOC. NO. 800).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, directing attention to a proposed amendment to the Army appropriation bill against time stop and premium payments at Government establishments, which, with accompanying paper, was referred to the Committee on Military Affairs and ordered to be printed.

AUTOMATIC TRAIN-CONTROL SYSTEM (H. DOC. NO. 1541).

The VICE PRESIDENT laid before the Senate a communication from the Interstate Commerce Commission, transmitting, as a supplemental report of the Chief of the Division of Safety submitted to Congress January 8, 1915, a report of the Chief of the Division of Safety concerning a test of the automatic train-control system of the American Train Control Co., of Baltimore, Md., which, with the accompanying paper, was referred to the Committee on Interstate Commerce and ordered to be printed.

WASHINGTON GAS LIGHT CO. (H. DOC. NO. 1548).

The VICE PRESIDENT laid before the Senate the annual report of the Washington Gas Light Co. of the District of Columbia for the year ended December 31, 1914, which was referred to the Committee on the District of Columbia and ordered to be printed.

GEORGETOWN GAS LIGHT CO. (H. DOC. NO. 1533).

The VICE PRESIDENT laid before the Senate the annual report of the Georgetown Gas Light Co. of the District of Columbia for the year ended December 31, 1914, which was referred to the Committee on the District of Columbia and ordered to be printed.

POTOMAC ELECTRIC POWER CO. (H. DOC. NO. 1543).

The VICE PRESIDENT laid before the Senate the annual report of the Potomac Electric Power Co. of the District of Columbia for the year ended December 31, 1914, which was referred to the Committee on the District of Columbia and ordered to be printed.

WASHINGTON RAILWAY & ELECTRIC CO. (H. DOC. NO. 1546).

The VICE PRESIDENT laid before the Senate the annual report of the Washington Railway & Electric Co. of the District of Columbia for the year ended December 31, 1914, which was referred to the Committee on the District of Columbia and ordered to be printed.

GEORGETOWN & TENNALLYTOWN RAILWAY CO. (H. DOC. NO. 1545).

The VICE PRESIDENT laid before the Senate the annual report of the Georgetown & Tennallytown Railway Co. for the year ended December 31, 1914, which was referred to the Committee on the District of Columbia and ordered to be printed.

CITY & SUBURBAN RAILWAY (H. DOC. NO. 1544).

The VICE PRESIDENT laid before the Senate the annual report of the City & Suburban Railway of Washington for the year ended December 31, 1914, which was referred to the Committee on the District of Columbia and ordered to be printed.

CAPITAL TRACTION CO. (H. DOC. NO. 1537).

The VICE PRESIDENT laid before the Senate the annual report of the Capital Traction Co. for the year ended December 31, 1914, which was referred to the Committee on the District of Columbia and ordered to be printed.

CHESAPEAKE & POTOMAC TELEPHONE CO. (H. DOC. NO. 1534).

The VICE PRESIDENT laid before the Senate the annual report of the Chesapeake & Potomac Telephone Co. for the year ended December 31, 1914, which was referred to the Committee on the District of Columbia and ordered to be printed.

EAST WASHINGTON HEIGHTS RAILROAD CO. (H. DOC. NO. 1532).

The VICE PRESIDENT laid before the Senate the annual report of the East Washington Heights Traction Railroad Co. for the year ended December 31, 1914, which was referred to the Committee on the District of Columbia and ordered to be printed.

WASHINGTON & OLD DOMINION RAILWAY (H. DOC. NO. 1542).

The VICE PRESIDENT laid before the Senate the annual report of the Washington & Old Dominion Railway for the year ended December 31, 1914, which was referred to the Committee on the District of Columbia and ordered to be printed.

T. L. LOVE V. UNITED STATES (S. DOC. NO. 851).

The VICE PRESIDENT laid before the Senate a communication from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion and opinion filed by the court in the cause of T. L. Love, surviving partner of Robert Love & Son, v. United States, which, with the accompanying paper, was referred to the Committee on Commerce and ordered to be printed.

FINDINGS OF THE COURT OF CLAIMS.

The VICE PRESIDENT laid before the Senate communications from the assistant clerk of the Court of Claims, transmitting certified findings of fact and conclusions filed by the court in the following causes:

Lewis H. Hazeltine v. The United States (S. Doc. No. 920);
Melvina Soard, daughter of Vincent Meyers, v. The United States (S. Doc. No. 919);
Charles Mallatte v. The United States (S. Doc. No. 918);
David L. Jewett v. The United States (S. Doc. No. 917);
Daniel N. Kelley v. The United States (S. Doc. No. 916);
Barbara E. Lane, widow of John E. Lane, deceased, v. The United States (S. Doc. No. 915);
George W. Holeton v. The United States (S. Doc. No. 914);
Martha V. Jones, widow of William M. Jones, deceased, v. The United States (S. Doc. No. 913);
George Hansen v. The United States (S. Doc. No. 912);
Thomas Jordan v. The United States (S. Doc. No. 911);
Thomas Monroe v. The United States (S. Doc. No. 910);
Hannibal Landon v. The United States (S. Doc. No. 909);
Jane E. Lawson, widow of Frank Lawson, deceased, v. The United States (S. Doc. No. 936);
John A. Willoughby v. The United States (S. Doc. No. 935);
Olive J. Pierce, daughter, and Minnie Taylor Maxon, granddaughter, sole heirs of James A. Taylor, deceased, v. The United States (S. Doc. No. 934);
Lewis L. Spayd v. The United States (S. Doc. No. 933);
George C. Wooley v. The United States (S. Doc. No. 932);
James Skidmore v. The United States (S. Doc. No. 931);
Levi S. Walker v. The United States (S. Doc. No. 930);
John W. Watts v. The United States (S. Doc. No. 929);
Herman A. Van Epps v. The United States (S. Doc. No. 928);
James Donahue v. The United States (S. Doc. No. 927);
John B. Gunning v. The United States (S. Doc. No. 926);
William J. Harding v. The United States (S. Doc. No. 925);
William Moseley, administrator of Temperance Moseley, deceased, v. The United States (S. Doc. No. 850);
Catherine A. Rhodes, widow of John G. Rhodes, v. The United States (S. Doc. No. 849);
Annette W. Brackett, administratrix of Joseph F. Twitchell, v. The United States (S. Doc. No. 848);
Andrew J. Thomas v. The United States (S. Doc. No. 847);
George H. Ruple v. The United States (S. Doc. No. 846);
Harvey N. Rogers v. The United States (S. Doc. No. 845);
Benjamin J. Robertson v. The United States (S. Doc. No. 844);
Samuel S. Hess v. The United States (S. Doc. No. 843);
Samuel H. Sanders v. The United States (S. Doc. No. 842);
Bertha Ethel Turner, sole heir of John H. Turner, deceased, v. The United States (S. Doc. No. 841);
Jemima R. Clevinger, widow (remarried) of Henry Richardson, v. The United States (S. Doc. No. 840);
Charles M. Shailer v. The United States (S. Doc. No. 839);
Thomas J. Smith v. The United States (S. Doc. No. 838);
Allison J. Pliley v. The United States (S. Doc. No. 837);
Earl M. Rogers v. The United States (S. Doc. No. 836);
John W. Taylor v. The United States (S. Doc. No. 835);
Flora B. Tenny, widow of William Tenny, v. The United States (S. Doc. No. 834);
Ancil B. Spencer v. The United States (S. Doc. No. 833);
Sarah E. Straughn, widow of John W. Straughn, v. The United States (S. Doc. No. 832);
Mark H. Sherman v. The United States (S. Doc. No. 831);
William Seager v. The United States (S. Doc. No. 830);
Charles A. Stockdale, son and sole heir of Sidney A. Stockdale, deceased, v. The United States (S. Doc. No. 829);
Harrison T. Chandler v. The United States (S. Doc. No. 828);
Ansil H. Couch v. The United States (S. Doc. No. 827);
Richard A. Wood v. The United States (S. Doc. No. 826);
Catherine Weirick, widow of Ephraim B. Weirich, v. The United States (S. Doc. No. 825);
Kate M. Lehn, widow (remarried) of William A. Maetzke, deceased, v. The United States (S. Doc. No. 824);
Rebeckah S. Manderson, widow of Charles F. Manderson, deceased, v. The United States (S. Doc. No. 823);
Morris Strauss v. The United States (S. Doc. No. 822);
Clarence M. Spaulding v. The United States (S. Doc. No. 821);
Thomas A. Peironet v. The United States (S. Doc. No. 820);
James A. Rodman v. The United States (S. Doc. No. 819);
John Rogers v. The United States (S. Doc. No. 818);
Peter H. Pierson v. The United States (S. Doc. No. 817);
Nellie W. Dodge, sister and one of the heirs of Frank H. White, deceased, v. The United States (S. Doc. No. 816);
Stephen P. Petteys v. The United States (S. Doc. No. 815);
Edward L. Shaw v. The United States (S. Doc. No. 814);
Alfred Bugh v. The United States (S. Doc. No. 888);
David C. Brewer v. The United States (S. Doc. No. 887);
Mary A. Britton, widow of Charles E. Britton, v. The United States (S. Doc. No. 886);
John J. Callahan v. The United States (S. Doc. No. 885);
John Clouts v. The United States (S. Doc. No. 884);
Thomas C. Bennett v. The United States (S. Doc. No. 883);
Mary E. Cole, widow of Warren Cole, v. The United States (S. Doc. No. 882);
George L. Wright v. The United States (S. Doc. No. 881);
Martha A. E. Fox, widow (remarried) of Marion Roberts, deceased, v. The United States (S. Doc. No. 880);
Mary L. Oliver, widow of Joseph J. Oliver, v. The United States (S. Doc. No. 879);
Edwin B. Parsons v. The United States (S. Doc. No. 908);
John E. Phelps v. The United States (S. Doc. No. 907);
Michael Trucks v. The United States (S. Doc. No. 906);
Henry T. Whitaker v. The United States (S. Doc. No. 905);
John H. Shaver v. The United States (S. Doc. No. 904);
Marion J. Sitter v. The United States (S. Doc. No. 903);
John Beals v. The United States (S. Doc. No. 902);

George D. Acker *v.* The United States (S. Doc. No. 901);
Mollie Allen, Maggie A. Hacker, and W. W. Anderson, children of Edward M. Anderson, deceased, *v.* The United States (S. Doc. No. 900);
Simon Baringer *v.* The United States (S. Doc. No. 899);
Lucius E. Brooker *v.* The United States (S. Doc. No. 898);
William J. Stokes, son of William B. Stokes, *v.* The United States (S. Doc. No. 897);
John H. Sellers *v.* The United States (S. Doc. No. 896);
Ralph W. Tucker, son and sole heir of Burwell S. Tucker, deceased, *v.* The United States (S. Doc. No. 895);
Samuel H. M. Byers *v.* The United States (S. Doc. No. 894);
David H. Cortelyou *v.* The United States (S. Doc. No. 893);
Nevada B. Snyder, daughter of Charles F. Brookbank, *v.* The United States (S. Doc. No. 892);

William H. Feagans *v.* The United States (S. Doc. No. 812); and
Llewellyn W. French *v.* The United States (S. Doc. No. 813).

The foregoing findings were, with the accompanying papers, referred to the Committee on Claims and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 655) authorizing the Secretary of the Interior to survey the lands of the abandoned Fort Assiniboine Military Reservation and open the same to settlement.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 15869. An act to provide for the establishment and maintenance of mining experiment and mine safety stations for making investigations and disseminating information among employees in mining, quarrying, metallurgical, and other mineral industries, and for other purposes;

H. R. 16637. An act to provide divisions of mental hygiene and rural sanitation in the United States Public Health Service;

H. R. 17330. An act to authorize the sale and disposal of an island in the Coosa River, in the State of Alabama;

H. R. 18783. An act to increase the limit of cost of the United States post-office building and site at St. Petersburg, Fla.;

H. R. 21037. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war;

H. R. 21089. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; and

H. R. 21218. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

The message further transmitted to the Senate resolutions of the House on the life and public services of Hon. JOSEPH F. JOHNSTON, late a Senator from the State of Alabama, and also on the life and public services of Hon. WILLIAM RICHARDSON, late a Representative from the State of Alabama.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (S. 6839) extending the time for completion of the bridge across the Delaware River, authorized by an act entitled "An act to authorize the Pennsylvania Railroad Co. and the Pennsylvania & Newark Railroad Co., or their successors, to construct, maintain, and operate a bridge across the Delaware River," approved the 24th day of August, 1912.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a memorial of the Ohio Association of Master Bakers, of Columbus, Ohio, remonstrating against exportations of wheat and flour, which was referred to the Committee on Commerce.

He also presented a petition of Local District No. 48, International Association of Machinists, including Minnesota and parts of Iowa, South Dakota, North Dakota, and Wisconsin, praying for the passage of the immigration bill over the President's veto, which was ordered to lie on the table.

He also presented a memorial of the Philadelphia Bourse, of Philadelphia, Pa., and a memorial of the Traffic Club of New York City, N. Y., remonstrating against the passage of the so-called ship-purchase bill, which were ordered to lie on the table.

He also presented a petition of the Democratic Club of King County, Wash., praying for the passage of the so-called ship-purchase bill, which was ordered to lie on the table.

He also presented petitions of sundry citizens of Wilkinsburg, Springdale, Erie, Beaver Falls, Ellwood City, and Rochester, all in the State of Pennsylvania; of sundry citizens of York and Walton, in the State of New York; of sundry citizens of Stafford, Topeka, Holton, and Denison, all in the State of Kansas; and of sundry citizens of Denver, Colo., Spokane, Wash., and Fort Wayne, Ind., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of New Jersey, organized as the Committee of One hundred of Hudson County, remonstrating against the enactment of legislation to prohibit the intermarriage of persons of the white and negro races within the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. SMITH of Michigan. I send to the desk a telegram, which I ask to have read for the information of the Senate.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

ECORSE, MICH., *February 1, 1913.*

WILLIAM ALDEN SMITH,
United States Senate, Washington, D. C.

DEAR SIR: Why don't the Democratic administration let our own shipyards build the ships they want to buy instead of buying foreign ships? We have 10 shipyards idle here on the Great Lakes that are able to build these ships.

G. A. RAUPP,
FRED J. PILTON.

Mr. SMITH of Michigan. With more than a passing interest in the petitions which I send to the desk, considering the question of the shipment of arms to belligerent nations, I ask that they may be referred to the appropriate committee.

The VICE PRESIDENT. The petitions will be referred to the Committee on Foreign Relations.

Mr. SMITH of Michigan presented memorials of sundry citizens of Michigan, remonstrating against the exclusion of certain matter from the mails, which were referred to the Committee on Post Offices and Post Roads.

Mr. THORNTON. I present a petition signed by a large number of citizens of Louisiana, praying for the enactment of legislation to enable the President of the United States to levy an embargo on all material useful in war, save foodstuffs and wearing apparel and surgical supplies only. I move that the petition be referred to the Committee on Foreign Relations.

The motion was agreed to.

Mr. THORNTON. I also present resolutions adopted by the Louisiana State Farmers' Union and resolutions adopted by the Louisiana State Farmers' Educational and Cooperative Union of America, urging complete freedom of the seas in the transportation of articles of commerce. I move that the resolutions be referred to the Committee on Foreign Relations.

The motion was agreed to.

Mr. HITCHCOCK presented petitions of sundry citizens of Nebraska, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented a petition of the Central Labor Union of Fremont, Nebr., praying for the enactment of legislation to prevent interstate shipment of convict-made goods, which was ordered to lie on the table.

Mr. THOMPSON presented petitions of the Turnverein of Leavenworth and of the German-American Alliance of Marysville, in the State of Kansas, praying for the enactment of legislation to prohibit the exportation of ammunition, which were referred to the Committee on Foreign Relations.

Mr. WORKS. I send to the desk a number of petitions numerously signed by citizens of California in favor of legislation prohibiting the exportation of munitions of war. I move that the petitions be referred to the Committee on Foreign Relations.

The motion was agreed to.

Mr. WORKS. I present a petition signed by 200 proprietors of barber shops in the District of Columbia, petitioning for legislation authorizing the closing of barber shops in the District of Columbia on Sunday. I move that the petition be referred to the Committee on the District of Columbia.

The motion was agreed to.

Mr. OLIVER. I present a memorial of the Philadelphia Bourse in protest against the passage of the ship-purchase bill. It is a short and concise statement, and I ask unanimous consent that it be printed in the RECORD without reading.

The VICE PRESIDENT. The Chair thinks it is similar to one handed down by the Chair to-day.

Mr. OLIVER. I did not know it had already been ordered printed in the RECORD.

The VICE PRESIDENT. The Chair can only order one inserted in the RECORD, which will be the one presented by the Senator from Pennsylvania.

Mr. OLIVER. Very well.

The memorial is as follows:

PROTEST AGAINST THE PASSAGE OF A BILL H. R. 18666–S. 6856 (63D CONG., 2D SESS.) PROVIDING FOR GOVERNMENT OWNERSHIP AND OPERATION OF MERCHANT VESSELS IN THE FOREIGN TRADE OF THE UNITED STATES.

Memorial of the Philadelphia Bourse, an organization composed of over 2,500 business men, firms, and corporations having as one of its objects the improvement of the commercial interests of the city, State, and Nation, acting through its board of directors by its committee on commercial affairs, at a meeting held January 22, 1915.

To the honorable the Senate and House of Representatives in Congress assembled:

This memorial of the Philadelphia Bourse respectfully represents:

Whereas section 4132 of the Revised Statutes of the United States, as amended by the act officially designated the "Panama Canal act," provides for the admission to registry as vessels of the United States foreign-built "sea-going vessels, whether steam or sail, which have been certified by the Steamboat-Inspection Service * * * not more than five years old at the time of application for registry * * * for trade with foreign countries * * * the Philippine Islands, etc.," with certain restrictions as to the citizenship of the owners or managers of such vessels; and

Whereas by H. R. 18202, Sixty-third Congress, approved August 18, 1914, the restriction contained in the Panama Canal act reading "not more than five years old at the time they apply for registry" was repealed, and the President of the United States granted authority to suspend the provisions of law requiring inspection and measurement by officers of the United States of foreign-built vessels admitted to American registry; and

Whereas under the terms of the legislation above quoted American citizens desiring to engage in the operation of vessels in the foreign trade are free to purchase ships in the cheapest markets of the world and obtain American registry for such ships; and

Whereas the failure of American citizens to take advantage of the opportunities afforded by the legislation hereinbefore referred to is conclusive proof that ships registered under the American flag can not be profitably operated in the foreign trade; and

Whereas before a merchant marine can be created under the American flag to compete with foreign ships engaged in the over-seas trade a complete revision of the navigation laws of the United States must be made, so that the cost of operating ships under the American flag may be reduced to the level of the cost of operating foreign ships competing for the same business; and

Whereas no such revision is proposed by the bill H. R. 18666–S. 6856, which provides for Government ownership and operation of merchant vessels in the foreign trade of the United States, in consequence of which the Government will operate under the same disadvantages that apply to privately owned vessels, magnified by the greater demands which will be made by seamen in Government employ; and

Whereas Government-owned and operated ships operated primarily "to regulate the rates for carrying the mails and for passenger and freight service" (see majority report of the Committee on Merchant Marine and Fisheries No. 1149, accompanying H. R. 18666) will unquestionably be operated at a loss; and

Whereas such loss will be the most insidious form of subsidy or subvention, appearing under the disguise of a deficit incurred in operating such ships, with no limitations upon the amounts of such deficits; and

Whereas according to the report of the majority of the committee hereinbefore mentioned "the country is opposed to subsidies, and with good reason," and such granting of subsidies is opposed by all Democratic doctrine. (See Rept. No. 2755, pt. 2, of the Senate, 58th Cong., 3d sess., accompanying S. 6291, submitted by Mr. Mallory of Florida for himself, and Messrs. Spight, of Mississippi, and McDermott, of New Jersey, which stated inter alia:)

"These sections provide for direct subsidies and are so obnoxious to Democratic principles and to the economic sense of the country that we are compelled to enter our earnest protest against their enactment into law. Its chief difference from former direct subsidy bills (reference is made to a bill 'To promote the national defense, to create a force of naval volunteers, to establish American ocean mail lines to foreign markets, to promote commerce, and to provide revenue from tonnage,' introduced by Senator GALLINGER) is that it is not as honest as these bills were. It displaces the word 'subsidy' with the word 'subvention' * * * without any limitation of the subsidy * * * without any sort of limitation of the total to be paid out of the Treasury now or hereafter * * *.

"We mean no reflection of duplicity against our colleagues on the commission (Merchant Marine Commission), but the situation seems to be such that they can not get away from the idea of direct governmental aid. * * * Section 2 ingeniously introduces the subject by the sugar-coated expression 'In the interest of the national defense and for the performance of public services.' Will the Congress of the United States and the American people permit themselves to be deceived by this transparent disguise? Public sentiment and the sober judgment of the people's representatives have united to condemn every previous effort to enact such legislation, and surely this effort must meet the fate of its predecessors despite the canting phrase 'In the interest of the national defense and for the performance of public services,' and the substitution of the euphonious title 'subvention' for 'subsidy.' * * *

"It will be observed also that unlike other previous bills which have been offered from time to time, there is absolutely no limit to the amount which may be expended under this bill."

Whereas, to still further quote the language of the committee, "Whatever objections to previous subsidy bills have been valid are of equal weight to-day against this section," there is every reason why the bill H. R. 18666–S. 6856 should be defeated and no valid reason for its enactment.

Therefore the Philadelphia Bourse earnestly opposes the passage of the bill H. R. 18666–S. 6856, believing it be futile for the purposes sought to be accomplished, vicious in principle, and indefensible as a piece of economic legislation.

We hold that a temporary condition should not be met by paternalistic legislation subversive of all precedent and the traditions of our people; embarking our Government in business as a common carrier on the high seas in competition with the ships of the world, and not for gain but to regulate rates, with the complications which would result with foreign nations from such "unfair competition," denounced and prohibited by section 5 of the act creating a Federal Trade Commission; and further

We respectfully urge that the Congress should "strike the shackles from business" on the ocean by revising all those sections of the navigation laws which by their restrictions on American ships and shipowners enhance the cost of operation of vessels under the American flag.

PHILADELPHIA BOURSE,
By GEORGE E. BARTOL, *President.*

Attest:
[SEAL.] EMIL P. ALBRECHT, *Secretary.*

Mr. OLIVER presented petitions of sundry employees of the Frankford Arsenal, Philadelphia, Pa., praying for the enactment of legislation to prohibit the use of stop watch and time study of employees, etc., which were referred to the Committee on Military Affairs.

He also presented petitions of sundry citizens of Pennsylvania, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented petitions of sundry camps, Patriotic Order Sons of America, and also from various labor organizations in the State of Pennsylvania, praying for the passage of the immi-

gration bill over the President's veto, which were ordered to lie on the table.

He also presented petitions of sundry pupils of the Springside School, of Philadelphia, Pa., praying for the enactment of legislation to prevent interstate commerce in the products of child labor, which were referred to the Committee on Interstate Commerce.

He also presented petitions of sundry branches of the United Mine Workers of America, in the State of Pennsylvania, praying for the enactment of legislation to extend the work of the Bureau of Mines, which were referred to the Committee on Mines and Mining.

He also presented memorials of sundry citizens of Stoneboro, Pa., remonstrating against the enactment of legislation to increase the Army and Navy equipment, which were referred to the Committee on Military Affairs.

Mr. KENYON. I present a letter from the German-American Alliance of Scott County, Iowa, which I ask may be printed in the RECORD and referred to the Committee on Foreign Relations.

There being no objection, the letter was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

DAVENPORT, IOWA, *January 25, 1915.*

Hon. W. S. KENYON, *Washington, D. C.*

DEAR SIR: At the last regular meeting the German-American Alliance of Scott County, Iowa, an organization having a membership of over 3,000 citizens of the United States, resolutions were adopted favoring the adoption of the following measures pending in Congress: House joint resolutions 377 and 378, Senate bill 6688, and House bill 19548; and the officers of the organization were instructed to urge Senators A. B. CUMMINS and W. S. KENYON and Representative HENRY VOLLMER to give their earnest support to these measures.

Respectfully,

GERMAN-AMERICAN ALLIANCE OF SCOTT COUNTY, IOWA,
By ALFRED C. MUELLER, *President,*
P. RADENHAUSEN, *Secretary.*

Mr. KENYON. I present a large number of petitions and resolutions on the subject of exportation of munitions and arms to belligerents. I ask that one be printed in the RECORD. It is short.

The VICE PRESIDENT. Without objection, it is so ordered.

The petition is as follows:

We, the undersigned citizens of the United States, most earnestly request the President of the United States, the Senators of our State, and the Representative of our district to pass the necessary laws that will enable the President of the United States to levy an embargo on all material useful in war, save foodstuffs and wearing apparel and surgical supplies only, and thereby withdraw from all contending powers all aid and assistance of this Republic.

We especially request our Senators and the Representative of our district to vote for Senate resolution 6088 or any similar measure of the House of Representatives.

Mr. KENYON presented a petition of sundry citizens of Hamburg, Iowa, praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. BURTON presented petitions of sundry citizens of Ohio, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. STERLING presented petitions of sundry citizens of Memo, Redfield, Ramono, and Goodwin, all in the State of South Dakota, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. JONES. Mr. President, in lieu of presenting petitions I simply want to say that every day I am receiving many letters urging the passage of the bill introduced by the Senator from Nebraska [Mr. HITCHCOCK] to prohibit the exportation of arms and munitions of war. I am also receiving many petitions to the same effect. I wish to state that I have not received a single letter or memorial protesting against the bill.

Mr. REED. I present two memorials from the House of Representatives of the State of Missouri, and ask that they be read.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read.

The Secretary read as follows:

STATE OF MISSOURI,
HOUSE OF REPRESENTATIVES,
Jefferson City, Mo., January 30, 1915.

Hon. JAMES A. REED, United States Senator,
Washington, D. C.

DEAR SIR: I have the honor to certify to you that the following resolution was adopted by the House of Representatives of the Forty-eighth General Assembly of Missouri, on the 29th day of January, 1915:

"*Be it resolved by the House and Senate of the Forty-eighth Missouri General Assembly,* That it is the sentiment of this body that the rivers and harbors bill recently passed by the House of Representatives of Congress is a meritorious measure, and if the same is passed by the Senate the sums appropriated for the various streams and harbors will result in great improvement to navigation being brought about to the various parts of this country.

"Therefore the Forty-eighth Missouri General Assembly urges the two United States Senators from Missouri to use their best efforts to secure the adoption of said rivers and harbors bill as now pending in the Senate; and be it therefore

"*Resolved,* That a copy of this resolution, signed by the clerk of the house of representatives and the secretary of the senate be sent immediately to WILLIAM J. STONE and JAMES A. REED, United States Senators from Missouri, with a request that the same be presented to and read to the United States Senate as soon as possible."

Very respectfully, yours,

R. E. L. MARRS, *Chief Clerk.*

STATE OF MISSOURI,
HOUSE OF REPRESENTATIVES,
Jefferson City, Mo., January 28, 1915.

Hon. JAMES A. REED,
United States Senator, Washington, D. C.

DEAR SIR: I have the honor to certify to you that the following resolution was passed by the House of Representatives of the Forty-eighth General Assembly of Missouri on the 28th day of January, 1915:

"Whereas the House of Representatives of the United States Congress has passed a bill appropriating liberal sums to continue the work on rivers and harbors projects heretofore begun; and

"Whereas there are more miles of navigable streams contiguous to or traversing the State of Missouri than any other State in the Union, thereby making the passage of said rivers and harbors bill made by the House of great importance to this State: Therefore

"*Resolved,* That the House of Representatives of the Missouri Legislature respectfully urges the United States Senators, regardless of political affiliations, to pass the House rivers and harbors bill with only such amendments made thereto as are absolutely necessary in order to conserve the public interest.

"*Be it further resolved,* That the clerk of this house be instructed to forward to the Secretary of the United States Senate a copy of this resolution and a copy to each United States Senator from Missouri, with the request that the same be read in the United States Senate while in session."

Very respectfully, R. E. L. MARRS,
Chief Clerk.

The VICE PRESIDENT. The memorials will be referred to the Committee on Commerce.

Mr. BRISTOW presented memorials of sundry citizens of Halls Summit and Minneapolis, in the State of Kansas, remonstrating against the enactment of legislation proposing to curtail the liberty of the press, which were referred to the Committee on Post Offices and Post Roads.

He also presented petitions of sundry citizens of Atchison, Poek, Buhler, Lincoln, Paola, and Offerla, all in the State of Kansas, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of Kansas City, Kans., praying for the enactment of legislation to grant pensions to civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

Mr. BRANDEGEE presented petitions of sundry citizens of Broad Brook, Meriden; of the Kaiser Franz Joseph Society, of New Britain; and of the Turner Society of Meriden, all in the State of Connecticut, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. CRAWFORD presented petitions of sundry citizens of South Dakota, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented petitions of the Central Elevator & Warehouse Co. and the Board of Trade of New Orleans, La.; American Hay & Grain Co., of Marietta, Ohio; Merchants' Elevator Co. of Minneapolis, Minn.; the Board of Trade of Atchison, Kans.; J. H. Wilkes & Co., of Nashville, Tenn.; Ballard-Messmore Grain Co. and Toberman Mackey, of St. Louis, Mo.; the J. Chas. McCullough Seed Co., of Cincinnati, Ohio, praying for the enactment of legislation providing for the grading and inspection of grain, which were referred to the Committee on Agriculture and Forestry.

Mr. CHAMBERLAIN. I present a joint memorial of the Legislature of Oregon relative to an amendment looking to the improvement of the navigation laws of the Pacific coast. I ask that the joint memorial may be printed in the RECORD and referred to the Committee on Commerce.

There being no objection, the joint memorial was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA,
STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, Ben W. Olcott, secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint memorial No. 4 with the original thereof filed in the office of the secretary of state of the State of Oregon on the 27th day of January, 1915, and that the same is a full, true, and complete transcript therefrom and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 27th day of January, A. D. 1915.

[SEAL.] BEN W. OLCOTT,
Secretary of State.

Senate joint memorial No. 4.

Whereas in the Oregon Daily Journal of Tuesday, January 12, 1915, there appears an editorial in which is recounted one of the conditions obtaining in Oregon to the great detriment of one of Oregon's leading industries, said editorial in part being as follows:

"Many things are troubling Oregon lumbermen. At the lumbermen's dinner in Portland Saturday night O. M. Clark stated that his firm closed a contract for delivery of 500,000 feet of lumber to a Philadelphia buyer. Transportation could not be obtained. Ships in the trade between Portland and the Atlantic ports refused to carry the shipment to Philadelphia, because they preferred to sell the lumber themselves and make a profit in addition to the regular freight charges.

"So the delivery could not be made. Mr. Clark's firm thereupon, for a small commission, transferred the contract to Robert Dollar, a San Francisco shipowner, who purchased the lumber in British Columbia and used it to fill the Philadelphia order.

"A thing that contributes to the power of the shipowners who thus refuse to deliver Portland cargoes in Atlantic ports is that none but American-built ships can engage in domestic trade. The amendment last fall to the navigation law admitting foreign-built ships to American registry did not include an admission of such vessels to the domestic trade, but restricted them to purely foreign business"; and

Whereas the lumber industry is one of the principal industries of the State of Oregon and gives ready employment to a large number of Oregon citizens, and as a result of the present condition of our national laws the lumber industry in Oregon is badly handicapped, with the result that mary of our citizens are now out of employment who have heretofore enjoyed regular and lucrative employment in the Oregon lumber industry; and

Whereas the United States of America constructed the Panama Canal at a great expense to the general public of this country, and by a recent act of Congress has opened said canal to the ships of all of the principal nations of the world upon terms as favorable as to the ships of this country, and by another act of Congress the protective tariff on manufactured lumber has been removed, with the result that our eastern lumber markets are now open to the producers of all lumber-producing countries; and

Whereas the navigation laws of the United States are such that lumber from one port can not be transported to another port in the United States except upon vessels built in the United States, and by reason of the navigation laws of this country such transportation is more expensive than transportation from competing foreign ports, with the result that lumber can be purchased and transported from ports in British Columbia to the Atlantic seacoast in the United States at a considerably less price than the same can be transported from the ports of Oregon: Therefore be it

Resolved, That the Congress of the United States is respectfully requested to so amend our national navigation laws that the lumber industry of the Pacific coast may transact its business with its natural customers on the Atlantic coast on terms at least as favorable as are now held by competitors operating in British Columbia; be it further

Resolved, That the secretary of state is hereby instructed to transmit by mail a copy of this resolution to each of the Oregon delegates in Congress.

Concurred in by the house January 26, 1915.

BEN SELLING,
Speaker of the House.

Adopted by the senate January 20, 1915.

W. LAIR THOMPSON,
President of the Senate.

(Indorsed:) Senate joint memorial No. 4, by Senator Bingham. J. W. Cochran, chief clerk. Filed January 27, 1915, at 3.45 o'clock p. m. Ben W. Olcott, secretary of state, by S. A. Kozer, deputy.

Mr. CHAMBERLAIN presented petitions of sundry citizens of Oregon, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented memorials of sundry citizens of Oregon, remonstrating against the exclusion of certain matter from the mail, which were referred to the Committee on Post Offices and Post Roads.

Mr. TOWNSEND presented petitions of sundry citizens of Michigan, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented memorials of sundry citizens of Michigan, remonstrating against the exclusion of certain matter from the mail, which were referred to the Committee on Post Offices and Post Roads.

He also presented petitions of sundry citizens of Michigan, praying for the passage of the immigration bill over the President's veto, which were ordered to lie on the table.

Mr. DILLINGHAM presented petitions of sundry citizens of Wilmington and Jamaica, in the State of Vermont, praying for the enactment of legislation to prohibit the sale of intoxicating drink and drugs in the Philippine Islands, which were referred to the Committee on the Philippines.

REPORTS OF COMMITTEES.

Mr. SHIVELY, from the Committee on Pensions, submitted a report (No. 941), accompanied by a bill (S. 7509) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, which was read twice by its title, the bill being a substitute for the following Senate bills heretofore referred to that Committee:

S. 1695. Charles F. Schantz.
S. 2282. Arthur W. Martin.
S. 3358. Blanche Wood.
S. 3643. Jane M. Brown.
S. 3977. Andrew F. Venable.
S. 5018. Anna L. Power.
S. 5270. Charles M. Gregory.
S. 5558. Patrick J. Hyde.
S. 6129. Benjamin F. Klippert.
S. 6158. Reinhard Anschuetz, alias Charles Reinhard.
S. 6168. Odelon Valcour.
S. 6186. James N. Yates.
S. 6256. Henry P. Logsdon.
S. 6279. William C. Campbell.
S. 6314. Edward Louden.
S. 6401. Joseph H. Dawson.
S. 6477. Jennings J. Pierce.
S. 6554. Wilhelmina Myer.
S. 6659. Raymond S. Sheldon.
S. 6764. Willard D. Cook.
S. 6791. George P. L. McCarty and Mildred G. McCarty.
S. 6824. Edward F. Collins.
S. 6845. Winfield S. Taylor.
S. 6848. William G. Taliaferro.
S. 6864. Minnie Lord Henderson.
S. 6899. Allan E. Pugh.
S. 6901. Eugene Helm.
S. 6917. David Roach.
S. 6939. Sarah A. Boll.
S. 6996. William A. Taylor.
S. 7012. Edward M. Booe.
S. 7031. Alice Pollock.
S. 7032. Mary R. Kendall.
S. 7063. Caro G. Moore.
S. 7125. Robert H. Trollinger.
S. 7193. John Johnson No. 2.
S. 7355. Louisa M. Fletcher.
S. 7453. Alice S. C. McNaught.

Mr. HITCHCOCK, from the Committee on the Philippines, to which was referred the bill (H. R. 18459) to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for those Islands, reported it with amendments and submitted a report (No. 942) thereon.

He also, from the Committee on Military Affairs, to which was referred the bill (S. 283) for the relief of Lester A. Rockwell, reported it without amendment and submitted a report (No. 943) thereon.

Mr. O'GORMAN, from the Committee on the Judiciary, to which was referred the bill (S. 7091) to create an additional judge in the district of New Jersey, reported it without amendment and submitted a report (No. 944) thereon.

Mr. SMITH of Georgia, from the Committee on the Judiciary, to which was referred the bill (S. 7041) to amend section 260 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, reported it with an amendment and submitted a report (No. 945) thereon.

Mr. LANE, from the Committee on Public Buildings and Grounds, to which was referred the bill (S. 6194) to provide for the acquisition of a site and erection of a public building thereon at Hood River, Oreg., reported it with an amendment and submitted a report (No. 946) thereon.

Mr. MYERS, from the Committee on Public Lands, to which was referred the bill (H. R. 16136) to authorize exploration for and disposition of coal, phosphate, oil, gas, potassium, or sodium, reported it with amendments and submitted a report (No. 947) thereon.

Mr. SMOOT. I desire to reserve the right to file minority views upon House bill 16136, which has just been reported from the Committee on Public Lands by the Senator from Montana [Mr. MYERS].

Mr. MYERS, from the Committee on Public Lands, to which was referred the bill (S. 6373) to provide for the payment for certain lands within the former Flathead Indian Reservation, in the State of Montana, reported it without amendment and submitted a report (No. 948) thereon.

Mr. MYERS. I also report back from the Committee on Public Lands, favorably and without amendment, the bill (H. R. 15799) to provide for stock-raising homesteads, and for other purposes, and I submit a report (No. 949) thereon. I ask unanimous consent for the immediate consideration of the bill.

Mr. GALLINGER. I object, Mr. President.

The VICE PRESIDENT. There is objection, and the bill goes to the calendar.

Mr. PERKINS, from the Committee on Commerce, to which was referred the bill (S. 7255) to provide a harbor boat for the Revenue-Cutter Service to replace the *Hartley* at San Francisco, Cal., reported it without amendment and submitted a report (No. 950) thereon.

DEVELOPMENT OF WATER POWER.

Mr. WORKS. I present the minority views of the Committee on Public Lands on House bill 16673, commonly known as the water-power bill. The paper consists mainly of a discussion of the legal questions involved, and I ask that it be printed in the RECORD.

There being no objection, the views of the minority were ordered to be printed in the RECORD, as follows:

[Senate Rept. 898, pt. 2, 63d Cong., 3d sess.]

DEVELOPMENT OF WATER POWER.

Mr. WORKS, from the Committee on Public Lands, submitted the following views of the minority, to accompany H. R. 16673:

The report of the majority of the committee states the object of the bill, as follows:

"The object of the measure is the better and speedier development for useful and beneficial purposes of the great undeveloped water power of the country, now lagging on account of inadequate and inefficient laws."

If this were the real object and purpose of the bill and this object would be attained even in reasonable degree and without unwarranted and dangerous encroachments by the National Government on the constitutional rights of the States, the signers of this minority report of the committee would not be found contending against its enactment, as they represent a constituency that is vitally interested in the development of all natural resources and their application to beneficial uses, freed as far as possible from limitations, obstructions, or unnecessary burdens of any kind. In any attempt to bring about such legislation we should carefully consider:

1. The rights of the States in the waters flowing through them in the natural streams and to regulate and control their appropriation, diversion, and use.

2. The limitations of the National Government in dealing with the appropriation, regulation, and use of these waters.

3. The rights of the people of the States to the use of the waters of the streams, as provided by law, commonly called the consumers.

But after all and in the last analysis, it is the consumer that should be protected and his individual right to the use of the water maintained and preserved under reasonable rules and regulations that will insure the greater and more beneficial use of the water for all legitimate purposes.

The western semiarid States, where irrigation is necessary to their full development and prosperity, are peculiarly and vitally interested in making every drop of water beneficially useful and in supplying every acre of land possible with the water, without which much of their lands are sterile and unproductive. This being true, it must be seen that these States are interested and will support any just law that will extend the use of water either for the irrigation of their land or the development of power. And if it were believed by us that this bill, if it should become a law, would have that effect without violating any of the fundamental and constitutional rights of the States, it would receive our earnest and united support. It is because we are fully convinced by our own knowledge of the subject and the testimony taken at the hearings before the committee that the bill will not conduce to the better or speedier development of the water power of the country, but will hinder and retard such development, and that its real object, purpose, and effect is to usurp by the National Government the rights and jurisdiction of the States in and over the flowing waters of the streams to the detriment of the States and to water consumers, that we earnestly oppose the passage of the bill. And this attempt at what seems to us to be revolutionary, detrimental, and unwise legislation is so far-reaching and important that we feel it to be our duty to lay before the Senate our reasons for opposing the passage of the bill.

In dealing with the subject we assume that certain fundamental principles of law, controlling in their influence as affecting such legislation as this, have been firmly and unalterably established by both Federal and State decisions. They are as follows:

1. The ownership of flowing water and the right to dispose of and to regulate and control the use thereof within their borders belong exclusively to the States as a part of their sovereign power, subject only, in case of navigable streams, to the power of the Federal Government to regulate and promote commerce between the States.

Bean *v.* Morris (221 U. S., 485).

4. The Federal Government owns the public lands as a proprietor only and not in its sovereign capacity.

Pollard's Lessee *v.* Hagan (3 How., U. S., 212);
Ward *v.* Race Horse (163 U. S., 504);
Woodruff *v.* North Bloomfield Gravel Mining Co. (18 Fed. Rep., 753);
Boggs *v.* Merced Mining Co. (14 Cal., 279, 376).

5. The Federal Government has no power or jurisdiction to fix rates or regulate the use or disposition of water within a State.

Sands *v.* Manistee River Improvement Co. (123 U. S., 288);
Osborne *v.* San Diego Land & Town Co. (178 U. S., 22).

6. The power to fix rates or regulate the use of water not given to the Federal Government by the Constitution can not be bestowed by act of Congress as a condition to the leasing or sale of the public lands.

New Orleans *v.* United States (10 Pet., 662, 736);
Leovy *v.* United States (177 U. S., 621).

7. Absolute property in and dominion and sovereignty over the soils under the tidewaters in the States are reserved to the several States.

Kansas *v.* United Land Association (142 U. S., 161).

8. Public lands owned by the United States are not subject to taxation by the States.

California *v.* Shearer (30 Cal., 645, 655, 658);
Van Brocklin *v.* Tennessee (117 U. S., 151).

9. The power of Congress to legislate or exercise sovereignty over lands within a State is confined to lands acquired by the Federal Government for certain specific purposes, and with the consent of the State.

United States *v.* Cornell (2 Mason, 60);
Woodruff *v.* North Bloomfield Gravel Mining Co. (18 Fed. Rep., 753).

The far-reaching effects of this proposed legislation and the evident attempt of the Federal Government to usurp the sovereign powers of the States move us to consider more extensively the effect of the principles above laid down and the cases supporting our views. In doing so we rest our views and conclusions largely upon the following premises:

1. Before the formation of the present Government all sovereign powers were vested in the several States within their borders.

2. The Federal Government formed by the States has only such powers as the States bestowed upon it by the Constitution. All others are reserved to the States.

3. The powers thus granted do not include the power to regulate or control the use of the waters of streams flowing within a State except to maintain and regulate commerce between the States, with foreign nations, and under treaties with the Indians.

4. The ownership of land within a State as a proprietary owner and not for governmental uses and purposes gives the Federal Government no power or jurisdiction to regulate or control the use of the waters of a stream on which the land borders.

5. Therefore any legislation attempting to vest any such power in the Government will be unconstitutional and void.

That the bill under consideration does provide for such usurpation of power we will show further along.

Having laid down these general principles that should guide and control our action, we quote, for the information of the Senate, some of the language of the courts on the subject which we regard as conclusive.

In Pollard's Lessee *v.* Hagan (3 How., 212) the question was as to the title to lands covered by the waters of a navigable stream and involved the power and jurisdiction of the United States Government over such lands. The court said:

"The right which belongs to the society, or to the sovereign, of disposing in case of necessity, and for the public safety, of all the wealth contained in the State, is called the eminent domain. It is evident that this right is, in certain cases, necessary to him who governs and is consequently a part of the empire, or sovereign power. (Vat. Law of Nations, sec. 244.) This definition shows that the eminent domain, although a sovereign power, does not include all sovereign power, and this explains the sense in which it is used in this opinion. The compact made between the United States and the State of Georgia was sanctioned by the Constitution of the United States, by the third section of the fourth article of which it is declared that 'new States may be admitted by the Congress into this Union, but no new State shall be formed or erected within the jurisdiction of any others State, nor any State be formed by the junction of two or more States or parts of States, without the consent of the legislatures of the States concerned, as well as of Congress.'

"When Alabama was admitted into the Union on an equal footing with the original States she succeeded to all the rights of sovereignty, jurisdiction, and eminent domain which Georgia possessed at the date of the cession, except so far as this right was diminished by the public lands remaining in the possession and under the control of the United States, for the temporary purposes provided for in the deed of cession and the legislative acts connected with it. Nothing remained to the United States, according to the terms of the agreement, but the public lands. And if an express stipulation had been inserted in the agreement granting the municipal right of sovereignty and eminent domain to the United States, such stipulation would have been void and inoperative, because the United States have no constitutional capacity to exercise municipal jurisdiction, sovereignty, or eminent domain, within the limits of a State or elsewhere, except in the cases in which it is expressly granted.

"By the sixteenth clause of the eighth section of the first article of the Constitution power is given to Congress 'to exercise exclusive legislation in all cases whatsoever over such district (not exceeding 10 miles square) as may by cession of particular States, and the acceptance of Congress, become the seat of government of the United States, and to exercise like authority over all places purchased by the consent of the legislature of the State in which the same may be, for the erection of forts, magazines, arsenals, dockyards, and other needful buildings.' Within the District of Columbia, and the other places purchased and used for the purposes above mentioned, the national and municipal powers of government of every description are united in the government of the Union. And these are the only cases within the United States in which all the powers of government are united in a single government, except in cases already mentioned of the temporary territorial governments, and there a local government exists. The right of Alabama and every other new State to exercise all the powers of government which belong to and may be exercised by the original States of the Union must be admitted and remain unquestioned, except so far as they are, temporarily, deprived of control over the public lands.

"We will now inquire into the nature and extent of the right of the United States to these lands, and whether that right can in any manner affect or control the decision of the case before us. This right originated in voluntary surrenders, made by several of the old States, of their waste and unappropriated lands to the United States, under a resolution of the old Congress of the 6th of September, 1780, recom-

mending such surrender and cession, to aid in paying the public debt incurred by the War of the Revolution. The object of all the parties to these contracts of cession was to convert the land into money for the payment of the debt and to erect new States over the territory thus ceded; and as soon as these purposes could be accomplished the power of the United States over these lands, as property, was to cease.

"Whenever the United States shall have fully executed these trusts the municipal sovereignty of the new States will be complete throughout their respective borders, and they and the original States will be upon an equal footing in all respects whatever. We therefore think the United States hold the public lands within the new States by force of the deeds of cession, and the statutes connected with them, and not by any municipal sovereignty which it may be supposed they possess or have reserved by compact with the new States for that particular purpose. The provision of the Constitution above referred to shows that no such power can be exercised by the United States within a State. Such a power is not only repugnant to the Constitution, but it is inconsistent with the spirit and intention of the deeds of cession. The argument so much relied on by the counsel for the plaintiffs, that the agreement of the people inhabiting the new States, 'that they forever disclaim all right and title to the waste or unappropriated lands lying within the said territory, and that the same shall be and remain at the sole and entire disposition of the United States,' can not operate as a contract between the parties, but is binding as a law. Full power is given to Congress 'to make all needful rules and regulations respecting the territory or other property of the United States.' This authorized the passage of all laws necessary to secure the rights of the United States to the public lands and to provide for their sale, and to protect them from taxation."

The case of Withers *v.* Buckley (20 How., 84) involved the powers of the Federal and State Governments over navigable streams. It also lays down the rule since adhered to that the fifth and other amendments to the Constitution were intended to modify the powers granted to the Federal Government and do not limit or affect the powers of the State.

Quoting from the language of Chief Justice Marshall in Barron *v.* Baltimore (7 Peters, 247–248), the court said:

"The question thus presented we think of great importance but not of much difficulty.

"The Constitution was ordained and established by the people of the United States for themselves; for their own government, and not for the government of the individual States. Each State established a constitution for itself, and in that constitution provided such limitations and restrictions on the powers of its particular government as its judgment dictated. The people of the United States framed such a government for the United States as they supposed best adapted to their situation and best adapted to promote their interests. The powers they conferred on this government were to be exercised by itself; and the limitations on power, if expressed in general terms, are naturally, and we think necessarily, applicable to the government created by the instrument. They are limitations of power granted by the instrument itself, not of distinct governments, framed by different persons and for different purposes.

"If these propositions be correct, the fifth amendment must be understood as restraining the power of the General Government, not as applicable to the States. In their several constitutions they have imposed such restrictions on their respective governments as their own wisdom suggested, such as they deemed most proper for themselves. It is a subject on which they judge exclusively and with which others interfere no further than they are supposed to have a common interest."

Again, reverting to the causes which led to the proposal and adoption of the amendments of the Constitution, the same judge remarks (ib., p. 250)—and these remarks embrace the whole series of articles adopted: "In almost every convention in which the Constitution was adopted, amendments to guard against the abuse of power were recommended. These amendments demanded security against the apprehended encroachments of the General Government, not against those of the local governments.

"In compliance with a sentiment thus generally expressed, to quiet fears thus extensively entertained, amendments were proposed by the required majority in Congress and adopted by the States. These amendments contain no expression indicating an intention to apply them to the State governments. This court can not so apply them. (Vide also the cases of Fox *v.* The State of Ohio, 5 How., 411, and of The West River Bridge Co. *v.* Dix et al., 6 How., 507.)"

And further, in considering an act of Congress relating to the subject, the court, in same case, used this language:

"In considering this act of Congress of March 1, 1817, it is unnecessary to institute any examination or criticism as to its legitimate meaning, or operation, or binding authority further than to affirm that it could have no effect to restrict the new State in any of its necessary attributes as an independent sovereign Government, nor to inhibit or diminish its perfect equality with the other members of the Confederacy with which it was to be associated. These conclusions follow from the very nature and objects of the Confederacy, from the language of the Constitution adopted by the States, and from the rule of interpretation pronounced by this court in the case of Pollard's Lessee *v.* Hagan (3 How., p. 223). The act of Congress of March 1, 1817, in prescribing the free navigation of the Mississippi and the navigable waters flowing into the river, could not have been designed to inhibit the power inseparable from every sovereign or efficient government to devise and to execute measures for the improvement of the State, although such measures might induce or render necessary changes in the channels or courses of rivers within the interior of the State, or might be productive of a change in the value of private property. Such consequences are not infrequently and indeed unavoidably incident to public and general measures highly promotive of and absolutely necessary to the public good. And here it may be asked whether the law complained of and the measures said to be in contemplation for its execution are in reality in conflict with the act of Congress of March 1, 1817, with respect either to the letter or the spirit of the act. On this point may be cited the case of Veazie et al. *v.* Moor (in 14 How., 568)."

The case of Escanaba Co. *v.* Chicago (107 U. S., 678) involved the right of the States to legislate respecting the use of navigable streams over which, for purposes of commerce between the States, the Federal Government has jurisdiction. In dealing with this question the court said:

"The power vested in the General Government to regulate interstate and foreign commerce involves the control of the waters of the United States which are navigable in fact, so far as it may be necessary to insure their free navigation, when by themselves or their connection with other waters they form a continuous channel for commerce among the States or with foreign countries. * * *

"But the States have full power to regulate within their limits matters of internal police, including in that general designation whatever will promote the peace, comfort, convenience, and prosperity of their people. This power embraces the construction of roads, canals, and bridges and the establishment of ferries, and it can generally be exercised more wisely by the States than by a distant authority. They are the first to see the importance of such means of internal communication and are more deeply concerned than others in their wise management. Illinois is more immediately affected by the bridges over the Chicago River and its branches than any other State and is more directly concerned for the prosperity of the city of Chicago, for the convenience and comfort of its inhabitants, and the growth of its commerce. And nowhere could the power to control the bridges in that city, their construction, form, and strength, and the size of their draws and the manner and times of using them be better vested than with the State or the authorities of the city upon whom it has devolved that duty. When its power is exercised so as to unnecessarily obstruct the navigation of the river or its branches, Congress may interfere and remove the obstruction. If the power of the State and that of the Federal Government come in conflict, the latter must control and the former yield. This necessarily follows from the position given by the Constitution to legislation in pursuance of it as the supreme law of the land. But until Congress acts on the subject the power of the State over bridges across its navigable streams is plenary."

And further:

"The doctrine declared in these several decisions is in accordance with the more general doctrine now firmly established—that the commercial power of Congress is exclusive of State authority only when the subjects upon which it is exercised are national in their character and admit and require uniformity of regulation affecting alike all the States. Upon such subjects only that authority can act which can speak for the whole country. Its nonaction is therefore a declaration that they shall remain free from all regulation."

Kansas *v.* Colorado (206 U. S., 46) involves directly the power of the Federal Government to legislate respecting the irrigation of arid lands. The question presented for decision is thus stated by the court:

"Turning now to the controversy as here presented, it is whether Kansas has a right to the continuous flow of the waters of the Arkansas River, as that flow existed before any human interference therewith, or Colorado the right to appropriate the waters of that stream so as to prevent that continuous flow, or that the amount of the flow is subject to the superior authority and supervisory control of the United States. * * *

"The primary question is, of course, of national control. For if the Nation has a right to regulate the flow of the waters, we must inquire what it has done in the way of regulation. If it has done nothing, the further question will then arise, What are the respective rights of the two States in the absence of national regulation?"

In discussing this question, as stated by the court, it was said:

"Congress has, by virtue of the grant to it of power to regulate commerce 'among the several States,' extensive control over the highways, natural or artificial, upon which such commerce may be carried. It may prevent or remove obstructions in the natural waterways and preserve the navigability of those ways. * * *

"That involves the question whether the reclamation of arid lands is one of the powers granted to the General Government. As heretofore stated, the constant declaration of this court from the beginning is that this Government is one of enumerated powers. 'The Government, then, of the United States, can claim no powers which are not granted to it by the Constitution, and the powers actually granted, must be such as are expressly given, or given by necessary implication.' (Story, J., in Martin *v.* Hunter's Lessee, 1 Wheat., 304, 326.) 'The Government of the United States is one of delegated, limited, and enumerated powers.' (United States *v.* Harris, 106 U. S., 629, 635.)

"Turning to the enumeration of the powers granted to Congress by the eighth section of the first article of the Constitution, it is enough to say that no one of them by any implication refers to the reclamation of arid lands. The last paragraph of the section, which authorizes Congress to make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or office thereof, is not the delegation of a new and independent power, but simply provision for making effective the powers theretofore mentioned. * * *

"We must look beyond section 8 for congressional authority over arid lands, and it is said to be found in the second paragraph of section 3 of Article IV, reading: 'The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.'

"The full scope of this paragraph has never been definitely settled. Primarily, at least, it is a grant of power to the United States of control over its property. That is implied by the words 'territory or other property.' It is true it has been referred to in some decisions as granting political and legislative control over the Territories, as distinguished from the States of the Union. It is unnecessary in the present case to consider whether the language justifies this construction. Certainly we have no disposition to limit or qualify the expressions which have heretofore fallen from this court in respect thereto. *But, clearly, it does not grant to Congress any legislative control over the States and must, so far as they are concerned, be limited to authority over the property belonging to the United States within their limits.* Appreciating the force of this, counsel for the Government relies upon 'the doctrine of sovereign and inherent power,' adding, 'I am aware that in advancing this doctrine I seem to challenge great decisions of the court, and I speak with deference.' His argument runs substantially along this line: All legislative power must be vested in either the State or the National Government; no legislative powers belong to a State government other than those which affect solely the internal affairs of that State, consequently all powers which are national in their scope must be found vested in the Congress of the United States. But the proposition that there are legislative powers affecting the Nation as a whole which belong to, although not expressed in, the grant of powers, is in direct conflict with the doctrine that this is a Government of enumerated powers. That this is such a Government clearly appears from the Constitution, independently of the amendments, for otherwise there would be an instrument granting specific things made operative to grant other and distinct things. This natural construction of the original body of the Constitution is made absolutely certain by the tenth amendment. This amendment, which was seemingly adopted with prescience

of just such contention as the present, disclosed the widespread fear that the National Government might, under the pressure of a supposed general welfare, attempt to exercise powers which had not been granted. With equal determination, the framers intended that no such assumption should ever find justification in the organic act, and that if in the future further powers seemed necessary they should be granted by the people in the manner they had provided for amending that act. It reads, 'The powers not delegated to the United States by the Constitution nor prohibited by it to the States are reserved to the States, respectively, or to the people * * *.'

"One cardinal rule underlying all the relations of the States to each other is that of equality of right. Each State stands on the same level with all the rest. It can impose its own legislation on no one of the others and is bound to yield its own views to none. Yet, whenever, as in the case of Missouri *v.* Illinois (180 U. S., 208) the action of one State reaches through the agency of natural laws into the territory of another State, the question of the extent and the limitations of the rights of the two States becomes a matter of justiciable dispute between them, and this court is called upon to settle that dispute in such a way as will recognize the equal rights of both and at the same time establish justice between them."

The court then proceeded to consider and determine the rights, not of the Federal Government, but of the States of Kansas and Colorado, in the waters of the Arkansas River, a stream which flows through both States.

The case of Shively *v.* Bowlby (152 U. S., 1) involved the title to lands below high-water mark in the Columbia River in the State of Oregon. It is one of the leading cases on the subject of the powers of the Federal and State Governments over navigable streams. That the power and jurisdiction of the States over nonnavigable streams and lands lying under them is exclusive is not questioned. It is only where the question of navigation for interstate purposes is involved that any question of sovereign power in the States has ever been controverted. In this case the laws of the several States on the subject and the numerous decided cases bearing upon it are fully reviewed, and the doctrine laid down in Pollard's Lessee against Hagan, quoted from above, confirmed and approved. The opinion in the case is an exceedingly interesting and instructive one, and should receive attention in this connection. In closing, the court said:

"The United States, while they hold the country as a Territory, having all the powers both of national and municipal government, may grant for appropriate purposes titles or rights in the soil below high-water mark of tidewaters. But they have never done so by general laws; and, unless in some case of international duty or public exigency, have acted upon the policy, as most in accordance with the interest of the people and with the object for which the Territories were acquired, of leaving the administration and disposition of this sovereign right in navigable waters and in the soil under them to the control of the States, respectively, when organized and admitted into the Union.

"Grants by Congress of portions of the public lands within a Territory to settlers thereon, though bordering on or bounded by navigable waters, convey, of their own force, no title or right below high-water mark, and do not impair the title and dominion of the future State when created; but leave the question of the use of the shores by the owners of uplands to the sovereign control of each State, subject only to the rights vested by the Constitution in the United States.

"The donation land claim, bounded by the Columbia River, upon which the plaintiff in error relies, includes no title or right in the land below high-water mark; and the statutes of Oregon, under which the defendants in error hold, are a constitutional and legal exercise by the State of Oregon of its dominion over the lands under navigable waters."

The following statement in the opinion in Illinois Central Railroad *v.* Illinois (146 U. S., 387, 435) is to the same effect:

"It is the settled law of this country that the ownership of and dominion and sovereignty over lands covered by tidewaters, within the limits of the several States, belong to the respective States within which they are found, with the consequent right to use or dispose of any portion thereof, when that can be done without substantial impairment of the interest of the public in the waters, and subject always to the paramount right of Congress to control their navigation as far as may be necessary for the regulation of commerce with foreign nations and among the States. This doctrine has been often announced by this court and is not questioned by counsel of any of the parties." (Pollard's Lessee *v.* Hagan, 3 How., 212; Weber *v.* Harbor Commissioners, 18 Wall., 57.)

As establishing the claim we make that the Constitution vests no power in the Federal Government to regulate or control the use of the waters of a stream within a State, and that this power can not be given by a statute enacted by Congress, we quote this language from the opinion in New Orleans *v.* United States (10 Pet., 662, 736):

"The Government of the United States, as was well observed in the argument, is one of limited powers. It can exercise authority over no subjects, except those which have been delegated to it. Congress can not by legislation enlarge the Federal jurisdiction, nor can it be enlarged under the treaty-making power."

That the States have the right to regulate the use of even navigable streams within their borders where Congress has not acted or where such action does not interfere with the paramount power of the Federal Government to regulate commerce between the States, is affirmed by Leovy *v.* United States (177 U. S., 621), in which it is said:

"Subject, then, to the paramount jurisdiction of Congress over the navigable waters of the United States, the State of Louisiana has full power to authorize the construction and maintenance of levees, drains, and other structures necessary and suitable to reclaim swamp and overflowed lands within her limits."

And in the *Daniel Ball* (177 U. S., 10 Wall., 557) it is said:

"Those rivers must be regarded as public navigable rivers in law which are navigable in fact. And they are navigable in fact when they are used, or are susceptible of being used, in their ordinary condition, as highways for commerce, over which trade and travel are or may be conducted in the customary modes of trade and travel on water."

Respecting the right of a State to control the navigation of a stream wholly within its limits it was said in the case of Veazie *v.* Moor (14 How., 568, 573):

"Upon a comparison of this decree and of the statute upon which it is founded with the provision of the Constitution already referred to, we are unable to perceive by what rule of interpretation either the statute or the decree can be brought within either of the categories comprised in that provision.

"These categories are: 1. Commerce with foreign nations. 2. Commerce amongst the several States. 3. Commerce with the Indian tribes. Taking the term 'commerce' in its broadest acceptation, supposing it to embrace not merely traffic but the means and vehicles by which it is prosecuted, can it properly be made to include objects and purposes such as those contemplated by the law under review? Commerce with foreign nations must signify commerce which in some sense is necessarily connected with these nations, transactions which either immediately or at some stage of their progress must be extraterritorial. * * * The phrase can never be applied to transactions wholly internal, between citizens of the same community, or to a polity and laws whose ends and purposes and operations are restricted to the territory and soil and jurisdiction of such community. Nor can it be properly concluded that, because the products of domestic enterprise in agriculture or manufactures or in the arts may ultimately become the subjects of foreign commerce, the control of the means of the encouragements by which enterprise is fostered and protected is legitimately within the import of the phrase 'foreign commerce,' or fairly implied in any investiture of the power to regulate such commerce. A pretension as far-reaching as this would extend to contracts between citizen and citizen of the same State, would control the pursuits of the planter, the grazier, the manufacturer, the mechanic, the immense operations of the collieries and mines and furnaces of the country; for there is not one of these avocations the results of which may not become the subjects of foreign commerce and be borne either by turnpikes, canals, or railroads from point to point within the several States toward an ultimate destination, like the one above mentioned. Such a pretension would effectually prevent or paralyze every effort at internal improvement by the several States; for it can not be supposed that the States would exhaust their capital and their credit in the construction of turnpikes, canals, and railroads, the remuneration derivable from which and all control over which might be immediately wrested from them, because such public works would be facilities for a commerce which, while availing itself of those facilities, was unquestionably internal, although intermediately or ultimately it might become foreign.

"The rule here given with respect to the regulation of foreign commerce equally excludes from the regulation of commerce between the States and the Indian tribes the control over turnpikes, canals, or railroads, or the clearing and deepening of watercourses exclusively within the States, or the management of the transportation upon and by means of such improvements."

In New York *v.* Miln (11 Pet., 102, 139) the absolute right of the State in this respect is more clearly and emphatically declared in this language:

"But we do not place our opinion on this ground. We choose rather to plant ourselves on what we consider impregnable positions. They are these: That a State has the same undeniable and unlimited jurisdiction over all persons and things within its territorial limits as any foreign nation where that jurisdiction is not surrendered or restrained by the Constitution of the United States. That by virtue of this it is not only the right, but the bounden and solemn duty, of a State to advance the safety, happiness, and prosperity of its people, and to provide for its general welfare by every act of legislation which it may deem to be conducive to these ends, where the power over the particular subject or the manner of its exercise is not surrendered or restrained in the manner just stated. That all those powers which relate to merely municipal legislation, or what may, perhaps, more properly be called internal police, are not thus surrendered or restrained, and that consequently in relation to these the authority of a State is complete, unqualified, and exclusive.

"We are aware that it is at all times difficult to define any subject with proper precision and accuracy; that if this be so in general, it is emphatically so in relation to a subject so diversified and multifarious as the one which we are now considering.

"If we were to attempt it we should say that every law came within this description which concerned the welfare of the whole people of a State or any individual within it, whether it related to their rights or their duties, whether it respected them as men or as citizens of the State, whether in their public or private relation, whether it related to the rights of persons or of property or of the whole people of the State or any individual within it, and whose operation was within the territorial limits of the State and upon the persons and things within its jurisdiction."

Applying this doctrine to the right of a State to protect and control the flow of water in the streams within its limits, the court said, in Hudson Water Co. *v.* McCarter (209 U. S., 349, 356):

"The problems of irrigation have no place here. Leaving them on one side, it appears to us that few public interests are more obvious, indisputable, and independent of particular theory than the interest of the public of a State to maintain the rivers that are wholly within it substantially undiminished, except by such drafts upon them as the guardian of the public welfare may permit for the purpose of turning them to a more perfect use. This public interest is omnipresent wherever there is a State, and grows more pressing as population grows. It is fundamental, and we are of opinion that the private property of riparian proprietors can not be supposed to have deeper roots. Whether it be said that such an interest justifies the cutting down by statute without compensation, in the exercise of the police power, of what otherwise would be private rights of property, or that apart from statute those rights do not go to the height of what the defendant seeks to do, the result is the same. But we agree with the New Jersey courts, and think it quite beyond any rational view of riparian rights that an agreement, of no matter what private owners, could sanction the diversion of an important stream outside the boundaries of the State in which it flows. * * *

"The right to receive water from a river through pipes is subject to territorial limits by nature, and those limits may be fixed by the State within which the river flows, even if they are made to coincide with the State line."

Respecting the effect of the admission of Wyoming as a State upon a treaty with the Indians by which they were given the right to hunt on the public domain, the court in Ward *v.* Race Horse (163 U. S., 504) used this language:

"The argument now advanced in favor of the continued existence of the right to hunt over the land mentioned in the treaty, after it had become subject to State authority, admits that the privilege would cease by the mere fact that the United States disposed of its title to any of the land, although such disposition, when made to an individual, would give him no authority over game, and yet that privilege continued when the United States had called into being a sovereign State, a necessary incident of whose authority was the complete power to regulate the killing of game within its borders. This argument indicates at once the conflict between the right to hunt in the unoccupied lands within the hunting districts and the assertion of the power to continue the

exercise of the privilege in question in the State of Wyoming in defiance of its laws.

* * *

"The act which admitted Wyoming into the Union, as we have said, expressly declared that that State should have all the powers of the other States of the Union, and made no reservation whatever in favor of the Indians. These provisions alone considered would be in conflict with the treaty if it was so constructed as to allow the Indians to seek out every unoccupied piece of Government land and thereon disregard and violate the State law, passed in the undoubted exercise of its municipal authority. But the language of the act admitting Wyoming into the Union, which recognized her coequal rights, was merely declaratory of the general rule."

As to the limitation of the powers of the Federal Government based upon its proprietory ownership of lands within a State, this is said in Woodruff v. North Bloomfield Gravel Mining Co. (18 Fed. Rep., 753, 772):

"Upon the cession of California by Mexico, the sovereignty and proprietorship of all the lands within its borders in which no private interest had vested passed to the United States. Upon the admission of California into the Union, upon an equal footing with the original States, the sovereignty for all internal municipal purposes, and for all purposes except such purposes and with such powers as are expressly conferred upon the National Government by the Constitution of the United States, passed to the State of California. Thenceforth the only interest of the United States in the public lands was that of a proprietor, like that of any other proprietor except that the State, under the express terms upon which it was admitted, could pass no laws to interfere with their primary disposal, and they were not subject to taxation. In all other respects the United States stood upon the same footing as private owners of land."

Having demonstrated, by reference to the decided cases, the respective rights of the Federal Government and the States in the subject matter of the bill, we proceed to consider the provisions of the bill itself and the bearing of the principles we have discussed above on its terms and conditions.

But before taking up the various provisions of the bill in detail we desire to consider it briefly as a whole.

The bill in its entire scope and purpose is an infringement upon and an usurpation of the sovereign powers of the States. This is not only its effect, but it is the avowed intention of its friends to transfer, in part, at least, from the States to the National Government the control over the use of the waters of the stream within the States. Ostensibly it is proposed to authorize the Government to lease its own lands. To this there are serious objections, as we shall point out further along. But the public lands that may be leased for power sites are of themselves practically worthless. The Government has no ownership or interest in the water flowing in the stream except that of a riparian owner, and that only in States where riparian rights are recognized. In most of the Western States riparian rights are abolished and the ownership of the water vested in the whole people of the State, to be appropriated and applied to beneficial uses, as the laws of the State may provide. The Government owns the land precisely as a private individual owns his land, and with the same rights and privileges as to the use of the water that flows by it—no more, no less. It does not own it in its sovereign capacity, as we have shown, and has no sovereign power over it or over the water that flows past it. But the effect of the bill is to lease, not alone the land it owns, but the waters of the stream upon which it borders, and by conditions and restrictions in the lease to determine how and for what purposes the lessee shall use the water, as well as the land. This is in violation of the principles enunciated by the courts, as above pointed out, and an encroachment upon, and a plain and open violation of, the sovereign rights of the States to govern and control such use.

It is an ingenious effort to fasten upon the private ownership of the land, by the Government, the sovereign right to control the use of the waters, a right that the Government does not possess under the Constitution and can not be given it by statute, and which admittedly does belong to the States. The rental to be paid by the lessee is not based upon the value of the use of the land, but upon the amount of power that can be produced by the water, which belongs to the State, and, as the water, in which the Government has no ownership or interest, is thus leased, the attempt is made to control the use of the thing leased, namely, the water. It may be conceded that the Government, as lessor, and the lessee may agree upon any basis they please in fixing the rental or royalty to be paid. Of this the State could not justly complain. The trouble is that because the Government fixes the amount to be paid for the land by the amount of power that can be produced by the water, over which it can have no right or control, it is attempting to vest in itself the unwarranted power to determine how the water shall be used and what for. Ostensibly this is done to protect the Government, as lessor, and secure to it a compliance, on the part of the lessee, with the terms of the lease. But the intention and the effect of it is to draw to the Federal Government the right to control the use of the water. And this is the matter in controversy. Of this the States have every reason to complain. The granting of any such privilege is a betrayal of the sovereign rights of the State.

If any private owner of lands bordering on a stream should lease his lands for a power site and impose any such terms and conditions, affecting the use of the water, as this bill provides for, they would undoubtedly be inoperative and void. And, as the National Government, in this respect, has only the rights of a private owner, such conditions, made by the Government, would be equally so.

Having submitted these views on the general scope and effect of the bill, we proceed to verify what we have said of it by calling attention to some of its specific provisions.

In its first section the bill authorizes the Secretary of the Interior to lease lands of the Government for the "development, generation, transmission, and utilization of hydroelectric power." The effort is to devote not only the land leased, but the water, to a specific and exclusive purpose, namely, the generation of power. This is a direct violation of the right of the States to regulate and control the use or uses to which water should be applied, and in direct opposition to the policies of the States. In nearly all of the States where irrigation is practiced and in which this law, if enacted, will operate, have, either by direct statutory provisions or rules and regulations adopted by utility commissioners or other authorized official bodies, provided what uses of water shall be preferred over others where the water supply from any source is insufficient to meet all needs, usually in the following order: Domestic use, irrigation, development of power. This whole bill proceeds upon the theory that the Government can fix and designate the use to which the water shall be devoted, in spite of contrary rules fixed by the States. But we apprehend that if such a lease as is proposed were made and the power plant erected, the State could at any time require that the water used for the purpose of generating power be applied to domestic use or irrigation, if the water is needed for that purpose, and the lessee's lease and plant rendered valueless. If not, then the Government has, by its lease and the application of the water to a single and specific use, deprived the State of its undoubted sovereign right to determine the uses to which the water shall be applied. No one can doubt under the authorities we have cited that in a conflict of this kind between the two governments the right of the State to say how and for what purposes water shall be used would be sustained.

The vice of this first section runs through the whole bill. All of its provisions and limitations relate wholly to the use of the water for the generation of power. There is a feeble attempt to remedy this defect by section 20, added as an amendment by this committee, which provides that the plant may be enlarged by the lessee "for the purpose of impounding and conveying water for irrigation, mining, municipal, domestic, and other beneficial purposes." But this does not correct the evil. It is a mere consent of the Government that the water may be used for other purposes if the lessee desires. It is a consent given in a matter over which the Government has no control and about which it has no power either to give or withhold consent. And its consent, when given, amounts to nothing as affecting the use to which the water shall be applied. That is a matter exclusively within the power and jurisdiction of the States.

There is another apparent effort to avoid this and other void provisions in the bill that we will come to directly, by section 14, which provides that it shall not affect or interfere with the laws of any State relating to the control, appropriation, use, or distribution of water. Either this provision must have no effect at all or it will nullify every important provision of the bill, because the whole scope and effect of the bill, as we have shown, directly interferes with such laws of the States.

We now pass to the consideration of other provisions of the bill equally objectionable.

1. LIMITATION OF LEASE TO 50 YEARS.

Any attempt to limit the life of a plant for the distribution and use of water is wholly at variance with the whole theory of water rights in the Western States. Where water is put to use for irrigation, for example, the use must be perpetual and not for a limited term, otherwise a landowner might have the use of the water until his trees are matured then lose his supply, bringing destruction upon his trees and his crops. To prevent this it is provided by statute in most, if not all, of the irrigation States that if a public service corporation shall once supply water to land for irrigation the right to its continued and perpetual use, as an appurtenant to his land, attaches and passes, like other appurtenances, by a conveyance of the land. This is not so important as applied to the use of water for the development of power, except where the power is used, as it is very generally, for the pumping and other means of supplying water for irrigation. In that case it is equally important with the direct supply of water for irrigation.

2. RIGHT TO USE WATER MUST FIRST BE OBTAINED FROM STATE.

It is provided that no lease shall be granted until the right to the water is secured from the State. In some of the States this provision will be impossible of execution, because no right to the water can be obtained from the State until the plant to be used in applying it to a beneficial purpose is completed and approved by the State authorities and then no title to the water is granted, but only a license to use it. For example, in California a water commission is provided for by law. This commission is given complete and plenary power over the appropriation and use of water for any and all purposes. The commission is authorized to investigate all streams and determine the amount of total flow of the different streams in the State, the amount appropriated and in proper and necessary use, and the quantity open to appropriation. Anyone desiring to appropriate water from any stream must apply to this commission and state in his petition therefor certain required facts. Upon a proper showing being made, a permit is issued allowing the construction of proper works for its diversion and distribution.

The statute provides:

"SEC. 16. Every application for a permit to appropriate water shall set forth the name and post-office address of the applicant, the source of water supply, the nature and amount of the proposed use, the location and description of the proposed head works, ditch, canal, and other works; the proposed place of diversion and the place where it is intended to use the water; the time within which it is proposed to begin construction, the time required for completion of the construction, and the time for the complete application of the water to the proposed use. If for agricultural purposes, the applicant shall, besides the above general requirements, give the legal subdivisions of the land and the acreage to be irrigated, as near as may be; if for power purposes, it shall give, besides the general requirements prescribed above, the nature of the works by means of which the power is to be developed, the head and amount of water to be utilized, and the use to which the power is to be applied; if for storage in a reservoir, it shall give, in addition to the general requirements prescribed above, the height of dam, the capacity of the reservoir, and the use to be made of the impounded waters; if for municipal water supply, it shall give, besides the general requirements specified above, the present population to be served, and, as near as may be, the future requirements of the city; if for mining purposes, it shall give, in addition to the general requirements prescribed above, the nature and location of the mines to be served and the methods of supplying and utilizing the water." (Cal. Stat., 1913, pp. 1012, 1021.)

The statute further provides:

"SEC. 19. Immediately upon completion, in accordance with law, the rules and regulations of the State water commission, and the terms of the permit, of the project under such application, the holder of a permit for the right to appropriate water shall report said completion to the State water commission. The said commission shall immediately thereafter cause to be made a full inspection and examination of the works constructed and shall determine whether the construction of said works is in conformity with law, the terms of the approved application, the rules and regulations of the State water commission, and the permit. The said water commission shall, if said determination is favorable to the applicant, issue a license which shall give the right to the diversion of such an amount of water and to the use thereof as may be necessary to fulfill the purpose of approved application." (Cal. Stat., 1913, pp. 1012, 1023.)

So it will be seen that in California the provision that the applicant must first secure the right from the State can have no effect, because his right can not be passed upon until the whole works are completed

and approved by the water commission. And if not approved, the applicant is refused a license to divert and use the water. And under the following provision of the statute all water not appropriated in accordance with the laws of the State is declared to belong to the people:

"And all waters flowing in any river, stream, canyon, ravine, or other natural channel, excepting so far as such waters have been or are being applied to useful and beneficial purpose upon, or in so far as such waters are or may be reasonably needed for useful and beneficial purposes upon lands riparian thereto, or otherwise appropriated, is and are hereby declared to be public waters of the State of California and subject to appropriation in accordance with the provisions of this act." (Cal. Stat., 1913, pp. 1012, 1023.)

3. PROVISION AS TO TIME AND MANNER OF DOING THE WORK OF ESTABLISHING THE PLANT.

This matter is completely covered by State laws, and the provision conflicts directly with those laws. The California statute to which we have referred places in the hands of the water commissioners the power to determine when, where, and how the water shall be applied and continued in actual use. It provides:

"SEC. 12. The State water commission shall have authority to, and may, for good cause shown, upon the application of any appropriator or user of water under an appropriation made and maintained according to law prior to the passage of this act, prescribe the time within which the full amount of the water appropriated shall be applied to a useful or beneficial purpose."

And certain rules for determining what is a reasonable prosecution and completion of the work are laid down for the guidance of the commission. The statute further provides:

"SEC. 18. Actual construction work upon any project shall begin within such time after the date of the approval of the application as shall be specified in said approval, which time shall not be less than 60 days from date of said approval, and the construction of the work thereafter shall be prosecuted with due diligence in accordance with this act, the terms of the approved application, and the rules and regulations of said commission; and said work shall be completed in accordance with law, the rules and regulations of the State water commission and the terms of the approved application, and within a period specified in the permit; but the period of completion specified in the permit may, for good cause shown, be extended by the State water commission. And if such work be not so commenced, prosecuted, and completed, the water commission shall, after notice in writing and mailed in a sealed, postage-prepaid, and registered letter addressed to the applicant at the address given in his application for a permit to appropriate water, and a hearing before the commission, revoke its approval of the application. But any applicant the approval of whose application shall have been thus revoked shall have the right to bring an action in the superior court of the county in which is situated the point of the proposed diversion of the water for a review of the order of the commission revoking said approval of the application."

Thus we have a complete system of regulation in the State intended to secure an early application of the water to a beneficial use. To this end work is required to be commenced in not less than 60 days and prosecuted with due diligence, under rules and regulations prescribed by the commission.

This bill provides in section 2:

"That each lease made in pursuance of this act shall provide for the diligent, orderly, and reasonable development and continuous operation of the water power subject to market conditions."

In other words, the State, admittedly the only authority having jurisdiction over the matter, provides that the work must commence within 60 days, be prosecuted with diligence, and completed under rules and regulations prescribed by the water commission. By this act we fix no time when the work shall be begun, prosecuted, and completed, but require it to be done as the Secretary of the Interior shall prescribe in a lease and subject to market conditions. We have shown that the Federal Government has no power or jurisdiction over this matter of supplying water or power in a State; but if it had, this would involve a conflict of authority between the State and Federal Governments that must lead to conflicts and be intolerable.

4. ALLOWING INTERSTATE COMMERCE COMMISSION TO FIX RATES AND DETERMINE THE ISSUE OF STOCKS AND BONDS.

It is possible that where a corporation is engaged in transmitting power into another State the Federal Government would, because it is interstate business, have power to fix the rates to be charged against consumers, at least in the State to which it is transmitted. It is submitted, however, that it has no such power respecting power furnished by the corporation in its own State. And in no event could the Government justify itself in assuming to control the issue of stocks and bonds of a corporation as against the laws of the State of its creation. This would be an unwarranted exercise of authority based upon the mere fact that the corporation is its tenant, holding Government land within the State. Referring again to California, the railroad commission of the State has authority, conferred upon it by statute, to fix and determine not only the rates to be charged by a corporation furnishing power within the State, but to determine its bond and stock issue and other indebtedness. In other words, that commission has full and ample power to deal with the whole subject. Now it is proposed by this bill to give the same power to a Federal commission. This necessarily brings the two into direct conflict. The power can not be exercised by both Governments. It belongs of right to the State where it is organized and doing business and dealing with the water that belongs to the State and is being supplied to its people. There can be no just or valid claim that this power belongs to the Government, or can properly and legally be vested in it by statute.

5. AUTHORIZING COMBINATION OF PLANTS OR LINES.

The bill provides in section 3 that the Secretary of the Interior, in his discretion, may allow "the physical combination, distribution, and use of power or energy under this act or under leases given hereunder not in violation of law."

By what possible right could the Government, as a mere lessor of land, grant or withhold any such privilege? It is completely within the control and jurisdiction of the State.

Referring again to California. In that State the water can be diverted and used only under a license issued by the water commission after the works are completed, and for the purposes and in the manner the commission shall determine. And thereafter the exercise of the right is under complete control of the State authorities, as we have stated. The statute, after providing for the issuance of the license, further provides:

"All permits and licenses for the appropriation of water shall be under the terms and conditions of this act, and shall be effective for such time as the water actually appropriated under such permits and licenses shall actually be used for the useful and beneficial purpose for which said water was appropriated, but no longer; and every such permit or license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this section and likewise the statement that any appropriator of water, to whom said permit or license may be issued, shall take the same subject to such conditions as therein expressed."

The commission has ample power to determine whether there shall be combinations of plants or lines or not. They are fully authorized to say, in the license granted, whether this shall be done or not. And any effort to place this power, in whole or in part, in a Federal officer is in plain violation of the rights of the States and a usurpation of power.

6. FORBIDDING THE INCUMBRANCE OF THE PROPERTY LEASED.

Section 4 of the bill provides against the incumbrance of the property leased if within a Territory, or where the intention is to transmit power into two or more States, except upon the approval of the Secretary of the Interior for certain purposes.

This is much the same as the last previous question presented. It is, where the property leased is within a State, and it may be the corporation organized under the laws of that State, the assumption of a power that belongs to and, in some of the States, is being actively and satisfactorily exercised. It is no part of the authority, power, or duty of the Federal Government and can not be acquired by the mere proprietary ownership and leasing of lands. The incumbrance may be necessary to carry on the work authorized and required by the State to complete the works and put the water which it owns to a beneficial use. This matter of determining whether the property devoted to a public use shall or shall not be incumbered, and if so, in what amount, belongs exclusively to the State and can not be exercised legally by the Government. To do so is a plain infringement of the sovereign rights of the States. It may prevent a public improvement that the people of the State need and have the right to have.

7. PROVISION AUTHORIZING THE GOVERNMENT TO TAKE OVER THE LAND AT THE EXPIRATION OF THE LEASE.

By this provision the Government is authorized to take over not only the land it has leased but a water-power plant to be used, and which must continue to be used, for the generation of power for public use and to become a public-utility corporation, obligated to operate the plant and supply power to the public. When it assumes this function it becomes at once bound by the contracts and other obligations of the lessee to supply the power. It at once becomes amenable to the State authorities having power to regulate its business. If not, then the effect is to deprive the State of the right to regulate the use of the waters of the State as an exercise of its sovereign power. It may well be asked how, when the National Government becomes a utility corporation, the State can exercise as against it the power it has to regulate rates or otherwise control the use and operation of the plant, even to the extent, as it may, of taking away the use of the water and requiring it to be used for other purposes more necessary for the public good than the development of power. Neither the State nor any consumer under the system could sue the Government or compel it in any way to perform its duty as a public-service corporation. This provision, if not illegal, is, it seems to us, absurd. It would lead to untold and innumerable conflicts of governmental authority and complications.

8. MAKING CONTRACTS FOR POWER.

Section 7 of the bill provides for the making of contracts for power upon the approval of the proper State authority and of the Secretary of the Interior.

We think we have demonstrated above that the Federal Government has no power or jurisdiction over this subject within a State. In this instance the right of the State to deal with it is recognized, but the Secretary of the Interior is given the power to nullify the action of the State in giving its approval by refusing to give his own. So, action by the Secretary of the Interior, an officer who has no jurisdiction in the matter, and can be given none legally, is made necessary to any such action on the part of the utility corporation, for no better reason than that this particular corporation rents its power site from the Government. Other power corporations are not subject to any such limitation or double regulation. The State can not thus be shorn of its sovereign power over the subject matter by the Government in its capacity of a real estate dealer. It can not be possible that a renter from the Government must be subject to two regulating powers and two rules of regulation and other corporations owning their power sites or leasing them from some one else subject to but one. The mere statement of some of the results should be sufficient to condemn this provision.

9. OBJECTIONABLE MEANS OF ARRIVING AT RENT TO BE PAID.

The amount of rent to be paid for the land to be used as a power site is not fixed by the rental or other value of the land, but the amount of power produced by the use of the water belonging to the State. The land in and of itself is practically of no value. The profit, if any, resulting from the use of the water depends upon the rates collected by the corporation for the powers, which must be fixed by the State, if by anybody. In fixing the rates the State must allow the corporation the amount of rental it is required to pay to the Government as a part of its yearly operating expenses. The consumers must pay, not the interest on this amount only, as a part of the capital investment, but must pay it all each year as a part of the fixed annual charges of the company. A reasonable charge by the Government for the use of its land may be justified as a real estate transaction. It is not the exercise of sovereign power. It is nothing but a contract of lease, the same in all material respects as a transaction of a like kind by a private individual, with the Secretary of the Interior acting as the real estate agent. This should be kept constantly in mind. But the basis upon which the rental is founded is a false and unjust one. It compels the consumers of water belonging to the State to pay a charge to the Government that it is unconscionable to make. It compels the people of the State to pay the Government for the use of the water that belongs to them and to which the Government has no right and over which it has no power nor jurisdiction. The whole thing is unjust and unconscionable.

10. DISPOSITION OF PROCEEDS OF THE LEASE.

The injustice of the rental founded on the use of the water is made clear and accentuated by the provision, in the eighth section of the bill, that the proceeds shall be paid one half to the State and the other half to the Reclamation Service. This is clearly unjust to the State. The use of the water that belongs wholly to the State is the valuable thing. The Government has no interest in the water and is entitled to none of its benefits. But it assumes to rent it with the practically worthless land, the people of the State pay back the whole of it to the

corporation, and the Government provides how the rental shall be divided without the approval or consent of the State. This is extending the power of the Federal Government over the sovereign rights of the States with a vengeance.

11. CONTROL GIVEN TO THE GOVERNMENT WHERE STATE HAS NO UTILITY COMMISSION.

In section 9 of the bill it is provided that where a State has no utility commission or other authority having power to regulate rates and service of electrical energy and the issuance of stock and bonds by public-utility corporations engaged in power development, these powers shall be vested in the Secretary of the Interior or committed to such body as may be authorized by Federal statute until such time as the State shall provide a commission or other authority for such regulation and control.

This attempt to vest in an officer of the Federal Government the power to control the power-developing corporations in their service and to determine their issuance of stock and bonds is in violation of the rights of the States and unconstitutional. We have shown that the Federal Government has no power whatever to deal with these questions within a State, and that the power can not be created or conferred by statute. The fact that the State, for the time being, does not exercise the power can not have the effect of vesting it in the National Government. As the power of the Government can be conferred only by the Constitution, and as this was not so conferred, it is reserved to the States. This we submit is beyond question.

12. AUTHORITY TO EXAMINE BOOKS OF LESSEE.

By section 11 the Secretary of the Interior is given authority to examine the books and accounts of the lessees and to require them to submit "statements, representations, or reports, including information as to cost of water rights, lands, easements, and other property acquired, production, use, distribution, and sale of energy; all of which statements, representations, or reports so required shall be upon oath, unless otherwise specified, and in such form and upon such blanks as the Secretary of the Interior may require."

This again is a plain usurpation of the power that belongs to the States. Both the water commission and the railroad commission of the State of California, under its laws, have the right to require all of the information that is provided for in this section. This would subject a corporation that rents from the Federal Government to double examinations and double reports for which the consumers under that particular system must pay while other corporations, not renting from the Government, would be subject to only one examination and one report. Besides, the Government, as a mere lessor, of the property used as a power site, has no interest whatever in any of the things that are required to be reported upon by this section of the bill. As it is proposed to base the rents to be paid for the land upon the amount of power developed—if that be legal and justified, the Government has the right to satisfy itself of the amount of power developed. It has no interest further than that, and any effort to interfere with the business of the corporation or the operation of its plant, which belong alone to the State, is entirely unauthorized.

13. FORFEITURE OF LEASE.

Section 12 provides that this "lease may be forfeited and canceled, by appropriate proceedings, in a court of competent jurisdiction whenever the lessee, after reasonable notice, in writing, as prescribed in the lease, shall fail to comply with the terms of this act or with such conditions not inconsistent therewith as may be specifically recited in the lease."

This would place the lessee in a very unhappy situation. As the State has the undoubted power to regulate the use of the water and the operation of the plant, the lessee might be compelled by State regulations to violate numerous terms provided for in the lease or the regulations of the Secretary of the Interior. Where the power exercised by the Government—and that authority would be exercised by the Secretary of the Interior by this bill—and the State commission should conflict, the unfortunate lessee would have to take his chances of being prosecuted by the State authorities and his right to furnish power forfeited, or to comply with the rules, regulations, and orders of the Federal Government whereby his lease may be subject to forfeiture. This perhaps shows quite as clearly as anything else why it is utterly impossible that the provisions of this statute and the rules and regulations that may be prescribed by the Secretary of the Interior can not by any possibility be allowed to stand as against the sovereign power of the State to regulate and control all these things.

Can the Government by a system of long leases perpetuate its ownership in the States of untaxed lands? We have shown by the decided cases that the Government owns the public lands as a proprietor and not in its sovereign capacity. This is too clearly and firmly established to admit of doubt. In a sense the Government owns the land in trust to dispose of it for use by the citizens of the country. Laws have been enacted, from time to time, providing for their disposition. Until now the national policy has been to convey the absolute title to the land in whatever way it may be disposed of. But it is now proposed to hold the title to the land in the Federal Government and lease it on long leases. This would be a radical change in governmental policy. It is a very important one to the States. The land in the hands of the Government is not subject to taxation by the States.

In the hearings by the committee this startling statement was made by the Senator from Colorado [Mr. SHAFROTH]:

"I believe that any leasing bill for the public domain or resources thereof is a direct attack on the sovereignty of the States containing the same, because it must result in a perpetual ownership of the property in the United States Government. Inasmuch as taxes can not be imposed upon property owned by the Federal Government, it means, to carry it to its ultimate result, the depriving of the States of their means of existence.

"I want to call the attention of the committee to a list contained in an article by Mr. W. V. M. Powelson of the number of acres of land in the various Western States now in the ownership of the Government. In Arizona, 92 per cent of the lands within the area of that State are in Government ownership; California, 52.58 per cent; Colorado, 56.67 per cent; Idaho, 83.80 per cent; Montana, 65.80 per cent; Nevada, 87.82 per cent; New Mexico, 62.83 per cent; Oregon, 51 per cent; Utah, 80.18 per cent; Washington, 40 per cent; Wyoming, 68 per cent."

Thus it is shown that lands in the several Western States ranging from 40 to 92 per cent are held in Government ownership and not subject to taxation by the State. And it is proposed by this and other bills pending in the Senate, making up the system of conservation proposed to be inaugurated, to perpetuate this condition and perpetually deprive the States of the right to tax this large percentage of the lands within its borders to maintain and support the State government. Whether the Government has the power to deal with its lands in that way or not, it must be seen by any observing person that it will be a rank injustice to the States in which these lands are situated. But we go further and maintain that the Government, holding the public lands in trust to dispose of them, has no right or authority to thus perpetuate its ownership of nontaxable lands and withhold them from purchase by the people of the country, where the title should be vested.

Referring again to the case of Pollard's Lessee *v.* Hagan (3 How., 212), one of the leading cases on the subject, and from which we have quoted above, it will be seen that as to the public domain, not including lands acquired for permanent use for the erection of forts, magazines, arsenals, dockyards, and other needful buildings in the District of Columbia, the right and ownership of the land by the Government is "temporary," and so it has always, up to this time, been considered. The theory and understanding has always been that public lands are held by the Government temporarily and in trust to dispose of them and vest the permanent fee simple title in those who might acquire them under rules and regulations prescribed by Congress. It was never intended that title to such lands should be held permanently in the Government, and in our judgment any law that vests this right to permanently hold the lands free from State taxation will be an open violation of the trust under which the lands are held and of the sovereign rights of the States.

At the expense of further extending this already long report, we quote again a short extract from the case last mentioned:

"We will now inquire into the nature and extent of the right of the United States to these lands, and whether that right can in any way affect or control the decision of the case before us. This right originated in voluntary surrenders, made by several of the old States, of their waste and unappropriated lands, to the United States, under a resolution of the old Congress of the 6th of September, 1780, recommending such surrender and cession to aid in paying the public debt incurred by the War of the Revolution. The object of all the parties to these contracts of cession was to convert the land into money for the payment of the debt and to erect new States over the territory thus ceded; and as soon as these purposes could be accomplished the power of the United States over these lands, as property, was to cease.

"Whenever the United States shall have fully executed these trusts the municipal sovereignty of the new States will be complete throughout their respective borders, and they and the original States will be upon an equal footing in all respects whatever. We therefore think the United States hold the public lands within the new States by force of the deeds of cession and the statutes connected with them, and not by any municipal sovereignty which it may be supposed they possess or have reserved by compact with the new States for that particular purpose."

It clearly appears from this decision that the title of the Government in such lands is not permanent, but ceded only for the purpose of disposing of them, and that the Government can not make its title permanent or deprive itself for any length of time of the power to comply with the obligation of its trust to dispose of them.

Will the bill, if enacted, bring the desired results? As stated in the beginning, the purpose of this proposed legislation, as stated by the majority of the committee, is to bring about a speedier development of our undeveloped water power. It may be said that this is a purpose not within the power or jurisdiction of the Federal Government. The whole purpose of the bill, as thus stated, is beyond the power of the Government. It has no undeveloped water power. It is only a landowner in the States and nothing else. The development, as well as the regulation and control of undeveloped water and water power, is a purely State matter. The States alone have power to deal with the subject. The Government may, in its generosity, offer its land to the State, as any other landowner might do, to aid the State to develop its natural resources. It can not constitutionally do anything more. The assumption of some conservationists that the National Government has anything to do, as a Government, with the development of the natural resources in a State is without the slightest foundation. As a landowner it may be interested in such development as a means of increasing the value of the land it holds in trust for the people, but nothing more. It may hinder the State in its efforts to develop its resources by withholding its lands, available for dam, reservoir, or power sites, or by placing burdensome terms and conditions of sale or lease of its lands, if it has power to lease them, as would make it impossible or impracticable to use them for such purposes. But any private landowner might do the same thing and with the same effect.

And we submit that this is just what Congress will do for the Government if it enacts this bill. The terms upon which the Secretary of the Interior is authorized to lease land for power purposes are so unreasonable and burdensome and so clearly in conflict with State rights and State laws as to prevent any prudent business man from investing any money in a power site in any State. He would be unable to determine whether, in constructing and managing his plant, he would be bound by the Federal or State law, or both where they are not in direct conflict. If he obeyed one, in many instances, as we have pointed out, he would violate the other. A compliance with the State law would in some cases forfeit his lease. On the other hand, if he followed the provisions of the lease, particularly as to the time of commencing and completion of his plant, he would, in California at least, forfeit his right to the water, the really valuable thing, and a license to use the water would have to be denied him for failure to comply with the State laws. This would be true in other States as well. We have used California and its laws only as an illustration of the conflicts that would arise between the Government and the States if this bill should pass. The same conflicts would arise in the other Western States.

The present law relating to the use of public lands for power and irrigation purposes is entirely inadequate because of its uncertainty. But this proposed legislation would be infinitely worse, because it is so certainly and fatally wrong. It would, if enacted, soon put an end to any development of water power. Witness after witness, practical and experienced men, appeared before the committee and pointed out that the law would be impractical and unrevokable and prevent investments in enterprises of this kind, and the reasons were clearly pointed out. On the other hand, we had information to the contrary from Government officials who sincerely believed the law would be beneficial; but they could only theorize about a very practical matter. They had no practical knowledge on the subject. There were others who appeared in support of the bill equally sincere, but without knowledge. And the friends of the bill made no effort to sustain its constitutionality

or to defend it against the legal objections that we have been pointing out in this report.

We have given but little attention to the merely business objections made to the bill. To our minds the legal objections to it are so numerous and so conclusive that this is unnecessary. As to this phase of it we refer Senators to the public hearings, that were full and fair. The friends of the bill gave its opponents every opportunity to point out and support their objections to it. These hearings on so important a matter should receive the careful attention of every Senator who desires to be informed on the subject.

For the reasons we have pointed out and for others that may be developed later on, we could not concur in the favorable report on the bill, and submit that it should not pass.

REED SMOOT.
JOHN D. WORKS.
C. D. CLARK.

VIEWS OF SENATOR CHARLES S. THOMAS.

I am unable to accept the reasoning of the minority report in toto, but agree in the conclusions announced. My own view of the proper solution of the so-called water-power problem in the "public-land States" is the transfer by the Government to the States wherein they are located of all power sites upon the public domain in trust, and, conditioned upon their development by the transferers for the use and benefit of the public at rates sufficient to defray the cost of construction and operation, the sites to be forfeited to the General Government upon noncompliance with the terms and conditions of the trust. This insures development, prevents monopoly, and assures to the people an adequate supply of cheap power. It is conservation in the true meaning of the term.

C. S. THOMAS.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CHAMBERLAIN:

A bill (S. 7510) to declare Ollala Slough, in Lincoln County, Oreg., nonnavigable; to the Committee on Commerce.

A bill (S. 7511) for the relief of George W. Mellinger (with accompanying papers); to the Committee on Military Affairs.

By Mr. CATRON:

A bill (S. 7512) to fix the compensation of the pages of the Senate and House of Representatives; to the Committee on Appropriations.

A bill (S. 7513) to acquire and preserve the battle ground of the battle variously known as the Battle of Apache Canyon, Pigeons Ranch, and Glorieta, in the State of New Mexico; to the Committee on Military Affairs.

By Mr. JONES:

A bill (S. 7514) providing for the holding of terms of the district court for the southern division of the western district of the State of Washington at Aberdeen; to the Committee on the Judiciary.

By Mr. STERLING:

A bill (S. 7515) to reserve lands to the Territory of Alaska for educational uses, and for other purposes; to the Committee on Public Lands.

A bill (S. 7516) granting an increase of pension to John Lampke (with accompanying papers); and

A bill (S. 7517) granting an increase of pension to Herbert A. Oliver; to the Committee on Pensions.

By Mr. SHAFROTH:

A bill (S. 7518) to make the gold and silver certificates issued by the United States full legal tender for the payment of all debts, public and private; to the Committee on Banking and Currency.

A bill (S. 7538) granting a pension to Alice Quigley (with accompanying papers); to the Committee on Pensions.

By Mr. KENYON:

A bill (S. 7539) granting an increase of pension to Henry C. Jordan; to the Committee on Pensions.

By Mr. SHIVELY:

A bill (S. 7540) granting an increase of pension to Hazlet A. Jacobs; and

A bill (S. 7541) granting an increase of pension to Elias Lloyd; to the Committee on Pensions.

By Mr. HUGHES:

A bill (S. 7542) granting an increase of pension to John Kelly; to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 7543) to compensate the Delaware Indians for services rendered by them to the United States in various wars; and

A bill (S. 7544) quieting and confirming the title of the Methodist University of Oklahoma in and to certain tracts of land located in the city of Guthrie, Okla.; to the Committee on Public Lands.

A joint resolution (S. J. Res. 231) withholding from allotment the unallotted lands or public domain of the Creek Nation or Tribe of Indians, and providing for the sale or lease thereof, and for other purposes; to the Committee on Indian Affairs.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. WARREN submitted an amendment authorizing the President to retain Maj. Gen. Arthur Murray, United States Army, on the active list of the Army as an additional officer of the line of the Army and as major and as commanding general Western Department, United States Army, from April 25, 1915, etc., intended to be proposed by him to the Army appropriation bill (H. R. 20347), which was referred to the Committee on Military Affairs and ordered to be printed.

Mr. CATRON submitted an amendment proposing that from and after March 4, 1915, the pages of the Senate and House of Representatives shall be paid the sum of $730 per annum in lieu of the compensation which they are now being paid, etc., intended to be proposed by him to the legislative, etc., appropriation bill (H. R. 19909), which was referred to the Committee on Appropriations and ordered to be printed.

Mr. CHAMBERLAIN submitted an amendment providing that not less than $15,000 of the appropriation for the investigation of insects affecting cereal and forage crops shall be set aside for work in the Pacific Northwest, etc., intended to be proposed by him to the Agricultural appropriation bill (H. R. 20415), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. RANSDELL submitted an amendment proposing to appropriate $60,000 for experiments and demonstrations in live-stock production in the cane-sugar and cotton districts of the United States, intended to be proposed by him to the Agricultural appropriation bill (H. R. 20415), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. GORE submitted an amendment proposing to appropriate $50,000 of the funds now on deposit to the credit of the Choctaw Tribe of Indians for constructing and equipping dormitories at the Southeastern State Normal School at Durant, Okla., etc., intended to be proposed by him to the Indian appropriation bill (H. R. 20150), which was referred to the Committee on Indian Affairs and ordered to be printed.

RURAL CREDITS.

Mr. GORE. I submit an amendment intended to be proposed by me to the Agricultural appropriation bill (H. R. 20415), the amendment being Senate bill 7184, the rural credit bill, prepared by the United States Rural Credit Commission, and introduced by the senior Senator from Florida [Mr. FLETCHER]. I ask that the amendment be printed in the RECORD without reading, and referred to the Committee on Agriculture and Forestry.

There being no objection, the amendment was referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

That there shall be in the Department of the Treasury a bureau charged with the execution of all laws passed by Congress relating to the creation and supervision of farm-land banks, the chief officer of which bureau shall be known as the commissioner of farm-land banks, and he shall perform his duties under the general direction of the Secretary of the Treasury.

That the commissioner of farm-land banks shall be appointed by the President, by and with the advice and consent of the Senate, and shall hold office for the term of five years, unless sooner removed by the President upon reasons to be communicated by him to the Senate; and he shall be entitled to a salary of $6,000 a year.

The commissioner of farm-land banks shall, within 15 days of notice of his appointment, take and subscribe the oath of office, and he shall give to the United States a bond in the penalty of $50,000, with surety or sureties to be approved by the Secretary of the Treasury, conditioned for the faithful discharge of the duties of his office.

That the Secretary of the Treasury may appoint one deputy commissioner, who shall be entitled to a salary of $3,500 per year, and who shall possess such powers and perform such duties under the commissioner as the commissioner may direct. During a vacancy in the office of the commissioner, or during his absence or inability, the deputy commissioner shall possess the powers and perform the duties attached by law to the office of the commissioner. The deputy commissioner shall take the oath of office, and shall give a like bond in the penalty of $50,000, with surety or sureties to be approved by the Secretary of the Treasury.

That the commissioner of farm-land banks shall adopt a seal of office to be approved by the Secretary of the Treasury, a description of which seal, together with an impression thereof and a certificate of approval thereof signed by the Secretary of the Treasury, shall be filed in the office of the Secretary of State.

That there shall be assigned from time to time to the commissioner of farm-land banks by the Secretary of the Treasury rooms for conducting the business of the bureau of farm-land banks, containing safe and secure fireproof vaults, in which the commissioner shall keep all original articles of association and other valuable documents and things belonging to his department; and the commissioner shall from time to time furnish the necessary furniture, stationery, and other proper conveniences for the transaction of the business of his office.

The commissioner shall employ from time to time the necessary clerks, to be appointed and classified by the Secretary of the Treasury, to discharge such duties as the commissioner shall direct.

That it shall not be lawful for the commissioner or deputy commissioner, or for any clerk employed in the bureau of farm-land banks, either directly or indirectly, to be interested in any farm-land bank formed pursuant to the provisions of this act.

That the commissioner shall make an annual report to Congress at the commencement of its session, exhibiting—

First. A summary of the state and condition of every farm-land bank from which reports have been received during the preceding year, at the several dates to which such reports refer, with an abstract of the whole amount of mortgages or deeds of trust held by them and collateral trust bonds (hereinafter described as national land-bank bonds) issued by them, the whole amount of their other assets and liabilities, the amount of their capital stock, and such other information in relation to such associations as in his judgment may be useful or as may be requested by Congress.

Second. A statement of the associations whose business has been closed during the year, with the amount of their mortgages or deeds of trust and of their national land-bank bonds redeemed and the amount outstanding.

Third. Any other information which he may deem desirable to present and such special information as may be called for by Congress.

Fourth. The names and compensation of the clerks employed by him, and the whole amount of the expenses of the bureau of farm-land banks during the year, together with a full and complete list of all officers, agents, clerks, and other employees of his office, including examiners, receivers, and attorneys for receivers, and clerks employed by them, or any other person connected with the work of said bureau in Washington or elsewhere whose salary or compensation is paid from the Treasury of the United States or assessed against or collected from existing or failed companies under supervision or control.

When the annual report provided for in the last section is completed, or while it is in process of completion, if thereby the business may be sooner dispatched, the work of printing shall be commenced under the superintendence of the Secretary of the Treasury, and the whole shall be printed and ready for delivery on or before the 1st day of December next after the close of the fiscal year to which the report relates. There shall be printed not to exceed 10,000 copies; 1,000 for the Senate, 2,000 for the House, and the remainder for distribution by the commissioner.

That within 90 days after the approval of this act, or as soon thereafter as may be, the Secretary of the Treasury shall formulate and adopt plans, rules, and regulations governing the operations of the bureau of farm-land banks in accordance with this act, which plans, rules, and regulations shall be enforced by the said commissioner of farm-land banks.

POWERS OF COMMISSIONER OF FARM-LAND BANKS.

That the commissioner of farm-land banks is authorized and empowered within his discretion, upon proper application, to issue charters or certificates of incorporation for the establishment of national farm-land banks as herein provided for, and to exercise supervision and control over, and to require examinations of, all of the national farm-land banks established under this act, under such general rules and regulations as the Secretary of the Treasury may prescribe, and to withdraw or forfeit such charters or liquidate such banks as hereinafter provided, subject in all respects to the requirements and provisions herein contained. The commissioner shall perform such other duties as the Secretary of the Treasury may assign.

That the said commissioner of farm-land banks is hereby authorized, by general rules and regulations to be approved by the Secretary of the Treasury, applicable alike to all national farm-land banks organized hereunder, to specify the conditions under which the privileges herein authorized (by section 34 of this act) to be granted to said national farm-land banks shall be extended to such banks, and particularly to provide for the extension of such privileges only to national farm-land banks operating in those States which, by the passage of suitable laws, have met the requirements of the said commissioner of farm-land banks (first) as to the simplification of land-title registration and conveyancing, (second) as to the simplification, promptness, and economy of methods of securing farm-land loans and of foreclosing the same, and as to other matters, as more fully set out in section 34 of this act. And the said commissioner of farm-land banks shall have the power, with the approval of the Secretary of the Treasury, to specify the time when such rules and regulations, or certain of them, shall go into effect, and the time within which such conditions, or certain of them, must be complied with, and to extend such time and to withhold such privileges, or certain of them, from the national farm-land banks operating in any State failing to comply with the required provisions and regulations until the same are fully complied with.

That the commissioner of farm-land banks, by and with the approval of the Secretary of the Treasury, shall from time to time prepare and publish amortization tables covering periods of from 6 to 35 years, at varying rates of interest, to meet all the requirements of the banks organized hereunder. Such tables shall be adopted and used by all of such banks as the basis of all repayments of long-term mortgage loans herein provided for.

INCORPORATION OF NATIONAL FARM-LAND BANKS.

That the associations for carrying on the business of farm-land banking under this act may be formed by any number of natural persons, not less in any case than 10. They shall enter into articles of association, which shall specify in general terms the object for which the association is formed, and may contain any other provisions not inconsistent with law which the association may see fit to adopt for the regulation of its business and the conduct of its affairs. These articles shall be signed by the persons uniting to form the association, and a copy of them shall be forwarded to the commissioner of farm-land banks to be filed and preserved in his office.

That the persons uniting to form such a national farm-land bank shall, under their hands, make an organization certificate, which shall specifically state:

First. The name assumed by such association. The words "national farm-land bank" shall be a part of the title of every such institution, and these words shall not be used by any institution other than those incorporated under this act: *Provided, however,* That if the persons uniting to form such a national farm-land bank shall wish to apply cooperative principles in the formation and management of the same, the words "national farm-land bank, cooperative," shall be a part of the title; and the word "cooperative" shall not be used by any national farm-land bank other than those which accept the following principles and provide in their by-laws that—

(a) No stockholder shall own more than 10 per cent of the share capital at any time.

(b) At all meetings of the stockholders of such banking corporation each stockholder shall have one vote and only one on all matters pertaining to the organization or management of the institution, irrespective of the number of shares of stock owned by such stockholder.

(c) The net earnings of such banking corporation available and set aside for the payment of interest and dividends shall be distributed as provided in section 37 of this act.

(d) In all other respects such national farm-land banks, cooperative, shall conform to and be governed by the general laws as herein provided.

The words "national farm-land bank" or "national farm-land bank, cooperative," shall be prefixed by such descriptive title or name as the applicants may indicate, subject of the approval of the commissioner of farm-land banks. Each said national farm-land bank shall be designated by an official number provided by the commissioner of farm-land banks.

Second. The State in which the operations of such national farm-land banks are to be carried on, and the place in said State where its principal office is to be located, which place may be changed from time to time upon the request of such national farm-land bank, with the approval of the commissioner of farm-land banks.

Third. The amount of capital stock and the number of shares into which the same is to be divided: *Provided,* That such capital stock shall in no case be less than $100,000: *And provided further,* That such capital stock may be increased or decreased from time to time, subject to the approval of the commissioner of farm-land banks, but at no time to be less than the minimum herein set forth.

Fourth. The names and places of residence of the shareholders and the number of shares held by each of them.

Fifth. The fact that the certificate is made to enable such persons to avail themselves of the advantages of this act.

That the organization certificate shall be acknowledged before a judge of some court of record, or before a notary public, and shall be, together with the acknowledgment thereto, authenticated by the seal of such court or notary public, transmitted to the commissioner of

farm-land banks, who shall record and carefully preserve the same in his office.

POWERS AND LIMITATIONS OF NATIONAL FARM-LAND BANKS.

GENERAL POWERS.

That upon duly making and filing the articles of association and an organization certificate the association shall become, as from the date of the execution of its organization certificate, a body corporate; and as such, and in the name designated in the organization certificate, shall have power:

First. To adopt and use a corporate seal.

Second. To have succession for the period of 50 years from its organization, unless it is sooner dissolved according to the provisions of its articles of association or by the act of its shareholders owning two-thirds of its capital stock or unless its franchise becomes forfeited by some violation of law, except that, in the case of cooperative farm-land banks, a vote of two-thirds of the stockholders shall be necessary: *Provided*, That the charters of all national farm-land banks shall be at all times subject to change, amendment, or repeal under general laws enacted by Congress: *Provided*, That no such change, amendment, or repeal shall in any way affect the rights of the creditors of such national farm-land banks.

Third. To make contracts.

Fourth. To sue and be sued, complain and defend, in any court of law and equity as fully as natural persons.

Fifth. To elect or appoint not less than five nor more than nine directors, and by its board of directors to appoint a president, vice president, and other officers, to define their duties, require bonds of them, and fix the penalty thereof, dismiss such officers or any of them at pleasure, and appoint others to fill their places: *Provided*, That the officer herein described as Federal fiduciary agent shall not be subject to removal by the board of directors or officers of said bank, but shall be subject to removal only by the commissioner of farm-land banks.

Sixth. To prescribe by-laws not inconsistent with law regulating the manner in which its stock shall be transferred, its directors shall be elected or appointed, its officers elected or appointed, its property transferred, its general business conducted, and the privileges granted to it by law exercised and enjoyed, except that in the case of cooperative farm-land banks the by-laws shall be approved by two-thirds of the stockholders before being adopted and put into effect.

Seventh. To exercise by its board of directors or duly authorized officers or agents, subject to law, all such incidental powers as shall be necessary to carry on the business of farm-land banking: *Provided*, That the powers of such association shall include the following specific powers and shall be subject to the following specific restrictions:

A. SPECIFIC POWERS.

Every national farm-land bank shall have the following specific powers:

(a) To make loans upon farm lands anywhere within the State in which such national farm-land bank is operated: *Provided*,

First. That such loans are made for not more than 35 years.

Second. That such loans are secured by a first mortgage or first deed of trust on farm lands within the State in which the bank is operated.

Third. That such loans shall be made for any of the following purposes: (a) To complete the purchase of the agricultural lands mortgaged; (b) to improve and equip such lands for agricultural purposes; (c) to pay and discharge debts secured by mortgages or deeds of trust on such lands.

Fourth. That such loans do not exceed 50 per cent in amount in the case of improved farm lands, and do not exceed 40 per cent in amount in other cases, of the value of the said lands; to be determined by an appraisal, as provided in this act.

Fifth. That every such mortgage shall contain an agreement for the reduction of the face of the loan so secured through annual or semi-annual amortization payments: *Provided*, That the loan extends over a period exceeding five years.

Sixth. That every such loan made under this act shall provide for its extinguishment, at the option of the borrower, in whole or in part, at any date set for the payment of interest after five years from the date upon which the said loan was made, by the payment of cash or by the tender of national land-bank bonds hereinafter provided for as specified in section 46 of this act.

(b) To issue, sell, and trade in its own collateral trust bonds which shall be known and described as "national land-bank bonds" secured by the deposit, as elsewhere herein provided, of first mortgages or first deeds of trust (and of notes or bonds secured thereby), in an amount equal at least to the face value of the national land-bank bonds so issued and sold by the said bank: *Provided*,

First. That no such national farm-land banks or national farm-land bank, cooperative, shall issue or sell any bonds until it shall have made application for suitable authority and permission from the commissioner of farm-land banks. Such application shall state the amount of the series desired to be issued and the denominations preferred by the bank. Such bonds shall be issued in series of $20, $50, $100, $500, and $1,000, and shall run for specified maximum periods. No series shall be authorized of less than $50,000. Any such farm-land bank may advertise for bids on any proposed series of national farm-land bonds or fractional part thereof in advance of making application to the commissioner of farm-land banks for authority to issue such series.

Second. That the rate of interest upon the farm-land loans evidenced by the mortgages or deeds of trust held by the bank as security for its own national land-bank bonds shall not exceed the rate of interest paid on such national land-bank bonds by more than 1 per cent annually upon the amount unpaid on the loan, which said 1 per cent shall cover all charges of administration.

Third. That all national land-bank bonds issued by the said bank shall be payable on a date specified and shall be subject to call at par, at any interest period, after the date of issue, or after a specified time, by such proper notice and advertisement as may be provided by the commissioner of farm-land banks. Such bonds shall have interest coupons attached, and the bonds and coupons shall be payable to bearer.

Fourth. That such national land-bank bonds shall be always protected by the deposit, as security therefor, of at least an equal amount in valid face value of first mortgage or first deed of trust farm loans (and of notes or bonds secured thereby), maturing not less than five years after their date.

Fifth. That as the amortization payments are credited upon the first mortgage or first deed of trust farm loans so deposited as security, the national land-bank bonds issued by the bank and secured thereby shall be called and paid, or purchased in the open market and retired, to the extent of the credits made upon such first mortgage or first deed of trust farm loans held as security for the same, under rules and regulations made by the commissioner of farm-land banks: *Provided*, That all amortization payments, after being noted on the documents and entered, shall be deposited as a separate fund, and semi-annually, on the 1st days of January and July of each year, shall be applied to retiring national land-bank bonds in the amount of the sum total of such payments then on hand in the manner herein provided: *Provided further*, That the land bank, with the approval of the commissioner of farm-land banks, may substitute first mortgages or first deeds of trust of the same kinds and descriptions as those reduced by such amortization payments in amounts equal to the gross amortization payments received by the bank.

Sixth. That the first mortgage or first deed of trust farm loans (and the notes and bonds secured thereby) held as security for such national land-bank bonds shall at all times be in the joint possession and under the joint control of the said bank and of the Federal fiduciary agent hereinafter provided for, and that a register of such first mortgages or first deeds of trust shall be at all times kept by the bank, entries or cancellations in which shall only be made with the approval in writing of such Federal fiduciary agent. When it becomes necessary to foreclose a mortgage or enforce the terms of a deed of trust by legal proceedings, such mortgage or deed of trust may be withdrawn for such purpose, and there shall be immediately substituted in its place another mortgage or deed of trust, approved and accepted in the regular way, in equal amount, or national land-bank bonds in like amount shall be purchased to cover the withdrawn security and the surplus and capital of the bank may be used for such purpose, to be reimbursed, as far as may be, from the proceeds resulting from such legal proceedings.

Seventh. That no national land-bank bond shall be issued against any mortgage or deed of trust (or notes or bonds secured thereby) which falls due earlier than five years after its date.

(c) To use its capital stock, surplus, and deposits as a revolving fund for the negotiation of such first mortgage or first deed of trust farm loans, or to use the same for the purpose of buying in its national land-bank bonds and of holding them temporarily, or to loan its capital and surplus on first mortgages or first deeds of trust for a period not exceeding five years: *Provided*, That not to exceed 50 per cent of such capital and surplus may be permanently invested in such national land-bank bonds and the remainder of the capital and surplus can be permanently invested only in United States Government bonds, in the bonds of the State in which such bank is operating, or in such other securities as may be approved by the commissioner of farm-land banks.

B. SPECIFIC LIMITATIONS.

Every national farm-land bank shall be subject to the following specific limitations:

(a) The amount of national land-bank bonds that may be issued and outstanding at any one time by such national farm-land bank shall not exceed fifteen times its capital and accumulated surplus.

(b) The charges of administration imposed by such national farm-land bank upon the borrower for handling such loan shall not in each instance exceed an annual charge of 1 per cent upon the amount unpaid on the loan.

(c) The payments to be made annually or semiannually by the borrower shall in all cases be sufficient to pay the interest charge upon the loan, the administration charges of the bank, and an amortization payment sufficient to retire and pay off the amount of the principal borrowed (as evidenced by the face of said first mortgage or first deed of trust and the notes or bonds secured thereby), at its maturity.

(d) No national farm-land bank shall at any time loan to, or on the credit of, any one individual or institution, either on the security of land or on any other security, an amount in excess of 20 per cent of the sum of its then paid-in capital and surplus.

Eighth. But no national farm-land bank shall transact any business except such as is incidental and necessarily preliminary to its organization until it has been authorized to commence business by the commissioner of farm-land banks.

HOLDINGS OF REAL ESTATE.

That a national farm-land bank may purchase, hold, and convey real estate for the following purposes and for no others:

First. A suitable banking house for the transaction of its own business, which, however, may be in part leased to others for revenue purposes.

Second. Such as shall be mortgaged to it by way of security for loans made by it, as elsewhere herein provided.

Third. Such as shall be conveyed to it in satisfaction of debts contracted in the course of business dealings.

Fourth. Such as it shall purchase at sale under judgments, decrees, or mortgages or deeds of trust, held by the bank, or shall purchase to secure debts due to it.

But no such bank shall hold the title and possession of any real estate conveyed to or purchased by it to secure any debts due to it for a longer period than five years.

EXEMPTION FROM TAXATION.

That every national farm-land bank incorporated under the terms of this act and the capital stock and surplus therein and the income derived therefrom and the mortgages and deeds of trust (and the notes and bonds secured thereby) held by said bank and the national land-bank bonds issued by the same shall be exempt from Federal, State, and local taxation, except in respect to taxes upon real estate.

FEDERAL FIDUCIARY AGENT.

That the commissioner of farm-land banks shall, at the time of organization of each national farm-land bank, appoint a competent individual who is not an officer or director of any farm-land bank as a "Federal fiduciary agent" for that bank. As such Federal fiduciary agent he shall have the following powers and perform the following duties:

First. He shall certify to each national land-bank bond issued by the said bank, and no national land-bank bond issued without his signature shall be binding upon the said bank.

Second. He shall have joint possession and control with the bank of the mortgages and deeds of trust (and of the notes and bonds secured thereby) which are deposited as security for the national land-bank bonds issued by the bank, and no mortgage or deed of trust (or note or bond secured thereby) so placed in the joint possession of himself and the said bank shall be withdrawn or changed or have any credit made thereon except by and with his consent in writing.

Third. He shall have the supervisory control of all entries in the mortgage ledger kept by the bank, in which ledger shall be kept a detailed statement of each issue of national land-bank bonds made by the bank, and of all the mortgages or deeds of trust (and notes or bonds

secured thereby) held by the bank and himself jointly, to secure the national land-bank bonds of the bank, as well as such other information as may be required by the bureau of farm-land banks.

Fourth. He shall execute such bond with such security as may be required by the commissioner of farm-land banks. The salary and expenses of said Federal fiduciary agent shall be fixed by the commissioner of farm-land banks and shall be paid by the national farm-land bank with which he is acting: *Provided*, That where the same individual shall be appointed as fiduciary agent for two or more farm-land banks his salary shall be prorated among the several banks in proportion to their paid-up capital and surplus.

CAPITAL STOCK.

That the shares of stock of each national farm-land bank shall be of the par value of $100 each, and each stockholder shall be entitled to one vote for each share of stock standing in his name: *Provided, however*, That in the case of national farm-land banks, cooperative, each stockholder shall be entitled to one vote, and only one, and the shares of stock may be of the par value of $25 each. Shareholders may vote by proxies duly authorized in writing; but no officer, clerk, or employee of such bank shall act as proxy, and no shareholder whose liability is past due or unpaid shall be allowed to vote. Any national farm-land bank may, in its by-laws, authorize cumulative voting for directors.

That at least 50 per cent of the capital stock of every national farm-land bank shall be paid in before it shall be authorized to do business, and the remainder of the capital stock of said bank shall be paid in in installments of at least 10 per cent each on the whole amount of the capital as frequently as one installment before the end of each succeeding year from the time it shall be authorized by the commissioner of farm-land banks to commence business, and the payment of each installment shall be certified to the commissioner of farm-land banks, under oath, by the president or cashier of the bank.

That whenever any shareholder or his assignee fails to pay any installment on the stock when the same is required by the preceding section to be paid, the directors of such bank may sell the stock of such delinquent shareholder at public auction, having given three weeks' previous notice thereof in a newspaper of general circulation published in the city or county where the bank is located—or if no newspaper is published in said city or county, then in a newspaper published nearest thereto—to any person who will pay the highest price therefor, to be not less than the amount due thereon, with the expenses of advertisement and sale; and the excess, if any, shall be paid to the delinquent shareholder. If no bidder can be found who will pay for such stock the amount due thereon to the association and the cost of advertisement and sale, the amount previously paid shall be forfeited to the association, and such stock shall be sold as the directors may order, within six months from the time of such forfeiture; and if not sold it shall be canceled and deducted from the capital stock of the association. If any such cancellation and reduction shall reduce the capital of the association below the minimum of the capital required by law, or below one-fifteenth of its outstanding national land-bank bonds, the capital stock shall, within 30 days from the date of such cancellation, be increased to the required amount, in default of which a receiver may be appointed, according to the provisions of section 5234 of the Revised Statutes, so far as it may be applied hereto, to close up the business of such bank.

That any bank formed under this act may, by its articles of association, provide for an increase of its capital from time to time, as may be deemed expedient, subject to the limitations of this act. But the maximum of such increase to be provided in the articles of association shall be approved by the commissioner of farm-land banks; and no increase of capital shall be valid until the total amount of such increase is paid in and until notice thereof has been transmitted to the commissioner of farm-land banks, who shall thereupon issue to such bank his certificate, specifying the amount of such increase of capital stock, with his approval thereof, and after it has been duly paid in it shall be treated as part of the capital stock of such association.

That any bank formed under this act may, by the vote of shareholders owning two-thirds of its capital stock, or in the case of national farm-land banks, cooperative, by the vote of two-thirds of the stockholders, reduce its capital to any sum not below the amount required by this act to authorize the formation of such a bank; but no such reduction shall be allowed which will reduce the capital and surplus of the association below one-fifteenth of its outstanding national land-bank bonds as herein provided; nor shall any such reduction be made until the amount of the proposed reduction has been reported to and approved by the commissioner of farm-land banks.

BOARD OF DIRECTORS.

That the affairs of each bank shall be managed by not less than five nor more than nine directors. All directors shall be elected by the shareholders at a meeting to be held at any time before the association is authorized by the commissioner of farm-land banks to commence business, and afterwards at meetings to be held on any such date in January of each year as is specified therefor in the articles of association. The directors shall hold office for one year and until their successors are elected and qualified.

That every director must, during his whole term of service, be a citizen of the United States, and at least three-fourths of the directors must reside in the State or Territory in which the bank is located for at least one year immediately preceding their election, and must be residents therein during their continuance in office. Every director must own, in his own right, at least five shares of the capital stock of the bank of which he is a director. Any director who ceases to be the owner of five shares of stock, or who becomes in any other manner disqualified, shall thereby vacate his place.

That each director, when appointed or elected, shall take an oath that he will, so far as the duty devolves on him, diligently and honestly administer the affairs of such bank, and will not knowingly violate or willingly permit to be violated any of the provisions of this act, and that he is the owner in good faith, and in his own right, of the number of shares of stock required by this act, subscribed for by him or standing in his name on the books of the bank, and that the same is not hypothecated or in any way pledged as security for any loan or debt. Such oath subscribed by the director making it, and certified by the officer before whom it is taken, shall be immediately transmitted to the commissioner of farm-land banks and shall be filed and preserved in his office.

That any vacancy in the board shall be filled by appointment by the remaining directors, and any director so appointed shall hold his place until the next election.

That if, from any cause, an election of directors is not made at the time appointed, the bank shall not for that cause be dissolved, but an election may be held on any subsequent day, 30 days' notice thereof in all cases having been given in a newspaper published in the city, town, or county in which the bank is located; and if no newspaper is published in such city, town, or county, such notice shall be published in a newspaper published nearest thereto. If the articles of association do not fix the day on which the election shall be held, or if no election is held on the day fixed, the day for the election shall be designated by the board of directors; or if the directors fail to fix the day, shareholders representing two-thirds of the shares may do so, or in the case of national farm-land banks, cooperative, two-thirds of the stockholders may do so.

That one of the directors to be chosen by the board shall be the president of the board. One or more vice presidents shall likewise be chosen by the board.

LIABILITY OF STOCKHOLDERS.

That the shareholders of every national farm-land bank shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such bank, to the extent of the amount of their stock therein, at the par value thereof, in addition to the amount invested in such shares, unless, in the case of national farm-land banks, cooperative, by a two-thirds vote of the stockholders a larger liability shall be undertaken, and in every such case, when a greater degree of liability is assumed by any national farm-land bank, cooperative, the degree of such liability shall be set forth on the face of all farm-land bonds issued by such bank.

That persons holding stock as executors, administrators, guardians, or trustees shall not be personally subject to any liabilities as stockholders; but the estates and funds in their hands shall be liable in like manner and to the same extent as the testator, intestate, ward, or person interested in such trust funds would be if living and competent to act and hold the stock in his own name.

CONVERSION OF EXISTING LAND-MORTGAGE COMPANIES AND OTHER STATE INSTITUTIONS INTO NATIONAL FARM-LAND BANKS.

That any land-mortgage association or corporation, or any similar institution, including building and loan associations or savings and loan associations lending exclusively on farm mortgages, now incorporated under the general or special laws of any State, may become a national farm-land bank under this act, under a suitable name, upon complying with the provisions of this act; and in such case the articles of association and the organization certificate may be executed by a majority of the stockholders of the existing institution, and the certificate shall declare that the owners of two-thirds of the capital stock of the old institution have authorized the directors to make such certificate and to change and convert the institution into a national farm-land bank. The majority of the directors, after executing the articles of association and organization certificate, shall have power to execute all other papers and to do whatever may be required to make its organization perfect and complete as a national farm-land bank. The directors of the old company may continue to be the directors of the national farm-land bank until others are elected or appointed, in accordance with the provisions of this chapter. When the commissioner of farm-land banks has given to such association a certificate under his hand and official seal, after the provisions of this bill have been complied with and after it is authorized to commence the business of farm-land banking, the bank shall have the same powers and privileges and shall be subject to the same duties, responsibilities, and rules, in all respects, as are prescribed for other banks originally organized as national farm-land banks, and shall be held and regarded as such a national farm-land bank; but no such bank shall have a less capital than the amount prescribed for national farm-land banks organized under this act, and no such corporation shall be authorized to do business as a national farm-land bank until the amount of its outstanding collateral trust bonds is so reduced that it does not exceed fifteen times the capital and surplus of the said bank and until it complies in all other respects with the provisions of this act.

PRIVILEGES GRANTED TO NATIONAL FARM-LAND BANKS.

That the national land-bank bonds of any national farm-land bank shall be available for the following purposes:

First. As security for the deposit of postal savings funds in all banks authorized to receive such deposits.

Second. As a legal investment for time deposits of national banking associations, as provided in the Federal reserve act, and for the funds accumulated in savings banks organized and doing business in the District of Columbia.

Third. As a legal investment for trust funds and estates under the charge of or administered by any of the courts of the United States.

Fourth. As a security for loans from national banking associations to national farm-land banks or to individuals, for not exceeding five years, to an amount aggregating not over 25 per cent of the capital and surplus or to one-third of the time deposits of the national banking association making such loan. Such loans to be made and held by the national banking association making the same, as being within the provisions of section 24 of the Federal reserve act, so as to permit national banking associations to lend to national farm-land banks, on their obligations secured by their national land-bank bonds, in place of making the loan directly on farm lands, as provided for in said section.

The foregoing privileges (or such of them as the commissioner of farm-land banks, with the approval of the Secretary of the Treasury, may, by general rules applicable to all banks organized hereunder, from time to time designate), shall apply to national land-bank bonds issued under authority of this act, only as and when the following conditions (or such of them as the commissioner of farm-land banks, with the approval of the Secretary of the Treasury, may from time to time by like general rules designate) are likewise put into effect in any State or States.

(a) That laws decided to be sufficient by the bureau of farm-land banks have been enacted by the State in which such national farm-land bank is operating, withdrawing, or canceling the right to claim exemption, or providing for the waiver of such exemption, whether homestead or otherwise, against the mortgages or deeds of trust (or notes or bonds secured thereby), held as security for the national land-bank bonds of such national farm-land bank: *Provided*, That if the right to waive such exemption is given, then that all the mortgages or deeds of trust (and bonds or notes secured thereby) deposited as security for such national land-bank bonds contain such waiver.

(b) That in the judgment of the commissioner of farm-land banks, the State laws providing for registration of land titles, conveyances, and foreclosures in any given State are such as to give reasonable protection to the holders of first mortgages and first deeds of trust on lands located within that State.

(c) That the national land-bank bonds of all national farm-land banks, which are accepted under this law as security in the various matters above set out, shall be likewise accepted, under the State laws of the State in which such national farm-land bank is operated, as a legal investment for the funds of savings banks operating in that State, and of trust funds and estates held by or under the control of the courts of that State, and as a legal investment for the reserves of insurance companies incorporated under or operating under the laws of that State.

EXAMINATIONS.

That there shall be appointed by the commissioner of farm-land banks examiners, subject to the approval of the Comptroller of the Currency. The said examiners shall be named in the same manner and shall be subject to the same requirements, responsibilities, and penalties as are applicable to national-bank examiners under the national-bank act, the Federal reserve act, and other provisions of law. The said examiners shall be required to examine the condition of every national farm-land bank and report the same to the commissioner of farm-land banks at least twice each year.

The said examiners shall receive salaries to be fixed by the Comptroller of the Currency, which shall be paid by the Secretary of the Treasury out of any money in the Treasury not otherwise appropriated.

Any examiner accepting a loan or gratuity from any bank or association examined by him, or from an officer, director, or employee thereof, shall be deemed guilty of a misdemeanor and shall be imprisoned not exceeding one year or fined not more than $5,000, or both, and may be fined a further sum equal to the money so loaned or gratuity given, and shall forever thereafter be disqualified from holding office as an examiner under the provisions of this section. No examiner shall perform any other service for compensation while holding such office for any bank or officer, director, or employee thereof.

Other than the usual salary or director's fee paid to any officer, director, or employee of a national farm-land bank, and other than a reasonable fee paid by said association or bank to such officer, director, or employee for services rendered, no officer, director, employee, or attorney of an association or bank shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of such association or bank. No examiner, public or private, shall disclose the names of borrowers to other than the proper officers of a farm-land bank without first having obtained express permission in writing from the commissioner of farm-land banks or from the board of directors of such association or bank, except when ordered to do so by a court of competent jurisdiction or by direction of the Congress of the United States, or of either House thereof, or any committee of Congress or of either House duly authorized. Any person violating any provision of this section shall be punished by a fine of not exceeding $5,000 or by imprisonment not exceeding one year, or both.

That the commissioner of farm-land banks shall require statements showing the condition of each bank to be published in a newspaper or newspapers published in the vicinity where the bank is located at such times as calls for such statements may be made by him, and in general conformity with the practice as to call for statements from national banking associations by the Comptroller of the Currency: *Provided*, That in the discretion of the Secretary of the Treasury any or all examinations of national farm-land banks may be made by examiners who are commissioned to examine national banking associations.

DIVIDENDS.

That the directors of each national farm-land bank shall be authorized to declare a dividend upon the outstanding and paid-up capital stock of such an institution out of the net earnings of the same: *Provided*, That in no case shall any dividend be paid which will impair the capital stock of the said institution, nor shall any dividend be paid which will reduce the amount of capital and surplus of each bank to less than one-fifteenth of the outstanding national land-bank bonds of the said bank: *Provided*, That no dividend in excess of 6 per cent annually shall be declared by any national farm-land bank until it shall have accumulated a surplus of at least 15 per cent of its authorized capital: *And provided further*, That in the case of cooperative farm-land banks the net earning of such banking corporations available and set aside for the payment of interest and dividends shall be distributed as follows: To each owner of stock of such corporation may first be paid a dividend in the form of interest upon the par value of the shares of stock owned by such owner of stock, but not exceeding 6 per cent per annum, if said net earnings are sufficient for that purpose; otherwise, to be paid to each owner of such stock pro rata computed upon the par value of such stock. The balance of such net earnings, if any, shall be distributed among the patrons of such banking corporation in proportion to the amount of business transacted with such bank: *Provided, however*, That in such distribution the share-owning patrons may, if approved by a two-thirds vote, take dividends at a rate twice as great as that paid to nonshare-owning patrons: *Provided further*, That no dividend shall be paid until a special reserve fund shall be earned and maintained by each national farm-land bank, which special reserve fund shall be created out of the net earnings of the bank and shall at all times be equal to 5 per cent of the total annual interest charge on the land-bank bonds which are outstanding against such bank at the close of the last fiscal year. Such special reserve fund may be invested in any securities which may be approved by the Secretary of the Treasury for the permanent investment of the banks, and it shall not be disbursed for any other purpose except to meet arrears in interest payment on land-bank bonds issued by such bank.

DIRECTORS' MEETINGS.

That the directors of each national farm-land bank shall meet at least once in each month, and at such other times as are necessary. They shall have power to appoint committees and to delegate to such committees such portion of their powers as may be necessary for the convenient operation of the bank, subject to the approval of the bureau of farm-land banks.

APPRAISEMENT COMMITTEE.

That the board of directors of each national farm-land bank shall immediately upon its organization, and before making any loans upon farm lands, appoint an appraisement committee, consisting of three members, not less than two of whom shall be members of the board of directors. The names of said appraisement committee shall be at once delivered to the commissioner of farm-land banks, and any change in the said committee shall be at once communicated to him. The duty of said committee shall be to appraise, or cause to be appraised, and report on the value of real estate offered as security for loans. All reports of the appraisement committee shall be made in writing, signed by a majority of the committee, and shall give a description of the property, the value at which it is appraised by them, the value at which it is assessed for taxation, and such other information as may be required by the directors of the bank or by the commissioner of farm-land banks. Such report shall be filed and preserved with other papers relating to such loan, and no loan shall be made on any farm land unless and until such report in writing has been filed with the said bank.

POSTAL SAVINGS DEPOSITS.

That section 9 of the act of June 25, 1910, entitled "An act to establish postal savings depositaries for depositing savings at interest with the security of the Government for repayment thereof, and for other purposes," shall be, and the same is hereby, amended by adding a new paragraph at the close of such paragraph to read as follows:

"National land-bank bonds authorized by the commissioner of national farm-land banks and issued by any national farm-land bank may be purchased by the trustees in lieu of United States bonds or other securities for the purpose of investing postal savings deposits under the provisions of this section. At their discretion the said trustees may invest such sums as shall be withdrawn from the postal savings depositaries by the purchase of national land-bank bonds at not above par direct from any national farm-land bank authorized to issue the same."

That upon becoming satisfied that any national farm-land bank has refused to substitute mortgages for others upon which default has occurred, as required by section 15 of this act, or upon receiving satisfactory evidence that any such national farm-land bank has failed to meet its outstanding obligations of any description whatever when due, and is in default, the commissioner of farm-land banks may forthwith appoint a receiver, and require of him such bond and security as he deems proper. Such receiver, under the direction of the said commissioner, shall take possession of the books, records, and assets of every description of such association, collect all debts, dues, and claims belonging to it, and, upon the order of a court of record of competent jurisdiction, may sell or compound all bad or doubtful debts, and, on a like order, may sell all the real and personal property of such association on such terms as the court shall direct; and may, if necessary to pay the debts of such national farm-land bank, enforce the individual liability of the stockholders. Such receiver shall pay over all money so made to the Treasurer of the United States, subject to the order of the commissioner of farm-land banks, and also make report to the commissioner of all his acts and proceedings.

The said commissioner shall, upon appointing a receiver, cause notice to be given, by advertisement in such newspaper as he may direct for three consecutive months, calling on all persons who may have claims against such national farm-land bank to present the same and to make legal proof thereof.

From time to time, after full provision has been made for redeeming the farm-land bonds issued by said national farm-land bank, the commissioner shall make a ratable dividend of the money so paid over to him by such receiver on all such claims as may have been proved to his satisfaction or adjudicated in a court of competent jurisdiction, and, as the proceeds of the assets of such national farm-land bank are paid over to him, shall make further dividends on all claims previously proved or adjudicated; and the remainder of the proceeds, if any, shall be paid over to the shareholders of such national farm-land bank, or their legal representatives, in proportion to the stock by them respectively held.

DESTRUCTIBLE PROPERTY TO BE INSURED.

That wherever the value of buildings or destructible property attached to the land is a part of the security for any loan, such buildings or destructible property shall be properly insured against loss by fire, and policies representing such insurance shall be properly assigned and deposited along with the mortgages under the joint control of the said bank and the Federal fiduciary agent. In such case provisions shall be made in the mortgages or deeds of trust for the payment by the borrower of an amount sufficient to pay the premiums on such insurance policies, in addition to the interest, amortization, and administration charges to be paid by him as herein set out. In appraising property for loans the buildings and destructible property shall not be valued at more than 20 per cent of the total appraisement.

BRANCH BANKS.

That no national farm-land bank shall be authorized to operate branches, but each said institution may, with the approval of the commissioner of farm-land banks, employ and maintain agencies throughout the State in which it is operated.

SALES AGENCIES.

That any national farm-land bank may, with the consent of the commissioner of farm-land banks, maintain, outside the State in which it is operating, sales agents or agencies for the sale of its national land-bank bonds, or for trading in the same.

HOW PERIODIC PAYMENTS MADE BY BORROWER ON MORTGAGE TO BE DETERMINED.

That to the rate of interest to be borne by the national land-bank bonds to be issued by the bank shall be added the administration charge, together with a charge sufficient to amortize the loan by the time of its maturity, and in this way the periodic payment to be paid by the borrower on his mortgage shall be fixed, and this shall be set out in every mortgage and shall not be changed during the term thereof.

LOANS MAY BE PAID WITH NATIONAL LAND-BANK BONDS OF SAME SERIES—BANK MAY BUY IN ITS NATIONAL LAND-BANK BONDS AND HAVE CORRESPONDING AMOUNT OF MORTGAGES RELEASED.

That any borrower shall be entitled to pay off the amount of his mortgage or any portion thereof by presenting to the bank, on any interest period after the first five years, the national land-bank bonds of the bank of the same series as those issued against his mortgage. To the extent of such national land-bank bonds presented and canceled at such time, the borrower shall be relieved of his mortgage indebtedness and proper credits shall be made upon his mortgage. The Federal fiduciary agent shall evidence such credit. The bank issuing such national land-bank bonds shall also have the right at any time to buy in the open market its national land-bank bonds and to cancel the same, and thereupon to release a proportionate amount of the mortgages securing such national land-bank bonds. But in case any of such national land-bank bonds of the bank are called for payment by the bank, as hereinbefore provided, then the same must be paid off by the bank at par.

That whenever the borrower pays his debt in full the bank shall promptly satisfy and discharge the lien of record.

GENERAL POWERS GIVEN TO COMMISSIONER OF FARM-LAND BANKS.

That the commissioner of farm-land banks, by general rules and regulations, shall prescribe the methods of keeping the mortgage register;

of holding and preserving the mortgages and the bonds secured by deed of trust in the joint possession of the bank and of the Federal fiduciary agent; of crediting payments on mortgages; of canceling mortgages; and of releasing the liens of mortgages in whole or in part; and the general rules and regulations for the conduct of the institutions provided for under this act. Such rules and regulations, not in conflict with the provisions of this act, shall be binding upon all the banks created under the same.

That all matters relating to the organization and operation of said national farm-land banks created under this act shall be under the direction and control of the commissioner of farm-land banks, except as herein specified.

PENALTIES FOR VIOLATION OF LAW.

That any officer, clerk, or agent of any national farm-land bank, or any Federal fiduciary agent herein described, who commits any offense or malfeasance such as described in sections 5208 and 5209 of the Revised Statutes of the United States and section 13 of the act approved July 12, 1882, being the law relating to national banks, shall be punished upon conviction as prescribed in the said laws relating to national banks.

That all acts and parts of acts inconsistent herewith are hereby repealed.

RIVER AND HARBOR APPROPRIATIONS (H. R. 20189).

Mr. WARREN submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. JONES submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. POINDEXTER submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr. OLIVER submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

Mr WORKS submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

THE MERCHANT MARINE.

Mr. GORE. I submit an amendment to the amendment of the senior Senator from Florida [Mr. FLETCHER] to Senate bill 6856, to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes, which I ask may lie on the table and be printed.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. JONES. I present a brief amendment, which I intend to offer at the proper time to the shipping bill. I ask that it may be read.

The VICE PRESIDENT. The amendment will be read.

The SECRETARY. At the close of the last section of the latest substitute add the following proviso:

Provided, That no revenues derived through taxes or duties collected from unenfranchised women of the United States shall be available or used for any of the purposes of this act.

The VICE PRESIDENT. The proposed amendment will lie on the table and be printed.

Mr. LODGE. I submit a proposed amendment to the pending measure, the ship-purchase bill, in the nature of a substitute, which I ask may be printed in the RECORD.

There being no objection, the amendment was ordered to lie on the table and to be printed in the RECORD, as follows:

Amendment in the nature of a substitute intended to be proposed by Mr. LODGE to the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes, viz: Strike out all after the enacting clause and insert the following:

That the President is hereby authorized to construct in the United States of America, at a cost not exceeding in the aggregate $30,000,000, vessels which shall be both suitable for naval auxiliaries and for use in foreign commerce. In order to provide a fund for the cost of the construction of vessels so to be built and equipped hereunder, the President may issue and sell or use any of the bonds of the United States now available in the Treasury of the United States under the act of August 5, 1909, the act of February 4, 1910, and the act of March 2, 1911, relating to the issue of bonds for the construction of the Panama Canal, to an amount not exceeding $30,000,000: *Provided*, That the bonds issued and sold or used under the provisions of this section may be made payable at such time after issue as the President in his discretion may deem advisable, but not exceeding 50 years.

SEC. 2. That all vessels constructed under the last preceding section shall become a part of the Naval Establishment of the United States and shall, except as hereinafter provided, be under the direction and management of the Secretary of the Navy as are other naval ships.

SEC. 3. That when the United States is at peace vessels constructed under this act not needed as a part of the naval force may be leased by the President to any responsible person, partnership, or corporation engaged, or which proposes to engage, in the business of a common carrier between the ports of the United States and the ports of a foreign country. The lease, which shall be in writing, shall, among other things, provide—

First. The period of the lease.

Second. The rental, which shall be either a fixed sum, to be agreed upon between the President, representing the United States, and the lessee or lessees, but which shall not in any event be less than 4 per cent annually upon the cost of the vessel, with proper addition for depreciation; or, if it be found impracticable to rent them, or any of them, for such fixed compensation, then for a conditional or contingent rental as follows: That proportion of the profits of operation that the cost of the vessel to the United States bears to the entire capital necessarily invested to operate and carry on business with the ship as a part of a transportation enterprise.

Third. The ports between which the vessel shall ply.

Fourth. That the United States shall have the right to cancel or terminate the lease and retake the vessel whenever in the judgment of the President it is needed for use as an auxiliary in the naval force of the United States.

Fifth. That the vessel shall, at all times while in commercial use, be registered under the laws of the United States, and that the lessee or lessees shall observe all the laws of the United States relating to commercial vessels.

Sixth. That the United States undertakes no obligation or responsibility connected with or growing out of the operation of the vessels.

Seventh. Such other provisions as in the judgment of the President may be necessary to protect the interests of the United States and to carry out the objects of the act.

SEC. 4. That the President is further authorized to lease in like manner and upon like terms any vessel now belonging to the Naval Establishment suitable for commercial use and not needed for naval purposes, and also vessels of the War Department suitable for commercial use and not needed for military transports in times of peace, and also the vessels now owned by the Panama Railroad Co.

SEC. 5. That this act shall take effect upon its passage.

Mr. CUMMINS submitted an amendment in the nature of a substitute intended to be proposed by him to the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes, which was ordered to lie on the table and be printed.

Mr. POINDEXTER. I offer the amendment which I send to the desk, to the pending shipping bill, which I shall propose later. I ask that the amendment be read.

The VICE PRESIDENT. The Secretary will read the amendment.

The SECRETARY. It is proposed to add as a new section the following:

SEC. 12. No ship shall be purchased under the authority of this act from a belligerent nation, nor the citizens thereof, and no ship shall be operated by the United States, nor the shipping board, nor the corporation provided for herein, nor any lessee thereof, under the authority conferred by this act, to or from any port of a belligerent nation, nor to or from any European port during the continuance of the present war in Europe.

Mr. LA FOLLETTE. I submit a proposed amendment to the pending bill, the unfinished business. I ask to have it read and lie on the table.

The amendment was read and ordered to lie on the table, as follows:

Insert after line 12, page 2, Senate bill 6856, the following additional proviso:

"*And provided further*, That said corporation shall make no charter or lease of any vessel to any corporation, firm, or individual for a longer period than six months, and said corporation shall specify in the charter or lease the rates, charges, and fares to be observed by such corporation, firm, or individual chartering or leasing any such vessel or vessels, as the maximum to be charged during the life of such charter or lease, and there shall be contained in said charter or lease a provision terminating the same whenever the charterer or the lessee shall violate any of its provisions. It is hereby made the duty of such corporation to take such steps as may be necessary to terminate any such charter or lease whenever the corporation, firm, or individual party to such charter or lease shall violate the provisions of the same."

HEARINGS BEFORE THE COMMITTEE ON PUBLIC BUILDINGS AND GROUNDS.

Mr. SWANSON submitted the following resolution (S. Res. 529), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Public Buildings and Grounds, or any subcommittee thereof, be authorized during the Sixty-third Congress to subpœna witnesses, to send for books and papers, to administer oaths, and to employ a stenographer, at a price not to exceed $1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before the said committee; that the committee may sit during the sessions or recesses of the Senate; and the expenses thereof shall be paid out of the contingent fund of the Senate.

SHIPS OF BELLIGERENT NATIONS.

Mr. BURTON. I submit a resolution, and I ask for its immediate consideration.

The VICE PRESIDENT. In the absence of objection, the resolution submitted by the Senator from Ohio will be read.

The resolution (S. Res. 527) was read, as follows:

Whereas the pending ship-purchase bill, being Senate bill No. 6856, contemplates by certain of its provisions the purchase of shipping tonnage already constructed, and therefore suggests the possible acquisition of ships belonging to belligerents, some of which are interned in American and other ports as the result of the war; and

Whereas the purchase of such vessels would raise questions of vital importance to the interests of the United States, a knowledge of which is of supreme importance, in order that the Senate may reach an intelligent conclusion as to the advisability of enacting said bill and as to the propriety of incorporating in its provisions certain amendments: Be it

Resolved, That the Secretary of the Treasury be requested, and is hereby directed, to transmit at his earliest convenience to the Senate of the United States information responsive to the following queries:

1. Has the Secretary of the Treasury knowledge that any officer of the Government has made overtures or addressed inquiries to the owners of ships under the flags of belligerent nations, including those ships now interned in ports of the United States or other neutral ports, for the purchase of such ships on the part of the Government of the United States or any of its authorized agencies?

2. Have tenders of sale of any interned merchant ships or other merchant ships carrying the flag of any of the belligerent nations been made to the United States or any of its officers or agencies?

3. Have there been any tenders for the sale of vessels at present carrying the flag of any neutral nation to the United States or any responsible officer or agent thereof?

4. Is it within the knowledge of the Secretary of the Treasury that any person, firm, or corporation, acting either in private capacity or that of agent for the Government, holds any option upon any vessels of a belligerent nation interned in ports in the United States or elsewhere, contemplating their transfer either to private citizens of the United States or the Government of the United States or any agency thereof?

5. Is it within the knowledge of the Secretary of the Treasury that the Government of the United States or any official thereof has in his employ or under his direction any person or agent who is making inquiry as to the possibility of purchasing any ship or ships of any description whatsoever, contemplating their eventual transfer to the United States or an agency thereof?

In each of the above instances the names of the persons, ships, and terms involved in each contemplated sale or purchase is requested.

The VICE PRESIDENT. The Senator from Ohio asks unanimous consent for the immediate consideration of the resolution. Is there objection?

Mr. FLETCHER. The resolution is quite lengthy, and it involves a great many things which I could not clearly understand while it was being read. Therefore I shall have to ask that the resolution go over.

Mr. BURTON. I ask that the resolution lie on the table. I may say, however, Mr. President, that I regard the information called for by the resolution as of great importance to the consideration of the pending shipping bill.

The VICE PRESIDENT. Does the Senator from Ohio desire that the resolution shall go over under the rule or that it be printed and lie on the table?

Mr. BURTON. Let it go over under the rule and be printed.

The VICE PRESIDENT. It will be so ordered.

Mr. BURTON. I submit the resolution which I send to the desk and ask that it be read.

The VICE PRESIDENT. The resolution will be read.

The resolution (S. Res. 528) was read, as follows:

Whereas the pending ship-purchase bill, being Senate bill No. 6856, contemplating by certain of its provisions the purchase of shipping tonnage already constructed, and therefore suggests the possible acquisition of ships belonging to belligerents, some of which are interned in American and other ports as the result of the war; and

Whereas the purchase of such vessels would raise questions of vital importance to the interests of the United States, a knowledge of which is of supreme importance in order that the Senate may reach an intelligent conclusion as to the advisability of enacting said bill and as to the propriety of incorporating in its provisions certain amendments: Be it

Resolved, That the Secretary of State be requested and is hereby directed to transmit at his earliest convenience to the Senate of the United States information responsive to the following inquiry:

Has the Secretary of State, through private or official channels, received any information from any responsible foreign source as to the attitude the Governments of the belligerent nations, or any of them, might be expected to assume in relation to the transfer to the American flag and American register of merchant ships which have heretofore carried the flag of a belligerent State?

Mr. FLETCHER. I ask that the resolution may go over.

The VICE PRESIDENT. The resolution will lie over under the rule.

LOYAL CREEK INDIANS.

Mr. OWEN submitted the following resolution (S. Res. 530), which was read and referred to the Committee on Indian Affairs:

Whereas an agreement between the United States and the Muskogee or Creek Tribe of Indians was adopted by the act of Congress entitled "An act to ratify and confirm an agreement with the Muskogee or Creek Tribe of Indians, and for other purposes," approved March 1, 1901 (31 Stat., 869), section 26 of which provided that the Senate of the United States shall determine the amount of the Loyal Creek claim for what they suffered because of their loyalty to the United States Government during the Civil War, and shall make an award of such amount so found due to said Indians within two years from date of said act; and

Whereas the Senate Committee on Indian Affairs reported to the Senate that the sum of $1,200,000 was justly and properly due upon said claim under the terms of said agreement (see Senate Committee Rept. No. 3088, 57th Cong., 2d sess.); and

Whereas on February 16, 1903, the Senate of the United States adopted the said recommendation contained in the said report of its Committee on Indian Affairs (see CONGRESSIONAL RECORD, vol. 36, pt. 3, 57th Cong., 2d sess., pp. 2252–2254); and

Whereas the sum of $600,000 was appropriated by the act making appropriations for the Indian Department, approved March 3, 1903 (32 Stat., 995), which declared said amount to be in full settlement of said award and required said Indians by the terms of said appropriation to receipt for the same as a settlement in full of said award: Now, therefore, be it

Resolved, That the said award of $1,200,000 as made by the Senate of the United States in favor of the said Loyal Creek Indians on February 16, 1903, was the award of the Senate made under the terms of said agreement and that said appropriation and payment of $600,000 was a partial payment thereof. (See Senate Committee Repts. Nos. 5587, 59th Cong., 2d sess.; 975, 60th Cong., 2d sess.; 849, 62d Cong., 2d sess.,; and 917, 63d Cong., 3d sess.)

THE NICARAGUA CANAL.

Mr. POINDEXTER submitted the following resolution (S. Res. 531), which was read and referred to the Committee on Foreign Relations:

Resolved, That the Secretary of State is directed to inform the Senate if it is the understanding and intention of this Government that such canal as may be constructed on the Nicaragua route, to be acquired by the treaty with Nicaragua recently submitted to the Senate, will be subject to the terms of the Hay-Pauncefote treaty with Great Britain, and if under that treaty the United States will be prohibited from defending or fortifying said canal or collecting munitions of war therein, and if citizens of the United States will be deprived of the free use thereof, and if it is the intention and understanding of this Government that citizens and subjects of foreign nations shall have equal rights and privileges in said canal with citizens of the United States.

DISTRICT EXCISE BOARD.

Mr. JAMES. Mr. President, I ask unanimous consent to be excused from service upon the committee to investigate the excise board of the District of Columbia.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Senator from Kentucky is excused. There are now two vacancies on that committee, and the Chair fills the same by the appointment of the Senator from Delaware [Mr. SAULSBURY] and the Senator from New Jersey [Mr. HUGHES].

COMMITTEE ON REVISION OF THE LAWS.

Mr. ROBINSON. I desire to give notice of an amendment to the rules, which I ask may be read and referred to the Committee on Rules.

The VICE PRESIDENT. The proposed amendment to the rules will be read.

The Secretary read as follows:

Resolved, That there shall be a standing committee of the Senate known as the Committee on Revision of the Laws, to be composed of five Senators elected in the same manner as the members of other standing committees, which shall have power to act jointly with the same committee of the House of Representatives, and to which shall be referred all matters relating to the revision and codification of the statutes of the United States.

The VICE PRESIDENT. The resolution will lie over one day under the rules as a notice.

AMENDMENT TO THE RULES.

Mr. SMOOT. In accordance with the notice which I gave on last Saturday of a proposed amendment to Rule XL, I submit a resolution and ask that it be referred to the Committee on Rules.

The resolution (S. Res. 532) was read and referred to the Committee on Rules, as follows:

Resolved, That Rule XL be amended as follows:

On line 4 of said rule as printed on page 37 of the Rules and Manual, United States Senate, after the word "thereof," insert the following: "; and a motion to suspend any rule or any part thereof shall require a vote of two-thirds and shall be decided without debate."

RIGHTS OF NEUTRALS (S. DOC. NO. 801).

Mr. CHILTON. Mr. President, I ask unanimous consent to have printed as a public document a short address of only about six typewritten pages of the ambassador from Argentina, the Hon. Rómulo S. Naón, before the governing board of the Pan American Union, delivered December 8, 1914, on the subject of "Rights of neutrals."

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

FEDERAL RESERVE LAW.

Mr. SHERMAN. I have a copy of an address by Charles G. Dawes, delivered Saturday, January 9, 1915, before the Union League Club, of Chicago, Ill., on the dangers of the Federal reserve law in its present form and how it should be amended to avoid them. I ask that the address may be printed in the RECORD.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and it is so ordered.

The address is as follows:

[Address of Charles G. Dawes before the Union League Club, Saturday, Jan. 9, 1915.]

THE DANGERS OF THE FEDERAL RESERVE LAW IN ITS PRESENT FORM AND HOW IT SHOULD BE AMENDED TO AVOID THEM.

Gentlemen, my subject was announced, as the chairman has said, "The Federal reserve bank; its benefits, its dangers, and its relation to the future business of the country," but my address will be for the most part upon "The dangers of the Federal reserve law in its present form, and how it should be amended to avoid them," for what has happened in our community within the last two weeks in connection with criticism of the management of the local Federal reserve bank is but the beginning of a controversy which in time to come will sweep over this country, and which, if not foreseen by change in legislation, may (as twice before in our history) bring us into commercial chaos and financial ruin.

The ever-live question in a Republic is the relation of the centralization of power to the diffusion of power. Underneath every question of politics in a Republic, underneath every question of economics in its public aspect, is that difference among our people between the policy of the concentration of power and the policy of the distribution of power among a large number of competing units. And if in the Federal reserve bank act we find certain principles which have been overlooked in their public relation, which are certain to bring upon sensitive institutions (for a bank is a sensitive institution) this old, old controversy, it is time to point out these principles, it is time to point out the dangers, before the credits of the banks have gone into general business, before the whole commercial edifice depends upon them as a foundation, and before the time when political attacks upon the Federal reserve law and the banks organized under it may result in a contraction of credits from which we suffered twice before, in the case of the First and Second Banks of the United States, and in the latter instance brought us into the chaos and the panic and the ruin of 1837.

I wish to show why, in my opinion, the Federal reserve law as it is at the present time upon our statute books will inevitably, in the course of a few years, bring our people face to face with the controversy through which this country went in 1837, when Andrew Jackson, at the head of the radicals, supported by the independent State banks, attacked the United States Bank—a controversy which resulted in the destruction of the bank and of the commercial prosperity of the United States at that time.

The Federal reserve banks are great credit-creating devices designed to use as a foundation of credits money of the United States Government, and money belonging to other banks already in use by these other banks as a foundation of existing credits. They were designed to relieve us from an inelasticity, not a dearth, of currency. Whatever may be their present impression, the people eventually will never consider the Federal reserve banks as "banks for bankers," but as banks to be operated primarily, as well as secondarily, in the public interest, and not solely in the interests of the national banks of the United States. This will result, not only from the fact that the cooperation of the United States Government is essential to make the Federal reserve bank fully effective in times of emergency, but because to exist and still preserve a reasonable capacity for public usefulness in times of emergency the Federal reserve banks must loan chiefly in the open market in competition with other banks. This results from the fact that we have ample currency in the United States except at times of special demand when the crops are to be moved, or in times of financial panic. Under the Aldrich bill the immediate retirement of our $700,000,000 national bank-note circulation, secured by Government bonds, was provided for, which would have made a vacuum in existing circulation which the Central Reserve Association could fill by loans to member banks.

The Federal reserve law, however, makes no material reduction in the outstanding bond secured national-bank note circulation, since it provides for the retirement of not to exceed $20,000,000 per year. The Federal reserve banks therefore will be forced into the open market for loans, not only by the general demand of the people but as a matter of business necessity. Over a year ago I pointed out that in normal business times banks will not pay a higher rate, as a rule, to borrow money from Federal reserve banks than they now pay in open competition for the money of the depositing public; in other words, about 3 to 4 per cent for time money and 2 to 3 per cent for demand money. This is the reason why so few Federal reserve notes have been thus far issued. If the Federal reserve banks should loan their money to the member banks at these low rates in normal times they would employ so much of their resources to pay their expenses and dividends as to impair their usefulness in times of emergency. The higher the rate which they receive upon their loans the less will their credits have to be expanded in normal times and the greater will be their note-issuing capacity in times of emergency. They can make these open-market loans under one of the least discussed and yet one of the most important provisions of the Federal reserve law, which authorizes the purchase of domestic bills of exchange without the indorsement and guaranty of member banks. Nothing is easier than to change the form of ordinary commercial paper into domestic bills of exchange. But the law should be amended to clearly define powers which, while now existing under the law, require to be exercised a change in the usual form in which credit is now granted.

This brings me, then, to my first point against the law in its present form, that it provides for a dual trusteeship and for the control of Federal reserve banks by bankers whose institutions will be in competition with the Federal reserve banks in the open loan market. And let me say here, in connection with this local controversy which has arisen, that it is not necessary for me, in this presence or in any other, to defend the competency or ability or the honesty of the two leading bankers of this city now members of the board of directors of the Federal reserve bank of the city of Chicago. [Applause.] As a member of the board of directors and executive committee of the People's Trust & Savings Bank of Chicago, and knowing his ability and competency, I happen to be the man who first suggested Mr. Earle M. Reynolds for its president upon Mr. Bosworth's resignation, and I seem to have involved George M. Reynolds in some criticism by it. It is hardly worth while before such an audience to discuss such things as that, except as they are related to the great coming controversy, in which the impossible principle of dual trusteeship provided for by the Federal reserve law will eventually involve all of the Federal reserve banks. This first controversy has arisen upon apparently unessential things, but wait until all over this country these banks commence their operations, and listen to the clamor of the demagogue that the business of the Federal reserve banks is being repressed in order to protect the banks of those men which are in competition with them—that they are not being used as agents of the public or in the public interest, but in the interests of the national banks of the United States, which seek to use them and the money of the United States Government deposited in them. I only mention this local controversy, which is not worthy to be dignified by detailed discussion, as indicating what in a few years, when the credits of the Federal reserve banks are expanded, will, unless the law be amended, be an issue upon every political stump of the country in a great campaign, when the Federal reserve banks, as did the Second Bank of the United States, will fight for their continued existence and for the maintenance of the foundations of general credit.

And now I come to a very important part of this argument, the future relation of the United States Government, through the United States Treasury, to the Federal reserve banks and the political and business consequences which will arise because of it. I want to make important in your minds the relation of the Secretary of the Treasury—the Government—to the Federal reserve banks, because it is through that relationship chiefly that the banking system of the United States from now on will become a subject of political controversy unless the law is amended. The note-issuing capacity of the 12 Federal reserve banks of the United States, based upon that provision of law which allows them to issue notes with a 40 per cent gold reserve, after maintaining a 35 per cent lawful-money reserve on their deposits, is $427,225,000. Bear in mind that these figures assume that the full 40 per cent gold reserve is maintained. Through the power of the Federal Reserve Board to suspend reserve requirements the note-issuing capacity of these banks can be much increased, but I am now considering the banks as operating in normal times. Their expenses—roughly estimated, but near enough, I think, for the purpose of argument—dividend requirements and surplus requirements, will be about $4,500,000 per year. To provide this sum they can loan in the open market $100,000,000 at 4½ per cent or to the member banks $180,000,000 at, say, 2½ per cent. In the first case they would have left a note-issuing capacity of $327,000,000 and in the second case of $247,000,000.

As the deposits of the Federal reserve banks increase under its provisions requiring reserve deposits from national banks these amounts will be somewhat increased. The net deposits of the national banks of the United States—to protect against the fluctuations in which is the chief function of these banks—is $7,291,342,479. In my judgment, this approximate amount of notes would be inadequate to care for the situation in times of emergency, and the banks, to perform their functions, must encroach upon the 40 per cent gold reserve or rely upon the assistance of the Government deposits made by the Secretary of the Treasury. We must remember that the net deposits of the State banks of the United States aggregate a sum greater than those of the national banks of the United States; that in times of emergency the inability of the State banks to meet the currency situation will greatly stimulate the demands upon the national banks. Even if the Secretary of the Treasury has not deposited Government money with the Federal reserve banks before, he certainly would do it at any time that the Federal reserve banks would otherwise have to encroach upon their 40 per cent gold reserve in issuing Federal reserve notes.

Do you realize that when the Secretary of the Treasury deposits the general fund holdings of the United States Treasury, as he is authorized in his unlimited discretion to do, in Federal reserve banks, that he will have more money on deposit than all the national banks of the United States put together have on deposit with them at the present time? The deposits of the Federal reserve banks now aggregate $249,786,000. The general fund holdings of the United States Treasury which can be deposited and withdrawn by the Secretary of the Treasury at his sole and unlimited discretion amount to $255,722,000. If he deposits that money, $99,700,000 of which is in gold, and these banks expand their business, and there should be put out by these banks, on the basis of these Government deposits, several hundred millions of notes, tell me, after this credit has gone into circulation, who will be the great power in connection with the Federal reserve banks—the Federal Reserve Board or the Secretary of the Treasury? Supposing that in any State bank, with $40,000,000 of deposits, one depositor controlled $20,000,000 of them, what would be his influence upon any business engagements which the bank might consider?

The Secretary of the Treasury is a political officeholder, the representative of a political administration. If for the third time the money of the United States Government goes into the business of the country through the Federal reserve banks and the independent subtreasury system which grew out of the last disastrous experience of this kind is abolished, the position of power of the Secretary of the Treasury will be that exercised by R. B. Taney, the Secretary of the Treasury under Andrew Jackson.

Before we consider what he might or might not do let us consider for a moment the situation which, whenever the United States deposits have gone into business, he is not only likely but certain to confront. A great clamor will have arisen in the country against the control of the Federal reserve banks by competing bankers. A claim will be made, if the money of the Federal reserve banks has been loaned to member banks, that if it had been loaned to the public general interest rates would be lower. If, on the other hand, these deposits had been loaned to the public by the Federal reserve banks a great clamor will be heard about the tremendous power exercised by those dominating the banks, and opposition will arise from the independent banks, both State and national, suffering from competition in the loan market from funds taken from national banks, without interest, and from Government deposits. A clamor will come from those unable to secure credit from the Federal reserve banks, which would accommodate in normal times large institutions as distinguished from small institutions because the credit emissions of large institutions are better than those of small institutions as a rule. A clamor will arise that these Federal reserve banks, possessing great power over credits and business conditions, are dictating terms under which general business can be transacted.

Imagine the position of an administration under such a situation. If it did not yield to it, it would go out of power and another would be put into power which would yield to it. Let us see what R. B. Taney said and let us see what he did. And if anybody sees anything inappropriate in this attitude taken by Taney, who afterwards became Chief Justice of the United States, as applied to the situation in which this country will be after the expansion of the credits of the Federal reserve banks, let him say so. I am reading from the financial report of the Secretary of the Treasury of the United States for 1833:

"It is a fixed principle of our political institutions to guard against the unnecessary accumulations of power over persons or property in any hands, and no hands are less worthy to be trusted with it than

those of a money corporation. In the selection, therefore, of the State banks as the fiscal agents of the Government"—

This is when he commenced to withdraw the Government deposits, because of the political pressure against the system, because of the political prejudice in this country against the power which must necessarily attach to semipublic banks if they are to perform the function for which they were created—

"In the selection, therefore, of the State banks (that is, as distinguished from the second Bank of the United States) as the fiscal agents of the Government, no disadvantages appear to have been incurred on the score of safety or convenience, or the general interests of the country, while much that is valuable will be gained by the change. I am, however, well aware of the vast power of the Bank of the United States and of its ability to bring distress and suffering on the country. * * * But I have not supposed that the course of the Government ought to be regulated by the fear of the power of the bank. If such a motive could be allowed to influence the legislation of Congress, or the action of the executive department of the Government, there is an end to the sovereignty of the people and the liberties of the country are at once surrendered at the feet of a moneyed corporation. They may now demand the possession of the public money, or the renewal of the charter; and if these objects are yielded to them from apprehensions of their power, or from the suffering which rapid curtailments on their part are inflicting on the community, what may they not next require? Will submission render such a corporation more forbearing in its course? What law may it not hereafter demand, that it will not, if it pleases, be able to enforce by the same means?"

In that year, 1833, the Government of the United States had on deposit with the second Bank of the United States less in proportion to the other deposits of the bank than the Secretary of the Treasury is now authorized to deposit in the Federal reserve banks as compared with its present deposits. The Government then had on deposit with the second Bank of the United States $6,512,000, while the private deposits of the bank were $9,868,000, about 50 per cent more than the United States deposits. Three years later the Secretary of the Treasury had completed his part of the war against the second Bank of the United States. In March, 1836, the United States deposits were but $324,000, and the private deposits had shrunk from $9,868,000 to $3,390,000. The country was on its way to financial ruin. The great panic of 1837 which followed was brought about not alone by the war of Andrew Jackson and the radicals of the country, but by the war of the independent State banks which resented the competition of Government money used by the second Bank of the United States. I am not here to criticize Andrew Jackson. As a result of his war while panic and disaster ensued for a time, there was laid the foundation of our great independent competing banking system composed of 27,000 units which have aided in building up and developing the richest and most powerful business Nation of the world. As a result of that war were laid the foundations of the independent subtreasury system, through which Uncle Sam, having had trouble in getting his money out of the banks where he had deposited it, from that time on kept the bulk of it in his own pocket. He had so much in his pocket in 1907 that in that panic he could spare enough to the banks of the country to tide them over. It is far from my intention to criticize Andrew Jackson or the result of his war, but I do say that it is nothing short of folly for us to reestablish by law the conditions which brought about the Jacksonian war and the prostration of business. It is not a popular thing to criticize a law from which everybody hopes good, but I say that the time to correct this law is before the credits of the Federal reserve bank have been expanded.

Two great amendments in addition to the one regarding open-market operations must be made to this law to remove its menace to our future prosperity. The law must be amended to take the control of the Federal reserve banks from their competitors. I realize that the law has compelled the national banks to buy the stock of the Federal reserve banks—that they are the owners of them—that ordinarily control should not be divorced from ownership—that it seems unjust from a banking standpoint that the bankers should not control them, but this is a case where the interests and attitude of the public are involved, and the banks in time will suffer more from the retention of control than from its elimination. I say this without any hesitation; I give warning that the people of this country will demand that these banks be operated independently, and not by trustees already charged with the duties of trusteeship over competing corporations. I am here to say that this principle of dual trusteeship established by this law is wrong, not only as a principle, but as a policy. Amend this law so as to keep the banks under the control of business men and not politicians, but take that control away from competitors. If you do not, you have laid the foundations of a political controversy in which the Andrew Jackson of the future, voicing the demand of the people, will again lay our commercial edifice in ruins. This can be avoided; and the stand of true patriotism is to make an effort to avoid it rather than to wait in an unreal and fancied security until danger has become disaster. There was a day one spring when Johnstown, Pa., was at peace and quiet in the feeling of security and the enjoyment of prosperity. But was it out of danger because the danger was not realized? There ought to be some man in the Senate of the United States, some man, somewhere, who, in connection with this great danger which threatens the United States, could do as the man did who rode down before the flood from that crumbling Johnstown reservoir and cried to that peaceful people the warning of the disaster which was coming. If the Federal reserve banks are built upon the crumbling foundation of false principles, make no mistake, their reservoir of credits will break in time and our prosperity will be submerged.

The second great amendment which must be made to the Federal reserve law is the curtailment of the immense power over Government deposits in the banks, which is now left to the sole and unlimited discretion of the Secretary of the Treasury. In the first place, he should not be permitted to place any of the general-fund holdings of the Treasury in the Federal reserve banks, to become a foundation of banking credits in normal times. He should not be allowed to deposit the general-fund holdings of the Treasury in the Federal reserve banks until the Federal reserve banks had reached the limit of their possible expansion without Government deposits, and then only under such restrictions as would compel the banks to return the money after the crisis was past. The right to deposit and draw United States money in the Federal reserve banks should not be left to one man's discretion, but should be subjected to proper checks against the possible wrongful use of such vast power. But some one may say that our protection is the Federal Reserve Board. Is that permanent? Let the Federal Board be conservative as it is now, how long, against the pressure which will come from the people of the United States, can the Federal Reserve Board stand? We must make up our minds that these great credit-creating devices are going to be used, and the power of any one administration or any one Secretary of the Treasury to deposit and draw at his unlimited will and discretion what would amount at this time to one-half of the total assets of the Federal reserve banks must be prevented by amendment of the law. I care not who the man is—I have confidence in Secretary McAdoo, but that power should not be his or that of any other one man. This law must for the first time be discussed with relation to the politics of the country. For the most part the law is conformable to sound economics. It is capable of being made of great usefulness to our people, but in order to be so it must be amended before your business and my business becomes adjusted to and dependent upon the existence of a large volume of credits, which, when these wrong principles involved in the law are justly attacked, and contraction sets in, will overwhelm us in the ruin which our forefathers went through 78 years ago. The question of whether political appointees are put in charge of the bank, injurious as that would be, is subsidiary; the most important question is whether we can correct this law and prevent an attack upon these institutions upon whose proper handling of credits and currency our prosperity of the future depends. I thank you. [Applause.]

HAWTHORNE'S TRIBUTE TO FRANKLIN PIERCE.

Mr. HOLLIS. Mr. President, I am about to offer a concurrent resolution for the printing of the sketch of the life of Franklin Pierce by Nathaniel Hawthorne, one of New England's foremost novelists, which was written by him in 1852. I wish to make a short statement which, I think, will have the approval of my colleague [Mr. GALLINGER], the leader of the minority.

Franklin Pierce was a resident of New Hampshire all his life, except when he was in the service of his country as a Representative, a Senator, a soldier in the Mexican War, and afterwards as President of the United States. No statue of Franklin Pierce had been erected in New Hampshire until the past year. Two years ago the New Hampshire Legislature made an appropriation for the erection of such a statue, and it was unveiled in Concord, N. H., on the 25th of November, 1914. At that time ex-Senator William E. Chandler, for many years a Member of this body, made one of the principal addresses. Another address was by a distinguished Republican of New Hampshire, Judge Edgar Aldrich, of the Federal court. Other addresses were made by distinguished men of both parties, whose names I do not now recall.

The statue is by Mr. Augustus Lukeman, of New York. It was unveiled by Miss Susan H. Pierce, of Hillsboro, N. H., the great-grandniece of Franklin Pierce. The Hon. HOKE SMITH, of Georgia, and the Hon. FRANCIS S. WHITE, of Alabama, both distinguished Members of this body, were invited to take part in those exercises, but were unable to be present at the time of the unveiling.

I feel it an honor, Mr. President, to offer this concurrent resolution, which I do with the full approval of my colleague, and I hope that the Senate and the House of Representatives by adopting this resolution will make a public document of this very felicitous sketch of the life of Franklin Pierce, written by an author who is so well known as Nathaniel Hawthorne.

I ask that the concurrent resolution be referred to the Committee on Printing.

The concurrent resolution (S. Con. Res. 36) was read and referred to the Committee on Printing, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of Congress 3,000 copies of the tribute given by Nathaniel Hawthorne to Franklin Pierce during the presidential canvass of 1852, 1,000 copies for the use of the Senate and 2,000 copies for the use of the House of Representatives.

SHIPMENTS OF COPPER ABROAD (S. DOC. NO. 798).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and, with accompanying papers, ordered to lie on the table:

To the Senate:

I transmit herewith, in response to the resolution adopted in the Senate on January 8, 1915, calling for all correspondence with any belligerent nation concerning the treatment of shipments of copper from the United States to neutral countries, a report of the Secretary of State in the premises. I concur in the view of the Secretary of State that it is at this time incompatible with the public interests to communicate to the Senate the correspondence called for by the Senate's resolution.

WOODROW WILSON.

THE WHITE HOUSE, *February 2, 1915.*

SHIPMENT OF NAVAL STORES (S. DOC. NO. 799).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and, with accompanying papers, ordered to lie on the table:

To the Senate:

I transmit herewith, in response to the resolution adopted in the Senate on January 6, 1915, calling for all correspondence with any belligerent nation concerning the treatment of certain naval stores as contraband of war, a report of the Secretary of State in the premises. I concur in the view of the Secretary of

State that it is at this time incompatible with the public interests to communicate to the Senate the correspondence called for by the Senate's resolution.

WOODROW WILSON.

THE WHITE HOUSE, *February 2, 1915.*

PENSIONS AND INCREASE OF PENSIONS.

Mr. SHIVELY. Mr. President, I inquire if morning business has been completed?

The VICE PRESIDENT. The Chair was about to inquire whether there was further morning business. If not, morning business is closed.

Mr. SHIVELY. I ask unanimous consent that the Senate proceed to the consideration of omnibus pension bills on the calendar.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. SHIVELY. The first bill is Senate bill 6980, being Calendar No. 738.

The bill (S. 6980) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, was considered as in Committee of the Whole. It proposes to pension the following-named persons at the rate per month stated:

James A. Fancher, late of U. S. S. *Ohio* and *Princeton*, United States Navy, $24 per month in lieu of that he is now receiving.

Katie A. Beardsley, widow of John F. Beardsley, late of Company I, Sixth Regiment Connecticut Volunteer Infantry, $20 per month in lieu of that she is now receiving.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. SHIVELY. I ask the Senate to consider House bill 19545.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 19545) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, which had been reported from the Committee on Pensions with amendments.

The first amendment of the Committee on Pensions was, on page 2, line 19, before the words "per month," to strike out "$22.50" and insert "$24," so as to make the clause read:

The name of David Jewell, late of Company G, Fifty-first Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The VICE PRESIDENT. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which is House bill 6856.

Mr. SHIVELY. I appeal to the Senator from Florida [Mr. FLETCHER] to allow the unfinished business to be laid aside long enough to dispose of these omnibus pension bills. I think it will take but 30 or 40 minutes.

Mr. FLETCHER. May I inquire of the Senator from Indiana how long he expects it would take?

Mr. SHIVELY. About 30 or 40 minutes, or something like that time.

Mr. FLETCHER. Under the circumstances I ask unanimous consent to lay aside temporarily the unfinished business for half an hour.

The VICE PRESIDENT. Is there objection?

Mr. SMOOT. I understood the Senator to say for half an hour.

Mr. SHIVELY. I myself expressed the opinion that we might get through in that time. I hope the Senator will not fix a definite time.

Mr. FLETCHER. I will not fix a definite time. I will say for half an hour or such a matter.

Mr. SMOOT. Until the private pension bills are passed.

Mr. THOMAS. How many private pension bills are there?

Mr. SMOOT. There are not very many of them.

Mr. GALLINGER. There are only five or six left.

Mr. THOMAS. I shall certainly object to any undue postponement of the regular order.

Mr. SMOOT. So will I, but I certainly think that they can be passed in 30 minutes.

Mr. THOMAS. That may be, but I understood the suggestion of the Senator from Utah to include a considerable number of bills.

Mr. SMOOT. There are half a dozen of them, perhaps.

Mr. SHIVELY. Nearly half of them have been passed this morning.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the unfinished business is temporarily laid aside. The next amendment of the Committee on Pensions to the pending bill will be stated.

The next amendment was, on page 4, line 15, before the words "per month," to strike out "$22.50" and insert "$24," so as to make the clause read:

The name of Samuel S. Van Wye, late of Company E, Forty-second Regiment Missouri Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 5, line 7, before the words "per month," to strike out "$24" and insert "$30," so as to make the clause read:

The name of Ludlow Walker, late ordinary seaman, United States Navy, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 8, line 21, before the words "per month," to strike out "$40" and insert "$50," so as to make the clause read:

The name of Nathaniel T. Hoover, late of Company H, Second Regiment West Virginia Volunteer Cavalry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 9, line 14, before the words "per month," to strike out "$40" and insert "$50," so as to make the clause read:

The name of Rufus G. Blanchard, late of Company B, First Regiment Minnesota Infantry, and Company I, Fourth Regiment United States Veteran Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The amendment was agreed to.

Mr. SHIVELY. On page 12 I move to strike out lines 7, 8, 9, 10, and 11 in the following words:

The name of Milo B. Stewart, late of Independent Battery F, Pennsylvania Light Artillery, and Company D, Fifth Regiment United States Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

I offer the amendment because the soldier is deceased.

The amendment was agreed to.

The next amendment was, on page 14, line 13, before the words "per month," to strike out "$22.50" and insert "$24," so as to make the clause read:

The name of John F. Messick, late of Company B, One hundred and thirty-fourth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 17, line 6, after the word "Kentucky"; to strike out "Mounted," and in the same line, after the word "Volunteer," to insert "Mounted," so as to make the clause read:

The name of George W. Everman, late of Company D, Fortieth Regiment Kentucky Volunteer Mounted Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 18, line 5, after the name "Norton," to strike out "insane (William A. Titcomb, guardian)," so as to make the clause read:

The name of Oliver D. Norton, late of Company G, Seventeenth Regiment Maine Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 19, line 1, after the word "One," to strike out "hunderd" and insert "hundred," so as to make the clause read:

The name of Martha P. Clingerman, helpless and dependent child of Harrison Clingerman, late of Company K, One hundred and forty-ninth Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 22, line 16, after the word "Volunteer," to strike out "Secret Service" and insert "Sharpshooters," so as to make the clause read:

The name of Erwin D. Bulen, late of Company C, Sixtieth Regiment Ohio Volunteer Sharpshooters, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 23, line 5, before the words "per month," to strike out "$30" and insert "$24," so as to make the clause read:

The name of John N. Hall, late of Company F, First Battalion Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 26, after line 20, to strike out:

The name of Martha Rodgers, now Bodine, former widow of George N. Rodgers, late of Company D, One hundred and seventy-first Regiment Ohio National Guard Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 27, line 24, before the words "per month," to strike out "$26" and insert "$20," so as to make the clause read:

The name of Nancy C. McCurdy, widow of David F. McCurdy, late of Company A, Twenty-fourth Regiment Missouri Volunteer Infantry, and

pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 29, after line 4, to strike out:

The name of John T. Hetherlin, late of Company A, Fifth Regiment Pennsylvania Reserve Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 29, line 15, before the words "per month," to strike out "$22.50" and insert "$24," so as to make the clause read:

The name of Richard B. Winn, late of Company H, Fortieth Regiment Missouri Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 29, line 21, after the word "late," to strike out "of company," so as to make the clause read:

The name of Charles Black, late unassigned, First Regiment New York Volunteer Light Artillery, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

Mr. SHIVELY. On page 30, I move to strike out lines 13, 14, and 15 in the following words, the soldier having deceased:

The name of Samuel Fox, late of Company F, Twenty-fifth Regiment Missouri Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 36, line 14, before the words "per month," to strike out "$24" and insert "$20," so as to make the clause read:

The name of Emma L. Ackley, widow of Andrew F. Ackley, late of Company H, Eighty-fourth Regiment New York Volunteer Infantry, and pay her a pension to the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 40, after line 12, to strike out:

The name of Katie A. Armstrong, former widow of George Croffoot, late of Company D, One hundred and eighty-ninth Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 43, line 8, after the words "New York," to strike out "Secret Service" and insert "Volunteer Sharpshooters," so as to make the clause read:

The name of Margaret Lloyd, widow of John Lloyd, late of Sixth Company, First Batallion, New York Volunteer Sharpshooters, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 44, line 15, before the words "per month," to strike out "$24" and insert "$20," so as to make the clause read:

The name of Harriet I. Dagwell, widow of George A. Dagwell, late of Company C, Eleventh Regiment New York Volunteer Cavalry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 44, line 25, before the word "Volunteer," to insert "Veteran," so as to make the clause read:

The name of Homer A. Bidwell, late of Company B, Second Regiment New York Veteran Volunteer Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 45, after line 2, to strike out:

The name of John Ramsey, late unassigned, Fourteenth Regiment Illinois Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 45, line 18, before the words "per month," to strike out "$40" and insert "$30," so as to make the clause read:

The name of Henry M. Seitzinger, late of Company G, Twenty-seventh Regiment, and Company G, One hundred and sixteenth Regiment, Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

Mr. SHIVELY. On page 51, I move to strike out lines 23 and 24, and lines 1 and 2 on page 52, in the following words:

The name of John W. Hudelson, late of Company A, Fifty-seventh Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

This soldier is deceased.

The amendment was agreed to.

The next amendment was, on page 56, line 15, after the word "late," to strike out "of company," so as to make the clause read:

The name of Henry H. Smith, late unassigned, Tenth Regiment Michigan Volunteer Infantry, and pay him a pension at the rate of $27 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 58, after line 16, to strike out:

The name of David E. Stanwood, late of Company D, Twenty-fifth Regiment Maine Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 59, line 9, after the word "late," to strike out "of" and insert "captain"; in line 10, before the word "First," to insert "and major"; and in line 11, after the word "Cavalry," to strike out "and major in the same regiment"; so as to make the clause read:

The name of Andrew W. Duggan, late captain Company L and major First Regiment Michigan Volunteer Cavalry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, at the top of page 61, to strike out:

The name of Frederica Pence, widow of Samuel Pence, late of Company B, Sixty-first and Eighty-second Regiments Ohio Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. SHIVELY. I ask the Senate to proceed to the consideration of Senate bill 7212.

The bill (S. 7212) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, was considered as in Committee of the Whole.

It proposes to pension the following-named persons at the rates stated:

David R. Todd, late of Troop F, Fourth Regiment United States Cavalry, $16 per month.

Samuel Rook, late of Company B, Second Regiment Louisiana Volunteer Infantry, War with Spain, $12 per month.

Letta D. Webster, widow of Edmund K. Webster, late major Twenty-seventh Regiment United States Infantry, Regular Establishment, $20 per month.

Mary B. Howland, late nurse, Medical Department United States Army, War with Spain, $12 per month.

Horace M. Patton, late first lieutenant Company E, Fourth Regiment United States Volunteer Infantry, War with Spain, $30 per month in lieu of that he is now receiving.

Mr. SHIVELY. The Senator from South Dakota [Mr. STERLING] has an amendment to offer.

Mr. STERLING. On page 27, line 1, I move to strike out "$30" and to insert "$40," so as to read:

The name of Charles P. Harmon, late of Company C, Thirty-second Regiment Wisconsin Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

Mr. SHIVELY. I will accept that amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. SHIVELY. I ask the Senate to take up House bill 20562.

The bill (H. R. 20562) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war was considered as in Committee of the Whole, which had been reported from the Committee on Pensions with amendments.

The first amendment of the Committee on Pensions was, on page 3, after line 8, to strike out:

The name of Elizabeth McManus, former widow of Owen Lyons, late of Company A, Eleventh Regiment Indiana Volunteer Cavalry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 6, line 12, before the word "surgeon's," to strike out "who served as a" and insert "late," and in the same line, before the words "United States," to strike out "in the," so as to make the clause read:

The name of Mary J. Hill, widow of Robert L. Hill, late surgeon's steward, United States Navy, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 6, after line 13, to strike out:

The name of Stringer White, who served as a landsman in the United States Navy, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 8, line 4, before the words "per month," to strike out "$30" and insert "$24," so as to make the clause read:

The name of George W. Rank, late of Company B, One hundred and ninety-fifth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 9, line 16, before the words "per month," to strike out "$30" and insert "$24," so as to make the clause read:

The name of Daniel O'Donnell, late of Company F, Third Battalion, Fifteenth Regiment, and Company F, Thirty-third Regiment, United States Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 10, after line 21, to strike out:

The name of Edward A. Kinney, late of Companies C, D, and A, Ninety-ninth Regiment New York Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 12, line 18, after the word "Infantry," to insert "and former widow of Lewis A. Hoke, late of Company E, Ninth Regiment Pennsylvania Volunteer Cavalry," so as to make the clause read:

The name of J. Berdina R. Bierbower, widow of Jacob Bierbower, late of Company B, Forty-fifth Regiment Pennsylvania Volunteer Infantry, and former widow of Lewis A. Hoke, late of Company E, Ninth Regiment Pennsylvania Volunteer Cavalry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 13, line 20, before the word "nurse," to insert "late," and in the same line, after the word "nurse," to strike out "United States Army" and insert "Medical Department, United States Volunteers," so as to make the clause read:

The name of Lettie E. Wilson, formerly Lettie E. Thayer, late nurse, Medical Department, United States Volunteers, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 15, after line 13, to strike out:

The name of Daniel Williams, late musician, United States Marine Corps, and drummer in Company K, Twenty-third Regiment, and Company H, Eighty-second Regiment, Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 16, line 9, before the words "per month," to strike out "$30" and insert "$24," so as to make the clause read:

The name of Hezkiah B. Hulbert, late of Company E, Tenth Regiment New York Volunteer Heavy Artillery, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 16, after line 10, to strike out:

The name of Catharine Doty, widow of Townsend Doty, late of the United States Navy, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 17, line 21, after the name "Samuel," to strike out "Nicholas" and insert "Nichols," so as to make the clause read:

The name of Samuel Nichols, late of Company E, One hundred and fifty-third Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 18, line 6, before the words "first lieutenant," to strike out "who served as a" and insert "late," so as to make the clause read:

The name of Catherine M. Hazleton, widow of Frank B. Hazleton, late first lieutenant and adjutant, Twenty-seventh Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 18, line 15, before the word "second," to strike out "as," and in the same line, after the word "lieutenant," to strike out "in the," so as to make the clause read:

The name of Isaiah H. McDonald, late of Company A, One hundred and thirty-fourth Regiment Ohio National Guard Infantry, and second lieutenant, Ninth Regiment United States Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 18, after line 17, to strike out:

The name of Abner W. Fletcher, late of Company A, Twenty-sixth Regiment Maine Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 19, line 8, before the words "per month,' to strike out "$24" and insert "$20," so as to make the clause read:

The name of Irene M. Bush, widow of Christian M. Bush, late of Companies C and A, Sixty-fifth Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 19, after line 12, to strike out:

The name of Rhuamah Wilson, now Vincent, former widow of Charles Wilson, late of Company K, One hundred and forty-ninth Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 19, line 19, before the word "surgeon," to strike out "who served as a" and insert "late," and in the same line, after the word "surgeon," to strike out "in the," so as to make the clause read:

The name of Maria H. Redfield, widow of John S. Redfield, late surgeon Sixth Regiment Kansas Volunteer Cavalry, and pay her a pension at the rate of $24 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 20, line 15, before the word "ordnance," to strike out "who served as an" and insert "late," and in the same line, after the word "sergeant," to strike out "in the," so as to make the clause read:

The name of Mary A. Keller, widow of Lewis Keller, late ordnance sergeant, United States Army, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 21, line 4, before the word "landsman," to strike out "who served as a" and insert "late," and in the same line, after the word "seaman," to strike out "in the," so as to make the clause read:

The name of Jennie C. True, widow of William H. True, late landsman and ordinary seaman, United States Navy, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 24, line 13, after the word "Infantry," to insert "and widow of David D. L. McCulloch, late of Company D, Ninety-first Regiment New York Volunteer Infantry," so as to make the clause read:

The name of Anna C. McCulloch, former widow of Albert Bell, late of Company G, One hundred and seventy-seventh Regiment New York Volunteer Infantry, and widow of David D. L. McCulloch, late of Company D, Ninety-first Regiment New York Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 24, after line 16, to strike out:

The name of Silas P. Rainey, late of Company C, Eleventh Regiment Kentucky Volunteer Cavalry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 25, line 13, after the word "Militia," to insert "Infantry," so as to make the clause read:

The name of Uriah Golder, late of Company A, One hundred and seventy-first Regiment Pennsylvania Drafted Militia Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to.

Katie M. Penfield, widow of Charles W. Penfield, late of U. S. S. *Vermont*, United States Navy, $20 per month in lieu of that she is now receiving.

Robert J. Martin, late of Comuany K, Eighty-fourth Regiment Illinois Volunteer Infantry, and Company B, First Regiment United States Veteran Volunteer Engineers, $50 per month in lieu of that he is now receiving.

Daniel W. Smith, late of Company C, Twentieth Regiment Maine Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Charlotte A. Crowell, widow of John H. Crowell, late captain and assistant quartermaster, United States Volunteers, $20 per month in lieu of that she is now receiving.

Joseph P. Kridelbaugh, late of Company F, Twenty-third Regiment Iowa Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Charles H. Lewis, late of Company A, Eighth Regiment New York Volunteer Heavy Artillery, $50 per month in lieu of that he is now receiving.

Frederick Hutton, late of Company K, Thirteenth Regiment Indiana Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Sarah J. Crackel, former widow of Stephen W. Dawson, late of Company E, Second Regiment Kansas Volunteer Cavalry, $12 per month.

Jennie Jones, widow of Edward A. Jones, late of Company K, Third Regiment Michigan Volunteer Cavalry, $20 per month in lieu of that she is now receiving.

Charlotte S. Manley, widow of Randolph M. Manley, late of Company I, Forty-seventh Regiment Pennsylvania Militia Infantry, $12 per month.

George W. Read, late of Company C, Fifty-fifth Regiment Indiana Volunteer Infantry, $30 per month in lieu of that he is now receiving.

John H. Beatty, late of Company I, Ninety-sixth Regiment, and Company A, Seventy-seventh Regiment, Ohio Volunteer Infantry, $30 per month in lieu of that he is now receiving.

William Braginton, late of Company K, Fifty-seventh Regiment Indiana Volunteer Infantry, $30 per month in lieu of that he is now receiving.

John G. Avery, late of Company A, Eighty-third Regiment Pennsylvania Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Susie E. Harris, widow of Andrew J. Harris, late of Company B, Tenth Regiment Iowa Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Walter Morrell, late of Company I, First Regiment Wisconsin Volunteer Infantry, $30 per month in lieu of that he is now receiving.

James W. Jacobs, late of Company I, First Regiment Iowa Volunteer Cavalry, and Company A, Seventh Regiment Veteran Reserve Corps, $40 per month in lieu of that he is now receiving.

John W. Rankin, late of Company D, Twenty-third Regiment Iowa Volunteer Infantry, $36 per month in lieu of that he is now receiving.

George Krone, late of Company I, One hundred and thirtieth Regiment, and Company H, Two hundredth Regiment, Pennsylvania Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Jeremiah Adams, late of Company C, Twenty-second Regiment Iowa Volunteer Infantry, $40 per month in lieu of that he is now receiving.

George W. Cartwright, late of Company I, Twenty-sixth Regiment Indiana Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Samuel Shaffer, late of Company G, One hundred and thirty-eighth Regiment Indiana Volunteer Infantry, and Company M, Fifth Regiment, and Company B, Sixth Regiment, Indiana Volunteer Cavalry, $30 per month in lieu of that he is now receiving.

Warren J. Hazell, late of Company A, Sixth Regiment Ohio Volunteer Cavalry, $36 per month in lieu of that he is now receiving.

Frank B. Gillespie, late of Company F, Eightieth Regiment Indiana Volunteer Infantry, $30 per month in lieu of that he is now receiving.

William Bays, late of Company F, First Regiment Kentucky Volunteer Cavalry, $21 per month in lieu of that he is now receiving.

Nancy J. Nicholson, widow of Benjamin J. Nicholson, late of Company C, Fourth Regiment Kentucky Volunteer Cavalry, $20 per month in lieu of that she is now receiving.

Samuel Roberts, late of Company C, One hundred and thirty-second Regiment Illinois Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Charles S. Morse, late of Company H, Eighteenth Regiment Iowa Volunteer Infantry, $24 per month in lieu of that he is now receiving.

Sanford A. Herendeen, late of the U. S. S. *Ohio*, *Princeton*, and *New Ironsides*, United States Navy, $36 per month in lieu of that he is now receiving.

William H. Brown, late of Company D, Eighty-first Regiment New York Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Henry A. Smith, late of Company D, Thirteenth Regiment, and Company K, Thirtieth Regiment, Maine Volunteer Infantry, $40 per month in lieu of that he is now receiving.

George O. Miller, late of the Second Battery Maine Volunteer Light Artillery, $30 per month in lieu of that he is now receiving.

Peter P. Chacey, late of Company C, Eighth Regiment Illinois Volunteer Cavalry, $50 per month in lieu of that he is now receiving.

Eloise Warner, widow of Jared A. Warner, late commissary sergeant Second Regiment Iowa Volunteer Infantry, $20 per month in lieu of that she is now receiving.

George W. Case, late of Company E, Fifteenth Regiment Illinois Volunteer Infantry, $50 per month in lieu of that he is now receiving.

Emma Perkins, widow of John L. Perkins, late of Company D, Ninety-fifth Regiment Pennsylvania Volunteer Infantry, $12 per month.

John C. Simpson, late of Fourth Battery D, New Jersey Volunteer Light Artillery, $30 per month in lieu of that he is now receiving.

Aquilla M. Hizar, late captain Company I, First Regiment Delaware Volunteer Infantry, $50 per month in lieu of that he is now receiving.

Luther M. Blackman, late major, Fourth Regiment Tennessee Volunteer Cavalry, $45 per month in lieu of that he is now receiving.

John J. Calkins, late first lieutenant Battery C, First Regiment Michigan Volunteer Light Artillery, $36 per month in lieu of that he is now receiving.

Jennie O. Collins, widow of William S. Collins, late of Company B, Thirty-fourth Regiment Ohio Volunteer Infantry, $12 per month.

James L. Van Allen, late of Company E, Twelfth Regiment Ohio Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Clarence C. Tritle, late of Company L, Twenty-first Regiment Pennsylvania Volunteer Cavalry, $30 per month in lieu of that he is now receiving.

William Dickerson, late of Company H, Nineteenth Regiment Indiana Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Joana Boone, widow of William Boone, late of Company H, One hundred and eighty-second Regiment Ohio Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Fletcher N. Wilson, late of Company B, One hundred and ninety-ninth Regiment Pennsylvania Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Beulah C. Hicks, widow of James R. Hicks, late of Company B, Seventy-first Regiment Illinois Volunteer Infantry, $12 per month.

A. Paul Horne, late of Company B, Ninth Regiment New Hampshire Volunteer Infantry, $50 per month in lieu of that he is now receiving.

Ellen C. Gardner, widow of Charles H. Gardner, late of Company C, Sixteenth Regiment Massachusetts Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Annie R. Jewett, widow of Joseph A. Jewett, late of Company F, Twenty-fourth Regiment Indiana Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Ann Jolly, widow of Benjamin Jolly, late of Company D, Eighteenth Regiment Illinois Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Allen P. Gilson, late of Company F, Twenty-sixth Regiment New York Volunteer Cavalry, $30 per month in lieu of that he is now receiving.

Rachel W. Carney, widow of John Carney, late of Company D, Stone County Missouri Home Guards, and former widow of Thomas J. Taylor, late captain Company I, Third Regiment Iowa Volunteer Cavalry, $20 per month in lieu of that she is now receiving.

Alie McGloughlin, widow of John W. McGloughlin, late of Company B, Eighth Regiment Tennessee Volunteer Cavalry, $20 per month in lieu of that she is now receiving.

William A. Reames, late of Company B, Ninth Regiment Kentucky Volunteer Cavalry, $30 per month in lieu of that he is now receiving.

Delilah Lobenthal, widow of Leo Lobenthal, late of Company E, One hundred and first Regiment Ohio Volunteer Infantry, and Company D, Twenty-second Regiment Veteran Reserve Corps, $20 per month in lieu of that she is now receiving.

James Hammond, late of Company D, Fifty-second Regiment Illinois Volunteer Infantry, $50 per month in lieu of that he is now receiving.

Henry Walker, late of Company E, Twelfth Regiment Wisconsin Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Prudie M. Reynolds, widow of Joseph B. Reynolds, late of Company K, Fifth Regiment Wisconsin Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Fernando W. Moon, late of Company D, Twenty-fourth Regiment Michigan Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Joseph Ludiker, late of Companies L and B, First Regiment Missouri Volunteer Cavalry, $36 per month in lieu of that he is now receiving.

Jerome B. Wright, late of Company B, Second Regiment Colorado Volunteer Infantry and Company B, Second Regiment Colorado Volunteer Cavalry, $50 per month in lieu of that he is now receiving.

Robert Conn, late of Company E, Twenty-fourth Regiment Iowa Volunteer Infantry, $50 per month in lieu of that he is now receiving.

George L. Neal, late acting assistant surgeon, United States Army, $24 per month in lieu of that he is now receiving.

Fernando Miller, late of Company I, Fifty-eighth Regiment Illinois Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Anna E. Babbitt, widow of William P. Babbitt, late of Company A, Sixth Regiment Ohio Volunteer Infantry, $12 per month.

George W. Shoop, late of Company G, Fifty-ninth Regiment, and Company G, Eighty-ninth Regiment, Illinois Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Clifton Whittum, late of Company I, Fourth Regiment Maine Volunteer Infantry, $36 per month in lieu of that he is now receiving.

George R. Davis, late of Company C, Sixth Regiment Iowa Volunteer Cavalry, $36 per month in lieu of that he is now receiving.

Ai Clark, late of Company A, Fourth Regiment, and Company A, Nineteenth Regiment, Maine Volunteer Infantry, $50 per month in lieu of that he is now receiving.

Charles F. Smith, late of Company I, Forty-fourth Regiment Massachusetts Militia Infantry, $30 per month in lieu of that he is now receiving.

Louisa E. Catterson, widow of Robert F. Catterson, late colonel Ninety-seventh Regiment Indiana Volunteer Infantry, and brigadier general, United States Volunteers, $30 per month in lieu of that she is now receiving.

Arvilla B. Hammond, widow of Royal Hammond, late of Company C, Second Regiment Massachusetts Volunteer Heavy Artillery, and Company E, Seventeenth Regiment Massachusetts Volunteer Infantry, $24 per month in lieu of that she is now receiving, and that in the event of the death of Raymond R. Hammond, helpless and dependent child of Royal Hammond, the additional pension herein granted shall cease and determine, and that in the event of the death of Arvilla B. Hammond the name of Raymond R. Hammond shall be placed on the pension roll at $12 per month.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. SHIVELY. That completes the consideration of the omnibus pension bills on the calendar.

THE MERCHANT MARINE.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

Mr. HITCHCOCK. Mr. President, I desire to present an amendment which I shall offer to the pending shipping bill. I ask that it be read and printed.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). The Secretary will read the amendment.

The Secretary read as follows:

Amendment intended to be proposed by Mr. HITCHCOCK:

Add, at the end of the substitute, a new section, to be numbered 12, as follows:

"SEC. 12. That it shall be unlawful and treated as a breach of the neutrality laws of the United States for any person, partnership, or corporation to sell or contract to sell, or deliver or contract to deliver, during the existence of war between nations with which the United States is at peace, any arms, ammunition, artillery, and explosives of any kind whatsoever to be used against a country or nation with which the United States is at peace; and during the existence of war it shall be unlawful to sell for exportation or to export arms, ammunition, artillery, and explosives except upon filing with the Secretary of Commerce satisfactory sworn proof that said arms, ammunition, artillery, and explosives are not intended to be used in violation of this act.

"Any person violating this act shall be fined not more than $100,000 and imprisoned not more than three years, and any arms, ammunition, artillery, and explosives the exportation of which is attempted in violation of this act shall be forfeited, one-half to the use of the informer and one-half to the use of the United States."

The PRESIDING OFFICER. The amendment will be printed and lie on the table.

Mr. FLETCHER obtained the floor.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Montana?

Mr. FLETCHER. I do.

Mr. WALSH. I desire to have the Senate consider a bill, and I thought probably it would not consume very much time.

Mr. SMOOT. I did not hear the Senator's request.

Mr. WALSH. I desire to ask for the consideration of the bill (S. 5484) modifying and amending the act providing for the disposal of the surplus unallotted lands within the Blackfeet Indian Reservation, Mont. It is a bill which probably will not require very much time.

Mr. SMOOT. I object.

The PRESIDING OFFICER. Objection is made.

Mr. FLETCHER. I move that the Senate adjourn.

The motion was agreed to, and (at 2 o'clock and 25 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, February 3, 1915, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

TUESDAY, *February 2, 1915.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Be with us, O God, our Father, in the passing hours of this day, that with wise conceptions, pure motives, true judgments, we may do our work with perfect urbanity, according to others whatsoever we desire for ourselves; that we may find favor in Thy sight and grow unto the perfected manhood exemplified in the Lord Jesus Christ, our Savior. Amen.

The Journal of the proceedings of yesterday was read and approved.

NAVAL APPROPRIATION BILL.

Mr. HENRY. Mr. Speaker, I offer a privileged resolution, which I send to the Clerk's desk.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

House resolution 717 (H. Rept. 1342).

Resolved, That after the adoption of this rule it shall be in order, in the consideration of H. R. 20975, a bill making appropriations for the naval service for the year ending June 30, 1916, and for other purposes, to consider the following paragraphs of said bill, notwithstanding the rules of the House, beginning with the word "section," in line 12, on page 28, and ending with the word "kind," in line 4, on page 30, to wit:

"Section 9 of the naval personnel act of March 3, 1899, entitled 'An act to reorganize and increase the efficiency of the personnel of the Navy and Marine Corps of the United States,' be, and the same is hereby, repealed.

"That the President be, and he is hereby, authorized, by and with the advice and consent of the Senate, to transfer to the active list of the Navy all officers who may have been transferred from the active to the retired list of the Navy under the provisions of section 9 of said personnel act and from the active to the retired list of the Navy or the Marine Corps by the action of any board: *Provided*, That the action in these cases has been examined by the Naval Committee of the Sixty-third Congress of the House or of the Senate and either or both of said committees have reported, or ordered to be reported, favorably to the House or the Senate a bill to transfer such officer to the active list of the service: *Provided further*, That such officer shall be transferred to the place on the active list which he would have held if he had not been retired or to which he had passed a satisfactory examination for promotion and shall be carried as an additional number in the grade to which he may be transferred or at any time thereafter be promoted: *And provided further*, That such officer shall stand a satisfactory medical and professional examination for promotion, as now provided by law, in all cases where he had not before retirement passed such examination.

"That the President be, and he is hereby, also authorized, by and with the advice and consent of the Senate, to transfer to the active list of the Navy any other officer who may have been retired under the said section 9 whom he may consider physically and professionally qualified to discharge his duties on the active list: *Provided*, That such officer shall be transferred to the place on the active list which he would have held if he had not been retired and shall be carried as an additional number in the grade to which he may be transferred or at any time thereafter promoted: *Provided further*, That such officer shall stand a satisfactory medical and professional examination as now provided by law: *And provided further*, That any officer transferred to the active list shall not by the passage of this act be entitled to back pay or allowances of any kind."

In the consideration of said paragraphs of the bill there shall be general debate not exceeding two hours—one half of the time being alloted to those in favor of the same and controlled by Mr. WITHERSPOON and the other half to those opposed to the same and controlled by Mr. ROBERTS of Massachusetts.

It shall be in order to offer amendments to said paragraphs while the same are being considered under the five-minute rule.

Mr. ROBERTS of Massachusetts rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. ROBERTS of Massachusetts. I want to ask a question of the chairman of the Committee on Rules.

The SPEAKER. The gentleman will proceed.

Mr. ROBERTS of Massachusetts. I would like the attention of the gentleman from Texas [Mr. HENRY] for a moment. I noticed, when the Clerk was reading or purporting to read the language of the bill which is made in order, on line 25, page 28, he omitted "the Naval Committee of the Sixty-third Congress."

Mr. HENRY. Yes; that is a clerical mistake. I was going to ask unanimous consent that that be inserted in the resolution.

Mr. ROBERTS of Massachusetts. It is the intent of the rule to cover the exact language as printed in the bill?

Mr. HENRY. Yes. The rule did not follow the exact language of the appropriation bill, and therefore, Mr. Speaker, I will ask unanimous consent that it be made to conform to the language of the bill.

The SPEAKER. The gentleman from Texas [Mr. HENRY] asks unanimous consent that the language of the rule may be made to comport with the language of the bill. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, I notice that the rule provides that I shall control the time in opposition to the provision. While I

am opposed to the provision in the bill, I would rather not control the time. I would be perfectly willing that the gentleman from Tennessee [Mr. PADGETT] should control the time, if he desires.

Mr. PADGETT. I do not desire to control the time. I am perfectly willing that the gentleman should control it.

Mr. HENRY. If it is so desired, the gentleman from Massachusetts [Mr. ROBERTS] can control it.

Mr. MANN. All right.

Mr. HENRY. I ask unanimous consent, Mr. Speaker, that the name of the gentleman from Massachusetts [Mr. ROBERTS] be substituted for that of the gentleman from Illinois [Mr. MANN].

The SPEAKER. The gentleman from Texas asks unanimous consent that the name of Mr. ROBERTS be substituted for that of Mr. MANN. Is there objection?

There was no objection.

Mr. LENROOT. Mr. Speaker, I would like to propound an inquiry with reference to the rule. The last proviso in the rule as read by the Clerk reads as follows:

That any officer transferred to the active list shall not by the passage of this act be entitled to back pay or allowances of any kind.

I do not understand that the provision is in the bill as reported by the committee.

Mr. ROBERTS of Massachusetts. That appears in the bill. If the gentleman will read the bill, he will find it from line 1 to line 4 at the bottom of page 30.

Mr. LENROOT. Then I am mistaken.

Mr. HENRY. Mr. Speaker, I will ask the gentleman from Kansas if he desires to discuss the rule?

Mr. CAMPBELL. There are requests over here for time in which to discuss the rule.

Mr. HENRY. I will ask for the previous question, with 20 minutes on a side.

Mr. CAMPBELL. That will be satisfactory.

Mr. HENRY. Mr. Speaker, I will move the previous question, and ask unanimous consent that not exceeding 20 minutes be allowed to a side on the rule.

The SPEAKER. The gentleman from Texas [Mr. HENRY] asks for the previous question and that not exceeding 20 minutes be allowed to a side on the rule. Is there objection?

Mr. CAMPBELL. Mr. Speaker, I serve notice to the gentleman from Texas and the Committee on Naval Affairs that there is much objection to one part of this resolution. There is little or no objection to that portion which abolishes the plucking board.

Mr. HENRY. You can state that when you get to the bill. This rule only makes it in order.

Mr. CAMPBELL. I know it only makes it in order, but the previous question will prevent an amendment of the resolution and bring the matter to the House for a vote. The same question can be decided, of course.

Mr. PADGETT. If the gentleman will permit, I understand the rule allows amendment of the paragraphs of the bill.

Mr. MADDEN. But the previous question being ordered, no amendment is allowed to the rule.

Mr. PADGETT. The rule simply makes the whole matter in order for consideration. While I am not in favor of all the provisions in the matter and think there ought to be very material amendments, and think it is bad legislation to incorporate it on an appropriation bill at all, still I do not see any objection if you are going to make it in order under the rule as it is drawn.

The SPEAKER. Is there objection to the request of the gentleman from Texas [Mr. HENRY] that the previous question be ordered, with argument not to exceed 20 minutes on each side on the rule?

Mr. STAFFORD. I would like to inquire of the chairman of the committee whether it is his intention to proceed immediately with the consideration of these paragraphs after the rule is adopted?

Mr. PADGETT. No. We will take them up in their regular order.

Mr. STAFFORD. What is to be done with the general debate on this paragraph for two hours? Is that for consideration of the paragraph when reached?

Mr. PADGETT. That will be when we reach them. I am hoping that it will not take two hours, and I want to state here at this time—and I think it is a good place to state it—that it is my purpose to ask the House to remain in session until we can complete the reading of the bill to-day down to the "Increase of the Navy," so that only the "Increase of the Navy" will remain to be passed over to a subsequent day.

Mr. STAFFORD. I hope the gentleman will not try to rival another body in having all-night sessions.

Mr. PADGETT. No. I think we can do what I suggest, because there is a large part of the bill to which I can conceive of no objection, and only the time expended in reading it should be consumed. I want to get consideration down to the "Increase of the Navy."

Mr. STAFFORD. Then I assume that as soon as the rule is adopted we will proceed with the reading of the bill?

Mr. PADGETT. With the other part of the bill; yes.

Mr. BUTLER. Is it the purpose of the chairman to sit to-night?

Mr. PADGETT. It will be unless before to-night the reading of the bill down to the "Increase of the Navy" is completed. The gentleman knows that the provisions in the bill with reference to appropriations for the Bureau of Medicine and Surgery, the Naval Academy, the Marine Corps, and many other matters will simply take the time to read them.

Mr. BUTLER. The chairman knows the luck we have in keeping a quorum at night sessions, and I suggest that if we are to sit in the evening the rest of them come here.

Mr. HENRY. If we can hurry the matter along now, perhaps that will save the time.

Mr. BUTLER. I am not taking much time. I could make a fuss, so that we could not get through this afternoon.

Mr. GARDNER. Will the gentleman yield?

Mr. HENRY. I will.

Mr. GARDNER. I call the gentleman's attention to the fact that on page 26, two pages ahead of the provision that is covered by the special rule, comes an appropriation for the enlisted personnel, which to my mind is the most important question of the whole lot. I know that the gentleman from Alabama [Mr. HOBSON] proposes to offer an amendment, and so do I. I think that will take some time unless the gentleman from Tennessee, who has the power, shuts off debate.

Mr. PADGETT. I will say to the gentleman that it is my purpose to allow a reasonable debate on that provision. I have no desire to cut it off.

Mr. GARDNER. That, with other matters—for instance, I have an amendment which I sent to the Clerk's desk when we adjourned the other day, which will take some time, and that will bring a vote on the plucking board along toward midnight; that is, the vote on the new legislation on pages 28 and 30.

Mr. PADGETT. Oh, I think not.

Mr. MANN. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. MANN. Under the rule as proposed, which provides for two hours' general debate, when will that be in order? There are three paragraphs in the bill covered by the rule; will the general debate come before the reading of any of the paragraphs?

Mr. HENRY. I think that was the intention.

The SPEAKER. The Chair thinks that will be the better way.

Mr. HENRY. Mr. Speaker, I ask unanimous consent that that be understood.

The SPEAKER. The gentleman from Texas asks unanimous consent that that be understood. Is there objection?

There was no objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas that the previous question shall be considered as ordered on the rule, and have not exceeding 40 minutes' debate? [After a pause.] The Chair hears none.

Mr. HENRY. Mr. Speaker, I yield five minutes to the gentleman from Georgia [Mr. TRIBBLE].

Mr. CAMPBELL. And I yield the gentleman from Georgia five minutes more.

The SPEAKER. The gentleman from Georgia is recognized for 10 minutes.

Mr. TRIBBLE. Mr. Speaker and gentlemen of the House, I do not claim to have any superior knowledge on this question to that of any other Member of this House, but if the membership will listen for 10 minutes I think I can give them information that they probably have not had before. The chairman of the committee has heretofore defeated any efforts to abolish the plucking board on the statement to this House that the efficiency of the Navy would be impaired by the abolition of the plucking board.

I am going to show you gentlemen that that statement has no foundation, and I am going to show it on the statement of those who have nourished, those who have protected, those who have held sacred the Navy plucking board. The whole foundation is cut from under the chairman of the committee by the members of the Navy plucking board themselves, who have held it sacred all these years.

Admiral Knight, one of the best-known men in the Navy, was the first man called before the Naval Committee. Listen to what he said I do not want you to make up your decision on this question altogether on what I say in this speech, but I do beg you to give attention to the witnesses that I call. Every one of them says that the plucking board now injures the efficiency of the Navy instead of benefiting it. Here is what Admiral Knight says:

In my opinion there was no officer who was eliminated from the captains' list last year or this year whose elimination was deserved because of anything he had done, and hardly one whose elimination contributed anything to the absolute efficiency of the service. I consider that the elimination of Capt. Gibbons was a distinct loss of efficiency to the captains' list as a whole.

I am taking the language of one of the men who has protected, who has held sacred this plucking board and been keeping it from coming on the floor of this House, although I have been fighting to bring it here four years.

There is another thing that I want to call to the attention of the membership of this House. I dare say that many Members have not understood my position. It is natural to follow the chairman of the committee on such questions, and he has stubbornly opposed me, and I fear my position has not been properly considered, because of the opposition of the Navy Department to my position and the efforts of the chairman to sustain the department. I am now going to repeat the charge that I have frequently made that the plucking board does not only take out of the Navy 15 men each year, but it takes out an unlimited supply. You may have thought me in error when I stated that to you before, but when these men come before the committee and confirm my statement it should open your eyes to the great wrong being done the American people. They are honest; they would not tell a falsehood; they tell the truth when pressed for an answer. Under the law you can take out of the Navy by volunteer retirement 102 men annually and yet the Members hear the discussion about only 15 officers annually. Remember that these officers are retired on salary and render no service to the Government that educated them and pays them from $5,000 to $10,000 annually as salary in retirement.

I asked the question of Admiral Wainwright. There were three admirals before the committee—Admiral Knight, Admiral Mason, and Admiral Wainwright. Let us see what Admiral Wainwright says in response to a question I put to him. I want the attention of the chairman of the committee, because if I do not state the facts I want him to come forward and show to the House that I have not stated the truth. Listen, Members of the House:

Mr. TRIBBLE. I gather from your statement that when you find a man whom you think is more deficient and might be plucked, if you can get him out by some other method you take the other course and do not pluck him?

Admiral WAINWRIGHT. Yes.

Mr. TRIBBLE. And the purpose of that is to get out as many as possible?

Admiral WAINWRIGHT. To promote as rapidly as possible.

The only fellows that they pluck are the ones who stand pat, who say, "You can not force me out of the Navy by voluntary retirement. You must pluck me if you get me out." The officer who stands pat and says, "You have got me to pluck," that is the fellow they go after. The other fellows they run out by threats of plucking them.

In order that you may know that I am giving the facts about voluntary retirement I give you the law, as follows:

SEC. 8. That officers of the line in the grades of captain, commander, and lieutenant commander may, by official application to the Secretary of the Navy, have their names placed on a list which shall be known as the list of "applicants for voluntary retirement," and when at the end of any fiscal year the average vacancies for the fiscal years subsequent to the passage of this act above the grade of commander have been less than 13, above the grade of lieutenant commander less than 20, above the grade of lieutenant less than 29, and above the grade of lieutenant (junior grade) less than 40, the President may, in the order of the rank of the applicants, place a sufficient number on the retired list with the rank and three-fourths the sea pay of the next higher grade as now existing, including the grade of commodore, to cause the aforesaid vacancies for the fiscal year then being considered.

Mr. MADDEN. Will the gentleman yield?

Mr. TRIBBLE. Yes.

Mr. MADDEN. What is the basis of selection? Is it class?

Mr. TRIBBLE. Yes; mostly class. These fellows who sit around in easy-bottom chairs have a little coterie of their own, and these other fellows who do not get into the coterie, but discharge their official duty and seek no favors, if they happen to have something against their record, real or imaginary, are pushed out of the way, and they suffer instead of the fellows who sit around in the easy chairs. I am now discussing forcing officers to retire under threats, but I fear the Members have not understood my argument, as the impression prevails that only 15 officers can retire annually. I read from page 1102:

Mr. TRIBBLE. If you can shut a man out by another route, you do so?

Admiral WAINWRIGHT. I would not say shut him out.

Mr. TRIBBLE. You said Potts was going by another route?

Admiral WAINWRIGHT. Yes.

Mr. TRIBBLE. Your officers are looking for as many routes to get them out of the way as possible, and the Navy Department is calling for more.

Admiral WAINWRIGHT. Yes; getting them out at the top.

Mr. TRIBBLE. And saddling them upon the people, who have to pay their salaries.

Now I turn back to the former page, and I will read again from the same witness. The charge had been made before this subcommittee that one man, named Mertz, was addicted to the use of liquor. I would not be personal, but I give this explanation. I think it is necessary at this time, in order that you may understand the reference to Capt. Mertz. I read again:

Admiral WAINWRIGHT. I will try to tell you the different influences that enter into it. I do not remember; but it is possible we knew that Capt. Mertz could not be sent to sea; he had no sea service. That is one of the reasons that affected me and others. We knew the minute he was ordered to sea he would retire. You know, you let everything of that sort affect you.

Here is an officer telling that these things affect them, and here is where Mr. BRITTEN comes to the front, and I say, hurrah for BRITTEN; he is a good man, even if he does stay on the Republican side. He is not the only good Republican. There are others. I simply emphasize the fact that he is a capable Republican Representative, and I am pleased to recognize his service on the Naval Committee and in this House:

Mr. BRITTEN. I remember Admiral Mertz was afterwards promoted.

Admiral WAINWRIGHT. He did not go to sea as an admiral.

Mr. BRITTEN. But he was promoted, and is now retired as an admiral and drawing an admiral's pay.

Admiral WAINWRIGHT. Yes.

Then Mr. BRITTEN comes to the front again and asked Admiral Wainwright if Mertz was not promoted after he had and the plucking board had refused to retire Mertz. When they should have plucked the least efficient, instead the board did retire Capt. Veeder, one of the most capable men in the service, with 14 others, true and tried, by plucking them, while Mertz was promoted to be an admiral and was retired by voluntary retirement on salary. Yes; the board knew Mertz would not object to promotion and voluntary retirement, so they let him alone.

Mr. Speaker, am I telling the truth when I stand here and state to you that men are charged with some little offense that does not amount to anything for the purpose of pushing them out of the Navy by voluntary retirement on salary? But some officers say: "No; I am not going to retire; I want to stay in the Navy; I have a good record, and I can do as good service as any officer." I claim that they receive some kind of information to retire and escape the plucking board, and I am informed often sent around through the back door.

When I was solicitor general down in my State there was a system of giving notice to grand juries of offenses when the prosecutor did not want to come to the front and indict some person by placing his name to an indictment. These secret prosecutors would then slip a little paper under the door with information to the jury and name of witness, and get what they called a presentment from the grand jury, which served the purposes of prosecution without making known the prosecutor. The plucking board serves the same purpose to force voluntary retirement by some one giving notice. "If you do not get out of the way you will be disgraced by being plucked the next time the plucking board meets." They get the same money by voluntary retirement. If they are plucked, they are disgraced; therefore not less than 40 are retired annually on pay, frightened and forced out of the service. Now, my point is this: The plucking board is only used on the fellow who has the bravery to stand up and say, "No; if you get me out of the Navy, you have to pluck me, for I will take the disgrace, for I have done nothing."

Mr. HAMILTON of Michigan. Mr. Speaker, will the gentleman yield?

Mr. TRIBBLE. Yes.

Mr. HAMILTON of Michigan. What is the purpose underlying the taking of efficient men out of the Navy? What is the real purpose?

Mr. TRIBBLE. The real purpose is to make vacancies that there may be promotions to positions with more distinction and increase of salary to those promoted. If an officer high in rank is removed, a vacancy is made for officers to be promoted all along the line of promotion, to officers seeking higher positions and more salary in the service. I say if you take efficient men out of the Navy you make the service more deficient, and I say to you that these admirals—Wainwright,

Mason, and Knight—all say when summoned before this subcommittee that the plucking board is now making the Navy Department more inefficient instead of efficient. [Applause.]

The SPEAKER. The time of the gentleman from Georgia has expired.

Mr. CAMPBELL. Mr. Speaker, I yield 10 minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Speaker, I am entirely in sympathy with the provisions in the bill proposing to repeal the plucking board, and giving to the President of the United States general authority to restore to the active list those retired officers who are the victims, or who have been the victims, of the plucking board, and if this rule contained nothing more than those two propositions I should favor it. But there is another proposition contained in this rule that ought not to be passed over lightly. It is found in the second paragraph of the three paragraphs made in order by the rule. The second paragraph, after giving to the President of the United States authority to restore these men to the active list, has this proviso:

Provided, That the action in these cases has been examined by the Naval Committee of the House or of the Senate and either or both of said committees have reported, or ordered to be reported, favorably to the House or the Senate a bill to transfer such officer to the active list of the service.

Mr. Speaker, I undertake to say that this provision and the policy which it embodies is absolutely unprecedented in the history of this Government, and it involves a question far more important than the mere question of whether certain officers shall be restored to the active list. It involves a policy of whether the Congress of the United States shall seek to control the action of the President of the United States through one of its committees, and that is exactly what this does. It seeks to limit the action of the President in making these appointments to an inquiry by him of what the Naval Committee of the House or the Naval Committee of the Senate has done with reference to certain private bills which have been introduced.

Mr. TRIBBLE. Mr. Speaker, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. TRIBBLE. I will call the gentleman's attention to the fact that it has been admitted on the floor of the House that that part of it can be stricken out if it is necessary.

Mr. LENROOT. Oh, yes; I understand that can be stricken out, but I undertake to say, and I assert, that a question of so much importance ought not to be permitted to be discussed and settled in a rider upon an appropriation bill.

Mr. TRIBBLE. Will the gentleman permit another question?

Mr. LENROOT. No. I can not yield further, because my time is limited.

Mr. FITZGERALD. Will the gentleman yield for one question?

Mr. LENROOT. Just for a question.

Mr. FITZGERALD. Would not that paragraph also permit a review of the action of every board as well as the plucking board, boards that retire men for disability, and so forth?

Mr. LENROOT. Yes; that is all of them.

Mr. FITZGERALD. This very section does not restrict them to the action of reviewing the work of the plucking board. I understand under that provision men retired in the Marine Corps some years ago could now be restored to the active list of the Navy.

Mr. LENROOT. That is true under this provision, but the point I want to make, Mr. Speaker, is that the question of policy ought not to be settled by a rider upon an appropriation bill.

Mr. WITHERSPOON. Will the gentleman yield for a question?

Mr. LENROOT. I can not yield further. I can sympathize to some extent with our Democratic friends in attempting to limit the action of the President upon what they themselves or one of their committees have done. We all know that in everything that has transpired through the past two years a vast majority of the Democrats have been nothing but rubber stamps for the President of the United States. You have surrendered to him your conviction, your votes, and every prerogative that you have, and I wonder if now by this provision seeking to control the action of the President you think that you are going to assert your independence of the President and say to the country that we ourselves are going to have something to say about these things by saying to the President that while you can do with us as you please upon all legislation of general public importance, you shall not, Mr. President, appoint a retired officer to the active list unless you come to us and ask us if you can. But, however that may be, the great question involved, Mr. Speaker, is whether this Congress proposes to adopt an absolutely new policy in endeavoring to control the action of the President of the United States and not in a constitutional way but by a committee of this body and a committee of the Senate. Why do you put that in there? Is it because you are afraid——

Mr. HENRY. Will the gentleman yield?

Mr. LENROOT. I can not yield. Is it because you are afraid to trust the President of the United States in making these appointments? You have trusted him in everything else. You have let him do with you as he would, but in this little matter of appointment of a few retired officers back to the active list you say we can not trust President Wilson to do that thing or to remedy this terrible outrage with reference to some of these officers of the United States. Mr. Speaker, I hope this rule will be defeated. It ought to be defeated for the reasons I have named, and if it is, there will be no difficulty in securing from the Committee on Rules another rule long before these paragraphs are reached making in order the provisions with reference to the repeal of the plucking board and giving to the President authority untrammeled by any action of any committee of this House to do justice to those officers who have been plucked by the plucking board. I yield back the balance of my time.

The SPEAKER. The gentleman yields back two minutes.

Mr. HENRY. Mr. Speaker, in reply to what the gentleman from Wisconsin has had to say about being rubber stamps, I only wish to say it is my recollection, as our legislation has been so good, that the gentleman has voted for practically everything the Democrats have proposed and the President has proposed, and therefore he must be one of the rubber stamps, too. [Applause on the Democratic side.]

Mr. LENROOT. The gentleman would like to be accurate, and I want to say that is not true.

Mr. HENRY. Well, practically all of it. We have considered him closely allied to us in reference to such legislation. I yield three minutes to the gentleman from Georgia [Mr. HOWARD].

Mr. CAMPBELL. I yield the gentleman from Georgia two minutes.

The SPEAKER. The gentleman from Georgia is recognized for five minutes.

Mr. HOWARD. Mr. Speaker and gentlemen of the House, I want to confine myself strictly to this plucking-board proposition. All men who know anything about the personnel of the Navy know that the plucking board has long since served the purpose for which it was in the first instance inaugurated, and some of the best officers in the United States Navy are being plucked from the service by this board. That is an admitted fact. Now, then, if this board has served its purpose, why continue it any longer? The trouble about this whole thing is this: They are starting at the wrong end of the personnel of the Navy to do the plucking. Instead of holding down the graduates from the Naval Academy, who are less efficient and keeping them on the reserve list to come in when ready, they start at the other end and put a whole lot of admirals and captains on the retired list who could render efficient service and who have just about reached the height of their efficiency. Now, in reply to my good friend from Wisconsin, the third paragraph, to which he refers, in this rule says:

That the President be, and he is hereby, authorized, by and with the advice and consent of the Senate, to transfer to the active list of the Navy all officers who may have been transferred from the active to the retired list of the Navy under the provisions of section 9—

Section 9 refers to this plucking board—

of said personnel act and from the active to the retired list of the Navy or to the Marine Corps by the action of any board—

And provides such officer shall stand a satisfactory medical and professional examination before reinstatement. Now, what does that mean?

It means that the two committees of the House and the Senate simply act in an advisory capacity, to wit, in that they go into an investigation of the fitness or unfitness of an officer who has been plucked, and after this committee of the House or the committee of the Senate has determined that this man was plucked without any view to his efficiency and that he is capable of rendering good service to the Navy they recommend to the President of the United States that he be placed on the active list, with confidence that the President will act with the best interests of the service in mind.

Mr. Speaker and gentlemen of the House, I can not understand the theory upon which gentlemen act in this House in opposing this legislation, when the Secretary of the Navy and everybody who knows anything about the Navy knows that the Navy is short, woefully short, of officers, and yet every year this star-chamber proceeding is carried on and looked upon as

a farce by the American people. Why, Mr. Speaker, I knew in one instance of a distinguished naval officer who was plucked where it was known that he was going to be plucked a year before it happened, and that man's services to the Navy Department were almost invaluable.

Now, I want to read in conclusion one little statement about the plucking board. There is more than the matter of efficiency in the plucking of an officer. Sometimes an officer's social standing will be one of the main objections urged against him and in favor of his being plucked. It says:

> Laws should not be countenanced that permit anything so contrary to American principles as star-chamber methods. Such laws will not only lead to carelessness and injustice, but are apt to be used to promote personal ambitions and to revenge personal grudges.

Now, Mr. Speaker, there is no question in my mind but that this rule ought to be adopted, that the plucking board ought to be abolished, because of the fact that it can be used as a source of gratification of personal revenge, and that it has done injustices that can not be measured by words in this House to honorable officers in the service.

Why, Mr. Speaker, talk about submarines causing a nervousness among officers and men on ships in the English Channel! When this plucking board meets in June there is hardly an officer in the Navy in possession of his faculties to the extent that he can perform his duties that is not perturbed because of the fact that he does not know, no matter what his record has been, where the lightning is going to strike, and he will hear the humiliating news that he has been "plucked."

Mr. CAMPBELL. Mr. Speaker, I yield three minutes to the gentleman from Illinois [Mr. BRITTEN].

Mr. HENRY. And I yield five additional minutes to the gentleman.

The SPEAKER. The gentleman from Illinois is recognized for eight minutes.

Mr. McLAUGHLIN. Mr. Speaker, will the gentleman in the course of his remarks tell us how this plucking board is made up and where they get their authority?

Mr. BRITTEN. I did expect to deal, Mr. Speaker, with that particular subject in the course of general debate. I only have eight minutes now, but I probably will get to that point. I want to call to the attention of the House, particularly at this time, an extract from a letter from the commander in chief of the Atlantic Fleet—Admiral Fletcher—written less than 30 days ago, to the Secretary of the Navy, in which he said that in our battleship fleet alone there was a deficiency of some 300 commissioned officers and 5,000 men. He said, in substance, that the maximum efficiency of a battleship can only be attained by having the required or necessary number of officers on board. The idea to-day on the floor of the House, and as has been expressed by various Members, indicates that we are all unanimous on the elimination of the plucking board. We all agree that it does not add anything to the efficiency of the Navy at this time. We agree, I believe, that something must be done to prevent this annual slaughter of the hopes and ambitions of men who have given the best part of their lives to the service; and that can only be accomplished by the passage of the rule this morning. It is true that the paragraph in the bill which the rule refers to is not exactly what it should be; but that can be amended under the five-minute rule. If we do not pass this rule to-day a plucking board will be authorized by the Secretary of the Navy to sit between June 1 and June 30, this year, and 15 officers who to-day are apparently in the zenith of their strength, their efficiency, their value to the Navy, will be plucked out of the service and retired for life.

Mr. COX. Will the gentleman yield for a question?

Mr. BRITTEN. Just for a question.

Mr. COX. Do they pluck any of these men before they reach the age of retirement?

Mr. BRITTEN. All of them. The officers who will be plucked on June 1 or thereabouts, or the majority of them, have each survived 16 different sets of plucking. The plucking board, as you all understand, is appointed by the Secretary of the Navy, and is composed of five rear admirals, and a different board is appointed each year. They go over the various grades——

Mr. MADDEN. Will my colleague yield?

Mr. BRITTEN. Yes; for a question.

Mr. MADDEN. What is the average age of the men who are plucked?

Mr. BRITTEN. That depends, I will say to the gentleman, on the grade of the officer.

Mr. MADDEN. The men in the grade, then?

Mr. TRIBBLE. I can answer that question as to the last plucking. It was 42 years of age. I have the list, and it speaks for itself.

Mr. BRITTEN. The men in the grade of lieutenant commander would naturally be younger than those in the grade of captain.

These yearly boards for retirement by selection are appointed by the Secretary of the Navy from time to time. They do not pluck or ask for the retirement of an officer on his service record as it appears in the department. That has been demonstrated or stated by the various admirals comprising the plucking boards of the past. They say, on the contrary, that a man is plucked on the general impression that prevails in the Navy as to the value of that particular man. Does it not stand to reason that the human side is going to play a large part in the selection or the plucking of an officer? Does it not stand to reason that they are going to pluck men they do not know instead of those they do know? Admiral Knight said that they plucked several officers this year without regard to their value to the service. Their service records were not considered. There is no special marking system by which these men are retired. They are retired on the general impression that prevails in the Navy regarding their value. Purely hearsay.

It developed before our committee this year that each and every one of the officers plucked had never been under the direct observation of any member constituting the plucking board. In other words, they were plucked on hearsay. A straw vote is taken, and they account to no one for what has been done. There are no minutes of the proceedings.

Mr. COX. Does the gentleman mean to say that there is a straw vote taken?

Mr. BRITTEN. Undoubtedly; and they agree upon 5 or 10 or 15 officers to be plucked.

Mr. COX. Is that straw vote taken by the board or by the officers of the Navy?

Mr. BRITTEN. By the board. There is a star-chamber session of the plucking board, and no record is kept. An officer to-day would assume, because of his desirable command or of his position in the Navy or in the department, that he would be immune from plucking, but on the following morning his name may be reported to the Secretary, and from there to the President, and the next day he is put out of the service. The plucking board accounts to no one.

Mr. MILLER. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman from Illinois yield to the gentleman from Minnesota?

Mr. BRITTEN. Yes; with pleasure.

Mr. MILLER. Will the gentleman state when the plucking board was instituted?

Mr. BRITTEN. Sixteen years ago—1899.

Mr. MILLER. Just after the Spanish-American War?

Mr. BRITTEN. Yes; just after the Spanish-American War, when it had developed that a number of captains in the service did not have the ability or the efficiency to handle men and ships properly. There was no way then of retiring them until they got to be 62 years of age. Then the personnel act, including this now vicious paragraph for the plucking board, was inserted, in order to remove those captains and other officers who had demonstrated their inefficiency. But now, whom, in the name of Heaven, is the plucking board of June, 1915, going to pluck? Perhaps a man who a few months ago was superior to the men who are plucking them; men like Capt. Gibbons and Capt. Hill, two of the greatest officers in the service at the time they were plucked. The service record of an officer of the Navy, indicating great ability and efficiency, does not prevent his being plucked.

Mr. MADDEN. What do they do? Do they put the names of the officers in a hat and pick them out?

Mr. BRITTEN. No. They take a ballot and decide among themselves upon mere hearsay who is to be plucked, what lieutenant commander or which commander or captain shall be decided upon for plucking. Then the question passes around. "Who is he?" "I do not know. He has never served with me." "Do you know him, Admiral So-and-so?" "No; he never served under me, but Capt. ——— does not think much of him." "Does anybody know anything about him?" "No; well, then, we had better pluck him." So he is plucked, purely on hearsay and general—or lack of—information, and not upon his department service records, which should be the guiding element.

It was evidenced before our committee that 15 officers were plucked in 1913 without the plucking board having brought to its star-chamber session the records of the men to be plucked.

To-day should go down in naval history as marking the death of a once valuable paragraph in personnel legislation, which has grown to be most vicious and inhuman in its tendency to demoralize the efficiency and the fighting value of our Navy. Gentlemen, I ask your support of the rule.

The SPEAKER. The time of the gentleman from Illinois has expired.

Mr. HENRY. Mr. Speaker, I will ask the gentleman from Kansas [Mr. CAMPBELL] to use some of his time.

Mr. CAMPBELL. How much more time have I, Mr. Speaker?

The SPEAKER. The gentleman from Kansas has two minutes, and the gentleman from Texas [Mr. HENRY] has seven minutes.

Mr. HENRY. I yield two minutes to the gentleman from Pennsylvania [Mr. KELLY].

Mr. CAMPBELL. And I yield two minutes to the gentleman also.

The SPEAKER. The gentleman from Pennsylvania [Mr. KELLY] is recognized for four minutes.

Mr. KELLY of Pennsylvania. Mr. Speaker, I was glad to be able to vote for this rule in the Committee on Rules, and I am glad to favor its adoption and passage at this time.

It is not a question of private bills being considered, as the gentleman from Wisconsin would have us believe, because the questions included in these private bills are of the greatest public importance. The facts brought out by the gentleman from Illinois [Mr. BRITTEN] and the others before our committee prove that there has been great injustice done, and no public duty is more important than to establish justice and prevent injustice.

The plucking board, established in 1899, has served its purpose and has outlived its usefulness. Those officials who were inefficient have been plucked, and now even the purpose of the law of plucking the least efficient is not considered. The law itself is not being carried out, because it specifically states that the least efficient shall be retired. To determine that means a careful study of records. The last plucking board would have had to consider the records of as many as 732 officers, including thousands of pages of records, which could not be done in less than 30 days; and yet in a very short time the decisions were reached and certain officials retired. On July 1, 1912, a number of officers of the Navy were plucked, and among them was one man who had a record of the very highest type, excelled by no man in the service. That man was Commander Armistead Rust, then in command of the U. S. S. *Baltimore* and captain of the Charleston yard. In spite of the record of 25 years of efficient and faithful service, that officer, just one day before he would have been promoted to the rank of captain, was plucked. So far as the records show, his entire career proves him to be one of the highest grade officials, the kind which the highest efficiency in the Navy demands. I want to read a synopsis of his record, which was never considered by this star-chamber plucking board. It shows that—

He was under 50 years of age when retired, or about 3½ years below the average age of the captains on the active list.

That his average mark, taken from 74 reports made by 36 commanding officers, covering a period of 25 years, was excellent, or 3.68 against a possible maximum of 4, or 92 per cent perfect.

That his health and character were and always had been excellent.

That in 25 years of service he had never been unfavorably reported by either a senior or junior officer.

That he had more sea service as a commander than any other man on the commander's list and four times as much as the average.

That he enjoyed the full confidence and respect of his commanding officers, who had especially commended him for—

"An excellent, very steady, and reliable character."

"An excellent deck officer."

"Very efficient in dealing with enlisted men."

"Very conscientious in the performance of every duty."

"Intelligent and zealous to a marked degree in dealing with enlisted men."

"For gallant, courageous, and manly conduct in risking his life to save that of an apprentice."

"That they were highly gratified to have him assigned to their ships."

"That he could be trusted with hazardous independent duties, because they would be zealously and satisfactorily executed."

He was recognized by the Bureau of Ordnance "as a competent and efficient officer in matters pertaining to ordnance."

There are on file with his record letters of appreciation or commendation for special service from Admirals Lamberton, Bradford, Sigsbee, Andrews, and Dewey.

There is on file in the department, as a part of his record, a long list of special extra work to his credit, which gives conclusive evidence of this officer's excellent mental equipment, painstaking industry, and great interest in the welfare of the service.

His work in the development of the science of navigation proves him to be an authority on the subject and an independent and advanced thinker. Every vessel in the Navy has in its library two books on the subject of navigation for which he is responsible—practical books that reduce the navigator's labor and the probability of error.

He designed a steel signal tower for use in hydrographic surveying, the adoption of which by the Navy Department has saved the Government many thousands of dollars.

He has made important improvements and inventions in navigators' and surveyors' instruments, including a range finder of greater accuracy and much less delicacy than any other now in use, one of which has been installed on the U. S. S. *Delaware*.

By sticking to an undesirable assignment in charge of a surveying party on the coast of Cuba, he, through hard work and originality, multiplied the output of that expedition more than four times.

The volume and variety of the extra professional work, accomplished by this officer almost wholly at times when he was off duty, is the strongest possible corroborating evidence of his "professional ability" and "aptitude for the service." It bears indisputable testimony to his great industry and versatility. Each portion of this work represents an earnest and successful effort to improve the service, and stands as incontestable proof that he has persistently applied a trained intelligence along original profesional lines to such success as to increase in some degree the efficiency of every department in which he has been employed.

Mr. BRITTEN. Does the gentleman from Pennsylvania realize that the officer to whom he has just referred was plucked by the plucking board without their having seen the records to which he has referred?

Mr. KELLY of Pennsylvania. That is absolutely true, and I thank the gentleman for the suggestion. Without any attention having been paid to a record like this, covering 74 separate reports, this gifted man, who has written books that are in the library of every ship in the service; this man, who has invented devices that are on every ship in the service, only one day before he would have been promoted to the grade of captain, was plucked without right or reason, upon mere gossip or hearsay. Behind closed doors, in star-chamber session, a vote was taken, and the board plucked him, though he was admittedly one of the most efficient officers in the Navy.

That is not a private question; that is a public question, as much as any question considered in this House. For that reason I believe this rule should be passed. It makes in order three provisions, each one of them being worthy and commendable, even though, as a general proposition, legislation of this kind on an appropriation bill is not to be commended. But in this case justice demands action, and immediate action, that grievous wrongs may not be continued. The first provision is the abolition of this plucking board, which is so fruitful a source of injustice. The second is the proposition of putting on the active list those officers whose cases have been considered by committees in the Sixty-third Congress and reported favorably. That does not take any power out of the hands of the President, but simply means that those cases carefully considered by the Sixty-third Congress shall be acted on by this Congress. In the third place, power is given for the President to act on other cases, and where an unjust decision is proven, to remedy the wrong and place the officers so wronged on the active list. These provisions should appeal to every fair-minded man, and I hope that the rule making them in order will be adopted and the provisions themselves written into the law.

The SPEAKER. The time of the gentleman has expired. The gentleman from Texas [Mr. HENRY] has five minutes remaining.

Mr. HENRY. I yield the remainder of my time to the gentleman from Mississippi [Mr. WITHERSPOON]. [Applause.]

Mr. WITHERSPOON. Mr. Speaker, I favor the adoption of this rule. The first paragraph of the rule makes it in order to consider the repeal of section 9 of the personnel act. That section gives the plucking board the power to retire from the naval service 15 officers every year. The reason why that ought to be repealed is this: According to every officer in the Navy who has ever been before the Naval Affairs Committee in the last four years, it is overwhelmingly proved that we are woefully lacking in officers to use the ships that we now have. There is no question about that proposition, and I want to call attention to the effect of that lack of officers. It has resulted in this: That 12 out of the 33 battleships that we have in the Navy can not be given any target practice, can not be given any battleship exercises, can not be given any maneuvers of any kind, for the lack of officers; and in time of war, according to the testimony of these experts, those 12 ships would be absolutely useless to us because we have not the officers to use them and prepare them for war.

Mr. HELM. Will the gentleman yield just for a moment?

Mr. WITHERSPOON. I have no time. I will yield to the gentleman, but I can not yield to anyone else. I want to explain the reasons for this.

Mr. HELM. What is the age of these officers who have been retired?

Mr. WITHERSPOON. It depends upon their rank. Some of them have one age and some another. Now, I must decline to yield to anybody else.

They tell us that if you authorize two battleships in this bill the only way you can get the officers to use those ships when they are built is to put two more of our battleships, in addition to the 12, in reserve or in ordinary or out of commission and take the officers out of those ships to use on the new ones you are building. That is the woeful condition in which we find ourselves for the lack of officers.

Now, one other fact. According to the testimony of the members of this plucking board themselves they have told us that there are no incompetent and inefficient officers in the Navy, and that the officers whom they plucked did not deserve that stigma upon them, that they are all highly efficient and competent and that the country needs them, and therefore I submit

to you that it is nothing but nonsense to have a board to reduce the number 15 every year when we are in such need of them. That is the reason that first section ought to be passed.

It has been stated twice here in the debate that gentlemen favor this first section; that they favor repealing the plucking-board provision, but that they are opposed to the second section. That is utterly illogical. Why are we in favor of repealing the plucking-board law? It is because under that law an injustice has been done and the naval service has been injured; and if you let the law stand on the statute books, that wrong will be repeated every year. That is the reason we are in favor of repealing it. Now if you are in favor of preventing the repetition of this injustice every year in the future, how can you logically refuse to undo the wrongs that have already been done? [Applause.]

Let us look at this second section. It provides that wherever a committee of the Senate or the House has investigated a case, taken the testimony and come to the conclusion that an officer was improperly removed then the President ought to be given authority to restore him. [Applause.]

The SPEAKER. The time of the gentleman has expired. All time has expired, and the question is on agreeing to the resolution.

The resolution was agreed to.

INTERSTATE COMMERCE.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent to address the House for a minute or two, pro bono publico.

The SPEAKER. The gentleman asks unanimous consent to address the House for two minutes. Is there objection?

Mr. MANN. Reserving the right to object, what does the gentleman desire to speak about?

Mr. ADAMSON. About a bill alleged to be reported from the Committee on Interstate and Foreign Commerce. It is misleading, and I wish to make a statement about it.

The SPEAKER. Is there objection?

There was no objection.

Mr. ADAMSON. Mr. Speaker, I ask the Clerk to read a marked extract from the Traffic World of January 30, 1915.

The Clerk read as follows:

THE TRAFFIC SERVICE NEWS BUREAU,
Colorado Building, Washington, D. C.

The House Committee on Interstate and Foreign Commerce was expected on Friday to order a favorable report on the so-called Adamson bill, making the commodities clause of the act to regulate commerce more drastic to the end that there may be a complete divorce between transportation and all other forms of business. The committee considered the matter in secret session on January 27 and tacitly agreed that at its meeting on Friday the favorable report should be ordered.

The favorable report is made because Attorney General Gregory desires it. No attempt will be made to pass the bill through the House unless it appears that during a lull in the legislative grind in that body it can be passed without exciting opposition that will delay other matters. In other words, House Members are expected to vote for its passage on the theory that, inasmuch as it can not be passed through the Senate at this session, it will be safe to put it through the House without an adequate consideration of what would be its effect if the bill should become law.

Mr. ADAMSON. Mr. Speaker, my sole purpose in bringing this to the attention of the House is to compliment the imaginative powers of the author. If his purpose was to give to the world a statement of fact, he has made a dismal failure. If romance and sensation were the objects of his effort, he has achieved a shining success. The only trouble about the article is the entire absence of any element of truth. With that exception it is all right. [Laughter.]

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of H. R. 20975, the naval appropriation bill.

The motion was agreed to.

The SPEAKER pro tempore. The gentleman from Virginia [Mr. HAY] will take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 20975, the naval appropriation bill, with Mr. HAY in the chair.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent to return to page 5.

The CHAIRMAN. Under the unanimous-consent agreement it is in order for the gentleman from Tennessee to offer an amendment.

Mr. PADGETT. I offer an amendment to come in on page 5.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 5, after line 12, as a separate paragraph insert:

"Aeronautics: The sum of $1,000,000 is hereby reappropriated out of the unobligated balance of the appropriation, construction, and repair of vessels for the fiscal year ending June 30, 1914, and made available for aeronautics, to be expended under the direction of the Secretary of the Navy for procuring, purchasing, constructing, operating, reserving, storing, handling air craft and appurtenances, maintenance of air-craft stations and experimental work in the development of aviation for naval purposes."

Mr. FITZGERALD. I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from New York reserves a point of order.

Mr. PADGETT. I will ask the gentleman to state the point of order.

Mr. FITZGERALD. That it is not authorized by law.

Mr. PADGETT. I am ready for the Chair to rule.

The CHAIRMAN. The Chair overrules the point of order.

Mr. PADGETT. I am ready for a vote.

Mr. FITZGERALD. I wish to offer an amendment, Mr. Chairman. I move to strike out of the amendment, after the figures "$1,000,000," the words "is hereby reappropriated out of the unexpended balance," and so forth, down to the figures 1914, and to insert the words "is appropriated."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend the amendment by striking out, after the figures "$1,000,000," the following words: "Is hereby reappropriated out of the unobligated balance of the appropriation, construction and repair of vessels for the fiscal year ending June 30, 1914," and insert in lieu thereof the words "is appropriated," so that the amendment as amended will read:

"Aeronautics: The sum of $1,000,000 is appropriated and made available for aeronautics, to be expended under the direction of the Secretary of the Navy for procuring, purchasing, constructing, operating, reserving, storing, handling air craft and appurtenances, maintenance of air-craft stations and experimental work in the development of aviation for naval purposes."

Mr. FITZGERALD. Mr. Chairman, if an appropriation is to be made for aeronautics, it should be made directly out of the Treasury. The only purpose of reappropriating an unexpended balance in this instance is to mislead as to the amount of money carried by this bill. The report of the Naval Committee states that the amount recommended in this bill is $148,589,786.88, an increase of $3,721,070.27 over the current year. The inference to be drawn is that the charge upon the Treasury to be made on account of the Navy because of the passage of the naval appropriation bill in the next fiscal year is $148,589,786.88. As a matter of fact this bill imposes obligations of $2,200,000 in excess of the amount stated as being carried in the bill, so that the bill actually involves obligations on the Treasury of $150,789,786.

This shrinkage or apparent saving of $2,200,000 in the statement of the amount carried by the bill is effected by the method of providing that certain unexpended balances appropriated for purposes wholly different shall be reappropriated by this bill for some different purpose.

It has been the custom where money is appropriated for some specific purpose and it has not been possible to expend the money during the fiscal year for which the appropriation is made, and the object for which it was appropriated has not been accomplished, to reappropriate the unexpended balance. But this proposition is something novel—not entirely exceptional, but novel in that it is an attempt to make it appear that the Navy in the next fiscal year will cost $2,200,000 less than it actually will cost.

If we are to appropriate a million dollars for aeronautics, it should be appropriated out of the general fund in the Treasury. This roundabout, indirect method of obtaining money for a specific purpose in order to keep back the information and knowledge that there is actually to be expended a sum in excess of that stated on the face of the bill and in the report itself should not be approved by the House.

If the House is to appropriate $1,000,000, or any other sum, I believe it should be appropriated directly. If this method were to be adopted and unexpended balances reappropriated for specific purposes in the bill, it would be possible for the Committee on Naval Affairs to report a bill creating all the obligations imposed in this bill on the Treasury and to make a statement that the bill only carries $135,000,000 or $130,000,000. I hope the amendment will be adopted.

Mr. PADGETT. Mr. Chairman, there is nothing strange about this or unusual. It is a matter often resorted to in the House. This appropriation was carried in the bill last year under "Construction and repair." They did not use it for the purpose that it was appropriated for, and we are simply making this available in this bill for aeronautics. It has already been appropriated. The Navy has been charged with it, and I see no necessity of charging the Navy with it last year and then again this year. We call attention to it in the report clearly and fully, and the House understands it, and I hope the amendment to the amendment will be voted down.

Mr. MANN. Mr. Chairman, I hope the amendment of the gentleman from New York to the amendment will prevail. It is a mere matter of form of making appropriations. It is not at all unusual where an appropriation is made for a specific purpose and is not used, or not entirely used, to reappropriate it for a succeeding fiscal year. That is quite proper, but it is very unusual, indeed, to make an appropriation for one purpose one year and then in a subsequent year to reappropriate that money for some other purpose, so that it will not show how much is appropriated. It is misleading to the House.

Mr. PADGETT. Last year we reappropriated money for building slips at the Boston Navy Yard for an entirely different purpose. It was first appropriated for marine barracks, and the appropriation was changed and made available for building slips.

Mr. MANN. It is true that is sometimes done, but it is very unusual. That is the statement I made, that it ought not to be done as a matter of orderly procedure. The gentleman from Tennessee stated that this fund which was appropriated last year covered air craft but the gentleman is mistaken. This appropriation which it is proposed to reappropriate was for the fiscal year ending June 30, 1914, and that did not cover air craft.

Mr. ROBERTS of Massachusetts. The gentleman is mistaken.

Mr. MANN. I am not mistaken. We made an appropriation specifically for experimental purposes for air craft, and in the appropriation which the gentleman refers to we included the term "air craft" for the purpose of making repairs, and that was all. When gentlemen say that we appropriated an amount under that item for the purchase of air craft, airships, and all that, they are mistaken, or else they intentionally misled and deceived the House, because if they had appropriated a million dollars for air craft and had not intended to deceive the House, they would not have inserted an item of $10,000 for experimental purposes with which to purchase air craft.

Mr. PADGETT. Will the gentleman yield?

Mr. MANN. Yes.

Mr. PADGETT. Under the act of March 4, 1913, which was for the fiscal year of 1914, it contains a provision for the construction and repair of aeroplanes and all their auxiliaries.

Mr. MANN. I understand. I just made the statement in regard to it which the gentleman did not hear. I say that if the gentleman intended that that item was to cover the purchase of aeroplanes he deceived the House, because he proposed and secured an appropriation last year of $10,000 for experimental purposes of aeroplanes.

Mr. PADGETT. Mr. Chairman, I ask for one minute only. The appropriation of $10,000 under the Bureau of Navigation has been carried in the bill for several years, and was for experimental purposes, and the purchase and construction was under the lump-sum appropriation of construction and repairs that I have just read, and under steam engineering a lump-sum appropriation of $10,000 for experimental purposes, and it was so stated.

Mr. ROBERTS of Massachusetts. Mr. Chairman, the gentleman from New York [Mr. FITZGERALD] and the gentleman from Illinois [Mr. MANN] both fall into the same error in stating that the reappropriation here sought is of money which was appropriated for an entirely different purpose. The chairman of the committee has pointed out that under the act of March 4, 1913, which made the appropriation for the year ending June 30, 1914, there was carried a lump-sum appropriation amounting to $8,250,000, under "Construction and repair," which could have been used, every cent of it, for aeroplanes and other auxiliaries. That was not the only appropriation, however, carried in that bill or in last year's bill. It has been the habit heretofore to have an appropriation of the small amount of $10,000 under "Navigation for experimental purposes only" especially limited to experimental purposes, and under "Steam engineering" and "Construction and repair" in lump sums running high into the millions there has been authority to procure or construct or provide for aeroplanes and other auxiliaries without any limit whatever as to the amount that could be expended from those separate lump-sum appropriations. What is sought here is to reappropriate for aeronautics $1,000,000 out of that $8,250,000 which was unexpended, and which could have been expended for aeronautics, so that the reappropriation not only is in order under the rules of the House, but it is a reappropriation of the money for the identical purpose for which it was in the first place appropriated.

There is another reason, Mr. Chairman, why this reappropriation should be favored by this House. It has been the habit of certain people both in and out of Congress for many years to claim that the American Navy was the most extravagant Navy on the face of the earth, and they have pointed to the annual appropriations of each year in confirmation of their statements. The Navy is, and always has been, charged with the total amount that has been appropriated. It never has been given any credit whatever for unexpended balances; and for that reason, if for no other reason, it seems to me that we should take advantage of these unobligated balances and reappropriate them from year to year, especially when we do so to carry out the original purpose of the appropriations.

Mr. FITZGERALD. Mr. Chairman, in the naval appropriation act for the fiscal year 1914, under the heading "Bureau of Construction and Repair," subtitle "Construction and repair of vessels," language covering a great many items is found, and an appropriation of $8,250,000 is made. It included the purchase of aeroplanes. No one will contend for an instant, however, that it was contemplated that $1,000,000 should be expended out of that appropriation for aeroplanes. The appropriation was intended for construction and repair of vessels, preservation and completion of vessels on the stocks, and ordinary purchase of materials and stores of all kinds, and innumerable other things. This appropriation made for the fiscal year 1914, under the covering-in act, remains available until June 30, 1916, to meet obligations incurred and which may be outstanding at the end of the fiscal year.

Mr. GARDNER. Mr. Chairman, will the gentleman yield?

Mr. FITZGERALD. Yes.

Mr. GARDNER. The gentleman, of course, like everyone else, is desirous that the true facts as to the amount of money that is spent on the Navy from year to year shall be accurately known?

Mr. FITZGERALD. I am.

Mr. GARDNER. The chairman of the committee has indicated that in making up the figures showing what we spend on the Navy from year to year the Navy is debited with the amount appropriated whether it is expended or not, and therefore he says that if this item is put in as a new appropriation the Navy will be debited with a total which, as a matter of fact, it has not expended. For my own information I should like to know what is the custom—to debit the Navy with the amount appropriated or to debit the Navy with the amount actually expended when it comes to making up these estimates of what we are spending on the Navy?

Mr. FITZGERALD. Mr. Chairman, there are two ways of computing the cost of a service. One is by taking the annual appropriations made for the service. The other is by taking the statement of the amount actually expended on the service. No one can tell at the end of any fiscal year how much any service of the Government has cost during that fiscal year, because under the covering-in act annual appropriations made for any service during the fiscal year remain available for two years thereafter to meet obligations incurred during the fiscal year. No one can tell to-day how much actually was expended for the Navy during the fiscal year 1914, because all of the payments for the fiscal year 1914 have not yet been made. This very balance which it is now proposed to divert for some other purpose still remains available to meet obligations incurred during the fiscal year 1914. But it is possible, if the appropriation bills are framed in the manner in which they should be, to tell how much the Navy Department is authorized under the law to expend or to incur obligations for during a fiscal year.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield for a question?

Mr. FITZGERALD. Not just at this moment. Under the statement contained in the report of the Committee on Naval Affairs it appears that $148,589,000 are appropriated by this bill.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. FITZGERALD. Mr. Chairman, I ask unanimous consent that my time be extended for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FITZGERALD. That sum is the amount of direct appropriations carried in the bill. In addition to the $148,589,000, reappropriations aggregating $2,200,000 are carried in the bill. So that the Navy Department, if this bill as reported from the Committee on Naval Affairs becomes a law, instead of carrying authorizations of $148,589,000, as one would be led to believe from reading the report, actually carries authorizations and appropriations for $150,789,000. If an appropriation of $1,000,000 is to be made for aeroplanes it should be made directly. These balances are covered into the Treasury every two years under the operations of the covering-in act, and the only way in which it is possible to keep our fiscal years separated and to keep the statements accurate is by making direct appropriations.

It would be possible to take a bill like the sundry civil appropriation bill in which probably the unexpended balances at times will aggregate ten or fifteen million dollars, and by this

method of reappropriation make it appear to the House that the bill was actually carrying ten or fifteen million dollars less than were authorized to be expended. It seems to me that what we wish to know is how much the bill will authorize encumbering the Treasury. That is the purpose of this amendment.

Mr. GARDNER. Will the gentleman yield there for a few words?

Mr. FITZGERALD. I yield.

Mr. GARDNER. Of course anyone can see that if this bill actually authorizes the expenditure of $150,000,000, and if on its face it appears only to authorize $148,000,000, so far as this particular bill is concerned the face estimate is misleading, but it is not misleading if taken in connection with last year's appropriation bill. For instance, suppose that last year we had had Navy appropriations amounting to $150,000,000 and that of that amount only $148,000,000 had been spent. It would not be sound reasoning to calculate our Navy expenses at $300,000,000 for two years. Yet that is exactly the situation if the plan which the gentleman from New York advocates is to prevail. Now, the gentleman is perfectly correct——

Mr. FITZGERALD. But you can not tell for two years whether the $150,000,000 will be spent.

Mr. GARDNER. Allow me to continue my line of thought, because it is a little difficult to follow it. It is perfectly obvious that the gentleman is correct in holding that the statement that this bill only carries a hundred and forty-eight million dollars is misleading. It is misleading. On the other hand, you must impale yourself on the horns of one dilemma or the other. Either the estimate of the amount carried in this particular bill will be misleading, or else the statement as to the amount spent on the Navy in the last two years will be misleading.

Mr. GILLETT. If the gentleman will allow me, suppose this whole $2,000,000 in the next two years is spent. You do not know it will not be, so consequently it is misleading.

Mr. ROBERTS of Massachusetts. It can not be in this case because of the unobligated balance.

Mr. FITZGERALD. In authorizing appropriations there is some attempt sometimes by some persons to keep in touch with the probable revenues of the Government in connection with expenditures. I do not say that notion has been very contagious or too prevalent, but there are some such Members of Congress. It would be very easy by a series of appropriations of unexpended balances——

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARDNER. Mr. Chairman, I move to strike out the last two words as a substitute for the motion of the gentleman from New York. I do not want to have an amendment in the third degree.

Mr. FITZGERALD. To continue this statement, if the gentleman will yield, it might be by a series of reappropriations to have a financial statement on the face of which it would appear that we propose to expend a sum within the estimated revenues, but, as a matter of fact, actually authorizing expenditures far in excess of our estimated revenues. In making our statement it does not make so much difference whether the total of the appropriation bills from year to year may enable some one to charge that one service or another is costing too much money so long as there is information upon which men can intelligently determine whether the Congress is authorizing expenditures far in excess of the probable revenues of the Government. That is the information that is important to the public and to the Congress in the performance of its duty. If at any time it is desired to know how much the Navy actually costs in any one year, at the end of the two years following the end of a particular year when no other moneys can be paid out on that account, a correct statement can be had by examining the report of the Treasury Department, which gives the actual expenditures.

Mr. GARDNER. Will the gentleman yield back a little of my time?

Mr. FITZGERALD. I yield, although I do not think I encroached on the gentleman's time more than he did on mine.

Mr. GARDNER. Mr. Chairman, it does not make one picayune of difference the way you word this paragraph, so far as the actual expenditure of money is concerned. The only question is which way we deceive ourselves and the public most. It is inevitable that we must deceive ourselves to some extent whether we do the one thing or the other. If we amend the bill the way the chairman suggests, the public is deceived as to the amount carried in this bill.

Mr. PADGETT. I differ with the gentleman on that, because we expressly state here and call attention to the fact that it is a reappropriation.

Mr. GARDNER. I mean the casual public, which does not go into the details, but merely asks how much money is carried in the bill. On the other hand, if we have it the way the gentleman from New York wishes it, then in casting over a series of years to see how much money our Navy is costing us we shall deceive ourselves and deceive the public into thinking the Navy is costing more than it actually is costing, because the $2,000,000 will appear not only in this appropriation bill but will also be added as an amount appropriated in a former appropriation bill. Therefore, as it seems to me less important to know what is carried in this bill than it is to know what our Navy is costing us, I shall vote with the chairman of the committee to reappropriate the money. It will, of course, require some explanation in order not to be misled. The amount spent over a series of years, however, will be shown and the Navy will not be charged with money which it has not expended.

Mr. ROBERTS of Massachusetts. Mr. Chairman——

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that debate close in five minutes on this paragraph and amendments thereto.

Mr. MANN. Mr. Chairman, I have another amendment.

Mr. FITZGERALD. Mr. Chairman, I object. There are other amendments to be offered. On the pending amendment it is all right.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that debate on the amendment to the amendment be closed in five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. ROBERTS of Massachusetts. Mr. Chairman, in the Navy Yearbook, on pages 805, 806, 807, 808, and 809, will be found the annual appropriations for the Naval Establishment from 1883 down to and including 1914, and also the additional appropriations for the Naval Establishment and the deficiency appropriation. Those figures are the figures that are commonly accepted by the public and used by those arguing pro and con on the expense of the Navy, as indicating what it has cost this Government over that period of years to maintain its Navy.

Mr. SHERLEY. Will the gentleman permit an inquiry?

Mr. ROBERTS of Massachusetts. Certainly.

Mr. SHERLEY. Is it not equally true as to all the other departments?

Mr. ROBERTS of Massachusetts. It may be; but I am only speaking of the Navy Department.

Mr. SHERLEY. If we changed the rule as to the Navy and not as to the others——

Mr. ROBERTS of Massachusetts. There is no rule of the House prohibiting it.

Mr. SHERLEY. I am not talking about a rule of the House; I am talking about a rule of practice.

Mr. ROBERTS of Massachusetts. But we are not changing the rule of practice, so far as it pertains to the Navy Department.

Mr. SHERLEY. I do not agree with the gentleman. I think I have some knowledge of the usual appropriations. It is not usual to do that. Now——

Mr. ROBERTS of Massachusetts. I did not yield to the gentleman to make a speech, but only to ask a question. I have only five minutes, and the debate will be closed then.

Mr. SHERLEY. Go ahead. I do not want to take your time.

Mr. ROBERTS of Massachusetts. The gentleman from New York [Mr. FITZGERALD] stated it was impossible to tell now how much money had been expended in the maintenance and upkeep of the Navy Department in the year 1914. That statement is absolutely correct so far as it goes, but entirely misleading so far as this argument is concerned, because the appropriation bill for the Naval Department, as the gentleman well knows, carries annual appropriations, appropriations that are extended for two years, and appropriations good until expended. Now, the point that I think the gentleman had in mind, or, at least, the thought that might come from his statement, is that we do not know how much there will be of unobligated balance in the appropriation for construction and repair on June 30, 1914.

Mr. FITZGERALD. Not that one alone.

Mr. ROBERTS of Massachusetts. I am confining myself to that one alone, because that is where we are reappropriating an unobligated balance. That appropriation of $8,250,000 for that year could only be obligated during that year, and it is well known to-day how much of the $8,250,000 was unobligated. So it is a matter of mathematical calculation.

Mr. FITZGERALD. In the last two months certain information was furnished to the Naval Committee as to the amount of unexpended balances, and thereupon the Secretary of the Navy said that further information coming to hand——

Mr. ROBERTS of Massachusetts. The gentleman is seeking to confuse the issue between unexpended and unobligated balances.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, I do not think that the statement made by the gentleman from New York [Mr. FITZGERALD] and repeated by the gentleman from Massachusetts [Mr. ROBERTS], that it was impossible to know how much money was spent on the Navy during any fiscal year, ought to go without some understanding. It may be impossible at the end of the year to know how much the Navy Department has obligated itself to pay, but it is not only feasible to know how much money has been spent during the year, but that is promptly published by the Treasury Department at the end of every fiscal year. The amount of money which is spent may not be payable wholly out of the appropriation for that year. If the gentleman would say that they do not know how much of the appropriation was to be spent, of course that is accurate, but we know at the end of every fiscal year exactly how much money has been spent in that fiscal year on the Navy, on the Army, and in every other department of the Government. And if we did not know it, we would be in a sad way as to bookkeeping.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. FITZGERALD].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. FITZGERALD. I ask for a division, Mr. Chairman.

The committee divided; and there were—ayes 25, noes 33.

So the amendment was rejected.

Mr. FITZGERALD. Mr. Chairman, I move to strike out "$1,000,000" and insert "$300,000."

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend the amendment by striking out the figures "$1,000,000" and inserting "$300,000."

Mr. FITZGERALD. Mr. Chairman, the appropriation for aeronautics for the Army of the United States for the next fiscal year is $300,000. A special corps of aviation officers in the Army was created by Congress, consisting of 60 officers and 250 enlisted men. Certain requirements were established for officers who desired to be attached to the Aviation Corps. At the last report it had been possible to obtain only 26 of the 60 officers authorized by law. The War Department maintains a training school at San Diego, Cal., and an aeronautic station at Fort Sam Houston, in Texas, and has been engaged in the work of developing and experimenting with aeroplanes a much longer time than the Navy. These aeroplanes cost about eight or ten thousand dollars apiece. We have about 33 or 34 first-class battleships. If we were to obtain an aeroplane for every ship in the Navy that can accommodate one of them, and if, in addition, we were to provide the Navy with as large and extensive a service as the Army now has, it still would not require in any one fiscal year within 50 per cent of the amount proposed to be carried in this bill. This is one reason, Mr. Chairman, why these lavish unexpended balances are found in the appropriations for the naval service. For 1914, on the recommendation of the Committee on Naval Affairs, $8,250,000 was appropriated for construction and repair of ships, and before the expiration of the time within which that money can be expended this bill proposes to reappropriate $1,000,000 of the $8,250,000.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield there?

Mr. FITZGERALD. In one moment.

Mr. ROBERTS of Massachusetts. I think the gentleman wants to be accurate.

Mr. FITZGERALD. I will not yield at this point, Mr. Chairman.

The CHAIRMAN. The gentleman declines to yield.

Mr. FITZGERALD. It is proposed to appropriate $1,000,000, which is only a part of the excess of the appropriation made upon the recommendation of the committee. It seems to me, Mr. Chairman, that if Congress at this time provides for the Navy for aeronautics by appropriating $300,000, the same sum which is appropriated in the Army bill for the Army for the next fiscal year, we shall not only do everything that reasonable men can expect, but we shall provide every dollar that can be properly and legitimately expended by the Navy for this purpose.

Of course, if the purpose be, in making these appropriations, simply to evidence our enthusiasm and our interest in some of the services by making appropriations in large sums, enabling us to tell those who inquire that Congress has given a million dollars for aviation, without regard to the possibility of its use, without consideration of the ability of the department to expend the money, then it is desirable to appropriate $1,000,000. But we might just as well appropriate $5,000,000, not on the theory that it would be expended but simply because it would sound well to say that we had appropriated that much money.

Mr. GARDNER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from New York yield to the gentleman from Massachusetts?

Mr. MANN. I yield to the gentleman.

The CHAIRMAN. The time of the gentleman from New York has expired. The gentleman from Massachusetts [Mr. ROBERTS] is recognized. He is a member of the committee.

Mr. ROBERTS of Massachusetts. Mr. Chairman, the motion of the gentleman from New York [Mr. FITZGERALD] is to reduce this appropriation from $1,000,000 to $300,000, the same amount appropriated for the Army. If that is the only reason he has to give for the reduction, it is the most absurd proposition I have ever heard advanced. Why aeronautics in the Navy should be limited to the same amount of money as is provided for aeronautics in the Army I fail to see. The needs of the two services are entirely different.

But, Mr. Chairman, the trouble with aeronautics in this country has been the lack of interest and encouragement on the part of the Government. That has been the difficulty. There is the reason why this country, which first discovered and made feasible the heavier-than-air machine, is so far behind all the other nations of the earth in the matter of aeroplanes. The only customer we have, practically, is the Government, and the Government has had no definite amount of money at its disposal with which to purchase these craft, and therefore there has been no inducement to go on and perfect them in this country. And as long as we go on making these niggardly little appropriations that condition will be accentuated. It will grow worse.

The gentleman speaks of appropriating $5,000,000. Does the gentleman know that the General Board of the Navy recommended $5,000,000 for aeronautics in the Navy alone?

Mr. FITZGERALD. I did; and that is the reason I pay so little attention to their recommendations.

Mr. ROBERTS of Massachusetts. If the gentleman would pay attention to those who know he would be better off.

Mr. FITZGERALD. Does the gentleman know that to-day we are sending Curtiss aeroplanes to Europe?

Mr. ROBERTS of Massachusetts. I decline to be interrupted, Mr. Chairman.

Now, we had before us Capt. Bristol, of the Navy, who has charge of aeronautics, and he was asked how much money he could probably expend in the next fiscal year, and he gave a detailed list, which you will find on page 286 of the hearings.

Mr. FITZGERALD. Read it.

Mr. ROBERTS of Massachusetts. And it totaled $1,187,000. As one member of the committee I would vote and did vote to give him that whole amount, but the wisdom of the committee fixed the amount at $1,000,000.

I want to say to the gentleman from New York that there are a good many things necessary for aeronautics besides the flying machine or the balloon or the dirigible. They are absolutely as helpless until they have the auxiliaries necessary as would be a battleship in midocean without any motive power, without ammunition, without guns.

Mr. PAGE of North Carolina. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Massachusetts yield to the gentleman from North Carolina?

Mr. ROBERTS of Massachusetts. I yield.

Mr. PAGE of North Carolina. Is the attitude of the gentleman on the Committee on Naval Affairs toward other appropriations the same as that which the gentleman has mentioned on this subject? Is the inquiry how much you can expend, or how much you can expend efficiently and properly?

Mr. ROBERTS of Massachusetts. It is how much you can spend efficiently and properly, and particularly on this subject of aeronautics.

Mr. PAGE of North Carolina. That is not what the gentleman said a moment ago. I wanted to give the gentleman an opportunity to correct himself.

Mr. ROBERTS of Massachusetts. I suppose the gentleman will concede that no one wants to expend money unwisely. We assume that the officials of this Government have common sense and will spend the money to the best advantage of the Government, and we do not specify in these bills that they shall spend it wisely and judiciously any more than money carried on an

appropriation bill is a command to them to spend it riotously and extravagantly. And when Capt. Bristol told us that he could spend to advantage $1,187,000 we accepted his statement.

Mr. PAGE of North Carolina. If the gentleman will allow me, I will say to him that I like it much better that way than the way the gentleman first stated it.

Mr. ROBERTS of Massachusetts. Well, if the gentleman is fussy, I am quite willing to change it in the way I have done.

Besides aeroplanes, Mr. Chairman, and your dirigibles, you must have hydrogen sets for your dirigibles, you must have floating sheds for your dirigibles, you must have hangars, gasoline storage, and there must be an appropriation for the maintenance of all this outfit, so that the million dollars recommended to be appropriated, if it is authorized by this Congress, will be but a drop in the bucket compared with what we should have for our Navy alone.

Mr. BUTLER. Mr. Chairman, does the chairman of the committee desire to speak first?

Mr. MANN. A motion is pending.

Mr. PADGETT. No.

Mr. BUTLER. Mr. Chairman, there is an advantage in the flying machine which some of us, perhaps, do not appreciate. One reason why I favor a larger appropriation is this: I do not know whether the newspaper reports of the different engagements supposed to have taken place in European waters are true; but if they are half true, the destructive fighting machine in the Navy is the submarine, and some attention must be paid to that vessel if we are to have what is known as an "adequate national defense," which I expect to discuss before this bill is completed.

And if gentlemen will think of it a minute, and I would be glad if they would turn it over in their minds, so that before the bill is completed we shall better know what constitutes an adequate defense.

But, to go back a step, the fighting power in the Navy is the torpedo. The instrument with which it is to be fired effectively is the submarine, and against which we should seek to protect ourselves.

I was amazed at the statement made to the Committee on Naval Affairs that at the height of 2,000 feet it was possible to see a submarine 100 feet under the surface of the water. I could not believe that could be true, and yet I had no way of disproving the accuracy of the statement, because I never was in a flying machine and never was in a submarine.

Mr. GORDON. And never will be.

Mr. BUTLER. Just so, my friend; I never will be, if I am alive. I can do as well as other Americans if you decide not to allow this money, but I think we ought to be rational in what we do. If necessary for all purposes of government, let us appropriate less for ships in order that we may protect ourselves against the submarines built by other nations. The only means known at this time by which we can locate the presence of a submarine is from one of these flying machines. So absolutely incredible to me was the statement, that I made an effort to find out whether or not other people had had the same experience that these gentlemen have had in these flying machines. A friend living in my native town, by name, P. M. Sharpless, in company with a balloonist in Philadelphia, whom I know very well, Mr. Anton Atherholt, followed the course of the Delaware River testing this phenomenon, and at the height of 1,500 feet could discover the rocks in the bottom of the river. They discovered plainly the shoals and were able to trace the channel.

Mr. FITZGERALD. Does the gentleman think the Delaware River is a fair test?

Mr. BUTLER. Yes; I think it is quite a fair test. Anyhow, it is a sufficient test to make me believe that there is much in the statement that at the height of 2,000 feet, unless the ocean is very rough, the presence of a submarine may be discovered at the depth of 100 feet under water.

Mr. MANN. Will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from Illinois.

Mr. MANN. If the gentleman from Pennsylvania [Mr. MOORE] were here, does not the gentleman from Pennsylvania think that the gentleman from Pennsylvania [Mr. MOORE] would admit that the Delaware is only 10 or 15 feet deep, and that you could not help seeing the shoals in the bottom?

Mr. BUTLER. My friend from Pennsylvania [Mr. MOORE] is here, as he always is, right on the job.

Mr. MOORE. What the gentleman from New York [Mr. FITZGERALD] and the gentleman from Illinois [Mr. MANN] wanted was to get a rise, and they have gotten it. [Laughter.]

Mr. BUTLER. And I have furnished the time for both gentlemen to get in.

Mr. BARTLETT. Was that at high water or low water that this observation was made?

Mr. BUTLER. Where?

Mr. BARTLETT. In the Delaware River.

Mr. BUTLER. They did not furnish me with that information.

Mr. MOORE. The gentleman should never tire of praising the Delaware River. I do not.

Mr. BUTLER. I repeat when I first heard this statement of an official it was utterly incredible to me; but because of the observation of these gentlemen on the Delaware River in a balloon, I believe it is possible, as stated by them, at the deepest point in the Delaware River to see a horse and cart if they had been located on the bottom. Therefore I have become impressed with the importance of providing this means of detecting the presence of submarines. If we are to provide a national defense according to the money that we have in the Treasury, the time may come when we will put up a signboard on the New Jersey coast notifying an enemy who might approach that we have no money, and that they must go down to Costa Rica or elsewhere if they want some. [Laughter.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. BROWNING. Mr. Chairman, I am opposed to the amendment of the gentleman from New York. When Capt. Bristol was before the committee, as appears on page 288 of the hearings, the chairman asked him how many aeroplanes we ought to have, and he replied that we ought to have 100 in active service and 100 in reserve. In other words, he said we ought to have 200 aeroplanes for the Navy. The chairman asked Capt. Bristol what these aeroplanes cost, and he replied that they cost $11,000 apiece. The chairman remarked, "That is $2,200,000 for aeroplanes."

And that is what Capt. Bristol would like to have in place of the $1,000,000 that we propose to put into this bill. He would like to have $2,200,000, so that he could have 200 aeroplanes.

Mr. FITZGERALD. Will the gentleman yield?

Mr. BROWNING. Yes.

Mr. FITZGERALD. Will the gentleman state how many officers we now have in the Navy trained to fly these machines?

Mr. BROWNING. I can not answer that. Probably the chairman of the Committee on Naval Affairs can. Capt. Bristol says that we need 400 commissioned officers.

Mr. FITZGERALD. It is proposed to buy 100 machines. How many officers are trained to use them? Of course if they are all like our friend from Pennsylvania, who never intends to go up in one of them, it would not be of any use to have them.

Mr. BROWNING. I can not tell the gentleman how many officers we have who are trained in aviation. I think probably the chairman of the committee may have that information.

Mr. GOULDEN. Will the gentleman from New Jersey yield?

Mr. BROWNING. There is no use in training officers unless we have the machines. I yield to the gentleman from New York.

Mr. GOULDEN. Can the gentleman tell us at how many places these machines can be built to-day in this country?

Mr. BROWNING. I do not think they can be built at more than two places in the United States, if that.

Mr. GOULDEN. I do not think there are more than two or three places. There certainly should be many more.

Mr. BROWNING. I think that is correct, and that is one reason why the committee propose this, in order that it may be an incentive for manufacturers to build some of these aeroplanes, so that we can get them.

Mr. GOULDEN. Was it the purpose or the intention of the committee to have them built by the Government itself at some navy yard as an experiment?

Mr. BROWNING. No, sir; we could not have them built at any navy yard. We have no plant for the purpose.

Mr. GOULDEN. Could you not create a plant?

Mr. BROWNING. Yes; we could create a plant.

Mr. GOULDEN. Would not that be cheaper and better in the end?

Mr. BROWNING. I do not know.

Mr. BUTLER. You could not get the engines.

Mr. SHERLEY. Does the gentleman know what amount of work is now being done for European countries in the manufacture of aeroplanes in this country? I understand that the Curtiss aeroplane is being built in some numbers for European countries.

Mr. BUTLER. I understand the gentleman to ask how much work is being done in this country in the manufacture of aeroplanes for foreign Governments?

Mr. SHERLEY. Yes.

Mr. BUTLER. We do not know. That was information which we tried to get, but could not.

Mr. SHERLEY. But the gentleman does know, if the statements in the press are to be believed, that aeroplanes are being built in America for use in foreign countries?

Mr. BUTLER. I saw that statement in the papers. I call the attention of the gentleman from Kentucky to what seems to be an effort of the officers of the Navy to obtain an engine from Europe, the Mercedes, said to be the best, and they have not obtained it. That is the reason we are behind in the supply of aeroplanes, and we have now to make it up.

Mr. SHERLEY. I knew all that.

Mr. BROWNING. There were two engines brought over, the Mercedes and the Salmson, but we can not get them.

Mr. WITHERSPOON. Mr. Chairman, I desire to support the amendment offered by the gentleman from New York. I do not believe there is any necessity for the expenditure of a million dollars for air craft. I think $300,000 would be ample for the purpose. That would purchase about 30 aeroplanes. The Navy already has about a dozen aeroplanes, and you would then have in the neighborhood of 40. I can not see the slightest necessity for any more than that.

The argument brought out in the committee to induce us to make an appropriation of $1,000,000 rests on the ground that France has a thousand aeroplanes, Germany has 800, that England has a large number, and consequently they jump to the conclusion that we ought to have that many. In other words, we ought to ape foreign Governments in everything they do. So far as the Navy is concerned, if you take the history of the present war, according to the newspaper reports, all the belligerents engaged in that war have not used as many as 40 aeroplanes in the naval service. A large number of air craft of different kinds used by Europeans are used on land. It may be necessary for them, because they have millions and millions of men engaged in that war, and it is necessary to have these scouts to report the movements of all these troops, a condition that will never arise in this country, for it is utterly impossible for any country on earth to land a million men on our shores. If we should have a war, we would have but one use for aeroplanes, and that would be to serve as scouts and to report the movement of a hostile fleet on the ocean.

Forty aeroplanes could do that as well as a thousand could do it. We not only have aeroplanes for scouts, but destroyers are used as scouts and armored cruisers are used as scouts, and, with all the other scouts that we have, I submit to this committee that 40 aeroplanes would be the greatest abundance for us, and we do not need any million dollars spent for this purpose, except to gratify the taste of these gentlemen who want to do everything that foreign Governments do.

Now, my friend from Pennsylvania [Mr. BUTLER] thinks we need a million dollars for aeroplanes, because aeroplanes can discover submarines down under the water. Let me remind my friend that the testimony before the Naval Affairs Committee by experts, by naval officers—who are the only men that know about these things—is that if we had a war with a foreign Government they could not bring their submarines over here, and they would not have any submarines for aeroplanes to discover under the water.

Mr. HOBSON. Mr. Chairman, the gentleman from Mississippi [Mr. WITHERSPOON], with his usual omniscience about naval technique, with a wave of his hand, can dispense with all use for aeroplanes like he can with battleships. It requires 100 aeroplanes to successfully scout for one fleet. The scouting has to be done at 300 miles distance, and these aeroplanes have to come in every night, starting at nightfall to report to the fleet. Topedo vessels 300 miles away can not then cover that ground before daybreak, when it would be too late to attack. Of course, a submarine could cover only a fraction of that distance.

Now, in the scouting 300 miles from the fleet, each aeroplane scout covers a certain sector of the circle whose radius is 300 miles. The number of aeroplanes necessary to cover that circle on the high seas around one fleet, the minimum number of aeroplanes absolutely necessary for constant scouting is 50. When 50 come in, 50 must take their place. There must be one relief. So to make one fleet efficient in modern warfare will require 100 aeroplanes.

The gentleman scouts the idea of seeing submarines under the water. He is entirely mistaken. The aeroplane does not have to be high over the water when it is observing for submarine craft. It can come down close to the water's surface, and the testimony before the committee shows that they can locate without difficulty submarine boats at the distance that these boats navigate. They can locate submarines signaling to destroyers and other vessels their whereabouts and permit attack.

Now, Mr. Chairman, our Navy is three years behind. For more than three years we have utterly neglected the question of development of navigation of the air as a part of the essential defense of the Nation. We have not begun experimentation of lighter-than-air machines like the Zeppelins. Yet the importance of those implements can not be overstated. To-day the people of the British Isles, the United Kingdom, are kept in constant tension. The whole nerves of a nation are racked; the efficiency of that nation in self-defense is undermined by the fact that that nation has not experimented with this type of vessel when its foe has experimented. We need not think that we can buy these implements when war comes. No nation can. If they could be bought with money, the English would have more Zeppelins to-day than the Germans. You have to develop the art in your own country, and it requires money to develop the art. We have not provided the money in these years to develop the art. We are short in equipment, in buildings, and so forth. We are behind in training our men to fly. We need not one million dollars but many millions of dollars, not only to speedily equip our Navy as fast as we can efficiently do so with the required number of these craft, but also to develop our training service.

The gentleman from New York [Mr. FITZGERALD] asks about our getting the aviators. Why, a part of this million dollars will be used to develop the training of our men. This present bill authorizes 48 officers and 98 enlisted men from the Regular Navy and 12 officers and 24 enlisted men in the Marine Corps. We need this money to develop the men. We are just as backward in developing our fliers as in providing them with suitable machines. We need both the aeroplanes and the Zeppelins and the trained men for both types. It is certainly high time our Nation should make a good beginning. A million dollars is a small sum for the needs of the Navy to make an efficient start.

Mr. GARDNER. Mr. Chairman, I want to see something done in this business of air craft. We have been loafing along for years and doing nothing. We have been estimating and we have been reporting and we have been adopting plans and drafting designs, but we have not been building. Finally last year we sent abroad and we made a contract with a firm in Germany to send us over one aeroplane with a couple of Mercedes motors, and we made a contract with a French firm to send us over an aeroplane with a couple of Salmson motors. When the war broke out, of course those aeroplanes were commandeered, and we did not get them. About two years ago a board was appointed by the Secretary of the Navy to look into this whole question of naval air service and make recommendations. That board reported over a year ago and recommended $1,297,700 as the amount that was necessary at that time. What did we give them a year ago? We let them take about $350,000 to $400,000 out of the appropriations for various bureaus, and that is all we did. That is all they had to spend, and the result is they have not been able to do much. Now along comes Capt. Bristol, and he says that we need 100 aeroplanes for the active fleet, and that we need 100 aeroplanes in reserve. We do not expect to get them this year, but that is what we need. Moreover he says that we can expend a million and a half of dollars before the 1st of July, 1915, and another million and a half of dollars before the 1st of July, 1916. That is what Capt. Bristol says, and instead of that we give him only $1,000,000. He says it can be expended most admirably.

As to the statement that there has been only $300,000 given to the Army air service, that is true. I tried to get that amount increased by amendment on the floor of the House. At the time my amendment was defeated I did not have in my possession a copy of a letter which is now in my possession. Since that time I have been furnished with a copy of the letter written recently by Gen. Scriven to the Secretary of War, in which he says that that amount of $300,000 is absolutely inadequate, and merely means that the air service of the Army must necessarily deteriorate.

Mr. KELLEY of Michigan. Mr. Chairman, I want to call attention particularly to the testimony of Capt. Bristol with reference to the number of aeroplanes that are needed. Of course in determining this matter it must be borne in mind that in former days the scouting in the event of war was done by scout ships with a speed of probably 30 to 35 knots per hour, while these aeroplanes of the best type have a speed of about 90 knots an hour. Therefore, in the event of war, if we have nothing but ships for scouting, and the enemy be provided with aeroplanes with a speed of 90 knots per hour, we will be at a considerable disadvantage. Capt. Bristol explains just why we need 100 aeroplanes, and I want to read that portion of his testimony, which is found on page 288 of the hearings. Speaking of the amount to be invested in aeroplanes, he says:

I will explain a little how you come at that. You have a fleet of 16 battleships, and that represents about 3 miles in length. With a radius of 300 miles around that battleship fleet you have a circle of

1,900 miles; and there should be one aeroplane to every 40 miles of the circumference of that circle for scouting work. That would require 50 aeroplanes for one fleet, with 50 in reserve, which is the least allowance that could be considered. That makes 100 in the fleet actually, and then another——

The CHAIRMAN (interposing). Do you mean that around your battleships you would have——

Capt. BRISTOL (interposing). Aeroplanes going out on the radii of this circle so that at the end of 300 miles there would be one scout arriving at the circumference at nightfall every 40 miles apart to come back and report the position of an enemy. That is, so that at nightfall you would know that there were no submarines nor torpedo craft within the distance they could cover during darkness to make an attack on the fleet.

And so, if we are going to provide the Navy with suitable scouting vessels, it is necessary that this be done in modern warfare by air craft; and the number specified by Capt. Bristol seemed to the committee to be a reasonable number.

Mr. COOPER. Mr. Chairman, I want to say just a word suggested by the question put by the gentleman from New York [Mr. FITZGERALD] a little while ago. He inquired as to the number of men or officers in the Navy who could fly aeroplanes, and said that there would not be a sufficient number of men qualified to fly the machines even if we had them. Here, on page 288, is what Capt. Bristol said on this point. Mr. ROBERTS of Massachusetts, of the Naval Committee, said:

Let me ask you right here, have we enough officers skilled in aviation to man 48 more machines?

Capt. BRISTOL. We have not; but, strange as it seems, it does not require a very long time to train an officer to handle an aeroplane, so we could have them by the time we could get the craft.

Mr. FITZGERALD. Mr. Chairman, it may not take long to train them, but it takes some time to get them, as has been evidenced by the experience of the Army, which has an authorized corps of 60 officers and has been able to get only 26.

Mr. COOPER. But so far as qualifying them to fly the machine is concerned, he said that the department could get the necessary number of qualified aviators by the time it could get the craft.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that all debate on this paragraph close in 15 minutes.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that all debate on this paragraph and amendments thereto close in 15 minutes. Is there objection?

There was no objection.

Mr. HELM. Mr. Chairman, I am very heartily in favor of this amendment. I think it is sound business. I think it is the wise thing under existing conditions to do. I submit to you this proposition: With $80,000,000 staring us in the face as a deficit—and this should especially appeal to this side of the House—we are in a serious situation. There is no doubt but that the revenues are running behind and we are getting deeper and deeper in arrears.

Now, if a man were to get up on this floor and undertake at this inopportune and unseasonable time, considering the condition of the Treasury, to develop some machine that would harvest wheat and put it in a sack at 2 cents a bushel, why, he would be laughed and pooh-poohed off the floor. Yet men will stand up and vote for a million dollars to unnecessarily test out something that is being tested in every possible phase and angle in the European war. You can not wait; you are the most impatient set of men who ever were gotten together when it comes to spending money. All you seem to deem necessary is to appropriate whether the money is available and forthcoming or not. The last thing you are concerned about when you come to write the check or the draft is to know whether the money you are appropriating is on hand. The fact is we are $80,000,000 in the red. Now, can not we, as sensible men, wait six months, when all these propositions are being thrashed out day and night? It is stated in this morning's papers, I think, that there are being manufactured in the United States aeroplanes that are going to Europe for war purpose. Do you believe that the European nations who are engaged in war would buy American aeroplanes of no value and which do not serve their purpose; that they are spending their money for something that is of no use? It is preposterous. We are making progress in the manufacture of flying machines. We are not falling behind, as some of these warriors here are trying to convince the country. We are unquestionably keeping pace with the up-to-date types if those people abroad are willing to buy our machines and pay good money for them. So it does seem to me that the sensible thing to do, especially when our revenues are falling short, is to support the amendment.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I believe that aeroplanes are properly considered as war machines, as far as the Navy Department are concerned, although I see the Secretary of State holds, I do not say improperly, that aeroplanes are not to be treated as war machines, so far as permitting their export is concerned. Now, I am in favor of making reasonable provision for aeroplanes in the Navy and the Army. I have great respect for the Committee on Naval Affairs, though I think they would have done more wisely if they had followed the example of the committee presided over by the gentleman who is now presiding over the Committee of the Whole House on the state of the Union, who brought in a bill and had it passed, providing for a special corps in the Army to handle aeroplanes or air craft, and then providing for a special school where a considerable sum of money is being expended to train both officers and enlisted men in the handling of aeroplanes. I think the Navy has a small school costing a few thousand dollars a year, four or five thousand maybe, and hence the man in charge of that, having not acquired much knowledge of the subject, thinks it is easy to pick naval officers off the street who can handle air craft flying at the rate of 90 miles an hour out at sea, and he cooly suggests that he can get 100 officers, or thereabouts, in the Navy overnight who can handle these machines. The Army with more experience has discovered otherwise, because they have the experience and are not merely talking through their hats. Three hundred thousand dollars is the amount which we provided in the Army bill, and on a vote in the House proposing to raise that amount to $1,000,000, my recollection is that the $1,000,000 proposition only received about 30 votes in the House. I know that some gentlemen here claim that the Navy has more use for the aeroplanes than the Army, but that is contradictory to all common sense, barring the opinion of the gentlemen who assert that they need it. The air craft are being made use of wherever there are armies, and they are not being made constant use of anywhere by the Navy.

The principal occupation of the navies of the world to-day is to keep out of each other's reach, and in the main that means to stay safely near home. They do not need aeroplanes to do that. We appropriated $300,000 for the Army where it really needs the aeroplanes, and it seems to me that an appropriation of $200,000 for the Navy for the next fiscal year is amply sufficient. Under the law as it now stands, the current appropriation act, the Navy is authorized now to use more than $18,000,000 for the purchase or construction and repair of aeroplanes. It is true that is in items covering other things; but, as the gentleman has said, there was a large surplus left over from the year before. Having had authority to use such a sum as they pleased out of the appropriations, amounting to more than $18,000,000 for this year, how much have they used? It is $18,000,000, and I speak to a member of the Committee on Naval Affairs who does not know what they could use. There are two items in the current appropriation law which authorize the purchase and construction of aeroplanes, one of nearly $10,000,000 and the other $8,000,000, and they had a surplus in one of those amounts for the preceding year. Now, they are not using any such sum of money. They are not using a million dollars, although they will have left at the end of this fiscal year a considerable sum in those two items of appropriations. That is the proof of the pudding. Having the authority, they do not need the money, and we ought not to appropriate at the present time any more than they really need. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. PADGETT. Mr. Chairman, I am not going to take a long time to discuss this matter. The matter of aeronautics and its usefulness is being demonstrated every day in the European war. Foreign countries have large numbers of aeroplanes. For instance, in Austria-Hungary they have 600; Great Britain, 900; in France, 1,400; in Germany, 1,400; in Russia, 1,000; and we have in this country 23—the Army and Navy combined.

Mr. JOHNSON of South Carolina. Will the gentleman allow me to ask him a question?

Mr. PADGETT. Yes.

Mr. JOHNSON of South Carolina. The Government does not own them all?

Mr. PADGETT. Not all of them.

Mr. JOHNSON of South Carolina. Those are privately owned.

Mr. PADGETT. I can give the Government-owned ones, if the gentleman wishes. In Austria-Hungary they have 110; in Great Britain, 421; in Germany, 475; in Russia, 262; I was not counting the dirigibles in that number, but I was speaking of aeroplanes.

The dirigibles and Zeppelins are in addition to those numbers. Heretofore these appropriations for air craft have been embraced under the lump-sum appropriations for construction and repair and steam engineering and machinery, and the gentleman said there was about $18,000,000 that could be used. Of course if you could cut out everything else that had been appropriated—the construction of the ships, the repair of the

ships, and all of the many hundreds of other things that were provided for—and use it all for aeroplanes, we could have done so, but we have appropriated for these in connection with these various other items.

Mr. FITZGERALD. This $1,000,000 could have been used in 1914.

Mr. PADGETT. Yes; it could have been.

Mr. FITZGERALD. They had both the money and the authority.

Mr. PADGETT. But not the $18,000,000.

Mr. FITZGERALD. But they could have used the $1,000,000?

Mr. PADGETT. They could have used it.

Mr. FITZGERALD. How much did they use?

Mr. PADGETT. About $300,000. Now, then, I want to state that the Secretary said that under the conditions that were existing he could not use advantageously more than he has used in the past year. But in the past year conditions have changed very materially and substantially and a new phase is put upon the question and a new necessity presents itself to us. And I think it would be very wise to appropriate or make available this $1,000,000 that was appropriated to construction and repair last year and make it available for aeronautics next year, not only for the purchase of machines and the construction of them, but for the maintenance of stations and auxiliaries, which amount to several hundred thousand dollars, to equip us and prepare us for the suitable and proper management and handling of these matters. So I hope that the amendment offered by the gentleman from New York [Mr. FITZGERALD] to reduce it to $500,000 will be voted down, and that the $1,000,000 heretofore appropriated may be made available for the air craft.

The CHAIRMAN. The question is on the amendment to the amendment proposed by the gentleman from New York [Mr. FITZGERALD].

The question was taken, and the Chairman announced that the ayes seemed to have it.

Mr. PADGETT. Division, Mr. Chairman.

The committee divided; and there were—ayes 37, noes 43.

Mr. FITZGERALD. I ask for tellers, Mr. Chairman.

Tellers were ordered and Mr. MANN and Mr. PADGETT took their places as tellers.

The committee again divided; and the tellers reported—ayes 52, noes 54.

So the amendment was rejected.

Mr. MANN. Mr. Chairman, I move to amend the amendment by striking out "$1,000,000" and inserting "$500,000."

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend the amendment by striking out "$1,000,000" and inserting "$500,000."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the Chairman announced that the ayes seemed to have it.

Mr. PADGETT. Division, Mr. Chairman.

The committee divided; and there were—ayes 58, noes 42.

Mr. PADGETT. Tellers, Mr. Chairman.

Tellers were ordered, and Mr. MANN and Mr. PADGETT took their places as tellers.

The committee again divided; and the tellers reported—ayes 61, noes 52.

So the amendment was agreed to.

The CHAIRMAN. The question is now on agreeing to the amendment of the gentleman from Tennessee [Mr. PADGETT] as amended by the amendment of the gentleman from Illinois [Mr. MANN].

The question was taken, and the amendment as amended was agreed to.

The CHAIRMAN. The Clerk will read.

Mr. BUCHANAN of Illinois. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 5, line 23, after the word "proper," insert: "*Provided*, That the Secretary of the Navy is directed to expend $30,000 for establishing a plant to manufacture and construct air craft."

Mr. MANN. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The point of order is sustained.

Mr. BUCHANAN of Illinois. Mr. Chairman, upon what ground can the point of order be sustained against the amendment?

Mr. MANN. On the ground that it is legislation on an appropriation bill.

Mr. BUCHANAN of Illinois. The whole paragraph is legislation to a certain extent.

Mr. MANN. Not at all. The Chair overruled the point of order on the paragraph and held it in order.

Mr. BUCHANAN of Illinois. Will the gentleman withhold the point of order?

Mr. MANN. It is 2 o'clock now, I will say to my colleague, and we are notified that we are going to stay here until we reach a certain point in the bill, and it seems to me that we ought to make some progress.

Mr. BUCHANAN of Illinois. I have some information here.

Mr. MANN. Extend your remarks and insert the information in the RECORD.

Mr. BUCHANAN of Illinois. I have some information that the gentleman most probably has not.

Mr. MANN. I will read it in the RECORD if the gentleman will put it in.

Mr. PADGETT. Mr. Chairman, under the vote of the House the debate on this paragraph and amendments is closed.

The CHAIRMAN. That is true. The Clerk will read.

Mr. GARDNER. Mr. Chairman, I have an amendment to offer.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 18, line 17, after the figures "$1,000,000," insert: "*Provided*, That $20,000 of this appropriation shall be expended to test the reinforcements of the hulls of battleships and cruisers against submarine attack, and for this purpose, under the direction of the Secretary of the Navy, charges of high explosive as powerful as 300 pounds of picrate of ammonia shall be detonated under target sections of hulls similar to the hull of a battleship of the first line."

Mr. PADGETT. Mr. Chairman, I make a point of order against the amendment.

Mr. GARDNER. Mr. Chairman, I think it is clearly a restriction on the words, in line 14, "for other experimental work under the cognizance of the Bureau of Ordnance."

Mr. PADGETT. The whole matter you referred to is for construction and repair. This only deals with shells and powder and ordnance. It does not deal at all with ships or hulls of ships. Ships and hulls of ships are dealt with under steam engineering and construction and repair.

The CHAIRMAN. The Chair does not think that this is a limitation.

Mr. GARDNER. It is not meant for a limitation.

The CHAIRMAN. The Chair does not think it is.

Mr. GARDNER. But, Mr. Chairman——

The CHAIRMAN. Does the gentleman wish to be heard on the point of order? If so, the Chair will hear the gentleman briefly on the point of order.

Mr. GARDNER. I do not care to speak on it if the Chair has made up his mind.

Mr. PADGETT. Mr. Chairman, has the Chair ruled?

The CHAIRMAN. The Chair sustains the point of order.

Mr. BUCHANAN of Illinois. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois [Mr. BUCHANAN] moves to strike out the last word.

Mr. BUCHANAN of Illinois. I do so for the purpose of giving the House some information, although it may not be worth while if we do not consider matters that are of real importance in regard to the air craft. But I have a letter here which I received from the Navy Department, showing that we could establish a plant very cheaply for the manufacture of air craft. The letter comes from the Bureau of Construction and Repair and the Bureau of Steam Engineering. I will make my statement as brief as I can. It is recommended that if this work be done by the Government, it should be done either at the Norfolk Navy Yard or at the Philadelphia Navy Yard, these yards having an amount of space for testing work. I read:

NAVY DEPARTMENT,
Washington, January 29, 1915.

Hon. JAMES P. BUCHANAN, M. C.,
House of Representatives.

MY DEAR MR. BUCHANAN: Referring to my letter No. 26983–364 of January 2, 1915, concerning the estimated cost of a Government plant for the construction of air craft for the Navy, I take pleasure in forwarding herewith a copy of a joint letter from the Bureaus of Steam Engineering and Construction and Repair on this subject.

Sincerely, yours,

JOSEPHUS DANIELS,
Secretary of the Navy.

—

DECEMBER 14, 1914.

From: Bureau of Construction and Repair and Bureau of Steam Engineering.
To: Navy Department (material).
Subject: Aeroplanes.
Reference: (a) Department's memorandum, December 12, 1914.

1. While the initial successes in air-craft work were attained in this country, the design and construction here on a successful scale are

still in the development stage. Foreign countries are far in advance of our builders. The marked progress of this class of work abroad is due mainly, if not solely, to the encouragement given to private manufacturers by foreign Governments. While there are only a few companies in this country that can at present be considered as competent designers and builders, their number is sufficient to stimulate competition and bring about great improvement in design, provided there is a reasonable amount of Government business in sight. Furthermore, there are other companies that are only awaiting the existence of sufficient business to develop their ideas along the same line.

2. While the Government has resources, including a few officers specially trained in aeronautical-design work, this force can at present be considered as only a nucleus and is capable of carrying on only a very limited volume of work. It would be a tremendous loss to the advancement of aeronautical work to lose the ideas and results of private invention and experiment.

3. In view of the above and in view of the extremely hazardous nature of air-craft work, involving the loss of life and property, if not designed and manufactured with extreme care and along what experience has taught to be the safest lines, the bureaus believe that it would be a great mistake for the department to undertake at the present time the manufacture of air craft except on an experimental scale.

4. Preparations have already been under way for about two years looking to the design and construction of an experimental machine, with a view to developing ultimately the necessary plans, specifications, and detail instructions for the manufacture of aeroplanes, both hulls and power plants, by private manufacturers, including shipyards, and by navy yards in an emergency. This experimental work includes a continued series of laboratory experiments on a large scale at the navy yard, Washington. The preliminary work toward the experimental construction above mentioned is already in hand, and it has been the bureaus' intention to take up the manufacture of such an experimental aeroplane at the Washington Navy Yard in the near future.

5. The establishment of a Government plant for the general manufacture of air craft would require a complement of officers that can ill be spared at the present time, not only because the Navy has a very limited number of specially trained designers in this class of work, but because such a plant would call for the diversion from actual flying work of many of the most competent operators. As stated above, the establishment of such a plant would tend greatly to discourage the valuable initiative and resources of private manufacturers, who should be encouraged and stimulated as a most valuable asset not only in the development of air craft but also for turning out such craft in quantities in time of an emergency. Any Government plant which could be established in the near future would be entirely inadequate in war time, as air craft would be required in large quantities in such an emergency.

6. It is therefore recommended that the utilization of existing plants for aeroplane work be confined to the construction of one or more experimental aeroplanes on the department's design at the navy yard, Washington, and the construction of an aeroplane engine at one of the navy yards, with a view to the preparation of departmental plans, specifications, and manufacturing instructions in sufficient detail for use in an emergency.

7. However, if the department directs the establishment of a plant for the manufacture of air craft, it is recommended that the work be done either at the navy yard, Philadelphia, or the navy yard, Norfolk, these yards having a moderate amount of space for testing work. A considerable portion of the necessary plant is already available at these yards, but certain special tools would be required; some delay would be experienced in training a special force of mechanics, who would have to be instilled with the supreme importance of perfect workmanship. The approximate estimated cost of putting the shops at one of these yards in order and establishing an air-craft factory with a capacity of two or three machines per month is placed at $30,000. The estimated cost of turning out such machines under the present navy-yard cost system is about $6,000. This does not include the cost of the commissioned personnel, classified employees, leave, holiday, and disability, and certain other overhead charges not at present included in the cost of work, and does not include the question of patent rights; all of these would probably run the actual cost much above the above figures.

(Signed) SCHAEFER, *Acting.*
R. S. GRIFFIN.

That is the information I desired to get in before the point of order was raised against my amendment, thinking perhaps that if gentlemen understood how cheaply a plant could be established, it would be of great advantage to the Government, due to the fact that there have been statements made before our committee that it was very difficult to purchase these machines. Therefore by having a Government plant, in my opinion, it would tend to develop and improve our air craft in a way that would be of great importance to the Government.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Wisconsin?

Mr. BUCHANAN of Illinois. Yes.

Mr. COOPER. Has the gentleman taken into consideration the question of patents on some of these machines?

Mr. BUCHANAN of Illinois. Yes. There is something about that here.

Mr. COOPER. That is a very important consideration.

Mr. BUCHANAN of Illinois. He says, in respect to the cost that it "does not include the cost of the commissioned personnel, classified employees, leave, holiday, and disability, and certain other overhead charges," and "does not include the question of patent rights; all of these would probably run the actual cost much above the above figures."

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Wisconsin?

Mr. BUCHANAN of Illinois. Yes.

Mr. STAFFORD. During the debate it was stated that the reason why the Navy had not obtained more airships was the difficulty of obtaining the very delicate motors, the Mercedes and the Samson, from abroad. Is it proposed to obviate that difficulty and have them manufactured in the navy yards, or is it proposed to manufacture merely the frames?

Mr. BUCHANAN of Illinois. It would be the purpose to develop those parts by scientific men who are studying this question. I think if the Government had a plant, as it has in the case of powder and other things of that kind, it would develop men who would become expert along that line.

Mr. STAFFORD. Is it proposed by the gentleman's project to manufacture the entire machine and airship?

Mr. BUCHANAN of Illinois. Everything that they can manufacture. That would be my purpose, to have such a plant to manufacture every part of the machine and assemble them.

Mr. GARDNER. Mr. Chairman, I rise to the negative of the motion to strike out the last word.

Mr. Chairman, it is somewhat startling to find out that the ships of our Navy have not got hull protection against submarines. When gentlemen say that, ship for ship, our Navy is as good as the German Navy I am not sure that they know what they are talking about. The German Navy, it is said, has 20 dreadnaughts with double bottoms. They were designed, I understand, with a view to withstanding the explosion of 200 pounds of picrate of ammonia, or guncotton. They have five dreadnaughts with triple bottoms, we are told. Those were built in consequence of experiments with 300 pounds of picrate of ammonia, or guncotton, an experiment such as is provided in the amendment which I suggested.

Now, what are the facts? We have had one or two experiments made, but I think that 200 pounds of explosive was all that was used.

There may have been another experiment, but we can not find out anything about this special hull protection in the hearings. Why? Because the committee struck out the special hull protection discussion when Capt. Winterhalter gave his testimony. We do know that the German dreadnaughts have got these double bottoms and these triple bottoms, and we know that, except for the *Pennsylvania*, the *Arizona*, the *California*, the *Mississippi*, and the *Idaho*, we have not attempted to provide these inner bottoms for our vessels. In December the *Pennsylvania* was 61.7 per cent finished, the *Arizona* 43.6 finished, down to the *Mississippi*, which is only 2 per cent finished, while the *Idaho* and the *California* have not yet been begun.

Mr. FOWLER. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman from Massachusetts yield to the gentleman from Illinois?

Mr. GARDNER. I yield.

Mr. FOWLER. Can the gentleman give us any idea as to why experiments have not been made on the bottoms of vessels?

Mr. GARDNER. Oh, I suppose that it is the same old story of dawdle, dawdle, dawdle.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

Repairs, Bureau of Ordnance: For necessary repairs to ordnance buildings, magazines, wharves, machinery, and other items of like character, $30,000.

Mr. PADGETT. Mr. Chairman, I move to strike out the last word for the purpose of asking leave to print in the RECORD the letters of ex-Secretary Long and ex-Secretary Herbert, addressed to the present Secretary, relative to the Navy.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD by printing the communications referred to. Is there objection?

There was no objection.

Following are the letters referred to:

COPY OF EX-SECRETARY LONG'S LETTER.

HINGHAM, MASS., *December 21, 1911.*

Hon. JOSEPHUS DANIELS,
Secretary of the Navy.

MY DEAR MR. SECRETARY: I thank you for sending me your valuable and very interesting report as Secretary of the Navy. I am very much struck with the great development of the Navy since my day. I think that you are right, on the one hand, maintaining the present reasonable program of naval construction adapted to our ordinary preservation of the peace, but not, on the other hand, getting panic stricken over the present European condition, as if we were in danger of attack by the great nations which will come out of that conflict bankrupt and exhausted and recognizing the vital need of a long peace for their recuperation.

I am glad to see that your steps for promoting the efficiency and morale of the Navy—officers and men—by the expulsion of intoxicating liquors from the service is vindicated by the test of experience.

With all good wishes for your great department and with personal greetings of the Christmas season, I am,

Very truly, yours, JOHN D. LONG.

COPY OF EX-SECRETARY HERBERT'S LETTER.

1612 TWENTY-FIRST STREET,
January 30, 1915.

The honorable SECRETARY OF THE NAVY,
Navy Department, Washington, D. C.

MY DEAR MR. SECRETARY: I followed in the newspapers with deep interest the hearings before the Committee on Naval Affairs, and now have to thank you for an official copy, an examination of which has much impressed me with the knowledge you have acquired of naval affairs and the readiness with which you have been able to use it as occasion has demanded.

Your explanation of what the President meant by saying that the administration was not "nervous or excited" and your elucidation of the present status of the Navy and the program of the department were capital. The old maxim, "Festina lente," never was more applicable than it is to our naval program now. But the horror of the war in Europe has swept many well-meaning people off of their feet, and there are even those who see political advantage in an attack on the Navy Department because you have not asked for larger appropriations; but, in my opinion, you can afford to stand pat where you are, first, because sound public sentiment in this country demands that politics be kept out of naval as well as out of foreign affairs, and, secondly, because now is precisely the time when we should keep cool and study carefully the lessons that are being taught by the war in Europe.

Let me reminisce a little. Thirty years ago the first Cleveland administration found that a modest but efficient beginning of a new Navy had been made under Arthur. The Democratic Naval Committee of the House at the session of 1885–86 reported a bill for quite a number of new ships. Tom Reed, the opposition leader, under the rules of the House for a time successfully obstructed its passage. The bill was tacked onto an appropriation bill, points of order evaded, and it passed.

Mr. Reed later thought better of the matter, and never again, either under Cleveland or his successor, Harrison, was there any partisan opposition to naval appropriations. When I became Secretary of the Navy one of the first to congratulate me and tell me that he had written to President Cleveland urging my appointment was Nelson Dingley, of Maine, and during my administration of the department Senators Chandler and Hale and other Republicans of the Senate Naval Committee cooperated with the Secretary of the Navy as heartily as did the Democrats in the House committee. And there was no politics in naval affairs under McKinley or Roosevelt or Taft, nor was there any in the discussions of the first bill under your administration; and, beyond all doubt, the orderly progress of the Navy for the last 18 months, as the hearings and your reports prior to the hearings clearly show, has been quite as rapid under you as it was under any of your predecessors. Under none of them was the Navy any better prepared for immediate war with a great power than now. All this the public will fully understand.

If the Navy is not to be made the football of politics, then should the Congress decide at this short session, just because there is a great war in Europe, on an extensive program of construction? We have already before us several lessons from this war about the efficiency of submarines, of contact mines, of fast fighting ships, of swift commerce destroyers, or long-range guns; and we have learned also something about aeroplanes and Zeppelins, but we do not know yet the relative values of all these or what are to be the decisive factors in the great naval war that is now on; and that, before it is ended, will try out to the utmost every implement of destruction that human ingenuity has been able to devise.

If Congress now appropriates, no matter how many millions, it must specify the amounts for each item, the department must begin work upon each and all, and it may be that before the program is fairly entered upon it will become clear that grave mistakes have been made and much money is being wasted.

Twelve months hence we shall know better how much we should expend for naval construction and what to spend it for. Congressman GARDNER, in introducing his "searchlight" resolution, said he was convinced that the German cause was "unholy and a menace to the principles of democracy," and further expressed his belief that "the god of battles will visit defeat upon the Germans." If Mr. GARDNER is right in his opinion and his prophecy proves correct, German menace to our democratic institutions will be removed, and that important fact will be up for consideration in future appropriations. On the other hand, if Germany should win, even though her success should be a vast menace to America, no one can for a moment believe that, exhausted as the winner in this great war will be when it is over, our country would be in danger of immediate attack from that quarter.

I have no doubt of the wisdom of your construction program.

Yours, sincerely,

H. A. HERBERT.

Mr. BUCHANAN of Illinois. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by printing the letter from which I read extracts.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. GARDNER. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD, not only upon this paragraph, but as to any other part of the bill that I may discuss in debate.

The CHAIRMAN. The gentleman from Massachusetts [Mr. GARDNER] asks unanimous consent to extend his remarks in the RECORD on the bill generally. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Navy yard, Washington, D. C.: Fireproof general storehouse (cost not to exceed $225,000), to complete, $125,000; railroad system, improvements and extensions, $10,000; electric system, extensions, $10,000; in all, $145,000.

Mr. PADGETT. Mr. Chairman, I move to strike out the last word, for the purpose of asking permission to have the Clerk read at the desk, as my voice is bad, a letter from Admiral Fiske.

The CHAIRMAN. If there be no objection, the Clerk will read the letter.

The Clerk read as follows:

NAVY DEPARTMENT,
Washington, February 1, 1915.

From: Board on torpedo shell.
To: The Secretary of the Navy.
Subject: Experiments with Isham shell.

1. In obedience to your verbal instructions, the board on torpedo shell has the honor to report that in its opinion the experiments held with the Isham shell on January 27 were not conclusive and fell far short of demonstrating that the Isham shell can be considered an effective weapon of naval warfare. All the shell ricocheted that fell at distances of 8,000 yards or less. Out of seven fuses, only two operated correctly; and, the shell being filled with black powder only, no proof was given that if high explosive had been in the shell it could have been detonated by safe means. The experiments, however, are to be continued.

2. In regard to your additional instructions, that the board give its opinion as to the wisdom of the amendment adopted by the House, whereby "no part of the appropriation shall be expended for the purchase of armor-piercing shells of 12-inch caliber or larger, unless such shells are found by tests to be able to penetrate 10-inch Kruppized plates without breaking up the shell, fired with the standard service powder charge at an actual range of 12,000 yards," the board is of the opinion that such a provision would jeopardize the readiness of the Navy for war. We believe that our armor-piercing shell are as good as any that any antagonist could use against us and are as good as can be made in the present state of the metallurgical art.

B. A. FISKE, *Senior Member.*

The CHAIRMAN. The Clerk will continue the reading of the bill.

The Clerk read as follows:

BUREAU OF YARDS AND DOCKS.

Maintenance, Bureau of Yards and Docks: For general maintenance of yards and docks, namely: For books, maps, models, and drawings; purchase and repair of fire engines; fire apparatus and plants; machinery; operation or repair, purchase, maintenance of horses and driving teams; carts, timber wheels, and all vehicles, including motor-propelled and horse-drawn passenger-carrying vehicles to be used only for official purposes, and including motor-propelled vehicles for freight-carrying purposes only for use in the navy yards; tools and repair of the same; stationery; furniture for Government houses and offices in navy yards and naval stations; coal and other fuel; candles, oil, and gas; attendance on light and power plants; cleaning and clearing up yards and care of buildings; attendance on fires, lights, fire engines, and fire apparatus and plants; incidental labor at navy yards; water tax, tolls, and ferriage; pay of watchmen in navy yards; awnings and packing boxes; and for pay of employees on leave, $1,595,496: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for clerical, inspection, drafting, messenger, and other classified work in the navy yards and naval stations for the fiscal year ending June 30, 1916, shall not exceed $425,000.

Mr. MANN. Mr. Chairman, I move to strike out the last word. Why are motor-propelled passenger-carrying vehicles included for this bureau, which does not now have them?

Mr. PADGETT. I understand that they have one.

Mr. MANN. Is it paid for out of this appropriation?

Mr. PADGETT. Yes.

Mr. MANN. The existing law does not authorize it, as I recall. I believe the existing appropriation act provides for maintenance of horses, driving teams, and so forth, and of vehicles, including motor-propelled vehicles, for freight-carrying purposes only. Now, with an item in the current appropriation law like that, do they disregard it and go ahead?

Mr. PADGETT. I do not think so. I am not sure that this is a passenger-carrying vehicle. I will have to look it up.

Mr. MANN. I just asked out of curiosity, to know whether they paid any attention to the law.

Mr. PADGETT. I assume that they observe it strictly.

Mr. MANN. If so, they have no motor-propelled passenger-carrying vehicle.

Mr. PADGETT. It is freight carrying only, as I understand.

Mr. MANN. Or else they intentionally deceived the committee and the House when they made their estimates, because the law reads:

And all vehicles, including motor-propelled vehicles for freight-carrying purposes only for use in the navy yards.

If under an appropriation like that they operate passenger-carrying motor vehicles, it is intentional deceit. If they have any occasion for a motor-propelled vehicle, I have no objection to their having it. I simply take the gentleman's statement that they have one there under the current law. It may be that the gentleman was misinformed.

Mr. PADGETT. I can explain the matter to the gentleman now. There was an estimate submitted for a motor-propelled vehicle, and the committee disallowed it and did not include it, but we failed to correct this language here. They asked for a passenger-carrying motor-propelled vehicle, and we did not give it to them.

Mr. MANN. Then they have not any now?

Mr. PADGETT. No.

Mr. MANN. Did they say they needed one?

Mr. PADGETT. They wanted one, but we did not give it to them.

Mr. MANN. I have no objection to giving it to them if they need it.

Mr. PADGETT. But we did not report it.

Mr. MANN. But the committee did report it, and it is in the bill.

Mr. PADGETT. No; there is no authority to purchase.

Mr. MANN. Let us see whether there is or not:

Operation or repair, purchase, maintenance of horses and driving teams, carts, timber wheels, and all vehicles, including motor-propelled and horse-drawn passenger-carrying vehicles to be used only for official purposes.

That clearly authorizes the purchase of motor-propelled vehicles for passenger-carrying purposes.

Mr. PADGETT. Mr. Chairman, I move to strike out the last word. The other day the gentleman from Pennsylvania [Mr. MOORE] asked with reference to the item in the bill appropriating $14,000 for lepers. A general statement was made, but I have here a specific statement giving the information in detail. I ask to have that printed in the RECORD.

The CHAIRMAN. If there be no objection, it will be printed in the RECORD.

There was no objection.

The letter is as follows:

NAVY DEPARTMENT,
Washington, February 1, 1915.

Hon. L. P. PADGETT, M. C.,
Chairman Committee on Naval Affairs,
House of Representatives, Washington.

MY DEAR MR. PADGETT: That you may be able to give further enlightenment to those desiring information with respect to the lepers of Guam, I desire to place the following facts before you.

In January, 1912, there were 23 lepers recluded on the island of Guam, but even though segregated it was deemed advisable, in order to effectually and permanently eradicate the disease from this island, to remove therefrom every source from which leper bacilli was transmitted. Accordingly the governor of Guam, in the spring of 1912, sought and secured the permission of the Governor General of the Philippines to transfer all Guam lepers to the island of Culion, in the Philippines, where the Philippine Government had established a leper colony for the segregation and treatment of lepers found among the inhabitants of the Philippines, with the view to the ultimate elimination of leprosy from those islands.

Culion is well isolated, is roughly 20 by 40 miles in size, and is located about 240 miles southeast of Manila. The lepers are permitted to establish themselves at any place on this island, and if they desire to take up farming the necessary animals and implements are provided at Government expense. In actual practice, however, it is found that they practically all live in the town of Culion, where everything is furnished for them by the Philippine Government. A large modern hospital has been established for those who are bedfast or those who desire to undergo special treatment. The town is located on an elevated site, has a modern sewage system, and is practically controlled by regulations and ordinances which the lepers themselves make.

The permission for the transfer of Guam lepers to Culion was conditional upon the Navy providing the transportation and bearing the cost of their maintenance after establishment there. The Comptroller of the Treasury held that the appropriation as then phrased would not permit of expenditures on account of their transfer to and maintenance at Culion, and the department then asked that the wording of the appropriation be extended, which was done in the naval act approved August 22, 1912. In the following December the transfer was made.

It was stated in the last annual report of the governor of Guam that there were 17 Guam lepers at Culion and that during the fiscal year 1914 they had cost the Government $7.65 per leper per month, which would make the yearly cost of maintaining 17 lepers $1,560.60. However, during the present fiscal year, the report states, the cost will be $8.79 per man per month, owing to certain ration changes made in pursuance of complaint by the lepers.

In 1914, according to our records, this appropriation was deficient by $310.69. Besides maintaining the lepers in Culion it is charged with the pay of the hospital force at Guam, amounting to a trifle over $3,000 per annum, with the rations of patients and nurses amounting, in round numbers, to $8,000 per annum, with the cost of hospital supplies and drugs amounting to about $3,000 per annum, with repairs and general items of maintenance varying in cost, and sundry charges, the aggregate of which would exceed the appropriation if assistance were not given by the Bureaus of Medicine and Surgery and Yards and Docks.

This is the only special appropriation which is made for expenditure at Guam, the island, apart from the naval station, being self-supporting, but not sufficiently so to get along without this aid, unless heavier taxes were levied, which, it is understood, the people can ill afford to bear.

Very sincerely, JOSEPHUS DANIELS.

The Clerk read as follows:

Navy yard, Charleston, S. C.: Dredging, to continue, $20,000; paving and grading, to continue, $10,000; in all, $30,000.

Mr. MADDEN. I move to strike out the last word. I would like to ask the gentleman in charge of the bill how it happens that it costs just exactly $10,000 in many cases to do the dredging every year?

Mr. PADGETT. The dredging amounts to more than that; but those are the items submitted to do that much of it during the year.

Mr. MADDEN. I notice that they always have the same amount.

Mr. PADGETT. Not always; but in this bill we allowed generally $10,000 for each item.

Mr. MADDEN. Last year the items for given work were just exactly the same.

Mr. PADGETT. Yes.

Mr. MADDEN. I did not know whether they had any systematic way of reaching what it really cost or whether they just guessed at it and put that figure in.

Mr. PADGETT. No; the estimates submitted were more than that, but that was the amount that was allowed to do the work during the current year.

Mr. MADDEN. How did the committee reach the conclusion that $10,000 was just the right sum?

Mr. PADGETT. Those were the amounts submitted by the department.

Mr. MADDEN. I thought the gentleman said the estimates were a good deal more.

Mr. PADGETT. The estimates that came from the yards.

Mr. BUTLER. But the department said they could get along with $10,000 in each case.

Mr. MADDEN. I was struck by the similarity of the amount in each case, and I wondered whether it was just a haphazard way of making the appropriation.

Mr. PADGETT. No; it was done in the way I have stated.

The Clerk read as follows:

Navy yard, Mare Island, Cal.: Dredging and diking, to continue, $20,000; railroad system, extensions, $10,000; garbage crematory, $7,500; improvements and extensions to distributing systems, $15,000; oil storage, $12,500; in all, $65,000.

Mr. MADDEN. I move to strike out the last word. I notice that in nearly all the items for the different navy yards there is an extension of the railroad system. I was wondering whether they were tearing up the yards and reconstructing the railroad tracks, or whether it was necessary to build new railroads in every yard, or whether the extensions went beyond the yards, or where they went to, and what they were built for, and why it was necessary to continue building new railroads every year.

Mr. PADGETT. The railroad does not go out of the yard, but it is to reach different parts of the yard where the shops are located. The reason why the appropriation extends through different years is because Congress does not appropriate the amount asked in one year to complete the work.

Mr. MADDEN. How many miles of railroad are built in any one yard?

Mr. PADGETT. I could not tell.

Mr. MADDEN. In a given year?

Mr. PADGETT. It does not run up into miles.

Mr. MADDEN. If it does not run up into miles, I could build a mile of railroad in one of these yards for less than $10,000; and if it costs $10,000 every year, it seems to me that there must be a good many miles of railroad, or else a lot of extravagance, I do not know which.

Mr. PADGETT. The road runs from one portion of the yard to another.

Mr. MADDEN. If you lay a railroad track once, it is laid permanently unless you tear the shops down, locate them in another place, and want to build new tracks to the different shops. If the shops are located in a permanent place, the railroad must be permanent; and if they are, why rebuild them?

Mr. PADGETT. I will call the gentleman's attention to this statement in the hearings:

The CHAIRMAN. The next item is for "railroad system, extensions, $10,000."

Admiral STANFORD. It is desired to double-track Mare Island Avenue in front of building 69, to extend the track in the northern part of the yard around the old machine shop, to install an extension to the south to Dry Dock No. 2, and to provide additional cars.

Mr. MADDEN. Then I should think there would be an item here for the purchase of cars.

Mr. PADGETT. It says railroad-system extension. It extends the tracks and the operating part of it, too.

Mr. MADDEN. I can not read that language with that understanding. The only thing I can see in the language employed in this section is the authority to extend the railroad system, and that means tracks.

Mr. PADGETT. The system is not limited to tracks.

Mr. MADDEN. It is where I was brought up.

Mr. PADGETT. Any system could not be very well operated if it had nothing but tracks.

Mr. MADDEN. The system is one thing and the equipment is another.

Mr. PADGETT. It all comes under the word "system."

Mr. MADDEN. I do not think so. It seems to me that the language ought to be so clear that the department authorized to expend the money should not be authorized to expend money for any purpose except that set forth in the bill. It is not right,

it is not fair, and it is not frank to the House to come in with a provision in the bill authorizing the extension of railroad tracks and then use any part of it for equipment and operation.

Mr. PADGETT. It does not say "tracks"; it says "system."

Mr. MADDEN. And the gentleman believed when he introduced the language that "system" covered everything?

Mr. PADGETT. I did not introduce it.

Mr. BUTLER. This is not a new appropriation, the amount is different.

Mr. CURRY. Mr. Chairman, I rise in opposition to the motion of the gentleman to strike out the last word. The language in this bill regarding this appropriation is the usual language; it has been used in every appropriation bill for years. It says "for railroad system extensions." That does not mean for the extension of the rails alone. Railroad extension means the upkeep, double-tracking, buying new cars, and repairing the old cars. I venture to say that the railroad system in which my friend from Illinois is interested, and from which he draws some little profit, has to be kept up, and tracks once laid have to be relaid, and cars have to be repaired, and sometimes new cars have to be built. "For railroad system extension" does not mean for the extension of the line and nothing else, but includes double-tracking, repairs, and other items incidental to improvement and maintenance of the road. As a matter of efficiency and economy the railroad at Mare Island should be kept in repair, double-tracked, and from time to time extended. To permit of that is the purpose of this item in the bill.

The Clerk read as follows:

Navy yard, Puget Sound, Wash.: Dredging, to continue, $15,000; railroad system, extensions, $25,000; building slip for submarines, $20,000; in all, $60,000.

Mr. PADGETT. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 21, after line 13, insert as a separate paragraph the following:

"The Secretary of the Navy is hereby authorized, in his discretion, to exchange certain land at the navy yard, Puget Sound, Wash., not needed for naval purposes for certain other land of equal value adjacent to and lying outside of the present boundaries of said yard, and to execute and to accept on behalf of the United States such papers as may be necessary and appropriate to effect the exchange: *Provided*, That before said exchange is effected the Attorney General shall pass upon the sufficiency of the title to the land proposed to be conveyed to the United States."

Mr. MANN. To that I reserve a point of order.

Mr. PADGETT. Mr. Chairman, I have a letter from Assistant Secretary Roosevelt of the Navy and a report of the board. They are not very long, and accompanying them is a map of the lands. I will ask the Clerk to read the letter and the report in my time.

Mr. BUTLER. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. BUTLER. This amendment was not called to the attention of the committee?

Mr. PADGETT. No; it was sent to me a little while ago. It is simply to exchange a little lot that they do not need and to get one that they do need.

The Clerk read as follows:

NAVY DEPARTMENT,
Washington, December 1¼, 1914.

MY DEAR MR. PADGETT: I have the honor to submit the following statement in respect to the desirability of exchanging certain naval land at the navy yard, Puget Sound, Bremerton, Wash., for certain land adjacent to this yard and now in private ownership.

The principal entrance gate to the navy yard used by the civil employees is located at the foot of Chester Street, Bremerton. This street for a distance of about 330 feet along the navy-yard boundary has a width of only 30 feet. On the westerly side of the street and abutting the main entrance gate to the yard a general store is located. In February, 1913, the proprietor of this store was granted by the city authorities a license to establish a pool room, and the commandant at the yard learned that he was also taking steps to purchase the property. The litter around this store has been very objectionable for some time past, and with the increased use of the Chester Street entrance gate, due to the closing of the Warren Street gate, the objectionable features have become more noticeable.

The particular property on which this store is located has since been purchased by Mr. C. E. Thomas, president of the First National Bank at Bremerton, the purchase having been made by Mr. Thomas at the request of the commandant of the yard, and with the understanding that title to the property was to be transferred to the Government in exchange for other land of equal value at the navy yard that was not needed for naval purposes. This understanding between the commandant and Mr. Thomas was approved by the department, and Mr. Thomas was advised that the department "will take steps to have the exchange authorized by Congress."

In order to fix an equitable basis on which the proposed exchange might be accomplished, a board of naval officers at the yard was appointed by the commandant to consider the matter. This board (copy of report herewith) found that the Government could with advantage exchange four lots at the foot of Park Avenue (formerly Dock Street) for the two lots on Chester Street, saying "that an exchange on this basis will be fair to both parties."

The present owner of the Chester Street lots has expressed his willingness to effect the exchange of lands on the basis outlined by the board.

The two lots on Chester Street are designated as lots Nos. 1 and 2, block 1, Phillip's addition, Bremerton. These lots are each 30 by 140 feet, and contain a total of about 8,400 square feet.

The four lots of naval land proposed to be given in exchange were originally described as lot No. 48, block 14, and lots Nos. 21, 22, and 23, block 19, Bremerton. These lots are each 30 by 100 feet and contain a total area of about 12,000 square feet. These four lots are a part of the tract of 17½ lots in Bremerton acquired by the Government under deed dated June 6, 1900, at a total cost of $1,000. The purchase of these lots was authorized by the act of March 3, 1899 (30 Stat., 1035), as additional land to protect the water supply at the navy yard. Since the purchase of this land other arrangements have been made in respect to the water-supply system at the yard and little or no use has been made of the land that it is proposed to give up, nor have public improvements been placed thereon.

It is considered that it would be of material benefit to the public interest for the Government to acquire the two lots at the Chester Street entrance gate to the yard, and that for this land the naval property described above may be exchanged without detriment to the public interests.

In view of the foregoing, I have to respectfully submit the matter to the consideration of the Committee on Naval Affairs with the recommendation, in case such action meets with the approval of the committee, that there be included in the naval bill a clause authorizing the effecting of the proposed exchange.

For the convenience of the committee there is inclosed a draft of a clause that will, it is believed, cover the matter.

There is also inclosed a blue print showing in red the two tracts of land mentioned.

Sincerely, yours, FRANKLIN D. ROOSEVELT,
Acting Secretary.

Hon. LEMUEL P. PADGETT, M. C.,
Chairman Committee on Naval Affairs,
House of Representatives.

(3 inclosures.)

(Draft of clause, proposed to be inserted in naval bill, authorizing exchange of certain land at the navy yard, Puget Sound, Wash.)

NAVY YARD, PUGET SOUND, WASH., *February 24, 1913.*

From: Commander A. H. Robertson, United States Navy; Assistant Civil Engineer R. M. Warfield, United States Navy; Paymaster's Clerk A. G. King, United States Navy.
To: Commandant.
Subject: Exchange of certain lots.
Reference: Commandant's order F-1464, February 20, 1913.

1. In compliance with your order appointing us a board to ascertain valuation of lots Nos. 1 and 2, block 1, Phillip's addition to Bremerton, and to decide what portion of lots owned by the Navy Department on Fourth Street, Bremerton, are of equal value to the two lots above referred to, the board finds that lots Nos. 1 and 2, block 1, Phillip's addition to Bremerton, are valued at $3,600. This includes a two-story house located on lot No. 1. The value of these lots is dependent upon their location adjacent to Chester Street gate and also by the beautiful view obtained from them of the water front. It is believed that lots Nos. 21, 22, and 23, block 19, together with lot 48, block 14, facing on Fourth Street, are of equal value to the above-mentioned lots and improvements. Lots owned by the Navy Department are on low land and are not as desirable for residence property, and at the present time can not be considered as business property. It is believed that an exchange on this basis will be fair to both parties.

2. There is forwarded herewith blue print of plan No. 2A-222, showing position of lots referred to. Attention is invited to the fact that lots Nos. 1 and 2 of block 1, Phillip's addition to Bremerton, are approximately 30 feet by 140 feet each, whereas lots owned by the Navy Department are approximately 30 feet by 103 feet each.

A. H. ROBERTSON.
R. M. WARFIELD.
A. G. KING.

Mr. HUMPHREY of Washington. Mr. Chairman, I have very little information other than is set forth in the communication that has just been read. I know something about the conditions personally, and I am satisfied that it would be to the advantage of the Government and the public to have this exchange made. Of course, it is true that it is somewhat complicated, and I wish, under the circumstances, that the gentleman from Illinois would withhold his point of order.

Mr. MANN. I would like to ask the gentleman a question—whether he thinks it a very good method of legislation for the Navy Department to expect us to authorize an exchange of lands that can just as well be made next year, or could have been made last year, upon a letter read at the desk, so that no one has an opportunity to understand the facts?

Mr. BRYAN. Mr. Chairman, I move to strike out the last word.

Mr. MANN. Mr. Chairman, I make the point of order.

Mr. BRYAN. Mr. Chairman, the navy yard at Bremerton at times needs more land. I want to call the attention of Members to the fact this proposed exchange has never been referred to me, although I lived at Bremerton for 10 years and up to the time I was elected to Congress two years ago. If this transfer was to be made, it would seem that, owing to my personal knowledge of all the facts, some reference would have been made to me, so that I could know when the matter was coming up and could give the House the benefit of my first-hand knowledge of the situation. Mr. Thomas, president of the First National Bank, referred to in the departmental letter, is, or was until recently, president of the Bremerton Commercial Club, and in more or less continuous correspondence with me; and of course he could write me quite easily.

These four lots which it is proposed to transfer to Mr. Thomas are part of what is generally known as Burwell Park. They were acquired by the Government to protect the yard water supply while the village of Bremerton was very small and when wells were used. These lots are not now needed for that purpose. That statement is true. Further, I will say there has not been complete and adequate improvement of the area as a park, nor has the Government made a permanent dedication of it for such purposes. Permission to so use it has been granted. Some trees were planted by a women's organization, a band stand was erected at public expense raised by popular subscription at a mass meeting in the park, and a lawn-tennis court was laid out and established by clerks in the yard. I am not sure that the four lots particularly involved actually contain the tennis court or the stand, but the whole area has been fenced and improved as a public area. The boys play ball on one part of the tract. It stands as a recreation ground which may be further improved later. A very substantial sum, more than the entire value of the Chester Avenue lots, was spent by the Government and the city in leveling these Park Avenue lots and in grading and sidewalking the streets.

Those four lots on Park Avenue that are to be exchanged for the two lots on Chester Avenue are worth, each of them, the equivalent of three, or to be safe I will say two, of the Chester Avenue lots. In other words, if this deal were to go through, the Government would give four lots each of which is worth twice as much as the Chester Avenue lots for two. The Park Avenue lots are within one block of the principal business section and paved streets of the city of Bremerton. It is proposed to give four of those lots right next to the business section of Bremerton for two lots away up on the hill in the residence section. I lived within half a block of these two lots the Governments is to acquire and passed by both tracts every morning and evening for years, and I have passed on an abstract of title, acting as attorney in the sale of two lots adjoining the lots the Government is to part with, so that I know the facts about the matter, and I repeat, one lot on Park Avenue is easily worth two lots up on Chester Avenue, and the exchange would be a gross injustice. The Government would give up at least four dollars for one, and there is a great demand for those other lots that are down on Park Avenue. They are right next to the Masonic Hall, and close to the business section. They are valuable and the lots on the hill are of intrinsically much less value.

Mr. MANN. Then the gentleman thinks that I really performed a public service when I reserved the point of order?

Mr. BRYAN. Yes; I think the gentleman did; but I am sure the House would have voted it down, even if the point of order had not been reserved, after the information I am able to give to the House.

Mr. MANN. But I think it was safer to really reserve it than to depend upon the gentleman's argument. [Laughter.]

Mr. BRYAN. Oh, but I would have had the gentleman from Illinois as a recruit and support.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. BRYAN. Yes.

Mr. BUTLER. What is the name of the banker who tried to make this exchange?

Mr. BRYAN. C. E. Thomas, president of the First National Bank. I suppose a good exchange of land appeals to him as strong as to anyone else. He is a very nice gentleman, however.

Mr. BUTLER. Oh, I know. He may be clean and sweet, all right; but is he in the habit of working jobs of this kind?

Mr. BRYAN. He looks out for Mr. Thomas; but he is a gentleman of the very highest standing.

Mr. BATHRICK. What is the name of the commandant who was willing to have the banker put up the job?

Mr. BRYAN. That is the trouble about our navy yard commandants. The commandants are itinerants. They come and go, and instead of having an industrial management—a man to look after the manufacture and business of the yard—we put in itinerant admirals, one after another, who have very little interest in or knowledge of local conditions as a rule. Sometimes we get a good one and sometimes we do not. If you were to impose on an ordinary private shipbuilding plant the admiral that very often goes to these yards, the shipbuilding plant would give the admiral $5,000 a year to stay away. We do not manage our yards for industrial efficiency. We ought not to leave it to an admiral to manage them, but we ought to leave it to some one who is versed in the management and manufacture of things that are to be produced at the yards. We should have some kind of industrial management such as the Secretary of the Navy is now advising.

Mr. PADGETT. Mr. Chairman, I just want a moment to say that this matter has been investigated by the department and is recommended by the Assistant Secretary of the Navy. The department appointed a board, and that board investigated the matter, and reports in detail. I do not jump to violent conclusions with the rapidity with which the gentleman from Washington [Mr. BRYAN] does. I shall accept the statements of the gentleman with many grains of salt.

Mr. HUMPHREY of Washington. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. HUMPHREY of Washington. I just wanted to suggest to the chairman that I am well acquainted with the banker, Mr. Thomas. I have known him a great many years, and I know nothing whatever to his discredit, unless it be that he is the leading Democrat in the city. [Laughter on the Republican side.]

Mr. BRYAN. I lived there about 10 years, and the exchange would be at least four dollars to one against the Government.

I must add, under the consent granted, that the use of this Park Avenue property for speculation by Mr. Thomas or anyone else would be a distinct loss and a source of great regret to the men and women of Bremerton. It would be very unfortunate for the Government to part with it unless it transferred it to the local public authorities for use of the public. I have hoped to see a public building erected there or a building erected by some philanthropic person for a naval Young Men's Christian Association. The Park Avenue lots are so located as to be of great value for such a purpose, right in the heart of the city as they are. We blackballed the liquor traffic out of the State of Washington at the last election, and there should be a gymnasium and reading room for the Navy boys on one corner and the civilians on the other. There are four corners here owned by the Government, outside of the navy yard, on Park Avenue. I have valued them very low when I put that value at two to one for the property up the hill at Chester Avenue. This Park Avenue corner would be an ideal location for a Government post-office building if the park features are to be eliminated. There are 19 lots in the tract. They extend from Burwell Street—formerly Third Street—to Fourth, with Park Avenue running through the tract, thus providing four admirable corners. To expedite the parking of the lots, the city some years ago vacated an alley running east and west through them. To devote that alley area to private speculation would be a gross injustice.

The alleyway should be returned to the public if the Government does not propose to retain it. I have no grievance against Mr. Thomas, but I say here that it is my duty as a Representative of the rank and file at Bremerton as well as the speculators to do all I can to prevent this property being handed over to private parties to the detriment of the public and all parties interested except through speculation. I will add this, which may help to explain the situation: Certain splendid gentlemen who are officers in the Navy own the Kitsap Inn, a high-class apartment and boarding house, very near to this side entrance to the navy yard on Chester Avenue. Of course, the owners of this inn would be advantaged by the Government taking over the Chester Avenue lots and beautifying them in front of their property. At present the workingmen of the yard stop at this little store as they go to and come from work and buy their tobacco and something for their noon lunch, and so forth. The inn owners would doubtless prefer not to have this little workman's store so near their apartment. This letter from the Navy Department might be deemed to indicate that this Chester Avenue entrance to the navy yard was the main entrance. Such is not the case. The main entrance is about half a mile away on Front Street, in the business section of the city. This is a side entrance far removed from the business activity and main Front Street entrance to the yard.

The CHAIRMAN. The Chair sustains the point of order, and the Clerk will read.

The Clerk read as follows:

Naval proving ground, Indianhead, Md.: Toward extension of powder factory (cost not to exceed $500,000), to complete public work features, $158,380.

Mr. MANN. Mr. Chairman, I reserve the point of order on the paragraph for the purpose of getting a little information. As I recall, in the current appropriation law for this fiscal year we provided for this extension of the powder factory at the naval proving grounds, and appropriated not to exceed $500,000.

Mr. PADGETT. That is correct.

Mr. MANN. And this bill carries two items designed to complete the appropriation of the $500,000?

Mr. PADGETT. That is correct.

Mr. MANN. And there will be no other appropriation in order next year under that original authorization?

Mr. PADGETT. None whatever beyond this one and one following later.

Mr. MANN. Well, this one and the one on page 17.

Mr. PADGETT. Yes; that is correct.

Mr. MANN. Mr. Chairman, I withdraw the point of order.

The Clerk read as follows:

Naval magazine, Fort Mifflin, Pa.: One shell house, $25,000; fixed ammunition storehouse, $13,000; one magazine, $13,000; reforming plant extension, $7,000; railroad system, extensions, $6,000; in all, $64,000.

Mr. HOBSON. Mr. Chairman, I move to strike out the last word. I just wish to make a few remarks in connection with the letter which the chairman has just read from the senior member of the Board on Ordnance and Equipment, Navy Department. I think it is only just and fair to have a proper impression prevail as to the experiments which were actually made and their result. That letter says:

The board on torpedo shell has the honor to report that in its opinion the experiments held with the Isham shell on January 27 were not conclusive and fell far short of demonstrating that the Isham shell can be considered an effective weapon of naval warfare. All the shell ricocheted that fell at distances of 8,000 yards or less.

The armor-piercing shell fired at 12,000, or even 14,000, yards ricochets. The Isham shell if fired at 8,000, 6,000, 4,000, and 2000 yards, with one bag instead of two bags of powder, would ricochet at all these ranges. The shell bites the water and goes under, making an underwater run. This would give the impression that in the experiment the shell failed, as far as the ricochet test was concerned. On the contrary, every shell fired at 10,000 yards bit the water and went under. Now, there were three shells fired at 10,000 yards, all of which bit the water and made the underwater run. Two of them had their fuses operate out of the three. There were three fired and two fuses operated. All but the first one operated, and that one was a peculiar one and marked "No. 4." It was stated in advance that would not count, but they wanted this fired for certain experimental purposes. The question of fuses and the question of ricocheting are entirely different. The impression prevailing from the letter read would indicate failure in both features. The shell does bite, and with slight modifications the shell would bite even more than it bit before, and the fuse does operate, and it is believed that the fuse, with slight change, would operate even when the shell ricocheted. A change of the size of a little hole in connection with the locking and unlocking device of the shell, the effect of one-eighth of an inch in the size of the hole, it is believed will make all the fuses operate. Now, the reason why——

Mr. HENSLEY. Will the gentleman yield?

Mr. HOBSON. I will.

Mr. HENSLEY. I would like to inquire of the gentleman what encouragement, if any, has ever been given this man Isham in the construction of these shells by the Naval Establishment? In other words, has he had any encouragement, or has he had——

Mr. HOBSON. I will answer that question by citing the experience in the development of this fuse. A fuse is one of the most delicate pieces of mechanism in all the world. I do not except clockwork; I do not except torpedoes or anything else; the fuse is the most delicate, complex, complicated piece of mechanism in the world. We are to-day probably not over the experimental stage with the fuse that is used in the armor-piercing shell; that to-day is partially unsettled, for it was not certain in the failure of the armor-piercing shell whether the fault was in the shell or in the fuse; we have experimented for 25 years on the armor-piercing shell fuse, and the Government itself has spent thousands and thousands and tens of thousands of dollars in helping inventors to develop these fuses. Mr. Isham requested that he be allowed to use simply the machine tools down at the navy yard, tools of precision, for developing his fuse. The board, of which Admiral Fiske is chairman, recommended that the Navy Department allow him to go and use those tools of precision, but the Bureau of Ordnance refused to do it, and Mr. Isham had to go to a boiler shop and make these fuses by himself. Think of that; to make this complicated piece of mechanism in a boiler shop, and then to go down and fire them, and two out of three operated.

Mr. COOPER. Will the gentleman yield?

Mr. HOBSON. I will.

Mr. COOPER. What reason did the Bureau of Ordnance give for denying him the request?

Mr. HOBSON. Oh, they said that if Mr. Isham's shell failed he would lay the blame to them, and Mr. Isham repeatedly and repeatedly and repeatedly disclaimed that he would lay any blame to them.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COOPER. Mr. Chairman, I ask unanimous consent that the gentleman may have five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin? [After a pause.] The Chair hears none.

Mr. PADGETT. Will the gentleman yield to me for a moment?

Mr. HOBSON. Certainly.

Mr. PADGETT. The information I have from the Navy Department, and what I have in addition, is that Mr. Isham accused the Chief of the Bureau of Ordnance of all sorts of misrepresentations and wrongdoings, not only the present chief but the former, Admiral Twining, and when this matter came up Admiral Strauss stated to him, "You have it made wherever you want to, get any concern in the United States to make it for you, and we will pay for it, but we do not want to assume the responsibility of making it when you have accused the department of all sorts of corruption and malfeasance and misfeasance and wrongdoing." He said, "You have it made wherever you select in the United States, and we will pay the bill."

Mr. COOPER. Would that contract have bound the department? How could Mr. Isham, a poor man, as I understand him to be, go to some private manufacturing establishment and say, "The Bureau of Ordnance said if I came and had this work done they would pay for it." What sort of a contract would that be?

Mr. PADGETT. The department proceeded to give him assurance they would pay for it, and he could have it done at any place he might select.

Mr. COOPER. Assurance in writing?

Mr. PADGETT. I did not know that it reached that far. Mr. Isham declined to do it.

Mr. ROBERTS of Massachusetts. Will the gentleman yield for a question?

Mr. HOBSON. Certainly.

Mr. ROBERTS of Massachusetts. Is it not also a fact that Mr. Isham has accused the officials of both the Navy Department and the War Department in years past of not handling his experiments properly, of so conducting them, the material, particularly, as to prejudice the success of his experiments?

Mr. HOBSON. He certainly has made that accusation a hundred times.

Mr. ROBERTS of Massachusetts. And is it anything strange that any official of the Government to-day should decline to take the responsibility of making anything connected with his experiments?

Mr. HOBSON. Of course, it is not the chief of bureau, and that is why we had to have a board appointed.

Mr. PADGETT. And that board was appointed at the request of Admiral Strauss.

Mr. HOBSON. And I was with him when we decided that was the only thing to do.

Mr. PADGETT. I suggested, in face of all these accusations that were made, to have the board appointed, of which Admiral Fiske is president. I want to state another fact, that the department has spent over $300,000 heretofore experimenting with and trying to develop this Isham shell.

Mr. HOBSON. The gentleman is a thousand miles wrong in that statement. Most of the money has been spent on the A. P. shell.

Mr. PADGETT. These experiments were made at the request of Mr. Isham and under his direction, to demonstrate his theories.

Mr. HOBSON. Demonstrate no theories. It was to demonstrate whether the A. P. shell is effective or not, and we found it was not. The money should be charged to the A. P. shell. There has been only the smallest amount comparatively spent to develop the Isham shell.

Mr. COOPER. What is the A. P. shell?

Mr. HOBSON. The armor-piercing shell on which the Navy now depends.

I am glad the chairman of the committee has brought out the question of personal equation which has existed for 13 years between the chiefs of bureau of both the Army and the Navy Departments in regard to this line of experiment. To start with, as the gentleman has stated, the chief of bureau did not wish to have anything to do with it. When the chief of bureau washed his hands and let it go to the board he was free from responsibility. But when the request was made of the Navy Department to let Mr. Isham use the instruments of precision at the navy yard there was no question of responsibility of the chief of the bureau. Moreover, the chief of the bureau told Mr. Isham if he did make the fuses outside they would pay for them. Mr. Isham made the fuses in a boiler shop

with crude tools and a small number of workmen, and the sum total of cost was but a few hundred dollars, but the chief of bureau declined to pay the bill. With the labor and material on these first fuses, the cost averaged about $37, but the chief of the bureau told him that he could get fuses for $10 apiece on the average, and that he would pay only $10 apiece for them. That is the way he is expending $300,000 on developing the Isham shell.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I ask for the regular order.

Mr. HENSLEY. Mr. Chairman, I ask unanimous consent that the gentleman be allowed five minutes' additional time.

Mr. MANN. I reserve the right to object, Mr. Chairman. If we are to be kept here by the committee until we read to a certain point in the bill, I think we ought to confine ourselves to the items in the bill.

Mr. HOBSON. Mr. Chairman, I have seen the gentleman from Illinois sit right here and make points of order that took hours and hours of our time. He is not the man to put up to me the question of wasting the time of this committee.

Mr. MANN. I object, then.

Mr. HOBSON. I expected the gentleman to object. The gentleman has objected to more meritorious propositions than any man that ever lived, and I dare say he is proud of his record.

Mr. MANN. Well, the gentleman from Alabama is never here, anyway, unless he is personally interested in something.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Naval magazine, Puget Sound, Wash.: Shell house, $15,000; 2 magazines, $30,000; storage sheds, $4,000; house on pier, $2,000; pier extension, $4,000; lightning protection, $3,000; in all, $58,000.

Mr. HOBSON. Mr. Chairman, I move to strike out the last word. I desire to continue my remarks, Mr. Chairman, and I will say that Mr. Isham never expected his shell——

Mr. MANN. I make the point of order that the gentleman is not in order.

Mr. HOBSON. I will ask the Chair to rule on the point as to whether I am in order or not.

Mr. COOPER. I hope the gentleman will not object.

The CHAIRMAN. What is the point of order of the gentleman from Illinois?

Mr. MANN. That the gentleman from Alabama is not talking to the paragraph under consideration.

The CHAIRMAN. The Chair sustains the point of order.

Mr. HOBSON. If magazines do not have something to do with the storage of shells, then I do not know what they are for.

The CHAIRMAN. The Chair sustains the point of order, and the Clerk will read.

The Clerk read as follows:

Depots for coal and other fuel: For additional fuel-oil storage at Melville, R. I., $40,000; additional fuel-oil storage at Norfolk, Va., $90,000; fuel-oil storage at San Diego, Cal., $40,000; fuel-oil storage at Puget Sound, Wash., $80,000; fuel-oil storage at Mare Island, Cal., $80,000; fuel-oil storage at Guantanamo Bay, Cuba, $50,000; fuel-oil storage at Pearl Harbor, Hawaii, $80,000; custody and care of naval petroleum reserves, $10,000; contingent, $30,000; in all, $500,000.

Mr. HOBSON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Alabama moves to strike out the last word.

Mr. HOBSON. I desire, Mr. Chairman, under the practices of the House on the pro forma amendment to discuss matters strictly relating to this bill.

Mr. Isham considered it doubtful if his shell would bite under 8,000 yards. He expected ricochets at that and shorter ranges. He did not assume that his fuses would always operate in cases of ricochets, though he expected them to do so. The fact that the fuses did not operate under ricochets shows remarkable safety of the fuse when the locking piece is not released. Mr. Isham now renews his request that he be allowed to make good slight defects in his fuse at the navy yard, and then that experiments will go on with his fuse in shell charged with T. N. T.

The board, in a letter to Mr. Isham received by him to-day, says:

The board has now reached a stage in its proceedings where it considers it desirable to take up the question of the ability of your fuse to detonate the high explosive now used in the naval service.

This practically means that they regard the tests of the fuse on the 27th were successful.

Mr. SLAYDEN. What is that?

Mr. HOBSON. Trinitotoluol. That is a high explosive, though not as strong as nitrogelatin. The Navy Department is loath to use nitrogelatin, which would be the most powerful, although it has been fired under these experiments without exploding. Nevertheless, Mr. Isham has designed a shell now to carry the Navy Department's T. N. T., which the Navy Department says is safe in every respect. The final success of this new type now depends upon whether this fuse, with its construction, will successfully explode T. N. T.

Now, in the construction of the fuse you will find that the delay part comes from the train. At the end of the train a fulminate goes off, and that sets off the booster, and that sets off the charge. The Navy Department has developed boosters and the fuse used for the fulminate at the end of the train, so that the whole question is a question of practical operation. There is no question of principle involved or a question of further invention. It is simply an adaptation to really try whether in actual practice this fuse does do what the tests the other day indicated it would do.

In the second paragraph the board goes on to say that they believe that our armor-piercing shell is as good as any shell of that type that might be used against us by a foreign enemy. It does not say that that is the only type, nor does it say that that is the type that would be used against us.

Now, I am convinced by my experiments for the last few years in connection with the subcommittee that every nation in the world with the present art can develop the power of the torpedo shell, and I assume they have developed it, and that would be the one department of their development that would not be known and given out. The assumption by the board that our armor-piercing shell is as good as the armor-piercing shell of other nations may be correct, although I am not so sure. We may have a good armor-piercing shell, but in the statement of the board we find an admission that they do not expect either the 12-inch shell or 14-inch shell to penetrate 10 inches of armor at ordinary battle ranges. This is conclusive evidence that it is of the utmost importance that torpedo-shell attack should be developed as fast as possible.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. MOORE. Mr. Chairman, I desire to get some information about this paragraph. Am I in order?

The CHAIRMAN. Yes.

Mr. MOORE. I move to strike out the last word.

The CHAIRMAN. The gentleman from Pennsylvania moves to strike out the last word.

Mr. MOORE. Will the chairman of the committee explain whether these items for additional fuel-oil storage at the points named are for construction work?

Mr. PADGETT. Yes; it is new.

Mr. MOORE. Does this mean more oil tanks or more fuel to go into oil tanks?

Mr. PADGETT. It means more oil tanks.

Mr. MOORE. It means the construction of tanks only?

Mr. PADGETT. Yes.

Mr. GARNER. Mr. Chairman, I ask unanimous consent to insert in the RECORD a speech made by my colleague [Mr. DIES] at the banquet in Baltimore of the Manufacturers' Association.

The CHAIRMAN. The gentleman from Texas [Mr. GARNER] asks unanimous consent that he may extend his remarks in the RECORD by inserting a speech delivered by his colleague [Mr. DIES] on the occasion named. Is there objection?

There was no objection.

Mr. BRYAN. Mr. Chairman, I ask unanimous consent to extend my remarks on this bill.

The CHAIRMAN. The gentleman from Washington [Mr. BRYAN] asks unanimous consent to extend his remarks on this bill. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

That the appropriation of $400,000 for erection on the Isthmus of Panama of barracks, quarters, and other buildings for accommodation of marines, contained in the act of March 4, 1913, is hereby reappropriated, and $200,000 thereof made available for the erection of marine barracks at Mare Island, Cal., and $200,000 thereof made available for the erection of marine barracks at Norfolk, Va.

Mr. FITZGERALD. Mr. Chairman, I make a point of order against the paragraph.

Mr. MANN. I make a point of order against the paragraph, Mr. Chairman.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] and the gentleman from Illinois [Mr. MANN] make points of order against the paragraph. Does the gentleman from Tennessee [Mr. PADGETT] desire to be heard on the point of order?

Mr. PADGETT. No.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

Repairs and preservation at navy yards and stations: For repairs and preservation at navy yards, coaling depots, coaling plants, and stations, $1,097,436.

Mr. STEPHENS of Nebraska. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Nebraska [Mr. STEPHENS] moves to strike out the last word.

Mr. STEPHENS of Nebraska. Mr. Chairman, I ask unanimous consent that I may be allowed to proceed for 20 minutes.

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent to proceed for 20 minutes. Is there objection?

Mr. MANN. Mr. Chairman, I reserve the right to object. What is the proposition?

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent to proceed for 20 minutes.

Mr. MANN. Oh, well, no.

The CHAIRMAN. Is there objection?

Mr. MANN. I object.

The CHAIRMAN. The gentleman from Illinois objects.

Mr. STEPHENS of Nebraska. I will say to the gentleman, if he will reserve his objection a moment, that I tried to obtain time during general debate, but could not.

Mr. MANN. Oh, no. The gentleman could not have done that. There was a considerable time on general debate that was not used.

Mr. STEPHENS of Nebraska. I could not get time.

Mr. MANN. Oh, the gentleman could have secured time. I am not willing to stay here and allow people to talk until to-morrow morning on subjects outside the bill.

Mr. STEPHENS of Nebraska. I move to strike out the last word, Mr. Chairman.

The CHAIRMAN. The gentleman from Nebraska moves to strike out the last word.

Mr. STEPHENS of Nebraska. Mr. Chairman——

Mr. MANN. There will be debate. I will say to the gentleman, in the next few days, when the gentleman can get in.

Mr. STEPHENS of Nebraska. I am going to talk on war, and this bill applies to war effectively, and I think I shall discuss the subject as closely as it has been discussed this afternoon.

Mr. MANN. I am going to object unless the gentleman confines himself to the paragraph under consideration.

Mr. STEPHENS of Nebraska. My remarks may perhaps be unique. Although the gentleman may not think so, I do. My constituents are greatly disturbed over this war situation.

Mr. MANN. I make the point of order, Mr. Chairman, that the gentleman is not discussing the subject before the committee. I think no paragraph has been read since the last one went out on a point of order.

Mr. STEPHENS of Nebraska. The gentleman can not know what I am going to talk about.

The CHAIRMAN. The gentleman from Nebraska will confine himself to the paragraph under consideration.

Mr. FOWLER. Mr. Chairman, I ask unanimous consent that the gentleman from Nebraska may proceed for 10 minutes, as he deems proper, to discuss this bill.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] asks unanimous consent that the gentleman from Nebraska [Mr. STEPHENS] may proceed for 10 minutes. Is there objection?

Mr. MANN. Reserving the right to object, I would like to suggest to my friend from Nebraska that there will be ample opportunity in a few days to come in on some bill.

Mr. STEPHENS of Nebraska. I know, Mr. Chairman; but I want to suggest to the gentleman from Illinois that I want to talk now about a particular thing, and I have special reasons for it. Of course, he can object if he desires to do so.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none, and the gentleman is recognized for 10 minutes. [Applause.]

THE PROPOSED EMBARGO ON THE EXPORT OF ARMS AND AMMUNITION.

Mr. STEPHENS of Nebraska. Mr. Chairman, I wish to discuss briefly, principally for the benefit of many of my constituents, House joint resolution 377, which proposes an embargo on arms and ammunition destined for the belligerent nations now at war in Europe. There is a very vigorous propaganda being waged throughout the United States in favor of this resolution, with the result that thousands of naturalized citizens of this country are being misled into believing that this Nation is not now observing neutrality in its intercourse with the belligerents.

The result of this agitation is the receipt of a flood of letters and petitions by Members of Congress requesting them to support this resolution. The petitions are nearly all alike, showing a common origin, and from all sections of the country, indicating a nation-wide movement directed from a central organization. The letters and petitions almost always, directly or indirectly, ridicule the Nation's apparent inconsistency in praying for peace while we permit the export of arms and ammunitions to the belligerents. The letters clearly show that they have been influenced by reading bitter attacks against this Government charging it with failure to enforce neutrality. The German-American is among the most loyal of our citizenship, and these printed attacks, paid for, no doubt, at space rates, have done him a great injustice by leading some to believe he is not loyal to his own adopted country. No greater mistake could be made. The naturalized American is for his adopted country first, and he wants his adopted country to keep hands off the European situation, and I want him to know that that is exactly what his country is doing.

One of my correspondents had been so inflamed by the misrepresentations he had read that he was led to ask me if I had a son-in-law in England who had told me to oppose the resolution, which indicates the methods employed to injure the administration in the eyes of our naturalized American citizens. For the benefit of my correspondent and for the purpose of qualifying myself to discuss the subject impartially in the eyes of those who favor this resolution, and who usually charge everyone who is not in favor of it as being a partisan of England, I will state that I am a full-blood German by descent on my own account. Upon the account of my wife we have several first cousins, natives of Germany by naturalized parents, who are now fighting in the kaiser's army, if they have not already given their lives for their country. We are very much concerned about the welfare of these relatives, and our natural sympathies for Germany are very great. But we have no political sympathies whatever as between the belligerents. We refuse to permit the call of the blood to bias our political judgment in passing upon a national policy.

NOT A MORAL QUESTION.

Many, if not all, of my correspondents base their support of this resolution upon high moral grounds. My own contention is that it is not a moral question in a general sense at all. It is purely an economical question at this stage of our evolution. There is just one class of people who have any logical right to consider this question from a moral point of view, and that class is so small it is not worth considering. In fact, I am not certain that such a class exists except in theory. I refer to the class that is in favor of peace at any price; the class that is ready to disband the Army, scrap the Navy, and demolish our seacoast defenses and undertake to lead a Christlike existence in this world of riot and ruin and rapine. Those who have faith enough to embark the Nation upon the sea of "peace at any price" have a right to base their support of this resolution on moral grounds; because if it is wrong to sell arms to belligerent nations now, it was wrong to sell arms and ammunition to them in times of peace, when they were preparing for this war. If it was wrong for us to make arms and ammunition in times of peace for sale to other nations at peace, it necessarily follows that it is wrong for us to make arms and ammunition to use ourselves; because if it is wrong to make arms and ammunition to sell to others, to be used with which to kill their enemies, it necessarily follows that it is wrong for us to make arms and ammunition with which to kill our own enemies.

Therefore, if there is any moral side in this question at all it leads us straight as a line to the absolute prohibition of the manufacture of arms of any kind or character. And if we adopt this end of the dilemma, we are led absolutely to the peace-at-any-price program and to the absolute prohibition of the manufacture of arms and ammunition for war purposes. We would then be led to an abandonment of our Army and Navy and our seacoast defenses and accept whatever consequences might follow. Now, those who believe in this doctrine of "peace at any price" have a right to base their support of this resolution upon moral grounds. Those who do not believe in it have a moral right to continue to sell arms and ammunition to be used by belligerent nations, because they contend that it is a moral right for them to use them in the defense of themselves. Therefore I dismiss the moral phases of this question as irrelevant and immaterial, having no value in this argument.

It is true there will be many, either through superficial thinking or hypocrisy, who will harp upon our wickedness in permitting a few exports of arms and ammunition, while at the same time they will aid and abet their own Nation in maintaining a reasonable Army and Navy against the day we may want to begin the slaughter of innocents on our own account.

It is an honest war when we wage it, but brutal and unjust war when waged by other nations; brutal murder when other nations indulge in the pastime of killing each other, but when we kill it is ordained by God. Let a belligerent blow up one of our battleships to-morrow and the Nation would blaze with wrath and Congress would be mobbed if it did not order the killing to begin at once. We would pawn our last shirt to raise money to buy arms and ammunition to revenge the outrage. Our claptrap sentimentality would be shed, as the skin of a snake is shed, showing glinting armor beneath, and no doubt these hot-headed partisans who have a sob in their voices as they plead for an embargo on arms would be among the first to grab a gun and start for the front to defend their country.

We are now spending about three-fourths of the Government's revenues for war purposes, past and present, and the pressure for a larger expenditure is great. It is not likely therefore that the Nation as a whole will suffer much of a moral shock because some manufacturer of squirrel rifles secures a small order for guns from one of the belligerents.

The facts are we are all quite human, and it is most difficult for naturalized citizens of this country not to favor their respective fatherlands to the extent of injuring their own by impulsive acts. I consider it very unfortunate that the different classes of naturalized citizens of this country should permit themselves to become partisans under any circumstances. They ought not to contribute to a propaganda in support of their own respective fatherlands, which can not fail to greatly injure the administration and embarrass it in its diplomatic relations with other countries. The destiny of this Nation is of more vital concern to naturalized citizens of this country, who are protected by its laws, than can possibly be their concern for the destiny of any of the belligerents. They ought to be willing to trust questions of diplomacy to their own chosen representatives—the President and his advisers. International questions can not be settled in the workshop and on the farm. They must be settled by the people's representatives chosen for that purpose.

AMOUNT OF ARMS AND AMMUNITION EXPORTED.

It is commonly understood that we are shipping vast quantities of munitions of war to the belligerent nations, which is entirely erroneous, and on account of the allies having practically blockaded the ports of Germany and Austria these countries are not able to secure any of these supplies. The friends of Germany and Austria therefore contend that we should immediately place an embargo upon arms and ammunition, because neither Germany nor Austria can secure them from us. The reasoning is not sound, because whatever the tradesman has to sell he has for sale to anyone who has the money and the desire to buy, regardless of who they are or where they come from. The Constitution of the United States guarantees to our citizens the right to pursue their peaceful avocations without interference, and unless the action of the citizen in his trade activities affects the peace and welfare of the Nation the Government of the United States should not interfere with him.

Since the war broke out in August and up to January 1, 1915, we have exported to all the nations of the world $4,514,989 worth of ammunition of all kinds and character. These shipments have been distributed among the countries of Austria-Hungary, Belgium, France, Germany, Russia in Europe, Turkey in Europe, United Kingdom, Canada, and Japan. The quantity is infinitesimal in amount as compared to the consumption of munitions of war by the nations now at war. It is not a drop in the bucket, compared to other supplies that are furnished. For example, it is reported that an order was recently taken by an American manufacturer for $15,000,000 worth of automobile trucks for a belligerent. This is approximately four times the amount of all the munitions of war that have been shipped to all the nations in the world since the war broke out. Compare it with the order reported to have been taken from a belligerent by Henry Ford, the great automobile manufacturer of Detroit, a few days ago for 50,000 automobiles for immediate delivery. This order probably will amount to $50,000,000. These articles are of more benefit to the belligerent nations, a hundred times over, than the few million dollars' worth of arms that we are exporting.

EXPORTS FOR BELLIGERENTS NOT OVER $2,000,000.

Of the total exports of arms and ammunition of all kinds, amounting to about four and one-half million dollars, about one and a quarter million dollars was for 12 large cannon shipped to Russian Siberia, probably for the Pacific coast defense of that country. Another million no doubt should be charged to the account of the sporting trade, leaving a bare $2,000,000 worth of arms and ammunition which may have gone direct to the belligerent nations in Europe. This amount of war materials is not sufficient to supply one of the belligerents a fraction of a day when in action. In fact, it is possible to lose that much material by oversight on a battle front of 150 miles in a single retreat or a forward movement of the forces.

This amount of exports of arms and ammunition is of so little consequence to the warring nations that one is forced to the conclusion that other motives lie back of this propaganda. The noise that these propagandists have made has been sufficient to lead the citizens of my own district to believe that this country has turned all of its implement factories into the production of arms and ammunitions for the slaughtering pen of Europe.

OTHER SUPPLIES THAN GUNS.

The motive back of the movement to place an embargo on arms and ammunition is no doubt to ultimately stop the exportations of all supplies that go to support an army in the field. These gentlemen who favor an embargo on arms and ammunition know that if the resolution should ever be considered at all it would certainly be amended to make it effective by including supplies of every kind that an army can use. Such a law as that would completely paralyze the industry of the Nation more effectually than did the outbreak of war in Europe last August, when we found ourselves without the ships to move our products. Products of every kind suffered a decline in price at that time, and if it had not been for the general anticipation of the people that the war would ultimately enhance prices there would have been a still greater decline. As ships were procured and exports again began to move, conditions improved correspondingly all over the country. But even now, with the ocean freight rates increased from three to fifteen times the rates in force prior to the war, our ports are still congested with products destined for Europe. The Pennsylvania Railroad has refused to take any more grain for the ports at Philadelphia and Baltimore, because the yards are filled now with thousands of cars of corn and wheat awaiting ships to carry it abroad.

EMBARGO ON WAR SUPPLIES WOULD BANKRUPT NATION.

It requires only a small amount of business experience for one to see what would happen to the prices of products in this country should an embargo be placed on the real sinews of war—food and clothing and the factory supplies, automobiles, saddles, harness, tools, and so forth. The economic disaster that would follow such legislation would bankrupt the Nation and cause widespread suffering unparalleled in the history of this country.

There is not the slightest prospect of such legislation, but that does not dispose of the subject, for there are large numbers of citizens in this country who are pressing for its consideration and who must be answered. The question I wish to put to them is this: Are we ready to make the sacrifice? There is no doubt about where the road leads us, nor what the results of such legislation will be. To place an embargo on a handful of arms, comparatively speaking, on the ground of humanitarianism, and continue to ship vast cargoes of supplies for the belligerent armies would make us ridiculous in the eyes of the world.

AMOUNT OF OTHER EXPORTS FOR BELLIGERENTS.

On the face of it the object of the resolution is clearly intended to prevent, if possible, further carnage in Europe. With that object I am wholly in sympathy, but I do not want to be fooled into believing that there is any value whatever in the passage of that sort of a resolution. I deny that any such results will follow. I am opposed to the resolution, and I am opposed to any resolution that attempts to place an embargo upon the commerce of the citizens of this country who are carrying on legitimate trade. I wish to call attention to the character of the exports that we are now sending to Europe. Take, for example, the order for 50,000 automobiles reported to have been received by the Ford Automobile Co. for one of the belligerent nations. These cars are capable of transporting a quarter of a million of soldiers, or their equivalent in weight of provisions for the army, a hundred miles in a single day over the hard roads of Europe. There was nothing ever sold by a neutral nation to a belligerent in the history of the world, which, under favorable conditions, would contribute so effectively to a successful movement of a great army.

Then, following these 50,000 automobiles will be the supplies for their maintenance—gasoline, oil, tools, and accessories of all kinds. To provision the army, wheat, corn, oats, beef, pork, and clothing in vast quantities must be provided—every item equally important in the successful movement of an army; every item a link in the chain. The gun is really no more important than any other link in the chain; in fact, not so much so, because men can not fight unless they are fed and clothed.

The ammunition maker, the automobile, saddle, harness, blanket, and clothing manufacturers, would not object very much, perhaps, to an embargo on foodstuffs; nor would the farmer seriously object to an embargo on factory products. We are all much in the attitude of the man who wanted all property divided up equally among all of the people—land, horses, money, everything except hogs, for he owned quite a drove of them. But as a representative of a great agricultural State, I propose to be an exception to the rule and object to an embargo on either class. We own quite a drove of hogs and uncounted millions of bushels of wheat, corn, oats, barley, rye, and potatoes, and hundreds of thousands of head of horses, cattle, sheep, and so forth, that we desire to sell to those who need them and have the money to pay for them, and I deny the moral right of the National Government in times of peace to say to a citizen that he can not sell his products to anyone who desires to buy them.

We are furnishing five times as much wheat, six times as much corn, twice as much flour, and twelve times as much beef, and, on an average, five times as much breadstuffs, generally, to Europe as we did last year, nearly all of it going to the armies of the warring nations. Not only are we feeding the armies, but we are sending them tens of thousands of auto trucks, hundreds of thousands of saddles, hundreds of thousands of blankets, hundreds of thousands of sets of harness, thousands of wagons, and countless tools of every kind and character. Millions of our people are engaged in this profitable business, and these millions also buy other hundreds of millions of dollars worth of our farm products for their own sustenance. We are all tied together in a mighty mass, and when any portion of our body politic suffers the shock is felt throughout the whole.

WILL FORCE DOWN FARM PRICES.

Should we conclude to place an embargo on all war supplies so as to really hamper the belligerents, the results would be as disastrous to us as to the belligerents. The day the law would go into effect the surplus on our markets would drive prices down probably on an average of from 30 to 50 per cent. Wheat would drop possibly to 60 or 70 cents a bushel, corn to 35 or 40 cents a bushel, and all other products accordingly. The value of the season's farm products in the State of Nebraska alone would shrink at least $100,000,000 from present prices; thousands of factories would discharge half their employees or close down entirely; and our home market would suffer proportionately.

These are not vague fears; they are facts borne out by the experience of every business man. Nearly every port in the United States on the Atlantic seaboard is congested with cars loaded with our products destined for European markets, unable to get ships fast enough to supply the demand. Place an embargo on this trade and throw this surplus back on the home market, and this country would face a financial disaster of the greatest possible magnitude. Are we ready to create such a condition with a very worthy, though misguided, belief that we will thereby check the war movement in Europe? Are we willing to make the useless sacrifice? That is the question for every citizen to consider before he commences to clamor for a resolution that contemplates the National Government interfering with the trade of its citizens. My own honest judgment is that our efforts would produce no results that would be anywhere in proportion to the cost. The misery in Europe would go on, and maybe would be prolonged, and we would add to it our own misery. There are many beautiful sentiments expressed by the advocates of this resolution, with which no one disagrees and with which all are in hearty accord. They simply have no value in this argument, but greatly befog the question by bringing into it a force that blindly interferes with a sane and sensible solution of the problem.

GERMANY'S ATTITUDE CONSISTENT.

Germany does not contend that we are unneutral in selling war supplies to the belligerents, though she is unable at present to buy from us. Germany knows our actions in selling to all who can reach our markets are in perfect accord with international law and customs. She has never asked us to alter our laws in her behalf. Her interest now that she is blockaded by the allies would be enhanced by this proposed legislation, because the allies would suffer by such a law in having one source of supply shut off. Germany has an enormous capacity for producing war materials, greatly out of proportion to all other nations. In fact, it is an open question whether Germany would buy guns and ammunition from us if she could. She needs automobiles, horses, saddles, harness, and our wheat, corn, and meat vastly more than guns. These are the war supplies Germany needs. They are also the war supplies the allies most need.

The United States has been selling these supplies to all nations without discrimination. Now, it has transpired since the war broke out that two of these nations can not reach our markets because of a war blockade. As a result of this condition we have lost an immense trade with these two nations—Germany and Austria—through no fault of ours. They can not reach us. Now, the proponents of this measure want us to make a clean sweep and quit trading with the remaining nations that can reach our markets because Germany and Austria can not, and thereby wipe out the rest of our commerce. It is certainly an absurd suggestion from an economic point of view, and since the question is not a moral question at all, because the proponents of this measure are not willing to have this Nation stop making arms and ammunition for its own defense or to disband our Army and throw our fleets of warships into the scrap heap, it remains purely a question of economics and observance of neutrality. If the advocates of an embargo on arms are not ready for the United States to go out of the business of preparing to kill future enemies of her own, they are certainly hypocritical in their claim that we are criminal because we make arms for other nations with which to kill their enemies. The whole scheme of arms and armaments is a hellish business and clearly a device of the devil that is in us, so why talk about morals when we know just what we are, the passions that move us, and the wars that are sure to afflict mankind for ages to come. Peace at any price is only possible with Christlike men, and there are too few of them to count for much in these mighty passion waves that sweep the earth.

GERMANY ALWAYS SOLD ARMS TO BELLIGERENTS.

German diplomats are careful not to take the position that we are unneutral in selling arms and war supplies to her enemies who are able to reach our markets, because they know that Germany has always followed that practice herself. No protest has ever been made officially by this country or any other, so far as I have heard, against the practice. It no doubt would be a precedent, if established at the request of Germany, that would greatly embarrass her when this war is over, for Germany has the greatest manufactories of arms and ammunition in the world. She not only has the greatest gunmakers in the world, but the greatest in all history. She has supplied the markets of the world, impartially, selling to all who wished to buy.

During the titanic struggle between Russia and Japan Germany furnished vast quantities of guns and ammunition to both belligerents. No one in this country complained that Germany was wading in the blood of these two nations for the profit she could make. German-American citizens were not outraged by the conduct of their cousins, brothers, and countrymen in Germany at that time. Nor did we protest when German arms factories supplied the Boers in South Africa with their arms and ammunition during the Boer War with England. No one protested against Germany furnishing the great bulk of war supplies for the horrible war in the Balkan States, so recently closed. Nor was there a voice raised in this country, that I now recall, against the acts of Germany in supplying arms and ammunition to Spain during the Spanish-American War to be used by that country against our own country, when we were waging one of the most unselfish wars for human liberty in history. German-American soldiers by the tens of thousands were serving in that Army of liberation under the Stars and Stripes, and they were shot by Spanish oppressors with guns made by their German cousins in Germany. Our soldiers were not particular about the make of the gun with which they were shot. There were no neutrality meetings held at that time anywhere in this country declaring that Germany was unneutral and should stop selling supplies to our enemies. Such an action would have appeared foolish to us then, and it would so appear to us now were it not for the fact that we have been misled by the propaganda that has had for its motive the securing of support for Germany and Austria in this conflict against our well-known declarations of neutrality.

I do not blame Germany for doing all in her power to secure the sympathy and support of her blood relations everywhere in the world, but I think every naturalized American citizen should know that this propaganda is not being waged at all in the interest of neutrality but solely against neutrality. I have read the proceedings of these so-called neutrality meetings, and invariably they develop into the most rabid and partisan defenses of Germany's attitude in this war. The advocates of so-called neutrality soon throw off their pretense of neutrality, by lauding Germany to the skies, abusing Great Britain, and slandering their own country. The gross misrepresentations of the administration, the charges that it is an ally of England, the charges that it permits England to do as she pleases with

our commerce, are so common at these meetings that one sometimes wonders whether some of the most rabid have not forgotten their allegiance to our own beloved country that guarantees to them liberty and the pursuit of happiness. One of these so-called neutrals in a speech delivered January 24, at a so-called neutrality meeting held in Washington City, after slandering his own Government shamefully, charged that a British warship had fired a shot across the bow of the U. S. battleship *New York*, ordering her to stop. The captain of the *New York* cleared his ship for action and a fight was barely averted by the English captain apologizing. As a reward for this brave defense of our rights and dignity the speaker charged that the captain of the *New York* was reprimanded by the administration.

The whole story was a malicious falsehood, fabricated and circulated for no other purpose than to injure the administration in the eyes of our naturalized citizens, and force, if possible, the Congress to pass this embargo resolution in favor of Germany and Austria under the fraudulent pretense of neutrality. The man who made the charge appears to be wholly unable to appreciate the blessings of peace that this country now enjoys, largely due to the fact that it has as President and as Secretary of State two of the greatest advocates of peace in the world, who refuse to be turned from an observance of absolute neutrality by the misrepresentations of men of this character. Such hot-heads as these constantly harassing and hounding the administration at such a critical period in our history, when every loyal American ought to be holding himself in restraint, merits the condemnation of honest men.

LOYALTY OF GERMAN-AMERICANS.

The naturalized citizens of the United States appreciate the blessings of this new and wonderful land where they have made their homes and to which they owe their allegiance. They are all bitterly opposed to war and they want to be neutral. It is true they have a deep and profound sympathy for their respective fatherlands, and it is commendable that they have; but in spite of it all they are for their own adopted country first, and the hot-headed partisans who have tried to mislead them into believing that President Wilson and Secretary Bryan are not observing absolute neutrality will find that their efforts have been wasted. If there is one virtue greater than any other in our German-American citizen, it is his sense of loyalty to his Government. He feels that he must depend upon this Government for life, liberty, and opportunity. He knows that his Government must be loyally supported in times of stress like these, and he hates most cordially an agitator. It is true he feels keenly the dire stress of his fatherland, and he may follow his very natural and worthy sentiments of affection for his countrymen by wishing success to the German cause. No one can criticize him for that. My own blood and kin are now serving in the Kaiser's army fighting for Germany's cause, if they have not already died for their country; but that is no reason why I should insist upon this country becoming an ally of Germany. I wish my country to give Germany a fair deal in this deadly struggle with the allies, and that is what this country is doing, its slanderers to the contrary notwithstanding.

INTERNATIONAL LAWS OR CUSTOMS.

We are not to blame because the allied navies have blockaded German and Austrian ports. We do not own these navies, nor did we aid or abet this horrible war in any particular. We can not be expected to change our laws or morals in a crisis like the one confronting this Nation simply because Germany and Austria, our old-time friends and customers, have got pinched in the war game. If the situation were reversed, and Germany and Austria had England surrounded, we would go right on trading with Germany and Austria just as we always have before this nightmare came upon the world.

Trade takes no cognizance of diplomacy and diplomacy does not interfere with trade save when the peace and welfare of the nation is at stake. At such times military law supersedes civil law. But we are not at war with any nation. Our peace and welfare are not menaced by trade, because we defend trade only when it is legal. Therefore there is no national reason why our usual laws of trade should not continue in force.

International law is the result of centuries of usage and formal agreements of international conventions of nations. International agreements are made in times of peace for the guidance of nations in times of war. For the United States now, after all Europe is aflame with war, and one side has the other at a disadvantage in the matter of getting outside supplies, to attempt to change our attitude on the subject in question would be an affront to the nations which temporarily have the advantage. The allies would very properly ask us why we did not say that we would not live up to international laws and customs before the war broke out. Why did we wait until our actions would injure them only before declaring a new policy in regard to supplying provisions to belligerents? If the allies did not have all they could do to meet their enemy they might even consider our conduct in passing such a resolution an affront that we would have to make good by force. We would be in the attitude of supplying freely all of the demands of the belligerents on both sides of this controversy when they both were free to buy from us, but when one has obtained the upper hand of the other and shut him off from our markets, to refuse to sell to the other would certainly be an unfriendly act against the allies and a friendly act to the Germans and Austrians, who are at present shut off from our markets. If the situation were reversed, and Germany and Austria had the allies completely shut off from our markets, I apprehend that the German and Austrian sympathizers would not now be petitioning Congress to pass this resolution; but, on the other hand, the sympathizers of the allies would no doubt be petitioning us to pass this resolution. It depends altogether upon whose ox is gored.

It is certainly a good time for the citizens of this country to leave delicate matters of foreign relations to our diplomats. It is a splendid opportunity for us to show the world our loyalty to our own country by holding up the hands of President Wilson and his great Secretary of State. We are at peace with all the world, and the way to keep at peace is for our citizens to quit fighting the battles of their respective belligerent favorites. This Nation needs the support of all of its citizens.

Mr. HUMPHREY of Washington. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to proceed for two minutes. Is there objection?

There was no objection.

Mr. HUMPHREY of Washington. Mr. Chairman, on yesterday and the day before there was some dispute here on the floor of the House as to what information had been received by the State Department and what information had been given out with reference to those interned ships. To-day I have been handed a written statement given out by the State Department in relation to that matter. I want to insert it in the RECORD, so that the country may see just how definite and specific and free from any evasion or attempt to conceal is the statement that the Secretary of State gives out to the public. Therefore I ask to insert it in the RECORD, so that everybody can read it and understand the whole situation. No one will have any doubt, after reading this statement, just what has been done at the State Department. This statement will demonstrate how fair and frank the Secretary is about this matter and how plain and explicit this great orator can be when he takes the time and trouble to place his statements in writing.

The CHAIRMAN. The gentleman asks unanimous consent to insert in the RECORD the document to which he refers. Is there objection?

There was no objection.

The statement referred to is as follows:

Q. Any correspondence from British Government on the purchase of ships?—A. I have no statement to make except that which was given out this morning, namely, no nation has protested against the passage of the shipping bill, and it is not likely that any nation will or would, since that bill does not necessarily raise a diplomatic question.

If you desire to ask, as they did this morning, whether I would make any answer to inquiries in regard to this matter, I will say that this department does not think it proper to discuss with any nation the manner in which the authority will or should be exercised, if conferred.

Q. That is the authority to buy these ships?—A. Yes. How that authority will be exercised if conferred. The department assumes that if the authority is conferred it will be exercised by the President and those associated with him in a proper manner and with due regard for the Nation's welfare.

Q. I do not think that the original statement in the newspapers in regard to an alleged British representation said there had been any protests made.—A. I am not responsible for any statement made on that subject.

Q. You say that you have had no discussion with any representative of any foreign Government?—A. I am not willing to discuss with any foreign Government the manner in which the power, if conferred, will be exercised.

Q. Has the department received, upon its request, an expression of views on the general question of ship purchase?—A. The department has not requested of any government an expression of opinion as to how the President should exercise that authority, if it is given.

Q. I do not think the reports which started this discussion while you were away stated that there had been any discussion.—A. I am speaking of the manner in which the authority would be exercised if conferred; that is, the authority to purchase the ships.

Q. It would be impossible for a foreign Government to discuss that?—A. Yes; certainly.

Q. You understand the distinction I make?—A. Yes.

Q. It appears to me that if your statement referring to newspaper reports——A. I simply answer the questions that have been asked me. I do not care to discuss with the newspaper men any more than with foreign Governments the manner in which that authority will be exercised.

Q. That is not the question I want to ask you. It does not refer necessarily to the ship-purchase bill. It refers to any presentation of

views of any of the allied Governments regarding the transfer of ships.—A. I do not care to discuss now questions that are not connected with this particular proposition, since the newspapers are attempting them with this proposition.

Q. While you were away the statement was made that the British ambassador had said to you that the British Government looked upon the transfer of any vessels now interned in American ports—German and Austrian vessels—as an unneutral act.—A. Did you get that statement from me?

Q. No.—A. Go to the person who gave you the statement and let him confirm it. I do not intend that men shall get statements from others concerning State Department matters and then come to me for confirmation. I do not intend to discuss a statement like that; it did not come from me. If anybody in the State Department gave out that statement, you may go to him.

Q. It was not given out by the State Department.—A. Neither do I think it the duty of the State Department to confirm or deny a statement given out elsewhere. I have stated the attitude of this department on this question. I do not think it is proper for us to discuss how the authority will be exercised if it is conferred.

Q. The only ship up so far is the *Dacia*?—A. They have attempted to connect the *Dacia* with the ship-purchase bill. That is not my fault.

Q. Those last reports give something distinct and separate from the *Dacia*.—A. We have not felt it proper to discuss that.

Q. What representations have you had?—A. It is premature to discuss that question.

Q. Is it a question of policy which comes from the White House and not from here as to the expenditures under the bill? Is anyone able to say what ships we are going to buy?—A. It certainly is not the business of this department to discuss in advance a question which may not arise.

Q. Will the Treasury Department buy the ships?—A. You may hunt your authority elsewhere; you will not find it here.

Q. The Treasury Department, I imagine, will buy the ships.—A. As I said, I will not discuss that.

Q. The Japanese news bureau sent out last night what purported to be extracts of a letter from President Wilson and one from yourself and one that had been read by some gentleman at a meeting held in Tokyo to improve the relations between the two countries. Has there been such a letter?—A. I can give you a copy of it in the morning. It was to Dr. Shailer Matthews himself, the president of the Federated Council here. I will have it to-morrow afternoon.

Q. Do you know where Mr. Phelan is going to have his hearings here?—A. No; I do not know.

Q. Are you to appear before him?—A. I do not know whether I shall have anything to say. If there is any statement necessary from me, it will be made.

Q. Is Mr. Phelan a commissioner of the President or of the State Department?—A. I do not think that is a very material matter, because the President asked that some one be appointed, and I appointed him with the President's approval. I gave out the letter asking Mr. Phelan to make the investigation.

Mr. CULLOP. Mr. Chairman, I move to strike out the last word. I desire to ask the chairman of this committee a question with reference to a certain matter in the bill. A point of order was sustained against the paragraph appropriating $400,000 for barracks, quarters, and other buildings for the accommodation of the marines on the Isthmus of Panama. I wish to ask what has been done with the appropriation of 1913, with reference to providing such quarters on the Isthmus of Panama.

Mr. PADGETT. The money is in the Treasury unexpended. The department and the administration have concluded to place the Army in control at Panama, and do not propose to place marines there. For that reason they have not expended the money in building barracks, because they do not expect to keep marines at Panama. The fortifications will be manned under the control of the War Department.

Mr. CULLOP. Then the erection of barracks there, which was proposed in 1913, is abandoned now in 1915.

Mr. PADGETT. They have not expended the money, and they propose to use the money at these other places.

Mr. CULLOP. By waiting two years before expending the money the department has come to the conclusion that it would be wise not to spend it there, but to apply it to some other point in the United States.

Mr. PADGETT. Yes. The former administration recommended and purposed to keep marines in Panama, but the present administration adopted a different policy and therefore did not expend the money.

Mr. CULLOP. Mr. Chairman, I am glad to know that the Navy Department has come to the conclusion that there is one place in the world where it is not necessary to expend the public money for the purpose of defense. It is refreshing to learn this fact. With the war scare hovering over the world, as it is, I supposed there was no place where authority had been given to expend money where they would not be perfectly willing to make the expenditure and ask for an increase of the appropriation. But here, it seems, is one place where it had the opportunity and abandoned it. It deserves congratulations for this act, and I have no doubt the people will appreciate its consideration in this regard.

Mr. PADGETT. I will state to the gentleman, with his permission, that there was more than $1,800,000 appropriated in the bill last year that was not expended or even obligated.

Mr. CULLOP. I am very glad to have that information from the distinguished chairman. I would like to ask the chairman of the committee another question. Did that unexpended balance go back into the Treasury, or is it attempted to be appropriated for some other purpose in this bill?

Mr. PADGETT. Part of it has been reappropriated. The committee recommended $1,000,000 for aeronautics and $800,000 to be used for submarines. A little while ago the Committee of the Whole House on the state of the Union adopted an amendment reducing the amount for aeronautics to $500,000 instead of $1,000,000, and that is in the bill.

Mr. CULLOP. It seems from the answer of the chairman that it was not the purpose of the department to let this unexpended balance revert to the Treasury, but it attempted to divert it to another purpose. I suppose this is in consonance with "alarm" policy which is so industriously circulated around this Capitol and throughout the entire country. At no time was there ever less prospect of our country being engaged in war than now, but the advertising scare of war never did overtime more completely than it is doing at this time. This is about the time of year when it seems to always be at its zenith, and yet at this time it is apparent no leading nation in the world would under any circumstances declare war upon us, because all such nations already have all the war they want and more than some of them can successfully handle. We are in a safer position to-day than ever heretofore.

But, Mr. Chairman, annually when the naval bill is before this House for consideration an unusual number of "alarmists" appear on the scene and predict all kinds of dire disasters as apparent unless very great precautionary preparations are made to strengthen our national defense, increase our armament, and swell the proportions of our Navy. They pretend to see war clouds hovering around our borders and all over our fair land. They prophesy the enemy is about ready to fire upon us and invade our country to capture and dispoil it. They assert we are defenseless and that in a contest we would soon fall prisoner to our foe, come from whence it may. And now, when Europe is in the throes of a great conflict, the most destructive ever known in the history of warfare, they imagine they see, or at least pretend to see, it more imminent than ever, and urge, if possible, with more persistency than heretofore, our want of "preparedness" for war and the immediate need of the same. It is the same old scare they have presented for years, except it is dressed in a somewhat more elaborate garb, intended to be a little more attractive than when previously presented. They give emphasis to the fact that Europe is engaged in war and that some of the belligerents there engaged will attack us, and hence the necessity of our Nation being prepared to repulse the attack and defend our borders against invasion. Every nation in Europe, all know, has just as much war as it can handle, and has neither time, facility, nor inclination to become further involved. For this reason there is less necessity for increasing our armament, making greater preparations for war than at any time in the past. What nation in all the world is in a condition to declare war on us? What nation desires an engagement with us, the only large Nation practically in all the world enjoying peace? Is it reasonable to suppose that any of the belligerent nations now involved in the great war raging throughout European countries desire to or would attack a great and powerful Nation like ours? Such a course is not probable, and all who entertain such an idea should banish it at once.

The most reasonable conclusion that can be entertained in view of existing conditions throughout the world is that never before in our history were we less likely to be attacked by any foreign foe than at the present time and that never before have we had less need for armaments, battleships, a large Army and Navy than we have to-day. In other words, there is less danger now of war than we have ever known in our entire history. The "alarmists" may sound the alarm and plead for militarism, for dreadnaughts, and a large standing army, for munitions of war, but scan the nations of the earth, look at their conditions, their sorry plights, and search will be made in vain for one prepared to attack us, much less one that would want to do it. Then why this cry for "preparedness," this sounding of alarm, this demand to expend our treasure for something which will only deplete our resources, consume our supplies, and contribute nothing to our production.

If we were to increase our Navy, who knows what kind of a battleship to build? The types are so rapidly changing that those suitable for to-day are obsolete to-morrow. The dreadnaughts, as demonstrated by the European war, are things of the past in view of the dreadful and deadly work of the submarines. Doubtless if we construct submarines, about the time millions are squandered on them some ingenious mind will invent something far better and much more effective to supersede them. Inventive genius is at work devising missiles of death and destruction so rapidly that scarcely one is introduced until

another much superior for the intended work is created, which displaces it and relegates it to the scrap pile. It is clearly apparent there is no great foreign nation now but has all the war it can handle at this time, and doubtless when through with what it now has it will be content to remain at peace for generations to come, and the war prophecies of the "militarist" will not arouse much excitement among the peace-loving Americans, who prefer the conquests of "industrialism" to that of "militarism."

It is most fortunate that at this time, when certain interests are attempting to create a war scare, emanating doubtless from a desire to exploit a helpless and overburdened people, to promote financial advantages, whose zeal for personal gain exceeds many times their patriotic devotion to the universal welfare of nations and their people, that we have in the White House Woodrow Wilson, resolute and determined to prevent these emissaries of war from plunging this Nation into the maelstrom of sanguinary disaster or uselessly deluging it with the blood of her patriotic people. He will never be driven, scared, or cajoled by their eloquent pleas and defenseless theories, however plausible. Thus far, amid perils precipitated by jingoes who pretend to see danger of attack from every quarter, he has piloted the Nation through the perilous surroundings, avoiding conflict, preserving its honor unblemished, and the people have such confidence in his wisdom and patriotism that they rely on him to avert war and preserve peace—that he will elevate our national standard in the eyes of the nations of the world by furnishing an example that will earn the gratitude of every nation for promoting the doctrine of arbitration for the settlement of all national disputes, which will eventually lead to universal peace.

As a complete answer to those who are constantly declaring we are in danger of attack from foreign foes, that our Army and Navy should be increased, that our armaments and munitions of war should be enlarged, I desire to quote from Dr. Nicholas Murray Butler a refutation of their contention and which clearly shows the fallacy of their position. In an interview on December 7, 1914, he made the following statement, which I most cordially indorse:

> Our people can have war with somebody or almost anybody in due time and on some excuse, if they want to go to the trouble and expense to prepare for it. They can have peace with everybody by preparing for that.
>
> The true alternative to a policy of new and greatly enlarged military expenditures under the pretext of national defense is the policy of moral and intellectual leadership in the constructive work of national cooperation. Personally I have very little doubt as to which alternative the American people will chose to follow when they clearly understand the situation.
>
> In modern democracies the functions of the army and navy are police, philanthropic, and sanitary functions. Our Army and Navy have performed these functions admirably and well. Let them continue to do so. Keep them efficient for doing work of this kind, but put behind us forever the notion that we must arm in peace as a preventive of war, and that we must be perpetually defending ourselves or getting ready to defend ourselves against new enemies. No people will be hostile to us, unless we by our conduct make them so.

Here is the real situation stated by one of the great minds of the country, and his conclusions are worthy of serious consideration by every citizen in this great Republic. It is a correct solution of the question, and, if followed, will promote the welfare of the people and secure the triumph of peaceful methods for the settlement of international disputes instead of a resort to arms.

Mr. VARE. I ask unanimous consent to address the House for five minutes.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to address the House for five minutes. Is there objection?

There was no objection.

Mr. VARE. Mr. Chairman, since "Tipperary" was abolished from the Navy by order of Secretary Daniels, there has been considerable anxiety among the enlisted men and officers as to where a lively and strictly neutral substitute might be found. It is in the interest of a cheerful and contented Navy that I make the announcement that such a substitute has been discovered at the Philadelphia Navy Yard in the form of a song entitled, "Cheese it! We should worry! In good old U. S. A.!" Its composer-author is Frederick Hall, for four years organist and choirmaster at historic old Christ Church, where George Washington worshiped in the early days of the Republic. Mr. Hall is well known in Philadelphia as the composer of special music for many historical celebrations. He wrote the words and set them to music within the last 10 days.

This substitute for "Tipperary" made its debut at the Young Men's Christian Association at League Island last Christmas night, when 600 marines assembled for a Christmas entertainment. The song was introduced as a special number and the marines continued to sing it for 22 minutes, and it has been very popular at the Philadelphia Navy Yard ever since. Other navy yards will want to know about this song in order that they can comply with the instructions to avoid "Tipperary."

I ask the Clerk to read it.

Mr. YOUNG of North Dakota. Why not sing it?

Mr. NORTON. I think the gentleman ought to favor us with the song.

Mr. VARE. I will furnish each Member with a copy.

The Clerk read as follows:

"CHEESE IT! WE SHOULD WORRY! IN GOOD OLD U. S. A.!"

[Copyright, 1914, by Frederick Hall. All rights reserved.]

I.

Oh, I'm a Yankee lad, and I'm like Yankee Doodle dandy—
For I am not so very bright, but yet I'm kinda handy.
And this I know quite well, and I'm not afraid to tell,
That we should have a bigger, better Navy.
I hate the very thought of war and love my cup o' grape juice,
I love the dove of peace, of course, and my own little fireside,
And while I'm democratic, I am very patriotic,
And this is what's been working on my mind—

CHORUS.

Oh! We have got the money, and we have got the men,
And we have got the courage to use them once again;
But if we had to fight—though I hope we never will—
The Nation should be ready to jump right in and win.
And when we have a Navy that's ready any day
To turn back any people who may come in war's array
(Cheer) Hooray! Hooray!!
We'll never need be sorry, for we can grin and say—
(Cheer) Hooray! Hooray!!
"Cheese it! We should worry! In good old U. S. A.!"

2.

Oh, I'm a Yankee lad, and I'm like Yankee Doodle dandy;
And I have got a friend who is a sojer in the Army.
Says I to him one day, just a year ago last May,
"Say! Tell me what you think, and leave out the blarney."
He looked me in the eye right straight, and answered, "Sure as fate, sir,
We'd tackle anything on earth for the country of our birth, sir;
But when we sight a gun, if it's empty as a drum—
Say, how much shooting do you think it's worth?"

3.

Oh, I'm a Yankee lad, and I'm like Yankee Doodle dandy.
And we've a neighbor down our street; his name is Uncle Sammy.
His wife will hold her breath and be almost scared to death
If anybody says a word of burglars.
Not long ago, 'tis true, they kept the police on the run, sir;
So Sammy—careful man he is—he wants to buy a gun, sir.
His wife near had a fit—"Keep a gun? Why, I guess nit!
If burglars knew it, they'd be sure to come."

4.

Oh, I'm a Yankee lad, and I'm like Yankee Doodle dandy,
And I respect the good intent of friend "Library Andy"
And many more like him, who all say, with lots of vim,
"There's nothing worse than 'taint of military.'"
And "When we are prepared, that we will go a-hunting trouble."
But just a word of common sense will quickly burst that bubble;
For you can bet your hat it will never come to that,
For Uncle Sammy isn't built that way.

5.

Oh, I'm a Yankee lad, and I'm like Yankee Doodle Dandy—
My father he is Irish and his name is Handy Andy.
We're neutral as can be in this country of the free,
Though mother's people mostly came from Germany.
But we all love the Stars and Stripes in every kind of weather,
And you can bet your boots that it will hold us all together.
We're with it heart and head, and we'd fight till we were dead,
But this is what's been working on my mind—

6.

Oh, I'm a Yankee lad, and I'm like Yankee Doodle Dandy—
From 'way down South in Dixie land my wife is Sal Mirandy.
'Tis eight years since we've wed, as perhaps I may have said,
And now we have our own sweet little family.
It's "Home, Sweet Home," for me, you bet, with kiddies calling "Daddy!"
But if I went to war, indeed, 'twould break my heart quite sadly.
It makes me want to pray, and I've got a right to say
That this is what's been working on my mind.

Mr. MILLER. Mr. Chairman, I would like to have two minutes in this symposium. I desire to be recognized in opposition to the amendment.

The CHAIRMAN. The gentleman from Pennsylvania did not offer any amendment; he asked unanimous consent to speak for five minutes.

Mr. MILLER. I think the Chair and the committee can afford to give me two minutes. I want to communicate some real information.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota that he be allowed to address the committee for two minutes?

There was no objection.

Mr. MILLER. Mr. Chairman, this poetic effusion from Philadelphia is worthy of serious and profound sympathy. At least our profound sympathy should be extended to those whose misfortune it is to have to sing it. Nevertheless I am glad to see that in that beautiful city of Philadelphia there is left among the

descendants of William Penn, even in these days of melancholy, the spirit of song. It may be a spirit of weakened days, of fading strength, yet it is a song spirit. The cadence of these words strikes the ear somber and melancholy, emanating, as it were, from a soul oppressed with sorrow and deadened with grief; as such, perhaps, it is fitting that it should be sung by the sailor lads of our Navy. Sailor lads, in these grape-juice days, to whom Tipperary is forbidden, may well pour forth their soul thoughts in sepulchral strains and melancholy tones. Is the singing of this song, I wonder, calculated to stimulate enlistments in the Navy? Rather its singing would appear designed to drive out of the service all the men behind the guns, hastening the day when our battleships shall be scrapped and the American flag be furled upon the deep. But if it is designed that this song is to take the place of Tipperary, if it be designed that these melancholy strains shall be substituted for those lively, tripping notes, then I desire vigorously to protest. Military discipline may compel the lads of the Navy to sing this song, but no power on earth can compel a free people, as we claim to be, to sing it. Some executive power has said our sailor lads shall not sing Tipperary. Why not? Tipperary is not an English song; it is not a European song; it is an American song. It is not the product of warring spirit or belligerent enthusiasm. It is an American song, written by an American. Tipperary was written in Minnesota by a splendid Minnesotan, in the city of Owatonna, a city of vigorous, progressive, and cultured people, a city near which I was born. The song of Tipperary was written there by one of its citizens, by its merit seized the multitudes of Europe, and to-day moves to activity more Americans than any other strain. To me it is the high-water mark of ridiculousness for an executive officer to put a ban on the exuberant spirit of men who would sing Tipperary; but what a crime that ban becomes when it forces them in its place to sing such a melancholy dirge as this. In order to live man must sing, and I insist that American manhood and womanhood be permitted to sing the Minnesota-American song of Tipperary and that we be saved from the lockjaw that this song would give us. [Laughter and applause.]

The Clerk read as follows:

Total public works, navy yards, naval stations, naval proving grounds, and magazines, naval training station, San Francisco, naval hospital, New York, and depots for coal and other fuel, $2,527,816, and the amounts herein appropriated for public works, except for repairs and preservation at navy yards and stations, shall be available until expended.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on that. I wish to ask the gentleman what is the necessity for the words "available until expended"?

Mr. PADGETT. This provision for public works has always contained this language "shall be available until expended."

Mr. STAFFORD. I withdraw the point of order.

Mr. MANN. Mr. Chairman, my attention has been called to the fact that the total under the head of "Public works" is not now correct.

Mr. FITZGERALD. That is one of those cases where the total is not affected by a reappropriation.

Mr. MANN. That may be. I was going to suggest that the gentleman from Tennessee, the chairman of the committee, ask unanimous consent that the Clerk be authorized to correct the totals where necessary.

Mr. PADGETT. I thought I would do that after I got to the end of the bill.

The Clerk read as follows:

Transportation of remains: To enable the Secretary of the Navy, in his discretion, to cause to be transferred to their homes the remains of officers and enlisted men of the Navy and Marine Corps who die or are killed in action ashore or afloat, and also to enable the Secretary of the Navy, in his discretion, to cause to be transported to their homes the remains of civilian employees who die outside of the continental limits of the United States, $15,000: *Provided*, That no deduction shall hereafter be made from the six months' gratuity pay allowed under the naval act of August 22, 1912, on account of expenses for preparation and transportation of the remains: *Provided further*, That the sum herein appropriated shall be available for payment for transportation of the remains of officers and men who have died while on duty at any time since April 21, 1898, and shall be available until June 30, 1917.

Mr. MANN. Mr. Chairman, I make a point of order against the two provisos.

Mr. PADGETT. Will the gentleman reserve that a moment?

Mr. MANN. Yes.

Mr. PADGETT. The reason the committee inserted that is it was stated by the Surgeon General that the comptroller has ruled that they are compelled to deduct the amount whether the Government pays for the transportation or not. The family pays the burial expenses, and when they go to receive the six months' pay credit under the law the comptroller holds that they must deduct the $35 for burial expenses, although the family paid it and the Government did not pay it. For that reason the committee inserted it in the bill.

Mr. MANN. I make the point of order against both provisos.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

BUREAU OF SUPPLIES AND ACCOUNTS.

Pay of the Navy: Pay and allowances prescribed by law of officers on sea duty and other duty, $10,598,933; officers on waiting orders, $500,000; officers on the retired list, $3,070,230; clerks to paymasters at yards and stations, general storekeepers ashore and afloat, and receiving ships and other vessels, $320,520; 2 clerks to general inspectors of the Pay Corps, $3,625; 1 clerk to pay officer in charge of deserters' rolls, $2,000; not exceeding 10 clerks to accounting officers at yards and stations, $17,355; dental surgeon at Naval Academy, $2,400; commutation of quarters for officers on shore not occupying public quarters, including boatswains, gunners, carpenters, sailmakers, machinists, pharmacists, and mates, naval constructors and assistant naval contructors, $550,000; and also members of Nurse Corps (female), $1,000; for hire of quarters for officers serving with troops where there are no public quarters belonging to the Government, and where there are not sufficient quarters possessed by the United States to accommodate them, or commutation of quarters not to exceed the amount which an officer would receive were he not serving with troops, $1,000; pay of enlisted men on the retired list, $340,000; extra pay to men reenlisting under honorable discharge, $927,000; interest on deposits by men, $15,520; pay of petty officers, seamen, landsmen, and apprentice seamen, including men in the engineers' force and men detailed for duty with Naval Militia, and for the Fish Commission, forty-eight thousand men, $23,616,000; and the number of enlisted men shall be exclusive of those undergoing imprisonment with sentence of dishonorable discharge from the service at expiration of such confinement, $200,000; and as many machinists as the President may from time to time deem necessary to appoint, not to exceed 20 in any one year, $200,000; and 3,500 apprentice seamen under training at training stations, and on board training ships, at the pay prescribed by law, $742,560; pay of the Nurse Corps, $116,940; rent of quarters for members of the Nurse Corps, $15,480; in all, $41,240,563; and the money herein specifically aprpropriated for "Pay of the Navy" shall be disbursed and accounted for in accordance with existing law as "Pay of the Navy," and for that purpose shall constitute one fund.

Mr. HOBSON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 26, in lines 9 and 10, after the word "commission," strike out the words "forty-eight thousand" and insert "fifty-three thousand."

Mr. HOBSON. Mr. Chairman, the effect of this amendment would be to increase the enlisted personnel of the Navy by 5,000 men. The additional cost in this year's appropriation bill would amount to about $2,200,000. The ultimate total increase cost per year would amount to about $3,000,000. I desire to read a part of the report made by Admiral Fletcher as to the shortage of officers and men in the battleship fleet in commission and put the whole report in my remarks:

UNITED STATES ATLANTIC FLEET,
U. S. S. "WYOMING," FLAGSHIP,
Navy Yard, New York, January 12, 1915.

From: Commander in chief.
To: Secretary of the Navy (Bureau of Navigation).
Subject: Shortage of personnel of battleships, Atlantic Fleet.

1. There are forwarded herewith reports of the boards ordered to consider the necessary personnel for the different types of battleships, together with the comments of the division commanders. Reports of the necessary personnel for destroyers, gunboats, and other types of ships will be forwarded at an early date.

2. I desire to invite the department's attention to the serious shortage of officers and men in the battleships of the Atlantic Fleet. The battleships form the bulwark of our national defense, and as our Navy is gradually dropping behind foreign navies in size it is of urgent importance that such ships as we have be at least the equal in efficiency of any similar ships in the world. This condition it is possible to attain only by having each ship fully manned and thoroughly drilled. Our material is equal to an other afloat, but I desire to emphasize the fact that only the efficiency of our personnel can give us a fair chance of victory in the naval battles to come.

3. I submit that the situation is peculiarly pressing in our Navy, owing to the fact that our short enlistments give each ship a large number of untrained men. This handicap entails a large additional amount of work on both officers and petty officers. If to this handicap is added that of a shortage of both officers and men, inefficient ships will surely result. The situation admits of no temporizing. In the battleships alone there is a shortage of 5,000 men and more than 300 commissioned officers, as shown in the appended tables. There is no palliative for this situation. I desire to make the point that our battleships are undermanned, and the efficiency that is in these units can not fully be attained until the shortage in both officers and men is filled. In support of my opinion I quote the following from the report of the First Division commander on the same subject:

"While it is possible to operate these ships on a reduced complement, if this is done it must be realized that all the guns can not be manned; that the ship can never steam at her maximum speed; that the ship can never throw an effective landing party ashore; that practically all of the working day will be devoted entirely to the upkeep and preservation of material, with the consequent loss of time to be devoted to drills. In other words, the ship will never be ready for battle. In addition, it is apparent that there will be at no time a battleship available for the full duty of such a ship."

4. I quote further from the report of the Third Division commander:

"In time of peace the ships of the active fleet have a twofold duty to perform, each part of almost equal importance. The first duty of the ship is to maintain a trained personnel, wholly adequate to insure the ship's efficiency at the outbreak of war. The second duty is to train additional personnel which will inevitably be required to man ships newly commissioned and ships in reserve called into active service when the threat of war is imminent.

"Unless this latter duty of the active fleet is fully recognized and provision made for training a surplusage of men and officers to furnish the leaven of green crews called into service to command newly commissioned and reserve ships the result is sure to be disastrous. Unless a good proportion of the crews of newly commissioned ships for active service are experienced men, the ignorance and inexperience of green crews will soon set the standard of the ship's efficiency and result in merely preparing the ship for return to a navy yard for extensive repairs or for easy capture by the enemy."

5. The situation admits of no compromise. I urgently recommend that steps be taken without delay to fill the shortage of both officers and men in the battleships of the Atlantic Fleet, to the end that this organization, vital to the protection of the Nation, may be kept fully prepared for the grave and important duties that have called it into being.

F. F. FLETCHER.

The 5,000 men here called for would simply enable the commander in chief to have 21 battleships, on which we now rely as a part of our defense, efficient. He goes on to report that it would require 5,000 more men to make the auxiliaries efficient. Testimony before our committee shows that it would require in the neighborhood of 20,000 men to properly man the ships that would be put in commission the day that war was declared. It is imperative that we have these men ready when war comes. It is further reported to the committee that to put our whole Navy on a sound basis of national defense under war conditions, to add the auxiliaries necessary, would require anywhere from 30,000 to 50,000 men.

Therefore, Mr. Chairman, my amendment would simply be a beginning to make the ships we now have effective. The Secretary of the Navy himself in the hearings said that we need the men, but he said that on account of the condition of the Treasury he is going to wait until the next appropriation bill to recommend them. It takes time to train a man. We ought to have 5,000 additional men now; we ought to have 5,000 additional men in the next appropriation bill, and in the next appropriation bill, and in the following appropriation bill. We ought to have 5,000 additional men each year for the next five years to put our Navy on a basis of efficiency in time of war. The 5,000 men called for by my amendment would not be enough to man the new ships now building and that we are going to authorize in this bill. I offer the amendment for 5,000 men as the minimum that ought to be supplied in the bill.

Mr. GARDNER. Mr. Chairman, if I had offered the amendment instead of the gentleman from Alabama, I should certainly have fixed the figure of increase at 10,000 men. The shortage to which the gentleman has referred is merely the shortage for the 21 active battleships. It takes no account of the shortage in the rest of the Navy. The gentleman has quoted a letter written on the 12th day of January by Admiral Fletcher to the Secretary of the Navy. Here is what the admiral says:

UNITED STATES ATLANTIC FLEET,
U. S. S. "WYOMING," FLAGSHIP.
Navy Yard, New York, January 12, 1915.

From: Commander in chief.
To: Secretary of the Navy (Bureau of Navigation).
Subject: Shortage of personnel of battleships, Atlantic Fleet.

1. There are forwarded herewith reports of the boards ordered to consider the necessary personnel for the different types of battleships, together with the comments of the division commanders. Reports of the necessary personnel for destroyers, gunboats, and other types of ships will be forwarded at an early date.

2. I desire to invite the department's attention to the serious shortage of officers and men in the battleships of the Atlantic Fleet. The battleships form the bulwark of our national defense, and as our Navy is gradually dropping behind foreign navies in size it is of urgent importance that such ships as we have be at least the equal in efficiency of any similar ships in the world. This condition it is possible to attain only by having each ship fully manned and thoroughly drilled. Our material is equal to any other afloat, but I desire to emphasize the fact that only the efficiency of our personnel can give us a fair chance of victory in the naval battles to come.

3. I submit that the situation is peculiarly pressing in our Navy, owing to the fact that our short enlistments give each ship a large number of untrained men. This handicap entails a large additional amount of work on both officers and petty officers. If to this handicap is added that of a shortage of both officers and men, inefficient ships will surely result. The situation admits of no temporizing. In the battleships alone there is a shortage of 5,000 men and more than 300 commissioned officers, as shown in the appended tables. There is no palliative for this situation. I desire to make the point that our battleships are undermanned and the efficiency that is in these units can not fully be attained until the shortage in both officers and men is filled. In support of my opinion I quote the following from the report of the First Division commander on the same subject:

"While it is possible to operate these ships on a reduced complement, if this is done it must be realized that all the guns can not be manned; that the ship can never steam at her maximum speed; that the ship can never throw an effective landing party ashore; that practically all of the working day will be devoted entirely to the upkeep the preservation of material, with the consequent loss of time to be devoted to drills. In other words, the ship will never be ready for battle. In addition, it is apparent that there will be at no time a battleship available for the full duty of such a ship."

4. I quote further from the report of the Third Division commander:

"In time of peace the ships of the active fleet have a twofold duty to perform, each part of almost equal importance. The first duty of the ship is to maintain a trained personnel, wholly adequate to insure the ship's efficiency at the outbreak of war. The second duty is to train additional personnel which will inevitably be required to man ships newly commissioned and ships in reserve called into active service when the threat of war is imminent.

"Unless this latter duty of the active fleet is fully recognized and provision made for training a surplusage of men and officers to furnish the leaven of green crews called into service to command newly commissioned and reserve ships the result is sure to be disastrous. Unless a good proportion of the crews of newly commissioned ships for active service are experienced men, the ignorance and inexperience of green crews will soon set the standard of the ship's efficiency and result in merely preparing the ship for return to a navy yard for extensive repairs or for easy capture by the enemy."

5. The situation admits of no compromise. I urgently recommend that steps be taken without delay to fill the shortage of both officers and men in the battleships of the Atlantic Fleet, to the end that this organization, vital to the protection of the Nation, may be kept fully prepared for the grave and important duties that have called it into being.

F. F. FLETCHER.

The General Board of the Navy has worked out plans which show that between thirty and fifty thousand additional men will be needed in the Navy in time of war. But you can not put untrained men in the Navy in time of war. Let us see what material we have with which to fill those thirty to fifty thousand places that must be filled in time of war. We have a Naval Militia which consists of 7,132 men, if every man jack of them turns out, which, of course, will not be the case. We have no reserve at all, none whatever. To be sure, it is proposed to establish a reserve, but if it is no more successful than the attempt which has resulted in an army reserve of 16 men, it will be many years before we can count on a navy reserve. By the way, as to this question of counting on reserves, Mr. Chairman, the rapidity with which invention marches nowadays makes me think that we ought not to depend too much in time of war on a Navy and Army of "has beens." Can we get these men for war duty from the merchant service? Not a bit of it. Let me read to you from the testimony of Assistant Secretary Roosevelt:

Mr. HOBSON. How long do you think would be required to make a good man-of-war's man out of a merchant marine sailor?

Mr. ROOSEVELT. About the same length of time that it takes to make a good man-of-war's man now out of green material.

If we go ahead on the plan of having our war vessels so short of men in time of peace, some future Commodore Dewey may find himself in difficulties at some future battle of Manila Bay. This discussion is nothing new. The General Board again and again has called attention to the necessity of giving our Navy a greater number of men. There is no use building battleships if you are going to put them away in "cold storage," because you have not the crews to man them. Of our battleship fleet to-day we have 12 in "cold storage," where we can not get them ready for battle under three months' time, and it would take a year to get at all of them. We have three battleships in reserve, six in ordinary, and three out of commission.

I am going to read to you what the General Board of the Navy says in their report of this year:

In view of all that has been set forth, the General Board recommends (a) that legislation be asked for providing an active personnel, officers and enlisted force, capable of keeping in full commission all battleships under 15 years of age from date of authorization, all destroyers and submarines under 12 years of age from authorization, half of the cruisers, and all gunboats and all necessary auxiliaries that go with the active fleet, and of furnishing nucleus crews for all ships in the Navy that would be used in time of war and necessary men for the training and other shore stations.

Mr. Chairman, not only have we 12 battleships that are not in full commission, but we have nearly 80 other craft of the Navy keeping them company in "cold storage"—all on account of this lack of men.

Mr. McLAUGHLIN. Mr. Chairman, I wish to support the amendment offered by the gentleman from Alabama. I have had occasion to read some of the hearings taken by the committee, and I have been attracted by a statement made by some of the officials of the Navy Department. I had in mind when the amendment was offered something I had read, a statement by the Assistant Secretary of the Navy, Mr. Roosevelt, when he appeared before the committee, in answer to questions asked by members of the committee. He was asked how long it would take to get a reserve force of 25,000 men, the reserve force on which the regular Navy could call in time of war, and he said four or five years. He was asked how long it would take to get that number of men in time of war, and he said that would be pure guesswork; that they might not be able to get them at all. He was then asked how long it would take to secure enlistment of 25,000 men in the Navy, and he said that that would be pure guesswork. He was asked how large a number of men who had previously served in the Navy would be willing to come back, and he replied that we might be able to get 5,000 or 10,000, or possibly 15,000, but that nobody knows how many.

Mr. Chairman, those are the words of the Assistant Secretary of the Navy when he was considering the very matter or a

related matter to the one presented by the gentleman from Alabama. It seems to me that proper attention ought to be paid to securing men in time of peace and of training them so that they will be available with experience for efficient service in time of war. I believe the amendment ought to be adopted.

Mr. PADGETT. Mr. Chairman, I am opposed to this amendment, because I do not think it is necessary at this time. The Secretary of the Navy, who is charged with the duty and responsibility of the administration of the Navy, states that it is not needed at this time. Admiral Blue, Chief of the Bureau of Navigation, who had immediate charge of the personnel of the Navy, states that it is not needed, and that with the men we have we can man fully 90 per cent of our effective fighting ships, and that is as much, if not more, than any nation in the world keeps in active condition during time of peace.

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield for a question?

Mr. PADGETT. Yes.

Mr. CAMPBELL. What list does the Navy Department have of the men who have formerly served in the Navy, and if they have a list do they keep track of the men, where they are, and how soon they can get in touch with them if occasion needs?

Mr. PADGETT. Yes; I had a letter from Admiral Blue—he got it up, I believe, although it was signed by the Secretary—stating that they had a list of about 30,000 men who had been discharged within the last 10 years, and that within the last 3 or 4 years they had gone over the earlier discharges and had corrected the addresses of about 3,000, if I remember it correctly.

Mr. CAMPBELL. Does the department keep up a correspondence with those men who had formerly served in the Navy?

Mr. PADGETT. I could not say they keep up an active correspondence; but they have this list, and, as I stated, lately they have had correspondence and gotten corrected addresses of three or four thousand of those earlier discharges.

Mr. GARDNER. Is it not true they have only been able to get in touch with three or four thousand?

Mr. PADGETT. They went back over the earlier ones; the ones lately discharged they assume they have their addresses.

Mr. GARDNER. That is, they have their addresses on discharge?

Mr. PADGETT. Yes; and that they have their correct addresses, because they have been lately discharged.

Mr. HOBSON. Will the gentleman yield?

Mr. PADGETT. Let me finish the statement, and then I will yield. I want to get this matter clearly before the committee, and I will ask permission to proceed for 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee that he may proceed for 10 minutes?

Mr. HOBSON. Mr. Chairman, reserving the right to object, I want to ask the gentleman if he will have any objection to my asking unanimous consent for five minutes after he has finished? I have had five.

Mr. PADGETT. I never have objected to the gentleman.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none, and the gentleman is recognized for 10 minutes.

Mr. PADGETT. Mr. Chairman, I wish to call attention to this state of affairs, that we have at the present a full enlistment of 52,400 men, which is about 4,600 more than we have ever had heretofore in any enlistment. Last year we sold the *Mississippi* and the *Idaho*, and that released 1,400 men, and these others have run up enlistments at the present time to something like 10,000, if I remember, more than we have had heretofore available for manning the ships. Now, with that additional number of men that we have in the present enlistment there is no necessity for increasing at this time. Now, I wish to call attention to this fact that appears here. I have a statement showing the condition in England, Germany, France, Japan, and the United States based upon a tonnage basis of 1,000 tons.

Mr. SHERWOOD. Who is that statement by?

Mr. PADGETT. This is a statement gotten up from the publications of the different nations, and is in the hearing of the Secretary of the Navy and is furnished by him. You will find it on page 578 of the hearings. In England the bluejackets are 54.42 on a tonnage basis of 1,000 tons; in Germany, 69.13; in France, 87.83; in Japan, 96.32; and in the United States it is 68.70, so that you will see that the bluejackets we have in reference to tonnage are 68.70 as against 54.42 for England and for Germany 69.13; and, taking the marines, England has 9.42 marines on the tonnage basis of 1,000, Germany has 6.9, and the United States has 10.34. Now, when you combine the marines and bluejackets—because they do similar duties—England has 65.34, Germany 76.22, and the United States has 79.04, so that we have on the tonnage basis more than either England or Germany. Now, the Secretary states that it is his purpose during the coming year to have an investigation and redistribution of the personnel, so as to meet, where there may be an apparent shortage, by taking away from the smaller ships where there is a surplus, and when you take the tonnage we have more men per ton of ships than either England or Germany.

Mr. CAMPBELL. Does that include all ships or simply the ships in commission?

Mr. PADGETT. It includes all ships in which we have the men distributed. It is on the basis of our tonnage and our men, and it includes all ships.

Mr. McLAUGHLIN. Will the gentleman yield for a moment?

Mr. PADGETT. Yes.

Mr. McLAUGHLIN. Would the gentleman attach importance to this statement made by the Secretary, found on page 577, where he was asked when the last increase was provided for, and he said it was four years ago when he was authorized to increase the number by law and he scoured the country and he could not find the men?

Mr. PADGETT. Well, that was four years ago when they needed men.

Mr. McLAUGHLIN. And men were employed reasonably in the country, as they sometimes are and not as they are now.

Mr. PADGETT. Oh, well, if the gentleman wants to introduce that subject; but I have a statement here where a tabulation was kept and the question was asked of some 5,000 men as to why they joined the Navy—enlisted in the Navy—and about 318, as I remember, stated that it was because they wanted a job, that they were out of work, and all the others gave a different reason. Only 318 out of over 5,000. But let us leave out politics in this matter and stick to the discussion of the merits of this question. Now, I have a comparative statement here showing our complement, the British complement, the German and the Japanese, and the amount recommended by this board, to which attention was called by Capt. HOBSON a moment ago. Now take the *New York*. We have allotted to the *New York* 975 men. Upon a ship of the character of the *New York* in the English Navy they would have 900. On the *Arkansas* they have 984. On an English ship of that character they would have 900. On the *Wyoming* we have 984, and on an English ship of the same kind they would have 900.

Mr. GARDNER. Will not the gentleman read the complement of the German ships the size of the *Arkansas*?

Mr. PADGETT. I am going to do it; I am taking them one at a time.

Mr. GARDNER. The gentleman read the *Arkansas*, and read the English complement, but he did not read the German complement or the Japanese.

Mr. PADGETT. I said I was taking the English and the United States for comparison now.

You take, for instance, the *North Dakota*, and we have 894 men, and the English ship 870. And you take the *Utah*, and we have 894, and the English ship has 900, the only one so far that has more, and she has only 6 more. You go down and you will find that we have our ships manned as well as the English, and many of them better.

Now, you take the Germans, and on their large dreadnaughts they have a larger complement than we have, but on their smaller battleships they have fewer than we have. The Japanese have away out of proportion to any of the rest of the countries. They have 1,350 and 1,100 on their dreadnaughts, and then they run down below us, to 817, on the ships corresponding to our battleships.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. BUTLER. Would the gentleman like more time?

Mr. HOBSON. Mr. Chairman, I ask unanimous consent that the gentleman be allowed five minutes more, if I be allowed an equal length of time.

Mr. BUTLER. I do not want to make any objection.

Mr. PADGETT. I will not ask any further time.

Mr. HOBSON. Mr. Chairman, I ask unanimous consent for five minutes.

I will take the ship the gentleman has just referred to. He referred to the *New York*. He recited the fact that the complement in the Navy list for the *New York* is 975 men. He is correct, Mr. Chairman, but he failed to tell this House that right alongside that column there is a column showing the number of men on board the *New York* on December 1, 1914, to be 922—53 men short in the complement. He cited the *Arkansas*. Its complement is 984. That sounds liberal enough, but on the 1st day of December they had on board only 889 men. They were 85 men short. The *Wyoming* is 70 men short;

the *Texas* 62 men short; the *Delaware* 29 men short; the *North Dakota* 35 men short; and the *Utah* 55 men short, and so on.

Mr. PADGETT. Will the gentleman yield at that point?

Mr. HOBSON. Certainly.

Mr. PADGETT. Admiral Blue states that with the men he has he can place this complement on the ships. I have read the amount allowed by the department for these ships, and by taking the surplus from the others, with the men we now have, he can place these complements on the ships.

Mr. HOBSON. Of course if Admiral Blue proceeds to put out of commission a large number of other ships he can get an equivalent number of men. Referring to Admiral Blue, I think it is about time to pay a little attention to that agile prestidigitator in making briefs to bolster up the positions taken by the Secretary of the Navy.

Take his hearing on page 36. He proceeds to demonstrate that we have enough men. When he gets through and has cut down everything on earth, he still leaves a shortage of 4,565 men. By his own analysis, if we conceded every point he made, he would admit that we would need 4,565 more. But let us see how he has arrived at these low figures. He said, for instance, in time of war from the gunboats we could gain 2,000 men, because the gunboats would be interned. Every time a ship is interned the crew is interned along with the ship. If the gunboats are interned in foreign lands, how is he going to be able to get hold of the crews? That is item No. 1, 2,000 men. Next, he goes on to state that from station ships and at work in navy yards he could get 300 men. But what would he do? Who would take the place of the men he took? In item No. 4 he speaks of training stations and trade schools. He would get 3,000 men from them. There are only a little over 4,000 men there altogether. Instantly on the outbreak of war he assumes he could take more than three-fourths of all of these. If he did so, they would be almost as green as fresh enlistments. He refers in item No. 7 to 111 men taken from ships that are building. He would take all the men needed around ships that are building. In item No. 8 he says he could take from navy yards and shore stations 400 men, nearly half, though the work these men are doing would be increased in time of war. In item No. 10 he refers to general detail, 750 men. He would take all of these.

And so it goes. Now, Mr. Chairman, I have analyzed Admiral Blue's statement, and here is what it amounts to: From his admitted figures there are 4,600 men, and the shortage for the year 1915 he admits to be 1,086, of ships that are going into commission—the new ships. The fact is, you need 3,000 additional men. You can not get those men without sacrificing other stations. He says he can make up 1,614 men—from "general detail," 750; "from ships building," 111; available for enlistment, 753. He will have these items as large as before. But with his own figures he admits that you need 1,000 and more men for the current year to man the ships going into commission. That makes 5,686 men short by his own figures. As a matter of fact, we need the whole 27,000, making the shortage 6,300. Now, the ships to be authorized in this year's program recommended by the department would require 2,700 men more. The vessels recommended by the Naval Committee and carried in this bill would require more than 3,000 men, and it will take longer to train the men than to build the ships. Taking the department's figures, this brings up the shortage to 9,000 men. Taking the 2,000 men on gunboats makes 11,000. Now allowing for casualties 10 per cent—5,000—brings the total to 16,000. Admiral Blue's list of men on shore duty totals 12,518, from which the admiral imagines he could draw 5,669, although more work would be required than before. It is charitable to take only 3,000 as the evident error here. We would have from Admiral Blue's figures 19,000 men short.

In Admiral Badger's testimony he placed our shortage at about the same figure. Admiral Fiske's testimony gives the shortage at about the same figures, and says it would take about five years to put the personnel of the Navy in an efficient condition. The Assistant Secretary of the Navy places the figures about the same, and says we should really need from 30,000 to 50,000 more men upon the outbreak of war.

Reference has been made to investigations ordered by the Secretary of the Navy as to shortage. The report of Admiral Fletcher showing in detail an "alarming" shortage in the battleship fleet is the first report. Are we to expect any better showing from reports elsewhere? Yet Admiral Blue is trying long-distance handsprings on the report of Admiral Fletcher. Presto; with a wave of his magic wand, and the "alarming" condition in the fleet is all over.

Members are getting the economy fever as usual. They may vote down my amendment, conservative as it is, but they can not escape the responsibility for permitting to continue this alarming condition of shortage in the personnel upon which our country must depend. England was cited, and Germany. Those nations have 60,000 and 100,000 men in their reserves. They have large ocean merchantmen. We must depend more than any other nation upon the men ready and trained when war comes.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama [Mr. HOBSON].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. HOBSON. Division, Mr. Chairman.

The committee divided; and there were—ayes 25, noes 67.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Hereafter chief boatswains, chief gunners, chief machinists, chief carpenters, and chief pharmacists shall be termed commissioned chiefs: *Provided*, That the commissioned chiefs shall, after six years from date of commission, be recommissioned with the rank of lieutenant, junior grade, and six years from date of commission as chief with rank of lieutenant, junior grade, or after having served as a commissioned officer for 12 years, and after examination as hereinafter provided, shall be recommissioned as chief, with the rank of lieutenant in the naval service: *Provided further*, That the commissioned chiefs shall receive the pay and allowances, including longevity pay, heat, light, and quarters allowance, as are now allowed or may in the future be allowed officers in the line of the Navy of equal rank as that of the commissioned chiefs: *Provided further*, That warrant officers shall receive the same heat and light allowances as are now allowed or may in the future be allowed an ensign in the line of the Navy, this to be in addition to the pay and allowances already provided by law.

Mr. MANN. Mr. Chairman, I make a point of order on the paragraph.

Mr. PADGETT. The point of order is well taken.

The CHAIRMAN. The Chair sustains the point of order.

Mr. BATHRICK. Mr. Chairman, will the gentleman reserve the point of order?

Mr. MANN. For how long?

Mr. BATHRICK. For five minutes.

Mr. MANN. Yes.

Mr. BATHRICK. Mr. Chairman, we have just heard a discussion on a subject that is correlative to this, namely, the difficulty of securing enlistments in the Navy. We have had it developed beyond any question that it has been very difficult to get men to enlist in the Navy, and one of the primary and most important reasons is simply because we offer them no prospect of future advancement and development for themselves.

This can not be better illustrated than by the record showing what number or proportion of the men who enlist for the first time reenlist, and I beg the attention of the House to this very serious matter——

Mr. MOORE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from Pennsylvania?

Mr. BATHRICK. Yes.

Mr. MOORE. I want to ask the gentleman before he proceeds whether this provision is in substance what was contained in the Bathrick bill?

Mr. BATHRICK. It is a part of the Bathrick bill. The other parts of the bill have been accepted by the Navy. The bill was shot to pieces, and the Navy authorities took those parts that they wanted, but they balked at the part which would give to the enlisted men a chance to rise on efficiency and stand shoulder to shoulder with the line officers. This is the last part of it.

Now, I was going to call your attention to the difficulty of getting men into the enlisted force of the Navy. In 1911, out of 29,734 men in the Navy, only 5,862 enlisted the second time. On the second reenlistment there were only 1,600. Why? Because the doors were closed against every hope of advancement to a higher grade.

In 1914 there came out other illuminating facts. The number in the Navy who had been there under 4 years was 34,027. The number of those who had been there over 4 years and under 8 years was 10,909. But the number of those who had been in the enlisted force of the Navy more than 12 years and less than 16 years was only 1,588.

Now, gentlemen of the House, to-day is only one milestone in the long fight of the enlisted men of our Navy, of the men who want to go through and make something of themselves; and this amendment provides that all but 12 of those warrant officers who would come up under this bill shall come through upon a practical examination prescribed by the Secretary of the Navy, and they can not advance except on efficiency.

The 12 men referred to are men who have served in the Navy about 30 or 40 years, most of them occupying responsible and important positions as officers, but who would receive no help

by this measure, which would give them advancement without examination. They deserve this recognition, which is much less than that accorded to some line officers by recent legislation.

Mr. FITZGERALD. Mr. Chairman, will the gentleman yield there for a question?

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from New York?

Mr. BATHRICK. Yes.

Mr. FITZGERALD. How much does the boatswain or chief gunner receive?

Mr. BATHRICK. I can not tell exactly what they receive. This is not a pay bill. The purpose of this provision is to offer promise of advancement, and pay will go with it. I think it is something like $1,800.

Mr. FITZGERALD. Can they retire them at the end?

Mr. BATHRICK. They can retire when they are 62 years of age.

Mr. MOORE. There is an impression that this contemplates retirement. Is there anything in that?

Mr. BATHRICK. No.

Mr. MOORE. I think some objections have been made on that account.

Mr. BATHRICK. I know certain reasons have been floated through this House by those who are opposing this amendment, and their objections are based upon the very same thing that they desire for themselves, namely, retirement. For 50 years the enlisted men have been insisting upon this opportunity for advancement. Year after year they have looked for the improvement in their position in the service, with the laudable desire that every American citizen, of every class, nourishes in his heart, and which seems capable of realization everywhere except to the enlisted man in the American Navy.

Mr. MOORE. Mr. Chairman, will the gentleman yield again?

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from Pennsylvania?

Mr. BATHRICK. Yes.

Mr. MOORE. What chance have they of promotion by faithful service?

Mr. BATHRICK. I will explain that. You take a young man 17 years of age. He must have seven years' sea duty, and if he has that sea duty all the time and is not left on shore part of the time he may become an ensign at 30 upon examination. If, by the order or his superior officers or by some other mishap, or choice of those who rule above him, he passes the age of 35, the iron doors are forever closed against him. Thus this young man, who may have mastered the technique of the Navy, who may have while on shore duty graduated at the Georgetown or other college, who is just entering into the period where his services of mind and body might mark their greatest usefulness to the American people, has reached his dead line of advancement.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. BATHRICK. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from Ohio [Mr. BATHRICK] asks unanimous consent to proceed for five minutes more. Is there objection?

Mr. MANN. Will that be sufficient?

Mr. BATHRICK. I think it will.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BATHRICK. Now, Mr. Chairman, the question has been raised as to the effect upon the efficiency of men in the Navy. I want to call the attention of gentlemen in this House to the fact that a young man leaving the academy at Annapolis at the age of 20 may go aboard one of these ships and take precedence over and give command to a grizzled old engineer in the engine room who has been running that engine for 20 years. He can go into a turret and give command to the best gunner in the American Navy—a man who has taken the prize in our target practice—and he can go on the bridge and give commands to the man who has steered ships around the world and who knows more about practical navigation than the young ensign could possibly have known through technical education in the academy. These Annapolis graduates are commissioned as ensigns immediately upon their graduation and are made superior in rank by the law without practical knowledge and without knowledge how to do things which they have learned about only from books and oral instruction. But the enlisted man must actually do the things for many years before he can become an ensign. There are many enlisted men in our American Navy who never can, because of their incapacity, advance in rank. There are also a great many who have capacity, but who are held back by custom and regulation from receiving a just reward for their loyalty, study, and industry.

Among the 23 highest officers of the Pennsylvania Railroad there are 17 who rose from the lowly position of trackman. Under present circumstances there is no such prospect for young enlisted men in our Navy.

The assumption of authority over the practical warrant officers by the callow youths of Annapolis robs the men of their spirit and depletes their efficiency as a class. That is the condition to-day, and these enlisted men are galled by it. They are human; they are just like you and I. If a young man just graduating from college would come to us and undertake to tell us how to do things which we know more about by actual experience than he does by theory, we would be galled and feel that we were misplaced. It would take the heart out of us.

Mr. MOORE. Mr. Chairman, will the gentleman yield again?

Mr. BATHRICK. Yes.

Mr. MOORE. Are not these enlisted men under some extra expense occasionally, due to their desire to look well when meeting men of similar or higher grades from other navies?

Mr. BATHRICK. Yes. This is an occasional hardship upon them.

Mr. McKENZIE. Mr. Chairman, will the gentleman yield there for a question?

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from Illinois?

Mr. BATHRICK. Yes.

Mr. McKENZIE. I would like to ask the gentleman in that connection whether the Navy is maintained as an arm of our national defense, or is it supported for the benefit of the men in the Navy?

Mr. BATHRICK. I am talking upon this subject strictly and wholly from the standpoint of national defense. I believe there are some men in the House who think it is their duty to assassinate everything that can be put out on a point of order. It is an arbitrary and high-handed method of disposing of legislation. In this case it is trifling with the honest desire of many thousands of men in our Navy and is obstruction to good legislation and a proper national defense. No one will help to get economy by this kind of blackjacking to-day, and I will tell you why.

Mr. CALDER. Will the gentleman yield?

Mr. BATHRICK. I can not yield for just a moment.

The CHAIRMAN. The gentleman declines to yield.

Mr. BATHRICK. I have just explained to you how few reenlistments there are. In the five years last preceding this we expended $4,869,700 for clothing for recruits, and on top of that we paid transportation charges for them. If you would open up the door of hope for these men there would be more reenlistments, and you would save vastly more than the increased cost of the pay that would be allowed to them. That has been demonstrated in one particular, and the Secretary of the Navy himself says it has been demonstrated. That particular is this: About three years ago I brought to the attention of the Naval Affairs Committee a proposition to compel our naval officers on board ships to teach the men who were working at night in correspondence school courses, trying to come up from the ranks, to learn navigation, to know something about steam engineering. I have seen them on board these ships burning the midnight oil trying to improve themselves; and men educated at Annapolis, at an expense of $15,000 to $20,000 were not assisting them except as they were actuated by the kindly spirit which I admit is maintained between the line officers and the warrant officers of the Navy. There was no system about it. But by the grace of Secretary Daniels we got an order to compel these line officers to give systematic assistance to the warrant officers and men who were taking these correspondence school courses. The Secretary of the Navy says that it is better to have the enlisted men in the Navy feel that there is prospect and hope of advancement for them, and that we get a better class and more of enlistments. But what is the use of educating them, and what is the use of these poor fellows training themselves along that line, if we can not give them the rank to which they are entitled? They are capable, they can do the work. If every lieutenant on board should fall off a battleship into the sea; if every line officer, hardly excepting the captain, should fall into the ocean and be drowned, we have men among our warrant officers, of the enlisted men, who could fire the guns, run the engines, and navigate the ship.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. I do not undertake to dispute any of the statements made by the gentleman from Ohio, although I am not sure that I agree with all of them.

Mr. BATHRICK. Will the gentleman yield?

Mr. MANN. I think if this proposition were in order and submitted to a vote, with what little knowledge I have on the

subject, I should vote for it; but these propositions have no place in the naval appropriation bill. The Naval Committee this year have filled up the bill with legislative propositions which they might have reported in the proper way and might have had considered at the proper time, when that committee was called on Calendar Wednesday.

Mr. BATHRICK. Will the gentleman yield?

Mr. MANN. The gentleman can see that I am not yielding yet.

The CHAIRMAN. The gentleman declines to yield.

Mr. MANN. No; I do not decline; but a gentleman who has had 10 minutes ought to have patience enough to wait a moment without interrupting me.

I do not believe in this method of legislation—making an important change in the Navy without consideration by the House. It is impossible now to give it the consideration that it ought to have. Members of the House ought to have an opportunity to examine matters of this sort after they are reported in bills which come before the House in the regular way, instead of on an appropriation bill, in the consideration of which we are always crowded for time. Now I yield to the gentleman.

Mr. BATHRICK. I just want to make this statement to the gentleman from Illinois: It is a matter of the utmost difficulty to get personnel legislation from our committee.

Mr. MANN. That shows either that the committee is not in favor of it or is incompetent to act. I do not assume the latter.

Mr. BATHRICK. I think that is an error. This proposition has been before the committee, off and on, for over three years. It was considered two days and a half by the committee. It was given every consideration that could have been given to it in any other way, but the difficulty of personnel legislation is because of the technical character of that legislation. I have striven for three years to get this legislation presented.

Mr. MANN. I agree with the gentleman that he has striven for three years. This bill bears on its face the impress of trading in the Naval Committee, to have reported in it specific items of various kinds which different gentlemen of the committee wanted to favor, which do not, in my judgment, in any of them represent the sense of the committee itself on the particular propositions. That is the reason I am making a point of order, because I do not believe in passing legislation merely by trading instead of on merit.

Mr. BATHRICK. This was not done by trading. There was no sign or shadow of any such thing.

Mr. MANN. Oh, well, I do not say it was an open trade.

Mr. BATHRICK. It passed the committee after proper and careful consideration by a large majority.

Mr. MANN. I did not say that it was by an open trade.

Mr. BATHRICK. It passed on a roll call of the committee, and the gentleman can find the record of the vote in the committee.

Mr. MANN. Well, I make the point of order.

The CHAIRMAN. The gentleman from Illinois makes the point of order. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

That immediately on the passage of this act such commissioned chiefs as are entitled to the advance to lieutenant's rank by the provisions of this act shall be commissioned as such, and thereafter all warrant officers and commissioned chiefs in the naval service shall be examined for promotion by a board of commissioned chiefs, who shall require them to pass an examination in navigation (staff officers excepted), the requirements of same to be decided by the Secretary of the Navy: *Provided further*, That before being given any independent command at sea or being assigned to duties as navigator, commissioned chiefs of the rank of senior lieutenant shall pass an examination in navigation (staff officers excepted), the requirements of the same to be decided by the Secretary of the Navy.

Mr. MANN. I make a point of order against the paragraph.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

The sum of $150,000 is hereby appropriated to carry into effect the foregoing provisions relating to commissioned chiefs.

Mr. MANN. I make a point of order against the paragraph.

The CHAIRMAN. The Chair sustains the point of order; and the committee having arrived at that point in the bill which is provided for in the rule adopted this morning, the gentleman from Mississippi [Mr. WITHERSPOON] is recognized for one hour and the gentleman from Massachusetts [Mr. ROBERTS] is recognized for one hour.

Mr. HOWARD. Mr. Chairman, may I submit a parliamentary inquiry?

The CHAIRMAN. The gentleman may.

Mr. HOWARD. Under the rule adopted this morning I understand that these sections are subject to amendment. I have an amendment that I desire to offer to one of the sections, and I should like to know when that amendment will be in order.

The CHAIRMAN. That amendment will be in order when the paragraph is read under the five-minute rule after the general debate is over.

Mr. WITHERSPOON. Mr. Chairman, I yield five minutes to the gentleman from Georgia [Mr. TRIBBLE].

Mr. TRIBBLE. Mr. Chairman, beginning where I left off this morning, I had begun to give the House some illustrations of the able men who have been plucked from the Navy. I would do violence to my own State if I did not mention the fact that eight years ago one of the ablest men who ever served in the American Navy, Capt. Davenport, was plucked, and I want to tell you the circumstances under which he was plucked. He was on the battleship *Georgia*, a Georgian, and was in command of that ship when target practice began. There was a contest among all the ships as to which could shoot the best and was in the best fighting condition, and a prize was to be given to the best ship. Capt. Davenport had trained his crew and had begun the practice in this contest for that trophy. The plucking board took him out under those circumstances and sent him from the ship over to the shore, where he was forced to look over the back fence and see the crew that he had trained win the first place in the Navy.

Is that fair treatment? I am giving you the facts, and I challenge the Navy or anybody to contradict the statements I am making to you.

I will take up another illustrious man in the Navy, and that is Capt. Gibbons. I mentioned him this morning. A committee of this Congress was appointed, as they are each year, to go to Annapolis and investigate that institution. This committee, when Capt. Gibbons was in service there, made the following report:

The administration of the affairs of the academy under the superintendence of Capt. John H. Gibbons, United States Navy, deserves more than passing commendation. It is apparent that all the departments have been brought to a high degree of efficiency.

He served in 12 different high capacities, and his record throughout shows an official mark of excellence. Secretary Daniels stated in regard to his service at the Naval Academy as follows:

I deem it my duty to report to the department, after careful investigation, that I find an exceptional condition of efficiency in every department of this academy.

After Capt. Gibbons left the station at the Naval Academy he was placed in charge of the *Utah* with hopes, with aspirations, full of desire to do his duty, and responding to the American call, and the call of his country, he went to Vera Cruz and there distinguished himself as commander of the *Utah*. He came back to New York in charge of that dreadnaught, proud of his record as an officer in charge of that giant of the sea, and expected when he landed in New York to be received with open arms by the American people, with great demonstration in recognition of duty well performed. Instead of that, when he came into the harbor the *Utah* was met by a little tug, and this little tug brought a message to Capt. Gibbons, and the message ordered him to take off the uniform and retire from the service. I appeal to the membership of this House if they can not see that brave and efficient officer who distinguished himself at Vera Cruz walking down the gangplank with bowed head, with his crew of men and spectators looking on—a brave, distinguished officer in disgrace.

Mr. SHERWOOD. Will the gentleman yield?

Mr. TRIBBLE. Yes.

Mr. SHERWOOD. Was that done by the plucking board?

Mr. TRIBBLE. Yes; and that is the thing I stood on the floor of this House for four years pleading with Members to investigate this question and to repeal it. [Applause.]

Mr. MAPES. Will the gentleman yield?

Mr. TRIBBLE. Yes.

Mr. MAPES. Admiral Knight was a member of the plucking board, was he not?

Mr. TRIBBLE. Yes.

Mr. MAPES. And he testified before the committee?

Mr. TRIBBLE. Yes.

Mr. MAPES. Does the gentleman recall this statement made by Admiral Knight in regard to Capt. Gibbons, "I consider that the elimination of Capt. Gibbons was a distinct loss to the efficiency of the Navy"?

Mr. TRIBBLE. Yes; I mentioned that this morning. Now, I want to call attention to the fact that when the public mind of the country was outraged by this plucking of Capt. Gibbons and others last July, the newspapers stated that Secretary

Daniels denounced it at that time. He was quoted as saying "it was cruel." "The retirements of this date are tragedies." I presume he still stands with us. I have heard no official statement from him. I wish he would speak officially and give us his help to relieve the people of this unjust burden. [Applause.]

Mr. WITHERSPOON. Mr. Chairman, I yield six minutes to the gentleman from Michigan [Mr. KELLEY].

Mr. KELLEY of Michigan. Mr. Chairman, I am satisfied from what I have heard in the Committee on Naval Affairs that the days of usefulness of this forced-retirement board are over. There may have been in the beginning a reason why men should be retired from the various grades of the Navy by a board of this kind, but that time has gone by, because now, in the case of captains in the Navy at any rate, they have been passed upon, every one of them during the last 15 years by various boards, and the weak material has long since been culled out.

I do not blame the board for the retirement of five captains last July, because, under the law, the board had no option but to retire five captains and a certain number of officers in other grades. It was necessary for them to pick out five captains and retire them, and it did not make any difference whether all the captains were efficient men or not, five had to go under the law.

And so it comes about, as the gentleman from Georgia [Mr. TRIBBLE] says, that in July last one of the most distinguished men of the entire service was selected to go—Capt. Gibbons.

I want to say to you that Capt. Gibbons entered the Naval Academy in 1875, and he is now only 55 years of age, and from the hour that he entered the Naval Academy up to this moment, in all the various grades of service under the flag of his country, there is not one single mark recorded against him all the way along the line, from midshipman to captain of the *Utah*. And yet the captain was retired by this board last July. He served in the Spanish War, he served in the Boxer expedition in China, he served in the Philippines, and he served at Vera Cruz.

After he entered the grade of captain he was appointed as a member of the General Board—a board whose duty it is to advise the Secretary of the Navy in relation to our naval affairs. He was put on that board—a mark of distinction in itself—and then, if there is any doubt in the minds of anybody as to the esteem in which he was held by the officers of this Government, it must be dispelled by the fact that after he had served for about a year on the General Board he was put in charge of the Naval Academy at Annapolis, an institution where we train the young men to become officers of the Navy. He served there three years, or nearly so, with distinction, an exemplar to the young men of the country. Then, to show that he still held the regard of those in authority, he was given command of a dreadnaught, another mark of distinction and a further recognition of his ability. Upon his return home from the Mexican war he was relieved from duty and placed upon the retired list when only 55 years of age, with all of this splendid experience to his credit and not one mark against him during the whole 35 years of his distinguished career. Any system, Mr. Chairman, which will deprive this Government of such services has outlived its usefulness and should be done away with. [Applause.]

I yield back the remainder of my time.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I yield five minutes to my colleague from Massachusetts [Mr. GILLETT].

Mr. GILLETT. Mr. Chairman, it is very unpleasant for me either to debate or vote upon this question, because it affects men for whom I feel warm friendship and for whose professional knowledge and attainments I have the greatest respect. I am glad to indorse all that my friend from Michigan [Mr. KELLEY] has just said about Capt. Gibbons—he can not say too many complimentary things of him to please me—but it seems to me that this legislation brings before us a conflict between the rights of individuals and the rights of the service. The question is, Shall we benefit individuals or shall we benefit the service at large? And disagreeable as it is to make the choice, it seems to me that when that choice comes before us we ought to vote for what we believe is the good of the service.

Mr. MONTAGUE. Mr. Chairman, will the gentleman yield for a question?

Mr. GILLETT. I would rather not, but I yield for a question. I have very little time.

Mr. MONTAGUE. Mr. Chairman, I am always interested in the remarks of the gentleman from Massachusetts. I desire to ask him this question: In view of his concurrence in the estimate of Capt. Gibbons by the gentleman from Michigan [Mr. KELLEY], does he think it is for the good of the service to perpetuate a system that reaches that end?

Mr. GILLETT. Yes, Mr. Chairman; I do. It is indispensable for the service that some men shall be removed. In order that men may attain high rank at an age where the service needs them, there must be some system of removal. I know of no better system than to have some board of officers exercise that function. Personally I believe that it is better that such removal should be made by selection in some form than by mere seniority, because in that way the spur of ambition is fixed upon the officer, there is some reward for good service and some punishment for inefficient service; the loafer and the worker are not treated exactly alike.

I recognize that perhaps in this instance, perhaps in many instances, the board of retirement will make mistakes. They are human and fallible, as are the rest of us; but our service must be filled with splendid officers when any board can select such men as these to be removed, not because they are unfit—retiring them does not indicate that they are unfit—but because in the judgment of the board their retirement is better for the service than the retirement of any others. When all are good, good men must be retired. So it seems to me we should indorse and continue some such board as this, and when it comes to the issue, as we have now come to the issue, whether a board of naval officers is better to decide on a man's relative merit or a committee of this House, or this House in Committee of the Whole or the whole House, it seems to me there can be no question. I would rather trust a professional board than a political body.

I presume a retirement board often brings ill feeling in the service. Every man who is retired thinks he has been done an injustice. Undoubtedly some of them are treated with injustice; but it is better for the service that individuals should be occasionally treated with injustice by such a board of their own, when the whole service knows the necessity and will pass upon it, and will probably generally indorse it, than that the service should believe that retention of place depends upon political influence, depends upon pull with the committee, depends upon lobbying Members here. That, I believe, is the very worst evil that can come to our Navy—to have officers think that their positions depend upon political influence. And so, with great personal reluctance, I feel it my duty to vote against this proposition.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. WITHERSPOON. Mr. Chairman, I yield 13 minutes to the gentleman from Missouri [Mr. HENSLEY].

Mr. HENSLEY. Mr. Chairman, before I get into the argument on the proposition of abolishing the plucking board, I desire to say that the gentleman from Georgia [Mr. TRIBBLE] is entitled to a great deal of credit for his persistence in keeping this matter before the House and getting the House to focus its attention upon the situation that exists in the Navy, which, I believe, should not be permitted to continue any longer.

Some Members insist that this law at one time served a good purpose. It may be said in some regards that the conclusions reached under this law were right, but I do not believe that the law in the first instance was based upon the proper premise, though it may have served a good purpose in certain instances, as I have said. The law had for its purpose, as was explained to the Committee on Naval Affairs by the officers in the Navy as well as by others who are familiar with it, increasing the flow of promotions in the service. I insist that when you frame a law for that purpose wholly, you are very apt to lose sight of the good of the service. In other words, if there were incompetent officers in the Navy at the time this law was enacted they should have been eliminated by making the requirements for promotion stricter, so that only those who were efficient could have been promoted or would have been permitted to remain in the service. The law provides that the service records of all those officers whose cases are considered by the plucking board, as well as all others in those grades, must be compared so that those selected are the ones considered on the whole least efficient, not inefficient, but less efficient than those who remain. Anyone can very plainly see that the law makes a very unreasonable requirement. It is entirely impossible to comply with this requirement of the law, because it would require so much time to make this comparison so as to ascertain the least efficient.

The spirit of the law may have been all right, but the application of the law, because of what that involved, has not reflected that spirit. It is absolutely impossible for these gentlemen constituting the plucking board to go over the service records of all the officers in the Navy within the limited time they are called upon to do it. It is absolutely preposterous. It can not be done, and it follows, just as Admiral Knight said in response to a question I asked him when he was before our committee, and in this connection I desire to say that I never met a fairer officer

of the Navy, or anywhere a gentleman who impressed me more favorably than did Admiral Knight. I asked him this question: "Take two officers of the same rank, men of the same ability and of the same age, in every particular they are on a parity. One man, for instance, Admiral, has a wife and family to whom he is devoted. The other officer has no family and therefore, as is sometimes the case, he gives considerable of his time and attention to his clubs and to society generally, and you meet this one man often, and you have not met the other gentleman who has quite as good a record as the single individual. Which of those two officers will you pay most regard to under your system?" And he very naturally and honestly confessed that there was no dispute upon that proposition, that human nature was the same the world round. Now, I want to say to the gentleman from Massachusetts who insists that this is a personal matter with those who are asking to be restored, a matter where the individual officer alone is concerned, that in my opinion the service suffers more than the individual. Here are men educated at a considerable expense to the Government, as we all know. In the case of Capt. Gibbons, for instance, I desire to read the following:

Capt. John H. Gibbons entered the Naval Academy in 1875 and graduated in 1879. His record is flawless. During his service in the junior grade his special fitness was shown in many and varied positions. While ensign he was commended for conspicuous coolness and courage during the hurricane at Apia, Samoa, in 1889; showed special fitness while in charge of all work connected with and relating to the first 5-inch guns for the Navy; had charge of the mobilization of the Naval Militia for service in the Spanish War; served during the Spanish War on the U. S. S. *Newark*, seeing service in the blockade and in the bombardment of Santiago and Manzanillo; served as navigator of the *Brooklyn* during a cruise to the Philippines; was selected to command the *General Alava* in an expedition, where he rescued from the insurgents about 500 American and Spanish prisoners, and served in the Boxer campaign in China.

From 1902, when he was promoted to lieutenant commander, he was intrusted with many important commands, including the U. S. S. *Dolphin*, the U. S. S. *Charleston*, the U. S. S. *Louisiana*, and the U. S. S. *Utah*. While in command of the *Dolphin* and *Charleston* he received commendation from the Navy Department for excellence in gunnery shown by these ships and received trophies for the highest final merit of vessels first in the gunboat class and second in the cruiser class. During a long and varied career of 35 years it appears that he was selected by the Navy Department, which presumably had his special fitness and the efficiency of the service in view, for many important positions at sea and on shore, in all of which he received the highest commendation.

A record equally as good, I may say, can be cited in the cases of several other officers whom this legislation will restore to the active list.

Mr. Chairman, I have made a little computation here. You take the pay of a captain, $5,000 a year, and he is given sea service at $5,500 a year. He is retired on a basis of $3,750, three-quarters pay, computed upon the basis of pay for sea duty. Now, the difference between what he receives on the retired list and what he receives when he gives his whole time serving the Government would be only $1,750. Now, I insist, gentlemen of this committee, that it is a preposterous proposition that men who have been educated as these gentlemen have been—Capt. Hill, Capt. Rust, Capt. Gibbons, and others—and when they are at the very zenith of their mental and physical strength, should be retired in this fashion. They are now better able to serve the Government than they have ever been at any other time, and why should we not have their services when they have reached the very zenith of their strength mentally and physically?

Mr. SISSON. Will the gentleman yield for a question?

Mr. HENSLEY. Certainly.

Mr. SISSON. I would like to ask the gentleman who passes upon the record of these naval officers who constitute this plucking board?

Mr. HENSLEY. Oh, they are gentlemen who have escaped the plucking board and reached the grade of rear admiral.

Mr. SISSON. How is this plucking board selected; who names the plucking board?

Mr. HENSLEY. The Secretary of the Navy names five rear admirals, who constitute the plucking board, and it is not responsible to anybody on earth for what it does. There is no way you can inquire into the actions of the plucking board.

Mr. WITHERSPOON. They do not keep any record.

Mr. HENSLEY. And, as the gentleman from Mississippi says, they do not keep any record.

Mr. FIELDS. Will the gentleman yield?

Mr. HENSLEY. I yield.

Mr. FIELDS. Is there not a shortage of naval officers at this time?

Mr. HENSLEY. All who are familiar with the subject agree that there is a shortage; that we need additional officers.

Mr. FIELDS. And we are educating, of course, additional officers all the time?

Mr. HENSLEY. That is true.

Mr. FIELDS. And then, in order to give promotion to some men of a lower rank, they will retire men in the zenith of their strength?

Mr. HENSLEY. Absolutely. That can not be disputed by anybody. I can not agree with the gentleman from Massachusetts. While, of course, I do not want the service to suffer, I would never sit idly by and permit it. But I maintain, Mr. Chairman, that a wrong done a single individual is a wrong done to the whole. It is not right to single out these men and treat them in this fashion when they are capable of giving service to the Government of the United States, and not only capable but anxious to give service. And I insist that this plucking board if it ever has had and served a useful purpose that time has gone by. It was founded on a wrong proposition in its incipiency, because you can not consider a law wholly from the standpoint of increasing promotions, because when you do you lose sight of the service itself. That is the position I take.

Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on this proposition.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. WITHERSPOON. How much time does the gentleman yield back?

The CHAIRMAN (Mr. SAUNDERS). The gentleman yielded back seven minutes.

Mr. WITHERSPOON. Will not the gentleman from Massachusetts [Mr. ROBERTS] use some of his time?

Mr. ROBERTS of Massachusetts. Did the gentleman from Missouri use all of his time?

Mr. WITHERSPOON. He yielded back seven minutes.

Mr. ROBERTS of Massachusetts. I yield five minutes to the gentleman from Wisconsin [Mr. STAFFORD].

Mr. WITHERSPOON. Will the gentleman from Massachusetts yield to me one minute?

Mr. ROBERTS of Massachusetts. I will.

Mr. WITHERSPOON. I yield one minute to the gentleman from Texas [Mr. HARDY].

Mr. HARDY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on the ship-purchase bill and the merchant marine.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD on the shipping bill. Is there objection? [After a pause.] The Chair hears none.

The gentleman from Wisconsin [Mr. STAFFORD] is recognized for five minutes.

Mr. STAFFORD. Attention should be directed to the fact that the question before the committee is not only the repeal of the plucking-board provision but the reinstatement of all the men who have not only been eliminated from the service by the decision of the plucking board, but also the men who have been eliminated by any other board. The attention of the committee should be directed quite closely to the phraseology of the two paragraphs succeeding the one that repeals section 9 of the personnel act. Here we have in lines 22 and 23 on page 28, the authority vested in the respective Committees on Naval Affairs of the House and the Senate, upon their ipse dixit, to reinstate every person who for cause or no cause whatever has been eliminated from the service by reason of the plucking board or any other board, and then, in the following paragraph, we find a very different provision, that pertains to an entirely different case, which vests it with the President alone to reinstate them after first determining whether they are efficient and qualified to do active duty.

The strongest advocates of the repeal of the plucking board have stated here that when this provision was first adopted the reason for it was to eliminate from the service the inefficients and incompetents, who in the Spanish-American War had demonstrated as not being fit for continuance in the service. It may be admitted, as a reading of the hearings will disclose, that at the present time we do not have that condition confronting the service any more, but I believe there should be continued in the service some means, when the condition of the service is found that there are men who will not voluntarily retire or who are not disabled by reason of service, that can force their retirement. There should be some means to compel their retirement.

A close reading of section 9 will show that the Secretary of the Navy is entirely deprived of discretion; that it is mandatory upon him to appoint a plucking board of five rear admirals when the number that will be retired for disabilities and other causes, including voluntary retirement, do not aggregate the

number that is set forth in section 8. I think it should be left discretionary with the Secretary of the Navy rather than mandatory, so that he can at some time, when the conditions confronting the service are as they were at the close of the Spanish-American War, when there were too many inefficients in the service, find some means to rid the service of that kind of men.

Mr. HOWARD. Will the gentleman yield right there?

Mr. STAFFORD. I will, gladly.

Mr. HOWARD. There is a safety valve now whereby these inefficients can be eliminated from the service when they stand their examinations for promotion to the next higher grade? Then, if they show their condition is not satisfactory, the board can retire them.

Mr. STAFFORD. There is no way to show that they are inefficient until they are ready for promotion to the next higher grade.

To continue further, how can anyone justify the power that is vested in this first paragraph that will leave it to the committees of the House and Senate to reinstate all of these men who have been eliminated not only for cause and those without cause?

Of course, it is customary when a person is making an argument to pick out those meritorious cases, as has been done in this debate, and show the injustice that has been inflicted upon these efficient officers. But who will deny that since the personnel act was placed upon the statute book in 1899 there have not been many who have been removed for good cause by this plucking board?

Gentlemen stated this morning that these officers would have to take examinations. Oh, let me point out to you the difference in the phraseology between the last proviso in the second paragraph and the last proviso in the third paragraph. As to those men who are to be permitted to be reinstated by the action of the respective committees, there is no examination required. Permit me to read it. It says:

Provided further, That the officer shall stand a satisfactory medical and professional examination for promotion, as now provided by law, in all cases where he had not before retirement passed the examination.

This second paragraph puts it in the power of the committees to reinstate all these men, even though they may not be physically equipped to perform the service, and the President will be obliged under the authority given to reinstate them, because it does not say that he "shall in his discretion," but that he is authorized to do so.

Let me read to you the phraseology of the third paragraph and see how different it is. These are the men other than those who may be recommended by the committees who may be reinstated by the President upon their taking a satisfactory examination. Follow this phraseology and see wherein it differs from that which pertains to the other cases:

Provided further, That such officer shall stand a satisfactory medical and professional examination as now prescribed by law.

It does not say they shall take that examination only in case they have never taken the examination for promotion as provided by law, as in the preceding paragraph.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. I wish the gentleman from Massachusetts would give me three minutes more.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I yield to the gentleman three minutes more.

The CHAIRMAN. The gentleman from Wisconsin is recognized for three minutes more.

Mr. STAFFORD. Mr. Chairman, the whole purpose to reinstate these men, who have been forced out of the service, though competent, can be attained by eliminating entirely the second paragraph and by striking out, in the third paragraph, the words "any other," in line 16 of page 29, so that the President can reinstate these men if upon examination they are found to be efficient officers for the service.

I hope no one wishes to reinstate men in the service who after retirement for several years have become superannuated or from some other reason are inefficient in the performance of their duties. We, as legislators, who by the second paragraph are supposed to pass upon their merits, should not be vested with log-rolling authority to reinstate these men. You have confidence in the President, and I have confidence in the President. It is a matter of administration alone. Why should you reinstate all these men who have been retired by the plucking board—reinstate them without any examination at all? That would destroy the whole discipline of the service, to reinstate men who are absolutely inefficient and incompetent to perform these responsible duties.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield there?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Illinois?

Mr. STAFFORD. Yes.

Mr. BRITTEN. Is the gentleman opposed to the reinstatement of any of the officers who have been plucked previously?

Mr. STAFFORD. I am not opposed to the reinstatement of any of the officers who have been plucked previously if they are found upon examination to be efficient.

Mr. BRITTEN. It so provides.

Mr. STAFFORD. The second paragraph does not provide for it; and the gentleman, if he had read the provision closely and had followed my discussion carefully, would know that it does not so provide. The committee is vested with the whole authority as to reinstatement.

Mr. BRITTEN. Does the committee reinstate?

Mr. STAFFORD. The committee submits those names for reinstatement, and the President, taking the language of the law, is authorized to reinstate; whereas in the third paragraph you require them to take an examination to show that they are worthy of reinstatement. But in the second paragraph, as to those men who have been passed upon by the committee, you do not require an examination.

Mr. BRITTEN. Does it not in the final analysis depend entirely upon the President?

Mr. STAFFORD. It does not. The authority under the third paragraph would leave it entirely with the President. Why not leave it with the President entirely, and not hamstring him by this restriction?

The CHAIRMAN. The time of the gentleman from Wisconsin has again expired.

Mr. WITHERSPOON. Mr. Chairman, will the gentleman from Massachusetts use some of his time?

Mr. ROBERTS of Massachusetts. Mr. Chairman, I yield five minutes to the gentleman from Iowa [Mr. GREEN].

The CHAIRMAN. The gentleman from Iowa [Mr. GREEN] is recognized for five minutes.

Mr. GREEN of Iowa. Mr. Chairman, although it is with some physical difficulty that I take the floor, the question before us has been stated so inaccurately that, if there had been nothing more, anyone reading this RECORD would come to the conclusion that the House had never understood it at all. It has been stated repeatedly that the object of this personnel act, commonly known as the act creating the plucking board, was to increase the flow of promotions. That statement is correct, so far as it goes; but, left there, it conveys an entirely erroneous impression. The object of increasing the promotions is not for the benefit of the men to be promoted, but for the benefit of the Navy, in order that men may have the proper experience for their commands whenever the call of action and the hour of battle come upon them. Nor was this act passed, as has been stated here several times, because the Navy had been filled with incompetent and inexperienced officers at the time of the Spanish War. I have read the debates upon this subject carefully. No such reason as that was given. The real reason was that it was found that under the operations of the law as it stood every lieutenant commander in the Navy was over 50 years of age, and that such an officer might continue for several years more in that grade before he would be put in command of a ship. The result would be that before he became accustomed to his duties the age of retirement would be upon him. If it had not been for this personnel act, we would have had a Navy in which those highest in command—those, for example, who might be put in command of our fleets in case of war—would be so inexperienced that disaster would inevitably follow. We had an example in the case of an English admiral a number of years ago. He was inexperienced in fleet maneuvers and caused one of his vessels to collide with another, which resulted in the sinking of the *Victoria*, a first-class battleship, by the *Camperdown*. The same could be said of the captains who would have so short an experience that they would have had no real knowledge of their duties.

Mr. HENSLEY. Will the gentleman yield there?

Mr. GREEN of Iowa. Yes.

Mr. HENSLEY. The elimination of Capt. Potts and Capt. Hill and Capt. Gibbons permitted others to follow right up after them, so they could reach the point where they could have the experience. Is not that true?

Mr. GREEN of Iowa. Yes. The gentleman had a good deal of time, and I have only five minutes.

Mr. HENSLEY. Does the gentleman believe that anybody in the service could have been promoted to those places and have taken the places of those officers who could render better service to the Government than those officers could have rendered?

Mr. GREEN of Iowa. As far as Capt. Gibbons was concerned, I am not clear. As far as the others are concerned, I am inclined to think there could have been, but that is not the point here. It is the experience of all naval authorities that command should be exercised early in order that experience may be gained thereby to render them competent to exercise that command. Mr. Chairman, Paul Jones won his celebrated victory when he was only a little past 30. Nelson won the Battle of the Nile when he was under 40. Admiral Farragut stated that he believed it was of the utmost importance that men should rise to command young, and that if they did not have that experience they would not be accustomed to taking responsibilities, and when the hour of responsibility came upon them they would shrink from it and be incapable of fulfilling their duties.

Mr. BRITTEN. Does the gentleman know at what age our officers are assuming command in the Navy to-day?

Mr. GREEN of Iowa. I think I do, but I do not care to go into that at this time. I have not time for it, with only five minutes. Now, with the exception of my friend from Michigan [Mr. KELLEY], all whom I have heard speak in favor of the repeal of this act have impugned the motives of the plucking board. No real hearings were had upon this subject, but in the few hearings that were had it was expressly stated that they did not impute to the plucking board any wrong intentions, but at most only an error of judgment. Yet if some assertions are true which have been made on this floor to-day, every one of those officers who acted on the plucking board ought to be dismissed from the Navy. It is said that they have retired men from motives of jealousy; that they have retired men because they did not belong to the easy-chair fleet, because they were not proficient in society, and I know not what else has been urged. Can gentlemen really think that five rear admirals, some selected one year and others another, until, I think, practically every one of our rear admirals has served on this board, have been guilty of such conduct as that?

But it is objected that they have not determined this matter entirely upon marks and grades, but have, on the contrary, determined it to some extent by the general estimation which was placed upon these officers by their companion officials.

Who is a better judge of a lawyer than the members of his own profession? Who is a better judge of a doctor than the members of his own profession? And if members of the board succeed in placing on men retired the judgment and estimate which generally prevailed, they did what was intended by Congress in passing the act. There are men with perfect records that served in the Army and the Navy, and it was especially so during the Civil War, who were the greatest failures when they came to exercise important commands and go into the field.

The gentleman from Massachusetts [Mr. GARDNER] spoke of the ignominious surrender of Detroit in the War of 1812. The man who was in command was an officer of the Regular Army who had served with credit in the Revolutionary War, but owing to the fact that there was no plucking board he had not been retired, as he ought to have been long before that time. It was not a case where the militia was cowardly, for they were not afraid and wanted to fight, but it was because of the incompetence of the officer who commanded at the time the fortress was surrendered. [Applause.]

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. WITHERSPOON. Mr. Chairman, I yield to the gentleman from Indiana [Mr. ADAIR].

Mr. ADAIR. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. WITHERSPOON. Mr. Chairman, I yield two minutes to the gentleman from Indiana [Mr. GRAY].

Mr. GRAY. Mr. Chairman, I am opposed to a system that retires efficient men, in the prime of life, when they want to serve and when their country needs them. Such a system is incompatible with efficiency in the naval service; such a system is incompatible with economy in the naval service; such a system is incompatible with discipline, harmony, and cooperation in the naval service.

It defeats the object for which men are appointed in the naval service. It defeats the object for which men are educated in the naval service; it defeats the object for which men are trained in the naval service; it defeats the object for which men are commissioned in the naval service and the objects for which such service is performed.

An officer may have all the requirements and qualifications for the naval service; he may have the education, he may have the training, he may have the special talent and ability, he may be willing and anxious to serve, he may be ambitious and enthusiastic to continue in the service, and yet under this arbitrary system he is not allowed to serve when his country needs him. [Applause.]

Mr. WITHERSPOON. Mr. Chairman, I yield four minutes to the gentleman from Illinois [Mr. BRITTEN].

Mr. BRITTEN. Mr. Chairman, the hearings before the Committee of the Whole House this morning developed almost a unanimous opinion regarding the elimination of the plucking board, but this evening some of the arguments on this side of the House are made in a sort of apologetic manner, saying they would like very much to vote for the paragraph because they have friends on each side, and so forth.

My good friend from Massachusetts, Mr. GILLETT, said in opposition to the paragraph that he does not like to vote for it because it will benefit individuals at the expense of the service.

Now, I do not think that our distinguished friend is a naval expert in comparison with the many rear admirals who appeared before our committee in the last two years during my short incumbency in that honorable position. They all declared without equivocation that the plucking board to-day rather decreases the efficiency of the Navy than it tends to increase it.

He also says that the plucking board as it now exists will select for retirement certain officers, and then they will use their political influence to get back into the service. Would the gentleman rather have them stoop in humility to the admirals in the service all their lives and keep from treading on their toes, keep from criticizing their plans and construction from time to time, in order to prevent being plucked; and after all, that is what it amounts to. It has developed before our committee that officers who were retired were plucked because they had trod on the toes of their superiors from time to time, I am going to call attention to one of these cases in a moment.

The gentleman from Mississippi [Mr. SISSON] wanted to know from my colleague on the committee [Mr. HENSLEY], "Who reviewed the record of this board before they were appointed?" I will say to him that the plucking board as constituted last year comprised two rear admirals who less than than a year ago were quaking in their boots as captains, lying awake nights for fear that they were to be plucked by the plucking boards of 1912 and 1913.

Mr. TRIBBLE. Mr. Chairman, will the gentleman yield for a question?

Mr. BRITTEN. For a question.

Mr. TRIBBLE. Has the gentleman ever heard any excuse for the plucking of Capt. Potts, the aide of a former President, and one of the most gallant officers of the Navy?

Mr. BRITTEN. No; I never have. Then, the gentleman from Iowa [Mr. GREEN], who also opposed the provision in a half-hearted manner, says that he desires command early in life. Officers in the Navy to-day are reaching command rank at the ages of from 40 to 42 years. That certainly is young in the service. He recalls certain notable naval victories, and recites the ages of the officers of that time as being 40 and 38 and 46, and so forth.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield?

Mr. BRITTEN. Yes; with pleasure.

Mr. GREEN of Iowa. The reason the power is exercised at that early age is on account of this provision, is it not?

Mr. BRITTEN. Yes; and you would have those very men plucked to-day at an average age of 42 years. That is what the average age of the last plucking was.

Mr. ROBERTS of Massachusetts. Captains?

Mr. BRITTEN. No; all of those plucked.

Mr. COX. Mr. Chairman, can the gentleman think of a single, solitary thing of benefit that the plucking board has brought to the Navy to-day?

Mr. BRITTEN. None whatever. The gentleman from Iowa [Mr. GREEN] also says, who is better qualified to pass on the value of a lawyer than a lawyer, who is better qualified to pass on the value of a doctor——

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. BRITTEN. May I have a couple of minutes more?

Mr. WITHERSPOON. I have not the time.

Mr. BRITTEN. I will ask the gentleman from Massachusetts to yield me two minutes.

Mr. ROBERTS of Massachusetts. I will yield the gentleman two minutes.

Mr. BRITTEN. Mr. Chairman, who is better qualified, says the gentleman from Iowa [Mr. GREEN], to pass on the value of a doctor than his doctor friends? That is very true; but where is the set of physicians and lawyers who will in a star-chamber session take away a man's practice, take away his business or his profession, a profession to which he has given the best of his life to master?

Mr. SHERLEY. Mr. Chairman, will the gentleman yield?

Mr. BRITTEN. I have only two minutes, but I will yield for a question.

Mr. SHERLEY. I wanted to know what advantage, personally, in the way of advancement can come to any member of the plucking board by plucking any officer?

Mr. BRITTEN. None whatever.

Mr. SHERLEY. Then, why make the comparison of taking away a competitor?

Mr. BRITTEN. I did not make the comparison. The comparison was made by the gentleman from Iowa [Mr. GREEN]. In one instance, in the action of the plucking board of 1914, Capt. Gibbons was removed from service because he had not sufficient sea service, and letters brought before our committee indicated that he had requested of the Secretary to give him sea service, but the Secretary desired to hold him at the Naval Academy, where he typified the ideal example of manhood to the young men there about to become officers. In the next instance that same plucking board plucked a captain who has had more sea service than the majority of the admirals comprising the board. They plucked this officer because he had an untidy ship six or seven years ago, but who has since survived six or seven different sets of annual pluckings.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

Mr. WITHERSPOON. Mr. Chairman, I yield two minutes to the gentleman from Illinois [Mr. FOWLER].

Mr. FOWLER. Mr. Chairman, everybody ought to be in favor of the efficiency of our Navy. It is reported that the fame of the naval plucking board of America spread so far and so wide the world over that it reached the ears of King Ogula, of the island of Onapolula. He, believing in the virtue of the American system of retiring men from the Navy, appointed a plucking board for his kingdom, comprised of Owala, his secretary of state; Suhama, his secretary of war; and Bolawa, his secretary of the navy. These three gentlemen met in the public hall at the capital for the purpose of discovering how they might improve the efficiency of the navy of that little kingdom. The evidence revealed that one Bomloputa, who was an admiral of one of the three vessels belonging to the island kingdom, had been guilty of a conspiracy to turn his vessel over to a warring neighboring island, which was the enemy of Ogula. So they plucked him. Another gentleman, a rear admiral, Ashawalla, had been discovered in a murder plot for the purpose of destroying the king's life. They removed him. Another gentleman, Capt. Monogula, the father of the king, was found to be 100 years old, and they plucked him. Now, unless these gentlemen between can show that the American naval plucking board has been guilty of such gross conduct in plucking our naval officers as was found in this island kingdom, then there is no need for this new legislation. [Applause.]

Mr. WITHERSPOON. Mr. Chairman, I will ask the gentleman from Massachusetts to use some of his time.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I yield one minute to the gentleman from Alabama [Mr. HOBSON].

Mr. HOBSON. Mr. Chairman, I desire to use that moment to return the attention of the committee to the remarks of the gentleman from Iowa [Mr. GREEN] in his reference to the Battle of Detroit. Gen. Joe Wheeler was the grandson of the officer in command at Detroit. Gen. Wheeler investigated the case, examining the records in the War Department, and wrote a book on the subject, showing that Gen. Hull was a gallant and patriotic officer, and that the fault lay somewhere else, and, as I recall it—I have not read it myself—that Dearborn was the author of a conspiracy that was responsible. I wish to cite this for the benefit of those who may desire for the sake of history to look up the case further.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROBERTS of Massachusetts. Mr. Chairman, there seems to be an impression among certain members of the Committee on Naval Affairs, and possibly that impression has spread in the House, that I am opposed to all of the bills which have been covered under what has been termed the second paragraph of the proposition we are now considering. I refer to that part beginning in line 17, on page 28, to line 14, on page 29. A number of officers who are affected or would be affected by this legislation are personally known to me. I have been acquainted with them for a good many years, most pleasantly so. I have every sympathy for them and would like to see something done for them, but I do not believe in trying to do it this way. There is one bill at least that will be affected by this legislation that I have fought for in committee for years, but at the same time I do not believe this is the place to pass on it nor this the method. We have been treated to-day to a very delicious explanation of Democratic love for the common, everyday fellow. The gentleman from Ohio [Mr. BATHRICK] told you about the efforts that have been made for 50 years to enable the enlisted man to rise, and that he gets some legislation in this bill this year, but you will notice that the enlisted man did not get a rule to make it in order on the bill. The commissioned officers from the Democratic Committee on Rules got their rule making in order some of the most vicious legislation I have ever seen in my experience in this body. The chief object in the minds of most of the members of this committee seems to be to abolish the plucking board. I have no brief to defend the plucking board nor the provision of law creating an annual plucking board, but I call the attention of the committee to this.

If you repeal section 9, abolish the plucking board, you leave nothing in its place, and men can go on up to the highest grade with only a possibility of a court-martial to stop them. And you do what is infinitely worse. You reduce by 15 retirements a year the number of men who can go up in the lower grades. Now, the plucking board was not created, as was very well stated by the gentleman from Iowa, to benefit any individual officers in the service, and the gentleman from Missouri asked the question a moment ago, "Do you suppose you can get as good an officer in the grade of captain as some one who has been retired by the plucking board?" I do not know whether we can or not. We may get a better one, and we may not. When we retire a captain that allows an ensign to go up to the grade of junior lieutenant, the junior lieutenant to go up to that of senior lieutenant, and he to the grade of lieutenant commander, and the lieutenant commander to the grade of commander, and the commander to the grade of captain, and you give all these men an opportunity to become familiar with the duties of the grades next above them; but if you make no retirements these men must stay back in those grades. Why, all sorts of purposes have been attributed to this section 9 in reference to this plucking board. Some say that it was to get rid of the incompetent; some say it was to provide a flow of promotions to benefit the officers. It was provided to prevent as far as might be by legislation a hump in the Navy. Now, that hump exists in the Navy to-day, and when you stop the retirements that are provided for annually by the plucking board, you are increasing the evils of that hump by just the number of men you prevent being promoted. It is getting so in the Navy to-day that young men of the rank of junior lieutenant see nothing ahead of them in the service, and they are retiring, going out of the service into private life.

Why are they doing it? Because they see when they get to the rank of senior lieutenant or lieutenant commander they will be gray-headed men before they can get to commanding rank, and it takes the courage all out of a man to think of living from the time he is 30 until he is in the "forties" on the meager salary of junior lieutenant, especially if he has a wife and family dependent on him. And when you create this stagnation in the flow of promotion, which is technically called the "hump," you are discouraging then the entrance of men into the naval service, because no man with any ambition in him wants to get into a position of inferiority, where he must spend the best years of his life at a miserable pittance. So I say this committee should be very careful indeed about repealing this plucking-board provision unless it is ready to substitute something in its place.

I do not say the plucking board is the best means for providing for this flow of promotions, but it is all we have. Now, why throw it away? We have a personnel proposition before the Naval Committee, sent in recently by the Secretary of the Navy.

Mr. PADGETT. Will the gentleman yield for a moment?

Mr. ROBERTS of Massachusetts. I will.

Mr. PADGETT. The gentleman is aware that under the provisions of this measure if it becomes a law every man who is restored becomes an extra number and goes up parallel and with a corresponding man in the regular line, and will increase the number of captains and rear admirals in a very remarkable degree? The rear admirals are fixed now at 18. If these men who become extra numbers go out of the line, not subject to being retired, and pass up, all of them become rear admirals and will be retired as such if they live to be 62 years of age.

Mr. ROBERTS of Massachusetts. I thank the chairman of the committee for calling that to my attention. I had intended

to refer to it. The same personnel act of 1899 that carried section 9 fixed the number of commissioned officers in the Navy at 18 rear admirals, 70 captains, 112 commanders, 170 lieutenant commanders, 300 lieutenants, and not more than a total of 350 lieutenants of junior grade and ensigns. If the gentlemen who are contemplated in this proposed legislation are restored to the service, they do not take the place they formerly occupied; they have lost their number. Other officers below them have moved up, and it would be a gross injustice to those officers to push them back and allow these men to be put back into the original place. Hence it is provided that they shall be carried as extra numbers. Now, the law limits the number of captains, but when you put in extra numbers you are adding to the number of captains, or admirals, or whatever the grade may be.

Mr. SHERLEY. Will the gentleman yield?

Mr. ROBERTS of Massachusetts. I will.

Mr. SHERLEY. Is it not also true that every one of these men reached the point that he reached when he was retired by virtue of the very plucking board that made way for him to come up prior to his own dismissal?

Mr. ROBERTS of Massachusetts. Why, I would not say that as to every one of them, but I will say this, that unquestionably all of these officers have benefited to some extent in their promotion from one grade to another by the fact that a plucking board has been working since 1899, creating a certain number of vacancies each year and creating and providing for a certain flow of promotions each year, and it is possible that some of the officers who have been plucked within recent years might never have made the high grade they did but for the operation of the plucking board in the years preceding the action taken in their cases.

Now, Mr. Chairman, I want to call the attention of this committee to what seems to me is the most thoroughly vicious—and I might use an even stronger word and say asinine—piece of legislation proposed here. I have heard all sorts of queer things suggested in my time of service, but I have lived to this year of our Lord to find Members of the House of Representatives seriously proposing to confer power on the President of the United States through the simple action of a committee of the House or the Senate. Think of it! Suppose we adopt that proposition? Suppose I introduce a bill that affects the tariff of the country, and suppose the Committee on Ways and Means reports favorably on my bill, and thereupon the President could change the tariff of this country? No more foolish than the proposition before us. I tried to find out how many men would be affected by this provision allowing the President to restore to the Navy men who had been plucked or retired by any other board of the Navy or Marine Corps and whose case had been passed on by a committee of the Sixty-third Congress. Who can tell me to-day how many such cases have been passed on by the Senate Committee on Naval Affairs? Who can say now how many cases will be affected by the action of the House Committee on Naval Affairs? The author of the bill, which we find word for word almost now in the naval bill, made in order by a rule, was not able to tell me in committee the number who would be affected by this legislation.

The nearest approach I can get to it is a resolution introduced by the gentleman from Mississippi last October, in which he provided that the House should resolve itself into Committee of the Whole House "for the consideration, in the order named, of the following bills," and he mentioned 12 bills, 2 of them being Senate bills—bills where the Senate committee had acted and the Senate had ratified that action and sent the bills over to the House. But there is nothing to tell us how many of those cases had been reported upon by the committee that the Senate itself had not acted on, and I find in this list two cases where officers failed on their examination for promotion.

Now, those officers were retired from the service through the action of a board. The examining board's action caused the retirement of those men. They retired because they failed on their examination for promotion to the next higher grade. And yet if you adopt this provision in the bill, and if you put it in the power of the President, without this committee or this House hearing a single word on those cases, you will make it possible to restore them as extra numbers and allow them to go on up to the grade of rear admiral, possibly vastly increasing the number of rear admirals over the number contemplated by law.

I find that several of the cases, at least two of them, affect Marine Corps officers. In one of those cases the officer was retired by a medical board. He developed some functional trouble that the medical board in the Marine Corps at that time thought incapacitated him from duty, and he was retired by the operation of the board for physical disability. And yet under the provisions of this action, having been retired by the action of a board in the Navy Department or the Marine Corps, the President can restore him. Where? Read the bill, and you will find that he is restored to the Navy—a marine officer under the provisions of this loosely drawn measure is restored to the line of the Navy as an extra number. That is one of the foolish things that this committee and this House is asked to sanction in this bill.

While there are some bills for restoration that I have not favored, yet the subcommittee of which I am a member has passed upon them by a majority vote and the Committee on Naval Affairs has ordered them reported by a majority vote, and I would like to see those cases brought on the floor on the merits of each individual case and have them thrashed out here, so that the whole House may know the merits of each case, and I will be perfectly content with the action of the House. But I shall never be content to have this House authorize one of its committees, by its mere report on the matter, to confer the power of reinstatement on the President of the United States.

Mr. TRIBBLE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Massachusetts yield to the gentleman from Georgia?

Mr. ROBERTS of Massachusetts. I do.

Mr. TRIBBLE. As to that part of the bill that the gentleman is speaking about, will the gentleman vote to repeal the plucking board?

Mr. ROBERTS of Massachusetts. No; I will not. I will tell you what I will do, if the gentleman will give me his attention.

Mr. TRIBBLE. I am listening to the gentleman.

Mr. ROBERTS of Massachusetts. If the gentleman or anybody else will present a reasonable substitute for it that will be better than the plucking board, then I will vote to repeal the plucking board and adopt that proposition.

Mr. TRIBBLE. Can the gentleman suggest a worse system than the present one?

Mr. ROBERTS of Massachusetts. It is much worse than the present system to provide no flow of promotion; much worse; not for the particular officers that might be selected out, but for the whole personnel below them. There is where the injury is done, not to the men themselves, but to the service, which is paramount to the interests of any individual in it.

Mr. TRIBBLE. The gentleman has asked me a question. He ought to know that I, as one member of the committee, have been favoring the proposition that if these men are retired by a plucking-board system, they shall be put on the active list and given work to do. While they are taken out of the flow of promotion, they are not taken out of the service. Will the gentleman vote for a bill of that kind?

Mr. ROBERTS of Massachusetts. Oh, the gentleman knows that the Secretary can now take advantage of the service of these men on the retired list, no matter how they got there.

Mr. TRIBBLE. I will ask the gentleman if the Secretary has ever taken advantage of that law you claim exists and used a single one of them after they got out?

Mr. ROBERTS of Massachusetts. Oh, yes. During the administration of Secretary Meyer there were numbers and numbers of officers on the retired list who were doing active duty and getting pay; and, if I am not mistaken, it was last year only that we limited the amount of compensation that those officers could get, no matter what their rank might be.

It was in 1912 we passed this proviso:

Provided further, That any such officer whose retired pay exceeds the highest pay and allowances of the grade of lieutenant (senior grade) shall, while so employed in time of peace, receive his retired pay only in lieu of all other pay and allowances.

In other words, we made it impossible to utilize the services of the men who were of higher grade on the retired list, because they would not take the lower pay when they could stay out and receive the higher pay.

Mr. TRIBBLE. In answer to the gentleman's question I recall that there have been a number of such bills before the committee. The committee has reported several favorably, but the President of the United States has never allowed one of these men to be restored after the plucking board has plucked him.

Mr. ROBERTS of Massachusetts. The gentleman is talking on another proposition. I have not said that there was any proposition to restore plucked men to the active list. What I have said is this, that under the personnel act of 1899 the services of any man on the retired list could be utilized at the full pay and allowances of the active list, until we made that amendment in 1912. Now, there were many men whose services were utilized under those conditions.

Mr. TRIBBLE. That is true.

Mr. ROBERTS of Massachusetts. But for some reason the policy of the department changed, and they gradually weeded

them out, so that I think to-day we have very few if any retired officers doing active duty.

Mr. TRIBBLE. Does not the gentleman know that these officers, if they are getting their retired salaries, unless they are forced to go back into the service or unless they get more for going, will not voluntarily go back into the service and work?

Mr. ROBERTS of Massachusetts. I know if a man is on the retired list at three-fourths pay, and he is capable of doing certain duty of his grade, he would be very glad to be on full pay, adding 25 per cent to his yearly stipend.

Mr. TRIBBLE. That is what I am in favor of.

Mr. ROBERTS of Massachusetts. He would be glad to get it, and the Secretary can make use of that very provision of law to-day and utilize the services of these men on the retired list if he wishes to do so.

Mr. TRIBBLE. But the gentleman knows that the Secretary never wishes to do so.

Mr. ROBERTS of Massachusetts. But some Secretaries have wished to do so and have done so. Why the present Secretary does not I do not know. And while speaking about what some Secretaries do I will say that if it had not been for the action of the present Secretary the case of Admiral Potts would not be here. If Admiral Potts had received decent treatment at the hands of the present administration of the Navy he would not be before Congress asking for reinstatement.

Mr. TRIBBLE. If the gentleman had joined me two years ago to abolish the plucking board Admiral Potts would be in the service right now, because they could not have plucked him.

Mr. ROBERTS of Massachusetts. That is another question. He would not have been in a position to be plucked if the Secretary of the Navy had treated him fairly.

Mr. McLAUGHLIN. Mr. Chairman, I have not heard all that has been said, but I gather from what I have heard that the gentleman has the idea that if this provision is passed the President will have authority to return a man to the service and put him in line for advancement and promotion, when perhaps he has been disqualified, and has been plucked for that reason.

Mr. ROBERTS of Massachusetts. A man who has been court-martialed can be returned to the service by act of the President.

Mr. McLAUGHLIN. What is the meaning of the two provisos on page 29?—

And provided further, That such officer shall stand a satisfactory medical and professional examination for promotion, as now provided by law, in all cases where he had not before retirement passed such examination.

And the next one—

Provided further, That such officer shall stand a satisfactory medical and professional examination as now prescribed by law.

Mr. ROBERTS of Massachusetts. That goes with all such provisions. An officer has to go through that satisfactory professional and medical examination for promotion from one grade to another.

Mr. McLAUGHLIN. Would not that provision apply?

Mr. ROBERTS of Massachusetts. Certainly it would apply.

Mr. McLAUGHLIN. And preclude the President from picking up one of these men and restoring him to service and advancing him?

Mr. ROBERTS of Massachusetts. He could not restore him to the service arbitrarily; he has to go before the Senate. But it gives the President a power that he has not got, and it is given to him through the mere action of a committee of this House and not through the action of the House. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has spoken 26 minutes, and has 10 minutes remaining.

Mr. McLAUGHLIN. Would not the provision make it absolutely necessary that the President should conduct an examination or direct one to be conducted?

Mr. ROBERTS of Massachusetts. That would have to be done.

Mr. McLAUGHLIN. And would not that do away with the trouble that the gentleman suggests, that the President would take unworthy men?

Mr. ROBERTS of Massachusetts. Oh, the gentleman may have heard it said, faintly whispered, that the President of the United States has some influence with another body. I have heard of it.

Mr. McLAUGHLIN. He has too much sometimes.

Mr. ROBERTS of Massachusetts. We have known of a case where the President of the United States selected a staff officer and put him at the head of the line officers of the Army. Nobody thought a President would ever do that, but it was done.

Mr. McLAUGHLIN. Would the gentleman from Massachusetts rather trust a plucking board working in secret than to trust the President of the United States and Congress working openly?

Mr. ROBERTS of Massachusetts. Absolutely. I know scores of officers who have sat and will perhaps, if this is not repealed, sit on future plucking boards. They are honorable men, but they are charged with a most disagreeable duty. The gentleman must not forget that feature of it. Admiral Evans has sat on this board, and there is not a prominent admiral now living or dead for the last 14 or 15 years who has not been detailed to this duty, and it is a most disagreeable one as you can imagine.

Suppose a committee of this House was formed, made up of the chairmen of the committees, for instance, to select a certain number of Members from this House for retirement. Do you suppose that would be a duty that anyone would seek? Do not you suppose that it would be the most disagreeable duty that could come to any man? And yet that is the position of the rear admirals placed on the plucking board. They do the best they can. Until we can get a better system, I would rather put up with the ills of a plucking board than to fly to those of an ever-increasing hump in the Navy which so troubles the commissioned officers and departmental heads in the Navy Department.

I want to say one word more. There is not one of the bills contemplated in this legislation that has not been disapproved of by the Secretary of the Navy with one possible exception, and that was not a plucking-board case. When we are legislating I believe in doing something that will have a practical result, that is going to accomplish something. Can you imagine a President of the United States recommending for restoration to the Navy an officer who has been separated from the Navy by due process of law when the Secretary of the Navy is opposed to that restoration?

Suppose that possible, suppose that foolish provision giving committees of the House power to clothe the President with authority that he does not now possess, what is going to come from it, practically? Nothing. But we go on record as authorizing our committees—and it is well known that they are largely influenced by subcommittees—to clothe the President of the United States with power without our passing on the merits of a single one of the cases. Mr. Chairman, I reserve the balance of my time.

Mr. WITHERSPOON. Mr. Chairman, I will say to the gentleman from Massachusetts that there will be only one other speech on this side, and I would like him to use the balance of his time.

Mr. ROBERTS of Massachusetts. The gentleman will close in one more speech?

Mr. WITHERSPOON. Yes.

Mr. ROBERTS of Massachusetts. I yield the balance of my time, Mr. Chairman, to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Chairman, I do not know that I will vote for the paragraph which repeals the plucking-board provision of the personnel act. I have heard so much said against it—although I did not have the pleasure of hearing the gentleman from Massachusetts—that I think a word ought to be said in defense of the proposition as originally agreed upon.

The personnel-act proposition was pending in Congress in various ways when I entered Congress. There was a very hot contest in regard to it, both in Congress and in the Navy, but the reasons given for the plucking-board provision then were not those which I have heard assigned to-day—that it was for meeting the temporary condition in the Navy. Of course the fact is that when a large number of men in the Navy are commissioned officers in the lower ranks, if they live, there soon becomes a great congestion in the upper ranks of the Navy.

And many of the naval officers desired some method of eliminating a portion of the number so that promotions might be made more rapidly. I think that at that time the naval officers would have been quite willing to have had those who were to be eliminated selected by lots. It is a very easy matter, where there are 100 men and it is proposed to select one of them to be sacrificed, to get all of the hundred to agree to the proposition, for each one will believe that he will be lucky enough to escape. That is the fortunate condition of mind of most men who go into the Army or the Navy at all, or who go into a battle. Each hopes to escape. But when one of them is plucked and put out, then the situation seems quite different to him. He believes then that he has been imposed upon, and especially so where nominally the dismissal is on account of lack of efficiency. I have no doubt that the officers who have been retired by the plucking board are probably on the whole

quite as efficient as those who have remained in the service; and if some of those who had remained in the service had been plucked, they would have had the same objection to the plucking board that those have who have now been retired. Of course most of them are now in favor, I take it, of a proposition which proposes to restore men and carry them as extra numbers, which does not interfere at all with promotions in the future, so far as the past action of the plucking board is concerned. I never have been in favor, and am not now, of dismissing from the Navy efficient men in order to make promotion a little easier for those who desire it and for those who remain in the Navy. Take this House for an illustration.

If all of the Members who entered this House in this Congress should remain in the House for a period of 5 or 10 years, much less a lifetime, there would soon be some method found of revolutionizing the appointment of committees in the House so that the older ones who had attained places at the top of committees would not be permitted to remain there. Under the immutable laws of elections some Members are retired from the House, and yet I know Members who have been in this House nearly as long at least as I have been, and some of them longer, who are not yet chairmen of committees, although many of the men who came in after them, owing to the retirement of Members on their particular committees, have become chairmen of committees. It is natural for men to want these promotions, it is natural for them to complain if they do not receive that which they want, and it is utterly impossible in the Navy by simply promoting the ones senior in number to the upper rank to satisfy the Navy and keep it in the order in which it ought to be kept. I take it, of course, that the plucking-board provision will temporarily go out of the bill.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. WITHERSPOON. Mr. Chairman, these paragraphs in the bill propose three things: The first is the repeal of section 9 of the personnel act of 1899. That act provides that each year the Secretary of the Navy may appoint five rear admirals to constitute what is called the plucking board, and in one contingency that plucking board had the power to retire not more than 15 officers from the grades of captain, commander, lieutenant commander, and lieutenant. It can only do that in one contingency. Section 8 of that act, preceding the one we propose to repeal, provides a method for voluntary retirement by which as many as 40 officers can resign in one year, and the President, I believe, is authorized to accept their resignations. In case there should be 40 retirements under section 8, then this plucking board could not do anything at all. The idea is that if there are not 40 retirements in other ways, then the plucking board is authorized to pluck as many officers as is necessary when added to the voluntary and other retirements to make up 40.

Mr. PADGETT. Not exceeding 15.

Mr. WITHERSPOON. Not exceeding 15. There is, therefore, in section 8 a provision for the flow of promotions just to the same number as this plucking board law would permit; and if there were 40 officers in the Navy who had tired of the service—who did not like it—they could get out under section 8, and there would be just as much flow of promotions in that case as if the President had refused to accept their resignations, to the number of 15. Then this plucking board would be authorized to kick out 15 officers who did not want to go out of the service.

I called attention earlier in the day to the woeful lack of officers in the American Navy. One of the naval experts told us that we were short 203 officers, and that is the lowest estimate that has ever been made. Admiral Knight said that we were short four or five hundred. Admiral Badger said that we are short 933, and some other officers said we were short 700, and one of them said 3,000, and that it would take the Naval Academy 20 years at the present rate to furnish enough officers to use the ships we already have if we did not build any more.

Mr. MANN. Would it inconvenience the gentleman if I asked him a question?

Mr. WITHERSPOON. Not at all; I yield to the gentleman.

Mr. MANN. The gentleman refers to the number of officers short in the Navy. Do these people who speak of this mean short of the number they ought to have, or short of the number for whom we appropriate salaries?

Mr. WITHERSPOON. No; they mean, as I understand it, we lack that many officers of being able to use 12 of our battleships.

Mr. MANN. Short of the number which they think we ought to have, not short of the number for whom we make appropriations?

Mr. WITHERSPOON. No; we make appropriations for everyone we have.

Mr. MANN. Then I think we stop right there—do we not?

Mr. WITHERSPOON. I do not know whether we have ever stopped or not when it comes to appropriations. Now, Admiral Badger was asked this question. He had stated that there are 12 of our battleships, more than one-third of them, which were given no target practice, no battleship exercise, no maneuvers, no training of any kind, and that was because we do not have officers enough to do it, and it was further stated that if this House authorizes two more battleships the only way we can get the officers to man those battleships will be to put two more of our battleships in reserve, in ordinary, or out of commission, and take the officers from them and use them on the new battleships we are going to build.

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. WITHERSPOON. I will yield.

Mr. PAGE of North Carolina. In line with the question just propounded by the gentleman from Illinois, if the plucking board be abolished and these officers be not retired from the Navy, there is not any question in the mind of the gentleman from Mississippi that an appropriation would be made to pay their salaries, is there?

Mr. WITHERSPOON. Pay the salaries of those officers whom they want to retire?

Mr. PAGE of North Carolina. No; those officers if they were not taken out at all, if the plucking board is abolished, and the additional number of officers to those now in the Navy were retained, there would be no question of appropriating to pay their salaries?

Mr. WITHERSPOON. There is no question now, because those officers we want to restore will receive their salaries. They are on the retired list and they are receiving pay out of the Treasury without rendering any service, and they do not want to do that. They want to earn the money they are getting from the people, and I say they ought to be allowed to do it.

Now, that is another woeful condition about the lack of officers. We are told by the highest experts in the Navy that if we were to have a war it would take five years for us to put the 12 battleships which we have abandoned into a position where they could be used, and that grows out of the fact that we have not sufficient officers to train them. I will tell you, according to what I have learned from these naval experts, that if we were to put a lot of green men and green officers on a battleship without any target practice and maneuvers or training of any kind and send it out to fight it would just be like putting a blind man up to fight a duel with an expert pistol shot. It would be barbarous. These 12 battleships now might just as well be at the bottom of the ocean, so far as any good they could do in war, on account of the lack of officers. That is the condition of our Navy, according to the testimony of the only men who know about it, the naval officers; and yet we are in two ways making that condition worse every day. Every time you authorize a new battleship you make it worse, because you require more officers; and every time the plucking board kicks 15 of them out you make it that much worse. So much for the reasons why I think section 9 should be repealed.

Now, the next paragraph provides that the President shall be authorized, with the advice and consent of the Senate, to restore such officers as have been removed by this plucking board wherever the cases of their removal have been examined into and testimony taken and printed by a committee of this House or the Senate and where a committee of either House has reported favorably a bill to restore them. Now, it has been objected here that that means that you would restore the officers upon the action of a committee and not on the action of the House. That is not true. The expression in the second paragraph about the officers having had their cases examined and reported on by a committee is merely descriptive of the officers to be restored, and this House is not asked to vote to restore them because the committee has so recommended, but we ask you to restore them because the testimony which has been printed which we have before you shows that they are competent, efficient, and some of them the most brilliant officers in the Navy. You have got in the records here the evidence to show that, and we ask you to vote to restore them, not because the committee has recommended them, but because the facts justify and require it.

And I want to call your attention to those facts. First, I want to call your attention to the facts that apply to all of these officers, and there are seven of them. The testimony shows that they are highly educated, well-trained, competent, efficient, talented officers, and that there is no dispute about that proposition. The members of the plucking board whom we examined testified that these officers could not be dismissed from the service on account of objections to them, on account

of their inefficiency, on account of their incompetency. One of them said that not one of these officers deserved the stigma that had been placed upon him, but they were simply retired because the law forced the board to do it; that you had a law that made it necessary for them to do it, and not because they ought to be retired. That is the testimony of the members of the plucking board themselves.

Now, I want to submit to you the proposition that they were illegally dismissed and they were denied their legal rights. This section 9 provides that this board shall have, when they come to consider these officers, the records of all the officers they are considering, and the records of these officers are the only evidence that the law submits to that board. And manifestly it meant that the board should take these records and compare them and determine from the records which were the least efficient. That is what the law requires. The statute further requires that the members of this plucking board shall take an oath that they will not be governed by any bias or partiality and that they will consider nothing except the fitness of the officer and the efficiency of the Navy.

If the board selected and retired the 15 most efficient officers in the Navy, it would thereby decrease the efficiency in violation of the statute. So construing it altogether, I submit to this committee that the meaning of the law is that they should take the records of these officers and compare them, and determine, as they could from the records, which are the least efficient and then retire the 15 least efficient. And all the testimony in this case shows that they did not do that. This is a fact: That in the case of every one of these officers the board had only a small part of the records before them and never did pretend to examine the records or to make the comparison which the statute requires. Even in the case of the officers who have been retired the testimony shows that in several of the cases just a part of the record of those officers was examined by the board and not the entire record.

Now, we have examined the records of these other officers and had the members of the plucking board to testify with reference to them, and we have also had other witnesses, and that testimony proved this—that these officers had records much higher than those that were left in the service. And in many cases it was done in a most lamentable and inexcusable way. Here is an officer who was retired, and the testimony shows that there was not a thing against his record. It was not only high but absolutely flawless. Here is another man that was left in the service, whose record is just spotted with drunkenness, and to such an extent that his superiors reported—and it is in the hearings—that he was incompetent and unfit to discharge his duties. That is the kind of a man they would leave in the service and take out the most gifted, talented, brilliant officer, against whom there was not a flaw. Not only that, but here are a lot of officers who have been court-martialed and convicted of running ships aground, and in one case a ship was entirely lost by the negligence of an officer. Yet he is left in there, and men against whom there was nothing, from the beginning to the end of their records, are plucked. That is the kind of testimony that has convinced us that these officers ought to be restored.

Mr. FITZGERALD. What reason is assigned for selecting these men whose records are flawless and neglecting those with blemished records?

Mr. WITHERSPOON. In the course of my remarks right now the gentleman from New York will have a complete answer to his question.

Now, I want to call your attention to some facts with reference to each one of these officers individually. Take the first case—the Perkins case: Perkins served some 30 years in the Marine Corps, and most of his life was spent in the Tropics, and it finally had the same effect on him as it does on other officers who stay there a long time. It temporarily ruined his health. For about a year and a half he was unable to discharge his duties; but finally he recovered, and the medical examiner certified that he was able to discharge his duties, and he was sent back—to a recruiting station, I believe. Now, it was not long after that before the time came for him to be promoted. He was then a lieutenant colonel, and it was time for him to stand an examination for promotion to the next higher rank, and he was ordered, as all these officers are in such cases, before a board to stand his examination. Up to this time there had never been one unfavorable report against Perkins. But just about the time he was ordered before this board he received a letter offering him, I believe, $1,000 for his number; that is, to resign, get out of the way, so that somebody else could be promoted in his place.

He declined to do it. At the same time the major general commandant notified him that if he stood that examination and was promoted he intended to send him back to the Tropics, which had ruined his health before—trying to deter him and bulldoze him and prevent him from standing the examination.

At that time the commandant, his superior, made an unfavorable report on him, which was the first that had ever been made. He did not give the officer notice of it. The regulations require that whenever an unfavorable report is made upon an officer notice of that fact must be given to the officer. This officer went to Boston to appear before this board, and when he got there he was confronted with this unfavorable report, and the board asked him why he had not replied to it, as the regulations require. He said, "I never heard of it before. I was not notified of it," although it had been made six months before. The board threw it out, because he had not been notified of it. They gave him a very rigid examination, and he stood it and passed and was congratulated by every member of the board on his splendid examination.

That is the way Perkins got to be a colonel. Soon after that he was sent out to California in the discharge of his duties out there, and very soon afterwards he got a telegram to come to Washington. He came here and appeared at the proper office, and they told him that he must appear before a board that was already organized. He went in before that board, and they tried him for being insane. He never had any notice of the charge until he got here. He had a very poor chance to defend himself, and the board found that he was crazy. He appealed to the Secretary of the Navy from that decision, and the next day he and his lawyer went before the Secretary of the Navy, and there he was confronted by some telegrams from some friends in California and by a telegram from his own wife, urging the Secretary of the Navy to put him out of the Navy.

Well, of course, he did not know why his own wife had turned against him, and so he just had to resign, and did resign. When they found out the facts about it, it developed that somebody had been working on those parties out in California and deceiving them and making them believe that unless he resigned he would be disgraced as a lunatic; and that is the reason why his wife was induced to send him that telegram.

Mr. PADGETT. You used the word "resign." You mean voluntarily retire.

Mr. WITHERSPOON. That is what I mean by resigning. You can not resign involuntarily.

Mr. PADGETT. That is retiring.

Mr. WITHERSPOON. The fact about this is that they practiced a fraud on Perkins to get him out. That is the point of the matter. After that the action of the plucking board that found he was crazy was reviewed by the Judge Advocate and disapproved and reversed, and it was afterwards submitted to two other Judge Advocates, and they also disapproved it. Then your committee had the members of that plucking board that found Perkins to be crazy go before it, and examined them; and I tell you, gentlemen, I never examined a man on the subject of insanity in my life who knew as little about it as the members of that board.

Now, so much for Perkins. Take the next case, that of Rust. What I say as to these officers applies to Rust. But there are two or three things in this case that I want to call to your especial attention. Capt. Rust is the author of two books. One of them is a system of tables for the identification of stars, so that the mariner can on a cloudy night, if he sees a star in any part of the heavens, determine what star that is. The other book is also a system of tables by which they can take any star that they can identify anywhere and determine the latitude that the boat is in. Those were considered so valuable to the Navy that both of those books were printed and every ship in the Navy is supplied with both of them. That is one of the things that Rust did.

But, in my opinion, the greatest thing he did was to invent a range finder. A range finder is an instrument by which you determine the distance to a battleship or any other object that you want to shoot at. The whole question and problem of accurate shooting in naval warfare depends on the ascertainment of the distance to the ship. They never shoot to the right or the left. They always shoot over or under the opposing ship, and the reason they do that is because they do not know the exact distance to it.

Now, I have here a map by which I can explain the value of this. The difference between the Rust range finder and the one now in use is that the one now in use has a very small base, of about 20 feet. He has invented one with a base of almost the length of the ship. This diagram here would represent the present range finder. That little narrow strip would be the base of it. His range finder would have this broad base. Now, the difference between them is just this: The way they

determine the distance to a ship with the range finder is that they find this angle and that angle, and with those two angles and a known base they determine the distance to the ship. In getting those angles it is very difficult not to make some mistakes. And any mistake that is made in getting these angles will result in a mistake in finding the distance to the ship. Here is the advantage of the Rust range finder: If you find these two angles correctly, then the point T where those two lines cross is the correct distance to the ship. In the same way if you find these two angles accurately with the small range finder with the narrow base, the point where the lines cross is the distance to the ship. But now suppose you make an error, we will say, of one degree. That is a large error, and they would not make it, but I use it for illustration. If, in getting these two angles here, you make a mistake of a degree, the result of that mistake is that you lack this much in getting the accurate distance of the ship; but if you make the same mistake on the small range finder, a difference of one degree in these angles here would cause these two lines to cross right here, and you would have a very much greater error in the distance. See what an immense difference it makes. In other words, to make it plain, any error in getting the angle would be as much less in the Rust range finder than in the other one as this line here is longer than that line. Now, in my judgment, if the Rust range finder becomes a success and enables our officers to ascertain the distance to the ship of the enemy 5 or 10 minutes before they can ascertain the distance to our ships, it will have the same effect on the battle as it would to double the power of our Navy. [Applause.]

The CHAIRMAN. The time of the gentleman has expired. All time has expired, and the Clerk will read the bill.

The Clerk read as follows:

Section 9 of the naval personnel act of March 3, 1899, entitled, "An act to reorganize and increase the efficiency of the personnel of the Navy and Marine Corps of the United States," be, and the same is hereby, repealed.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I offer an amendment to strike out the paragraph.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 28, strike out the paragraph included between lines 12 and 16.

The amendment was rejected.

The Clerk read as follows:

That the President be, and he is hereby, authorized, by and with the advice and consent of the Senate, to transfer to the active list of the Navy all officers who may have been transferred from the active to the retired list of the Navy under the provisions of section 9 of said personnel act and from the active to the retired list of the Navy or the Marine Corps by the action of any board: *Provided*, That the action in these cases has been examined by the naval committee of the Sixty-third Congress of the House or of the Senate and either or both of said committees have reported or ordered to be reported favorably to the House or the Senate a bill to transfer such officer to the active list of the service: *Provided further*, That such officer shall be transferred to the place on the active list which he would have held if he had not been retired, or to which he had passed a satisfactory examination for promotion, and shall be carried as an additional number in the grade to which he may be transferred or at any time thereafter promoted: *And provided further*, That such officer shall stand a satisfactory medical and professional examination for promotion, as now provided by law, in all cases where he had not before retirement passed such examination.

Mr. HOWARD. Mr. Chairman, I offer an amendment.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I am a member of the committee, and I desire to offer an amendment.

The CHAIRMAN. The Chair will recognize the gentleman from Massachusetts.

Mr. ROBERTS of Massachusetts. I move to strike out the paragraph just read, beginning with line 17, on page 28, and ending with line 13, on page 29.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

Mr. HOWARD. Mr. Chairman, I think my amendment is preferential.

The CHAIRMAN. The Clerk will first report the amendment of the gentleman from Massachusetts, and then the Chair will recognize the gentleman from Georgia.

The Clerk read as follows:

Page 28: Strike out the paragraph beginning with line 17, on page 28, and ending with line 13, on page 29.

The CHAIRMAN. The Chair understands that the gentleman from Georgia desires to offer an amendment to perfect the paragraph.

Mr. HOWARD. Yes.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from Georgia.

The Clerk read as follows:

Amendment by Mr. HOWARD:

Page 28, line 23, after the words "of any board," insert the following:

"That the President be, and he is hereby, authorized, by and with the advice and consent of the Senate, to transfer from the retired to the active list of the Marine Corps, in the grade and with the rank and seniority to which he would have been entitled had he not been so retired, in his original place as an additional number, any officer now on the retired list of the Marine Corps: *Provided*, That the circumstances concerning his retirement have been examined by the Committee on Naval Affairs of the Senate and House of Representatives of the Sixty-third Congress, and that both of said committees have reported favorably to the Senate or to the House a bill to transfer such officer to the active list of said Marine Corps.

Mr. MANN. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. Does the gentleman desire to be heard on the point of order?

Mr. MANN. No.

The CHAIRMAN. The Chair overrules the point of order.

Mr. HOWARD. I should like to address myself to the amendment, if I am in order.

The CHAIRMAN. The gentleman from Georgia is recognized for five minutes.

Mr. HOWARD. Mr. Chairman, this amendment that I have introduced will affect only two men in the service. One of these men is Lieut. Col. Perkins, who was retired from the service, as stated by the gentleman from Mississippi [Mr. WITHERSPOON], under circumstances that, I do not think, in the words of the Secretary of the Navy, were exactly what they should have been in the administration of justice as we should all like to see it administered. I do not think I can express myself more forcibly about the case than to say to you that at the time of Col. Perkins's retirement he had had 32 long years in the service of his country. That service was an honorable service. He never shirked a duty, nor did he have one black mark registered against him within those 32 years of service. Ex-Secretary Long of the Navy devotes nearly one page of his history of the American Navy to the work done by that most efficient officer in the suppression of the Samoan rebellion. There he was actually under fire; there he placed his life in jeopardy for his country, as he had been trained to do, and he willingly did it.

Before he was called before the retiring board in Washington he had not put his foot in Washington in 26 years. He had been a real soldier, not a swivel-chair "warmer" officer or a social "katydid."

After he went to Panama, less than 90 days before he was retired, the then Secretary of War Taft paid a visit to that zone. He called Col. Perkins into a conference and asked him about certain recommendations that had been made. Col. Perkins submitted in writing to him certain recommendations that did not dovetail with the recommendations of high officials in Washington. Mr. Taft brought those recommendations of Col. Perkins to Washington and he adopted every single recommendation that Col. Perkins made in every instance as better for the efficiency of the service than those upon which he was called upon to act that were furnished by officers at headquarters.

And yet within less than 90 days after that he received a telegram from the then brigadier general commandant detaching him from the service in Panama and ordering him to Washington. He came in response to the order, not knowing what he was to be charged with or why he had been detached.

When he walked into the headquarters of the Marine Corps and reported in response to the order detaching him he was notified for the first time that he was to go before a retiring board to be retired for a thing that I never heard of before expressed as a medical term—"mental instability."

I know of no such term applicable to insanity, but they tried to force Col. Perkins then and there to go before the retiring board without counsel or even reading the specifications. He rebelled, and they gave him four days in which to prepare for trial.

When we had these medical officers before the Committee on Naval Affairs let us see what they said.

The first man brought in was a man named Dr. Ury, and I never shall forget him as long as I live. He said Col. Perkins was a paranoiac. I said, "Doctor, paranoia is a progressive disease?" "Yes." "Ever hear of one getting well?" "Oh, yes; I cured one." I said, "Is he living now?" He said "Yes." I said, "Well, Doctor, you take the friendly advice of a plain country lawyer; you go and find that man and take him over to Europe and exhibit him to the great medical colleges of the world as a man who had a well-defined case of paranoia and that you are the one that cured him and give them the secret

of your remedy and your millions are made, because you are the first man that ever lived who has cured paranoia."

The CHAIRMAN. The time of the gentleman has expired.

Mr. HOWARD. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. The gentleman from Georgia asks for five minutes more. Is there objection?

There was no objection.

Mr. HOWARD. I want to show you how thoroughly the case was gone into. Oh, I must not forget Dr. Ury. I said, "Dr. Ury, are you on the active or the retired list?" He said, "I am on the retired list." I said, "What is your age?" He said, "Fifty-two." I said, "What are you doing on the retired list?" "Well," he said, "they retired me because I was sick." I said, "What is the matter with you?" "Well," he said, "they said I was mentally 'instable.'" [Laughter.] I said, "My Lord, Doctor, they would not put you on the board to pass upon the mental condition of the men in the service, would they?" He said, "I was put on and I don't know why I was put on." I told this to a gentleman in the cloakroom and he said that he certainly was tried by a jury of his peers. [Laughter.]

The next and only other medical gentleman was Dr. McClerg, of the retiring board, and in a sort of pleasant way I examined him. I said, "Doctor, are you on the active or the retired list?" He said, "I am on the retired list." I said, "How old are you?"—he was a youthful-looking man. He said, "I am 54." I said, "What are you on the retired list for?" "Well," he said, "I suffered from neurasthenia, too, and it affected my mind and they retired me." [Laughter.] Now, gentlemen, that sounds ridiculous, but it is in the record, and the gentleman from Massachusetts will remember that he asked some questions about it.

Now, what is the truth? The truth is that these men testified that they diagnosed this case and made a mistake. One of them said in his testimony:

> Gentlemen of the committee, I admit that I made a grievous error in the diagnosis of Col. Perkins's case, and his subsequent life has demonstrated to me that it was an erroneous diagnosis, and all one honorable gentleman can ask other honorable gentlemen to do is to correct this wrong.

He had the nerve and the fairness to do that, and it was the truth and the whole truth. But let us see what they did. Nobody every suspected this man of having a weak mentality. I say right now that he is capable of making a good Secretary of the Navy. He knows more about the intimate history of the American Navy than any man that I know of in this city. Yet they say, "Oh, he was crazy." Let us see who determined that. These two gentlemen I have just mentioned; and the funny part about it was this: Here is the examination they made to discover something being wrong with a man's head. I never heard of it before. I said, "What sort of an examination did you make?" He said, "Well, I felt his pulse." "Was that normal or not?" "Normal." Then he said further that he took his temperature, and I asked him what about that, whether it was normal or not, and he said that it was normal. Then I asked what other examination he had made. He then replied that he had taken notice of his respiration. I asked him how that was and my recollection is that he said it was normal. I then asked him if he had ever seen this man before, and he said that he had never laid eyes on him in his life. Then I asked how long the examination had been in progress, and he said between 15 and 20 minutes. I asked him if he talked to him, and he said, "Very little." Then I said, "What in the name of heaven made you come to the conclusion that the man was crazy?"

Mr. Chairman, that question has never been answered. The record shows that. But I suppose he came to that conclusion on the same principle that if people see a policeman walking down the street with a man with handcuffs on him, 70 per cent of the people believe the man is guilty, just because he is arrested. In the like manner I can take my good friend, the gentleman from Kansas [Mr. MURDOCK], or myself—well, I better leave myself out of the matter for very likely the conclusion would be right there—or I can take my good friend, the gentleman from Mississippi [Mr. WITHERSPOON], or my good friend, the gentleman from Tennessee [Mr. PADGETT], and say that any one of them is crazy, and every one who would look at them would say, "Doggone if he doesn't look like it." [Laughter.] Why? Because somebody has been fool enough to say that he is crazy, because some one has him under surveillance. That is the way Perkins was kicked out of the service. Crazy about what? What was Secretary Taft doing accepting his recommendations if he was crazy? Where was there a blot on his record during the whole of the time that he was in the service? You will not find even a reprimand from a superior. Why take this man in the prime of his life when he has rendered honorable service and was ambitious to serve his country further and put him on the retired list, at the expense of the Government, when he is more capable to do service to his country than many of those who are now on the active list? [Applause.]

I conclude with this terse statement from as just a man as ever presided over the destinies of the American Navy—Secretary Daniels. After thoroughly going into every detail of this case he says:

> When Col. Perkins requested permission to withdraw his resignation, the Judge Advocate General reviewed the case and declared that "the finding is not supported by the evidence submitted." In this conclusion reached by the Judge Advocate General a careful reading of the record forces me to concur. Indeed, I can not understand how the finding of "mental instability" could have been reached from the evidence at the hearing. The Judge Advocate General rendered a righteous judgment when he said officially that "the finding is not supported by the evidence submitted to the board." This righteous judgment received the unanimous approval of the House Naval Affairs Committee, after the fullest investigation. I feel that for the Navy Department to live up to the principle of "for justice, all season's summer, and every place a temple," it is my duty to recommend the passage of a bill to restore Col. Perkins to the service and thereby right the wrong which was done him.

Mr. WITHERSPOON. Mr. Chairman, in order that the committee may see the force of what I said about the Rust range finder I want to state this, that the Navy Department has tested that range finder, and it is so highly impressed with its value that they have constructed all of its parts, and they are now at the navy yard at Norfolk, and as soon as the battleship *Delaware* comes to that port it is going to be placed on that battleship permanently in order to give it a thorough test. I wanted to call the attention of the committee to one piece of evidence that looks to me conclusive with reference to Capts. Hill and Gibbons, and I want to read it from the record. These gentlemen have a record that is just as high as a human being could get, and in order that you may appreciate that I want to state that the regulations in the Navy require the superior officer to make written reports upon his subordinates every six months, and that every one of these officers had from 70 to 75 reports made upon him by their superiors. It is the statement in those written reports in answer to questions which elicit the judgment of the superior officer upon every conceivable qualification and characteristic of the officer. They are framed so as to bring out the full judgment of the reporting officer. These two officers have just as high report as a human being could get, and I want to read to you a piece of evidence as to what sort of officers they are. Just as we closed the testimony of Admiral Knight this letter was handed to your committee:

ANNAPOLIS, MD., *July 21, 1914.*

The Hon. LEMUEL P. PADGETT,
House of Representatives, Washington, D. C.

MY DEAR SIR: Capt. F. K. Hill, who has recently been retired by the plucking board, served under me as chief of staff during my command of the Atlantic Fleet. He performed his duties most efficiently in every particular.

From my intimate acquaintance and official association with Capt. Hill during the past 20 years I am convinced that he has no superior professionally among officers of command rank, and I believe this to be the judgment of a large majority of the officers of the Navy. From his early years in the Navy he has displayed marked aptitude and efficiency. He has been a close and intelligent student of naval progress and development, and is a thoroughly equipped, all-round officer.

His retirement is a distinct loss to the service. I would, therefore, invite your careful attention to his record and career in the Navy, feeling sure that it will convince you that a great injustice has been done to this efficient and capable officer. It can not be to the best interest of the service to retire two officers of the capacity and efficiency of Capts. Hill and Gibbons.

Very respectfully,

H. OSTERHAUS,
Rear Admiral, United States Navy.

Now, that came in there and was read, and this is the testimony of Admiral Knight, trying to justify his action in retiring these two officers. Then this occurred. I asked him this question:

> Do you agree to the statements contained in that letter?
>
> Admiral KNIGHT. No; not to all of them.
>
> Mr. WITHERSPOON. You differ with Admiral Osterhaus about that, do you?
>
> Admiral KNIGHT. I differ with much diffidence, because I have the highest respect for Admiral Osterhaus, and I know that Capt. Hill's service with him was of a very high order of excellence. If I agreed with that letter, it goes without saying that I should never have had anything to do with the retirement of Capt. Hill.
>
> Mr. WITHERSPOON. Well, give us your judgment now as to whether or not the opinion of a man like Admiral Osterhaus, whom you esteem very highly, ought to have more weight, or ought the judgments of other admirals that may be as well capacitated as himself, who have not had the intimate association and personal contact with an officer which he says he has had with Capt. Hill, to have more weight; whose judgment ought to have more weight?
>
> Admiral KNIGHT. I have no hesitation in saying that, in my opinion, the judgment of Admiral Osterhaus as to Capt. Hill is of far greater value than my judgment as to Capt. Hill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WITHERSPOON. Mr. Chairman, I ask unanimous consent that I may have five minutes more.

Mr. GARDNER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GARDNER. What is the question before the House?

The CHAIRMAN. The amendment offered by the gentleman from Georgia.

Mr. GARDNER. Another parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GARDNER. Is not debate on the amendment exhausted at the end of 10 minutes?

The CHAIRMAN. Yes; debate has been exhausted.

Mr. GARDNER. Mr. Chairman, I ask for a vote.

Mr. WITHERSPOON. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

Mr. YOUNG of North Dakota. Mr. Chairman, I object.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the amendment may be again reported.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I move to strike out the last word. I ask, not to be taken out of my time to accommodate the gentleman from Wisconsin, that the amendment be again reported.

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

There was no objection.

The amendment was again reported.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I have no opposition to including the case of Col. Perkins among those on which the committees of Congress are to give power to the President. I have been all through the Perkins case for a number of years and am heartily in favor of a bill to restore him to the service. [Applause.] But I do not believe that his bill or any other should be included in an omnibus proposition such as we have before us where the mere action of committees confer power on the President of the United States. I think, from what has been said by my friend from Georgia on the Perkins case, that this committee will understand that it is a long case to present properly to this committee. There is argument on the other side, as my friend will also admit, but that argument does not weigh with me. The fact is, however, that this committee has not had a full statement of any one of these cases that would come under the provisions of this act. There has been no analysis of them; there has been nothing said in opposition to any of them. The side of the department, which has recommended against every one of them, has not been put before this committee.

The committee as a committee is not in a position to judge intelligently as to the merits of any one of the cases. I have some views on some of these cases, because I have been all through them; others I have not. What I object to is not the consideration of each and every one of these cases on its merits. I believe that should be, but I do object to this House putting itself in the position it will be in if this passes—of making the judgment of a committee superior and paramount to the judgment of the House. If the House should take up each case and have it thrashed out and then pass on it, my objection would be gone, but that is not the proposition before us. The proposition is that any case retired by the plucking board or the operations of any other board in the Army or Navy where a committee of Congress is willing to pass on the case can be acted on by the President. Now, let me say that if this should become legislation before the Sixty-third Congress expires there might be a shoal of those cases coming in, because if you read the language you will find that the committee does not have to report a bill to the House, even. If the committee orders a report on a bill, then the President of the United States is clothed with power to act. You would not even have to get a bill into the House in the ordinary way. In other words, the judgment of a committee overweighs the legislative function of this body or the body at the other end of the Capitol, and, as suggested by the gentleman from Wisconsin, it need not be a unanimous opinion of the committee, but a mere majority of that committee conferring this power on the President, and I submit, gentlemen of this committee, that is bad legislation. It is a bad precedent to establish. It might be carried further, and if carried to its conclusion there is no necessity for any sessions of Congress to pass on legislation that comes up. This can be accomplished by conferring on each committee of the House power to report the bills, and, when reported, the President can then act.

You can see how ridiculously absurd such a proposition would be if this were done in all committees, and it is just as ridiculous and absurd to permit it to be done in the case of one committee. And so I hope, Mr. Chairman, that my amendment to strike out the whole paragaraph will prevail.

Mr. UNDERWOOD, Mr. LENROOT, and Mr. WITHERSPOON rose.

The CHAIRMAN. The Chair will recognize the gentleman from Alabama [Mr. UNDERWOOD].

Mr. UNDERWOOD. Mr. Chairman, this plucking board was originally based on a false theory. I think it is very fortunate that the House has already agreed that it shall be stricken out of the law this year. Men should be promoted by selection for their ability and their aptitude to perform service, and not merely because of their age or length of service. The necessity should never arise where we should drive good men out of the service in order to promote others to the commanding rank. [Applause.] But that is passed, and I hope the House will stand by what it has acted on to-day or let this bill die. I believe in the action of the House to that extent. But now, as to these men who have been removed by the plucking board: Mr. Chairman, I know but little about naval affairs. I have never given them a close study; but there is no Member of this House that could have listened to the debate and the testimony that has been given to us to-day in reference to the way in which these men have been turned out of the service, the country deprived of their needed services, and they carried on a retirement list, drawing their salaries at the expense of the people, that can not come to the conclusion that there has been something rotten in these conditions. [Applause.] And I say the time has come when this House should do justice to the men that this law has treated in an infamous way. I have listened to the argument of the gentleman from Massachusetts [Mr. ROBERTS]. For many years there has been a close corporation in this House and in the Navy Department that ran the United States Navy. [Applause on the Democratic side.] The day has come when the American people have a right to see that the American Navy is run in their interests; and the first thing that you should do in the interests of the American people is to return these officers to the service of their country.

The gentleman says you propose to put these men back in service by the action of these committees. Why, read the paragraph, and what does it mean? It means but one thing, that you are designating a list of men, to wit, the men who have been turned out by this plucking board, and whose cases have been examined and passed on favorably by the Naval Committee of the House, as a list from which the President can select the men whom he will return to the service. It would be the same thing if you wrote in the pages of the bill the names of these men and said that from this list of names the President in his discretion and in accordance with this law can return these men to the service.

Mr. ROBERTS of Massachusetts. Will the gentleman yield for a question?

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended for two minutes, in order that I may ask him a question.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent that the time of the gentleman from Alabama be extended for two minutes. Is there objection?

There was no objection.

Mr. ROBERTS of Massachusetts. The gentleman stated that you might as well write in the names of the people who would be affected. Can the gentleman tell this House how many cases are pending in the Senate Committee on Naval Affairs for restoration, how many the committee have reported to the Senate, and how many they have ordered to be reported, and, furthermore, how many more they may report and order to be reported?

Mr. UNDERWOOD. No; I can not. I would be willing to give the President of the United States a blank commission to return any of these officers to the service that he thinks it just and right to return.

Mr. STAFFORD. Why would he not have that power under the next paragraph, rather than leaving it to the committee to determine who shall be returned?

Mr. UNDERWOOD. There is nothing that leaves it to the committee to determine anything. Whatever the committees have determined has already been determined, and it is a mere designation of a certain list of officers, and nothing else. And if you read the bill, you can not come to any other conclusion. [Cries of "Vote!" "Vote!"]

Mr. LENROOT. Mr. Chairman, I move to strike out the proviso in the amendment of the gentleman from Georgia [Mr. HOWARD] and ask to have it reported.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. LENROOT moves to strike out the proviso in the amendment offered by Mr. HOWARD, which is as follows: "*Provided*, That the circumstances surrounding his retirement have been examined by the Committee on Naval Affairs of the Senate and the House of Representatives of the Sixty-third Congress, and that both of said committees have reported favorably to the Senate or to the House a bill to transfer such officer to the active list of said Marine Corps."

Mr. LENROOT. Mr. Chairman, I agree with what the gentleman from Alabama [Mr. UNDERWOOD] has just said, that he would be willing to give a blanket commission to the President of the United States to restore to the active list any of these officers who have been retired; and the purpose of the amendment that I have offered is to effect that object—to give the President of the United States that blanket commission, which he does not have under the amendment proposed by the gentleman from Georgia [Mr. HOWARD]. It limits the action of the President of the United States—certainly in his amendment—to only restoring those officers whom the Naval Committee of either House may have favorably reported on.

Now, I want to ask you on this side of the House if it is fair to give a preference to an officer who may have had influence enough and "pull" enough to come here and get a favorable report from a committee, while some other officer, without money, without means, without influence, but just as much entitled to consideration by the President of the United States as are these men—is it fair, is it right, to debar the President from the right of doing justice to these men who have not been here and confine him to appointing those men only who have been?

Now, Mr. Chairman, another proposition: The gentleman from Mississippi [Mr. WITHERSPOON] says, and the gentleman from Alabama [Mr. UNDERWOOD] agrees with him, that upon the main proposition contained in the bill it is only a request to the President of the United States to place these men upon the active list. I want to ask you, Are you willing to vote to request the President of the United States to place men upon the active list that may have been reported by a Senate committee—that may have been reported by a Senate committee between now and the 4th of March?

We all know something about senatorial courtesy. The moment that that goes into the bill and becomes a law any Senator or member of the Committee on Naval Affairs of the Senate that desires to make a request to the President of the United States, by the President to place a man upon the active list, will as a matter of course, will as a matter of senatorial courtesy, get a bill either favorably reported or ordered to be reported by the committee.

Mr. GREENE of Vermont. Mr. Chairman, will the gentleman permit a question?

Mr. LENROOT. I do.

Mr. GREENE of Vermont. Would not the purpose be served by inserting, on page 29, line 16, after the word "Navy," the words "and Marine Corps"?

Mr. LENROOT. Certainly it would be taken care of. But if you strike out the proviso it gives the President of the United States absolute authority to appoint any man to the active list that the President may find entitled to be placed there.

I am willing to trust the President of the United States upon that proposition. Why should not you? But I want him to have the opportunity to put upon the list an officer who has not had the influence to command a favorable report from the committee here as well as one who does have that influence.

Mr. HENSLEY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Missouri?

Mr. LENROOT. Yes.

Mr. HENSLEY. Is it the gentleman's idea that influence was required on the part of those officers to have a hearing before the Committee on Naval Affairs?

Mr. LENROOT. No. But it does require money, it does require means, to come here and present a case before a committee of Congress; and the man who has not done that ought to have an opportunity to present his case before the President of the United States if he chooses, and be appointed if he is found to be entitled to an appointment.

Mr. HENSLEY. Mr. Chairman, will the gentleman permit me to say that there has not been a single case where anyone has asked for a hearing and has not had it.

Mr. LENROOT. I did not intend to make the slightest reflection on the committee; none in the least. But the man has to come here and present his case; and there are many officers, no doubt, upon the retired list who have not had that opportunity, but who ought to be considered.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. UNDERWOOD. Mr. Chairman, will the gentleman yield?

Mr. LENROOT. Yes.

Mr. UNDERWOOD. I thought the next paragraph covered that amendment.

Mr. LENROOT. No. The next paragraph does not cover that at all.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wisconsin [Mr. LENROOT].

The question was taken, and the Chairman announced that the "noes" seemed to have it.

Mr. LENROOT. Division!

The committee divided; and there were—ayes 30, noes 50.

Accordingly the amendment was rejected.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Georgia [Mr. HOWARD].

The amendment was agreed to.

Mr. PADGETT. Mr. Chairman, on page 28, line 19, after the word "Navy," I move to insert the words "or Marine Corps."

The CHAIRMAN. The gentleman from Tennessee offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 28, line 19, after the word "Navy" insert the words "or Marine Corps."

Mr. CULLOP. Mr. Chairman, I presume the same words ought to be inserted after the word "Navy," in line 16.

Mr. PADGETT. No.

Mr. CULLOP. The active list of the Navy or Marine Corps.

Mr. PADGETT. That is a different matter. Unless the amendment which I propose is adopted, this would authorize an officer of the Marine Corps to be transferred to the active list of the Navy. We can not do that. This is to perfect the language, that is all.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee [Mr. PADGETT].

The amendment was agreed to.

Mr. MANN. Mr. Chairman, I move to strike out the first proviso of the paragraph.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. MANN moves to strike out on page 28 the proviso beginning in line 23, which reads as follows:

"*Provided*, That the action in these cases has been examined by the Naval Committee of the Sixty-third Congress of the House or of the Senate and either or both of said committees have reported or ordered to be reported favorably to the House or the Senate a bill to transfer such officer to the active list of the service."

Mr. MANN. Mr. Chairman, the discussion of this subject so far has related mainly to those officers who were retired by the so-called plucking board under the personnel act; but this provision in the bill does not, in fact, apply to them at all, though I doubt not that that was the intention of the author of the proposition. This paragraph in the bill authorizes the President to restore officers who have been plucked and who have been recommended for restoration by the Committee on Naval Affairs of the House or the Senate, and the next paragraph in the bill authorizes the President to restore all other officers who have been plucked under the personnel act. So that this proviso about committees reporting upon officers who have been retired under the personnel act would have no effect at all. Under the next paragraph of the bill the President can restore any officer who has been retired by the plucking board. This provision, therefore, about committee recommendations has no effect upon officers who have been retired under the personnel act, but it does give a tremendous power as to officers who have been court-martialed or who have been retired by any other board, because this paragraph provides not only for officers who have been retired under the personnel act, but also anyone who has been retired from the active to the retired list of the Navy or the Marine Corps by the action of any board.

The next paragraph, giving the President carte blanche in the restoration of officers on the retired list, applies only to those who have been retired under the personnel act and does not apply to officers who have been retired by any other board. If this provision remains in the bill as it stands, it does no good to officers who have been retired under the personnel act. That is covered by the next paragraph; but it authorizes the Naval Committee of the House or the Naval Committee of the Senate to recommend to the active list any officer who has been retired at any time by any other board than the plucking board, and the Naval Committee does not even have to make a report to the House or to the Senate. It does not apply merely to those who have bills already introduced. Any officer on the retired list who has been retired for any purpose by any board,

court-martial or otherwise, who can secure the ordering of a report by the Naval Committee of either House between now and 12 o'clock noon on the 4th of March, is eligible for reinstatement to the rank which he would have held if he had not been retired.

That means that a great many of them will be put upon the active list as rear admirals if they have sufficient influence to affect the judgment of the President. It seems to me that it does no good and ought to go out.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken; and on a division (demanded by Mr. MANN) there were—ayes 41, noes 36.

So the amendment was agreed to.

Mr. FITZGERALD. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 28, line 17, after the word "authorized," insert the words "within two years of the date of the approval of this act."

Mr. FITZGERALD. Mr. Chairman, the amendment proposes that the authority granted to the President must be exercised within two years of the approval of the act. The applicants under this provision should be examined promptly and their applications definitely determined. The matter should not be held open year after year or administration after administration, so that the cases may keep coming up and be thrashed out and renewed and renewed and rerenewed until some one is found who will act favorably.

Mr. ROBERTS of Massachusetts. Do I understand the gentleman's amendment applies to what might be called paragraph 2?

Mr. FITZGERALD. It is to page 28, line 17, after the word "authorized," to insert the words "within two years after the date of the approval of this act."

Mr. ROBERTS of Massachusetts. How does the gentleman propose to treat the next paragraph?

Mr. FITZGERALD. I propose to offer the same amendment there. I believe two years is ample time and one might be enough.

Mr. MANN. Would it not be better to add it as a separate paragraph at the end of the next paragraph?

Mr. FITZGERALD. I believe it is better right at this point, as it is so simple.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The question was taken, and the amendment was agreed to.

Mr. MANN. Mr. Chairman, I move to strike out, on page 29, lines 12 and 13, the language "in all cases where he had not before retirement passed such examination."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 29, lines 12 and 13, strike out the following language: "In all cases where he had not before retirement passed such examination."

Mr. MANN. Mr. Chairman, the bill now provides—

That such officer shall stand a satisfactory medical and professional examination for promotion, as now provided by law, in all cases where he had not before retirement passed such examination.

I take it that the purpose of this bill is to restore men to the Navy who may be of some value to the Navy. Suppose a man had passed a physical examination six years ago for promotion; then he had been plucked, how idle it would be to say that he ought to go back into the Navy now without a further physical examination. He may have entirely lost his health within six years. That might not be true of his professional examination.

Mr. WITHERSPOON. Will the gentleman yield?

Mr. MANN. Yes.

Mr. WITHERSPOON. I did not quite understand the gentleman. Would he strike out the provision requiring him to stand an examination?

Mr. MANN. I want to leave the provision so that he must stand a medical and professional examination before he can be reappointed.

Mr. WITHERSPOON. Some of these officers are captains and they were captains when retired. They have stood an examination for promotion to the grade of captain and does the gentleman want them reexamined?

Mr. MANN. I think they ought to be reexamined.

Mr. WITHERSPOON. They would then be required to stand two examinations for that promotion?

Mr. MANN. They are out of the service now and they want to get back in. If they can not pass a physical and professional examination now, they ought not to go back as captains. If they are not qualified to be captains, they ought not to be appointed. I apprehend that as to the professional examination there might be no difficulty, but there might be great reason for not putting a man back without giving him a physical examination. A physical examination taken six years ago is no criterion to determine whether he is fit to be an officer in the Navy now.

Mr. WITHERSPOON. Will not the gentleman admit this? We will take one of these cases where he was promoted from the rank of commander to that of captain, we will say, five years ago. He stood an examination, both medical and professional, at that time. If he never had been retired he would not have to stand any further examination until the time came for him to be promoted to the grade of rear admiral. That examination—both medical and professional—would stand under the regulations until the time came for him to be promoted again.

Mr. MANN. But that time would not last five years.

Mr. WITHERSPOON. This is exactly the same thing.

Mr. MANN. Oh, no. A man who has been examined in the Navy for promotion to a captaincy, say, would stand a professional and medical examination. If they find that he is entitled to be promoted, and he remains in the service, he is not losing anything, though he does not get the physical examination, as I understand it, until the time when they are ready to make the appointment in the way of promotion. But to say that an old examination years ago shall qualify a man now for appointment in charge of one of the war vessels of the United States seems to me liable to bring upon us men who are not qualified to perform the duties. I do not think the gentleman from Mississippi [Mr. WITHERSPOON] desires to put into the active service anyone unless he is able to show qualities, both professional and physical, for performing the duties of the office which he seeks.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The question was taken; and on a division (demanded by Mr. MANN) there were—ayes 44, noes 23.

So the amendment was agreed to.

Mr. MANN. Mr. Chairman, I move to strike out, in line 4, page 29, after the word "*Provided*," the word "*further*."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 29, line 4, after the word "*Provided*," strike out the word "*further*."

The CHAIRMAN. Without objection, the amendment will be agreed to.

There was no objection.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Massachusetts [Mr. ROBERTS] to strike out the paragraph.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

That the President be, and he is hereby, also authorized, by and with the advice and consent of the Senate, to transfer to the active list of the Navy any other officer who may have been retired under the said section 9 whom he may consider physically and professionally qualified to discharge his duties on the active list: *Provided*, That such officer shall be transferred to the place on the active list which he would have held if he had not been retired and shall be carried as an additional number in the grade to which he may be transferred or at any time thereafter promoted: *Provided further*, That such officer shall stand a satisfactory medical and professional examination as now prescribed by law: *And provided further*, That any officer transferred to the active list shall not by the passage of this act be entitled to back pay or allowances of any kind.

Mr. FITZGERALD. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 29, line 15, after the word "authorized," insert the words "within two years of the date of the approval of this act."

Mr. FITZGERALD. Mr. Chairman, this is the same amendment adopted on the other paragraph.

Mr. MANN. Mr. Chairman, I suggest to the gentleman that he make it read "two years of the passage of this act."

Mr. FITZGERALD. I think the "two years of the date of the approval" is the same thing. It means the same thing.

Mr. MANN. It does not, but I do not care.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York.

The question was taken, and the amendment was agreed to.

Mr. FITZHENRY. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 29, line 17, after the word "said," strike out the words "section 9" and insert in lieu thereof the words "personnel act."

Mr. STAFFORD. Mr. Chairman, on that I reserve a point of order that it is not germane.

The CHAIRMAN. The Chair will hear the gentleman on the point of order.

Mr. STAFFORD. Mr. Chairman, these three paragraphs under consideration relate entirely to section 9 of the personnel act. They do not relate to the other provisions of the personnel act. For instance, section 8 provides for retirement for disability and on other conditions. The gentleman's amendment is opening up all the various paragraphs of the personnel act where may be grounds for removal. All that is in order under the rule are these three separate paragraphs and germane amendments thereto. If under the other sections of the personnel act officers may be removed, amendments relative thereto would not come within the scope of the rule. It has been held many times that when an amendment relates merely to one thing, another amendment embodying a general class as this amendment does is not germane. I assume that the Chair appreciates the real purpose of the amendment.

Mr. MANN. Mr. Chairman, it is true that the Chair overruled the point of order which I made a while ago to the amendment offered by the gentleman from Georgia [Mr. HOWARD] on the preceding paragraph, without discussion, but I have no complaint to make about that. I thought the amendment introduced entirely new matter.

This section provides for the restoration to the active list of men retired in a certain way under section 9 of the personnel act. Now, there are many other ways in which an officer can be retired entirely apart from section 9, and the question is whether on a provision to restore officers who have been retired under section 9 it is germane to offer an amendment affecting officers who have been retired in some other way.

Mr. STAFFORD. If the Chair will indulge me just a moment further. Section 8 provides for the retirement of officers by reason of voluntary retirement and by reason of disability. The purpose of the amendment is to give authority to the President to consider the retirements of officers who have been retired for other reasons than under section 9, relating to the plucking board. It opens up the general subject, and therefore it is not germane, because provisions here only relate to one certain class, namely, those who have been retired under section 9 of the personnel act, while the amendment relates to a different class.

Mr. FITZHENRY. Mr. Chairman, as I understand the subject of this legislation, it is the transfer of officers from the retired list to the active list in the Navy and Marine Corps. The preceding paragraph relates to those who are retired by any board, so it clearly is outside the provisions of section 9 of the personnel act; and the present paragraph goes into another subject—the transfer from the retired list to the active list—and the purpose of this amendment is simply to open up section 8. There are only two paragraphs in the personnel act under which an officer can be retired—one is section 8, the other is section 9. Section 9 is the section that provides for the plucking board and gives power to that body. Section 8 provides for voluntary retirements. Now, the thought that brought this amendment to my attention was, having in mind a young officer who was recently transferred from the active list to active duty on the retired list, it seemed to me the power ought to be vested in somebody somewhere along the line, in a proper case, to transfer that young man back to the active list in the Navy, and that is the purpose of this proposed amendment. It seems to me that it is germane to the subject matter of this legislation and eminently appropriate to the rule under which we are considering this legislation to-day. The rule itself provides that this legislation shall be subject to all amendments.

Mr. BUTLER. Will the gentleman yield to me for a question?

Mr. FITZHENRY. Certainly.

Mr. BUTLER. I listened attentively as possible in an endeavor to hear what the gentleman was saying, but I could not hear all he said. What is the real reason for changing that language? Now, the purpose of this act, as I understand it, is to transfer to the active list of the Navy certain officers who have been eliminated by the operation of this board of elimination, and the power of that board is found under section 9.

Mr. FITZHENRY. Yes.

Mr. BUTLER. Why not use the same language? Does the gentleman desire to enlarge the list of officers who possibly may be restored?

Mr. FITZHENRY. Because under the preceding paragraph of this bill express provision has been made for specific officers whose particular cases brought this subject matter to the attention of the committee. The next paragraph, as I understand it, was to be a paragraph to grant to the President of the United States power to treat any particular case within the law and to make proper transfers. The language used is that of "section 9," and in order to broaden it out so it will take in section 8 I have offered this amendment to strike out the words "section 9" and insert the words "personnel act."

Mr. BUTLER. I am obliged to the gentleman for answering my question, and now let me ask him another one. Is it the gentleman's intention to enlarge the list of officers to be restored? Does the gentleman intend to have included in this new act other officers than those who have been selected by this elimination board?

Mr. FITZHENRY. I will answer the gentleman from Pennsylvania, frankly, that is the intention.

Mr. BUTLER. I thank the gentleman for his candid answer.

Mr. FITZHENRY. I want this law to be broad enough to cover a man who may have voluntarily for a few weeks gone on the retired list doing active duty, as the one I have in mind, and in a proper case have him transferred back to the active list. That power ought to reside somewhere in the management of the Navy, either in the President of the United States or in the Secretary of the Navy. I think the most remarkable thing about sections 8 and 9 is that the Congress ever gave any board to be automatically created power that could not even be reviewed by the Secretary of the Navy or the President of the United States.

The CHAIRMAN. The Chair will ask the gentlemen to confine themselves to the point of order. Does the gentleman from Pennsylvania [Mr. BUTLER] wish to be heard on the point of order?

Mr. BUTLER. I do not, Mr. Chairman.

Mr. FITZHENRY. If the Chair will permit me, I would like to call attention to the closing paragraph under the rule under which this paragraph is being considered, to the effect that it shall be in order to offer amendments to the paragraph while the same is being considered under the five-minute rule.

The CHAIRMAN. Of course, that is as to a germane amendment. The Chair thinks under the rule we are dealing entirely with section 9 of the personnel act of March 3, 1899, and to undertake now to go further, as the gentleman says is the object of the amendment he has offered, is to open up a broader field from which to take persons who are on the retired list and put them on the active list, and is not germane to section 9. The Chair therefore sustains the point of order.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I would like to get the attention of the gentleman from Mississippi [Mr. WITHERSPOON] for a moment. I believe he is the author of this provision. I would like to understand the meaning of this proviso:

Provided, That such officer shall be transferred to the place on the active list which he would have held if he had not been retired.

Now, what does that mean? For instance, every officer who is promoted is required to take an examination, is he not?

Mr. WITHERSPOON. Yes.

Mr. MANN. How can anybody tell whether he has passed an examination which he has not taken, and, if they can not tell, how can they restore him to any place he has not already held? What is the intention of it?

Mr. WITHERSPOON. The answer to that is that they have all taken the required examination except one. There was one officer that was ordered to take an examination for promotion to the next higher rank.

Mr. MANN. I think the gentleman does not quite get my question.

Mr. WITHERSPOON. Yes, sir; I get it, and, if you will bear with me, I think I will make you understand it. There was one officer who was about to be examined, and just before he stood the examination he was retired by the plucking board. Now, if he was restored to the same place that he would have had, he would have to stand an examination, and that was the object of that provision that you had struck out, that they should stand examination except where they had already stood it. That was struck out, and I think we made a mistake when we struck it out, because it was intended to cover one case.

Mr. MANN. I do not want to argue that over again.

Mr. WITHERSPOON. When it says that he shall be restored to the same place he would have held, it means this: That each officer has a certain number. You take, for instance, the admiral——

Mr. MANN. Let me ask my question, then, a little more intelligently than I did before. Suppose a man was lieutenant commander in the Navy, holding a certain number, and that number is now in the position of captain in the Navy, having passed through the position of commander. Even assuming that the man had taken examination for promotion from lieutenant commander to commander, he would not have taken examination for promotion to captain. If he had remained in

the service and taken examination he would now be a captain. Does this restore him to the position?

Mr. WITHERSPOON. Yes, sir. I was going to tell you there was a certain number he would have had if he had remained in the service.

Mr. MANN. I understand that; but how could you tell he would have passed the examination for captain?

Mr. WITHERSPOON. The bill as we had it drawn would provide for identically that case.

Mr. MANN. Not at all.

Mr. WITHERSPOON. If you will let me explain, I will show you it did provide for precisely that kind of a case until you struck it out.

Mr. MANN. But he had not taken examination for promotion as captain.

Mr. WITHERSPOON. Yes, sir.

Mr. MANN. He could not have done so. A lieutenant commander could not be appointed captain.

Mr. WITHERSPOON. That is true; and if he could not stand that examination now, he could not be restored.

Mr. MANN. He could not have been appointed captain from the position of lieutenant commander. He first would have to be appointed commander and be promoted from commander to captain.

Mr. WITHERSPOON. Under that bill he would have the place he would have had.

Mr. MANN. But it is not a correct supposition that within the time that has elapsed there has been a promotion of his class through two ranks.

Mr. WITHERSPOON. I think there have been some of them promoted through two ranks.

Mr. MANN. I do not agree with you about that.

Mr. WITHERSPOON. I know in the previous paragraphs some have been promoted through three ranks.

Mr. MANN. Not since he was retired.

Mr. WITHERSPOON. Since he was retired by the operation of some other board. There is not a single one of these cases that has been retired long enough to have passed through two ranks.

Mr. MANN. Oh, the gentleman is mistaken about that. The previous paragraph does not apply merely to the personnel board. The personnel board has been in operation for 12 or 15 years. There have been men passed through more than two ranks, and I guess more than three ranks in that time.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BUTLER. Mr. Chairman, before we leave the paragraph, I ask unanimous consent to speak for five minutes.

The CHAIRMAN. The gentleman from Pennsylvania moves to strike out the last word.

Mr. BUTLER. Mr. Chairman, before we leave this subject we have been considering, let me bear a word of testimony to the valuable services which have heretofore been performed by this board which is now obnoxiously spoken of as the "plucking board." I agree with the action of the committee. I have felt for three or four years that this board should be abolished; that the good work which it had performed, the good work which it was designated to perform by a law passed 16 years ago, has been performed, and the mission of the board was done.

Perhaps if you will allow me to refer to myself, I am the only one here who actively participated in the construction of this law 16 years ago. At that time I had some fear as to the effect of the absolute authority conferred upon this board. I had great doubt whether it was advisable to place such absolute and unreviewable authority—such undisputed authority—in the hands of any man or set of men. I appealed at the time to those who knew better than I did to inform me of the probable consequences following the execution of the law, and became satisfied of its necessity. You may yet think well of the services of this board as it is now extinguished forever.

As I have said, I was satisfied that there was need for this board and the power given it; and I say now, as one who knows of what he is speaking, that it is largely because of the work of this autocratic board that we have now the finest personnel that any military body can boast of. The officers were held to a strict accountability. They knew what the result would be if they did not come to the mark prescribed for them.

But all the old timber has been cut out. The authority being absolute, there being no opportunity whatever given to this board to avoid the duties devolving upon it, it has been forced, my friends, to take from the line of the Navy men who, in my judgment, should not have been selected. Perhaps at times this board acted unwisely. But in most instances it acted wisely and with a view to add to the efficiency of the service. I believe, except within the last two or three years, the acts of this board could be approved by anyone who would examine the duties which it performed and the manner in which it performed them.

I am glad, however, that the day of its departure is about to come. But let me suggest to you that you may find it necessary within a very short time to direct by law another body of men to perform duties of some kind that will take from the Navy of the United States men who ought not to hold high commissions in it.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The title of paymaster's clerk in the United States Navy is hereby changed to pay clerk, and hereafter all pay clerks shall be warranted from acting pay clerks who shall be appointed from enlisted men in the Navy holding acting or permanent appointments as chief petty officers who have served at least three years as enlisted men, at least two years of which service must have been on board a cruising vessel of the Navy. All appointments as acting pay clerk shall be made by the Secretary of the Navy, and all such appointees, in addition to the qualifications above set forth, must be citizens of the United States. All acting appointments herein provided for shall be made permanent under regulations established by the Secretary of the Navy: *Provided*, That paymasters' clerks now in the Navy whose total service as such is less than one year and who are citizens of the United States may, upon the passage of this act, be given appointments as acting pay clerks without previous service as enlisted men: *Provided further*, That paymasters' clerks now in the service and former paymasters' clerks whose appointments have been revoked within six months next preceding the passage of this act, who have had not less than one year's actual service as such, and who are citizens of the United States, may, upon the passage of this act, be warranted as pay clerks without previous service as enlisted men or as acting pay clerks: *And provided further*, That pay clerks and acting pay clerks shall have the same pay, allowances, and other benefits as are now or may hereafter be allowed other warrant officers and acting warrant officers, respectively.

Mr. MANN. Mr. Chairman, I make a point of order on the paragraph.

Mr. PADGETT. The point of order is well taken.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

That all pay clerks shall, after six years' service as such, be commissioned chief pay clerks and shall on promotion have the rank, pay, and allowances of chief boatswain: *Provided*, That in computing the six years' service herein provided for credit shall be given for all service in the Navy as pay clerk, acting pay clerk, and paymaster's clerk: *Provided further*, That paymasters' clerks now in the Navy and former paymasters' clerks whose appointments have been revoked within six months next preceding the passage of this act, who have had not less than six years' actual service as such, and who are citizens of the United States, may, upon the passage of this act, be commissioned as chief pay clerks without previous service as enlisted men, acting pay clerks, or pay clerks.

Mr. PADGETT. Mr. Chairman, the gentleman from Illinois has made a point of order against the first paragraph of the provision relating to pay clerks, and in order to save the time of reading I ask that we consider as read all down to and including line 11 of page 33. It all relates to this same matter. And inasmuch as the gentleman from Illinois has made a point of order as to the other, I ask that the point of order be sustained on the later provisions down to line 11 of page 33.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to consider as read the provisions down to line 11 of page 33, and that the same shall be considered as subject to a point of order. The Chair sustains the point of order.

Mr. MOORE. Was there a request made for unanimous consent?

The CHAIRMAN. Yes.

Mr. PADGETT. It all relates to this same matter. With the first paragraph out the other is useless.

Mr. MOORE. If it comes out, the opportunity to ask this question goes by. I reserve the right to object for the purpose of asking the chairman of the committee why the expression "who are citizens of the United States" is used? Have we paymasters who are not citizens of the United States? In each one of these paragraphs that expression is used.

Mr. PADGETT. Paymasters' clerks are limited to citizens of the United States, coming up from the enlisted men.

Mr. MOORE. Why is that expression used?

Mr. PADGETT. Just to limit it to that class. They are warrant officers.

Mr. MOORE. To put the question bluntly, are there any paymasters' clerks who are not citizens of the United States?

Mr. PADGETT. I understand not; and we do not want any.

Mr. STAFFORD. To make the RECORD clear, Mr. Chairman, I make a point of order against each of these paragraphs.

The CHAIRMAN. The Chair sustains the point of order to the paragraphs, beginning with line 23, on page 31, line 21, on page 32, and line 7, on page 33. The Clerk will read.

The Clerk read as follows:

Hereafter officers of the Navy and Marine Corps appointed student naval aviators, while lawfully detailed for duty involving actual flying in air craft, including balloons, dirigibles, and aeroplanes, shall receive the pay and allowances of their rank and service plus 35 per cent increase thereof; and those officers who have heretofore qualified, or may

hereafter qualify, as naval aviators, under such rules and regulations as have been or may be prescribed by the Secretary of the Navy, shall, while lawfully detailed for duty involving actual flying in air craft, receive the pay and allowances of their rank and service plus 50 per cent increase thereof. Hereafter enlisted men of the Navy or Marine Corps, while detailed for duty involving actual flying in air craft, shall receive the pay, and the permanent additions thereto, including allowances, of their rating and service, or rank and service, as the case may be, plus 50 per cent increase thereof: *Provided*, That not more than a yearly average of 48 officers and 96 enlisted men of the Navy and 12 officers and 24 enlisted men of the Marine Corps, detailed for duty involving actual flying in air craft, shall receive any increase in pay while on duty involving actual flying in air craft, nor shall any officer in the Navy senior in rank to lieutenant commander, nor any officer in the Marine Corps senior in rank to major, receive any increase in pay or allowances by reason of such detail or duty.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order to the paragraph.

Mr. PADGETT. Let me ask the gentleman if he is going to make the point of order?

Mr. STAFFORD. I want to inquire whether these provisions, as recommended by the committee, differ at all from the provisions in the bill reported by the Committee on Military Affairs for the Army aviators?

Mr. PADGETT. They differ in this, that there is a better provision made for the men in the Army aviation corps than is provided in this bill for the Navy.

Mr. STAFFORD. I believe there was no difficulty whatever in the Committee on Military Affairs obtaining consideration for the bill providing for the permanent establishment of the aviation service connected with the Army, and I think there will be no difficulty in getting consideration of a similar bill reported from the Committee on Naval Affairs for the Navy, and so I make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. PADGETT. Then, Mr. Chairman, I ask unanimous consent that the point of order include and embrace all down to and including line 9, on page 35, for it all relates to this matter.

Mr. STAFFORD. I make the point of order to those respective paragraphs.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that the point of order shall relate to paragraphs indicated by him. Is there objection?

There was no objection.

The CHAIRMAN. The Chair sustains the point of order to each of the paragraphs indicated. The Clerk will read.

The Clerk read as follows:

The President is hereby authorized, by and with the advice and consent of the Senate, to appoint George W. Littlehales a professor in the corps of professors of mathematics of the Navy, with the rank of lieutenant, as additional number in that grade and in any grade to which he may be thereafter promoted: *Provided*, That for pay and other purposes his service as a civilian employee in the Hydrographic Office of the Navy Department previous to being commissioned shall count as service in the Navy.

Mr. MANN. Mr. Chairman, I make a point of order against the paragraph.

Mr. PADGETT. The point of order is well taken.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

There is hereby established a United States naval reserve, which shall consist of citizens of the United States who have been or may be entitled to be honorably discharged from the Navy after not less than one four-year term of enlistment or after a term of enlistment during minority. The naval reserve shall be organized under the Bureau of Navigation and shall be governed by the Articles for the Government of the Navy and by the Naval Regulations and Instructions. Whenever actively employed with the Navy, or whenever employed in authorized travel to and from prescribed active duty with the Navy, its members shall be employed as members of the naval reserve and shall while so employed be held and considered to be in all respects in the same status as enlisted men of the Navy on active duty, except that they shall not be advanced in rating in time of peace. When not actively employed with the Navy, members of the naval reserve shall not be entitled to any pay, bounty, gratuity, or pension except the pay expressly provided for members of the naval reserve by the provisions of this act, nor shall they be entitled to retirement by reason of such service in the naval reserve.

Mr. STAFFORD. Mr. Chairman, I make a point of order against this paragraph. This is too important a matter to be considered on an appropriation bill. I will ask to reserve the point of order for a moment, at the request of the gentleman from Pennsylvania [Mr. BUTLER].

Mr. BUTLER. While this is clearly subject to the point of order, it is perhaps the most desirable feature of this whole bill, as the Naval Militia is, in my judgment, one of the most important features of the Navy, and I shall ask the Naval Affairs Committee at an early date to report this in a special bill, so that we may consider it.

Mr. STAFFORD. Mr. Chairman, I quite agree with what the gentleman from Pennsylvania says, but I think he will agree with me that this is no place to consider such an important measure—on an appropriation bill. Therefore I make the point of order.

Mr. PADGETT. They put the other in by a special rule.

Mr. STAFFORD. That shows the favoritism that characterizes your Committee on Rules.

Mr. PADGETT. Not at all. It is not a question of favoritism; it is a question of judgment. Mr. Chairman, I ask unanimous consent, as this provision continues down to and including line 8, on page 40, that it all be considered as read, and the point of order made to it down to line 8, on page 40.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that the part of the bill indicated by him be considered as read.

Mr. MANN. Down to where?

Mr. PADGETT. To line 8, on page 40.

The CHAIRMAN. To line 8, on page 40, as it all relates to the same subject.

Mr. STAFFORD. To have the RECORD straight, I will make the point of order to the respective paragraphs.

The CHAIRMAN. The Chair sustains the point of order made by the gentleman from Wisconsin to the paragraphs beginning with line 21, on page 36——

Mr. STAFFORD. Line 1.

The CHAIRMAN. The point of order has been sustained already to that paragraph; to the paragraphs beginning with line 8, on page 37; line 15, page 37; line 1, page 38; line 7, page 38; line 16, page 38; line 22, page 38; line 11, page 39; line 24, page 39; and line 7, on page 40.

Mr. BUTLER. Including lines 7 and 8.

The CHAIRMAN. The Chair sustains the point of order to the paragraphs beginning with the lines indicated by him. The Clerk will read.

The Clerk read as follows:

Hereafter the commander in chief of the United States Atlantic Fleet, the commander in chief of the United States Pacific Fleet, and the commander in chief of the Asiatic Fleet, respectively, shall each, after being designated as such commander in chief by the President, and from the date of assuming command of such fleet until his relinquishment of such command, have the rank and pay of an admiral; and in each of the above-named fleets the officer serving as second in command thereof shall each, after being designated as such second in command by the President, and from the date of assuming duty as such second in command until his relinquishment of such duty, have the rank and pay of a vice admiral; and the grades of admiral and vice admiral in the Navy are hereby reestablished and authorized for the purposes of this section. The annual pay of an admiral shall be $12,000, and of a vice admiral $10,000: *Provided*, That in time of peace officers to serve as commander in chief and as second in command of the three said fleets shall be designated from among the rear admirals on the active list of the Navy: *Provided further*, That nothing herein contained shall create any vacancy in any grade in the Navy nor increase the total number of officers allowed by existing law, and that when an officer is detached from duty as such commander in chief or as such second in command, as above provided, he shall return to his regular rank in the list of rear admirals and shall thereafter receive only the pay and allowances of such regular rank.

Mr. MCKENZIE. Mr. Chairman, I make a point of order to that.

Mr. CULLOP. I also make a point of order to it.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Fuel and transportation: Coal and other fuel for steamers' and ships' use, including expenses of transportation, storage, and handling the same; maintenance and general operation of machinery of naval coaling depots and coaling plants; water for all purposes on board naval vessels; and fee for the cooling of water, including the expense of transportation and storage of both, $4,500,000.

Mr. MOORE. Mr. Chairman, will the gentleman from Tennessee inform us whether any efforts have been made by the Navy Department to obtain cheaper coal or to release it from what is said to be a coal combination that sets the price of Navy coal?

Mr. PADGETT. There have been appropriations to develop the Alaska coal, and we received a report of the Matanuska field which is very encouraging. The report of the Bering River field the year before was not satisfactory. The one received this present winter as to the Matanuska field was very encouraging. It was said to be equal to the best eastern coal.

Mr. MOORE. The hearings before the Naval Affairs Committee have some reference to a combination which it is said the Secretary of the Navy undertook to break up during the past year.

Mr. PADGETT. Identical bids were submitted in a number of cases.

Mr. MOORE. The bids were identical; and there was a move on the part of the Secretary of the Navy to break up the combination by acquiring coal elsewhere than from West Virginia fields.

Mr. PADGETT. The Secretary declined to accept any bids, and readvertised, and then in the readvertisements there was

a change in the conditions and terms. Then there was in the next submission of bids variations in the prices.

Mr. MOORE. Were there any allegations before the committee of a combination which would seem to have warranted any investigation on the part of the committee?

Mr. PADGETT. The Assistant Secretary of the Navy said that the management of the coal was under his jurisdiction in the department; and when these identical bids came in he was satisfied from them that there must be a mental telepathy that brought them all together, and for that reason he had refused to accept the bids and readvertised.

Mr. MOORE. He has been purchasing some Pennsylvania coal, has he not?

Mr. PADGETT. Yes.

Mr. MOORE. In competition with the West Virginia coal?

Mr. PADGETT. Yes.

Mr. MOORE. Can the gentleman tell approximately how many tons of coal are used for steamer use in the Navy?

Mr. PADGETT. It is quite a large amount.

Mr. MOORE. The appropriation is $4,500,000.

Mr. PADGETT. Yes; and I think they use between 700,000 and 800,000 tons for steamer purposes. There is some bought otherwise for factory purposes, but that is a different class of coal.

Mr. MOORE. Has all the coal heretofore been obtained from one source?

Mr. PADGETT. Not from one source, but from one general locality. There is over here in West Virginia three different grades—Pocahontas, Georges Creek, and New River—and they were all three the principal supplies of coal, but under the present administration during the last year it has broadened out, and two or three supplies from Pennsylvania have come into competition.

Mr. MOORE. The department has certain standards and is guided by those standards in regard to the quality of steamer coal?

Mr. PADGETT. It has the mines classified, and they must come up to the standard.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE. I ask for five minutes more.

The CHAIRMAN. The gentleman asks that his time be extended five minutes. Is there objection?

There was no objection.

Mr. MOORE. Pennsylvania coal was examined during the past year, and it came up to the standard fixed by the department?

Mr. PADGETT. Some of it did, and some did not come up to it.

Mr. MOORE. Was there any test on any one of the naval vessels?

Mr. PADGETT. I understand there were several.

Mr. MOORE. Was there a test on the battleship *New York*?

Mr. PADGETT. I do not remember the name of the ship. I believe that some coal was tested on the *New York*. I am not sure that it was Pennsylvania coal, but the test was made on the *New York*.

Mr. MOORE. I think I am correct in saying that the hearings show that a test of Pennsylvania coal was made on the *New York*, and that it was eminently satisfactory.

Mr. PADGETT. If it was the Pennsylvania coal, the report found that it was satisfactory.

Mr. MOORE. At any rate, that Pennsylvania coal is now being secured to a limited extent by the department. I wanted to find out if the gentleman could tell us why the tests established by the Navy Department, which accepted the Pennsylvania coal, are not acceptable to the War Department, which, up to the present time, has insisted upon taking the Pocahontas coal and other coal from the West Virginia fields?

Mr. PADGETT. I have no information on that. I did not know there was that distinction.

Mr. MOORE. Can the gentleman tell us how coal is stored at the Isthmus, so far as the Navy coal is concerned?

Mr. PADGETT. The Navy has no separate storage there. That is under the War Department and under the Panama Canal administration. They store there and supply the Navy and commerce also. The Government has a monopoly on the supply at Panama with reference to all purposes.

Mr. MOORE. Has the Navy a storage plant at Panama?

Mr. PADGETT. I think not. We get it from the Isthmian Canal administration.

Mr. MOORE. What is the nearest coal supply station to Panama?

Mr. PADGETT. We have one at Guantanamo, and then on the Pacific coast we have one at San Diego, at Los Angeles, and up the coast to Bremerton.

Mr. MOORE. At the present time all of the coal goes to the Pacific coast from the Atlantic coast, from the port of Norfolk, or latterly from the port of Philadelphia?

Mr. PADGETT. Yes.

Mr. MOORE. Does the gentleman know anything about the freight rates?

Mr. PADGETT. They have been very high of late.

Mr. MOORE. As high as $6 a ton?

Mr. PADGETT. Higher than that in some cases.

Mr. MOORE. On coal costing no more than $2.60 a ton?

Mr. PADGETT. Some of the freight rates run up above $8 a ton.

Mr. MOORE. There is no coal on the Pacific coast—the Matanuska, Alaska, field—that is, up to date, satisfactory for naval use?

Mr. PADGETT. The Matanuska coal is reported to be; but that is away inland 100 miles, and they have to bring it out at great cost in sleds and dredges over the snow. There is no communication there yet.

Mr. MOORE. What is the prospect, so far as the Navy Department's necessities are concerned, of obtaining that western coal for Pacific coast use?

Mr. PADGETT. From Alaska?

Mr. MOORE. Yes.

Mr. PADGETT. None at all until the railroad is completed; but I may add that there is a very large supply of oil on the Pacific coast, and oil is very cheap, and we are using a large quantity of oil in ships, and we are providing oil storage on the Pacific.

Mr. MOORE. That was the purpose of the inquiry I made of the gentleman early in the day. Provision is made in this bill for additional storage tanks?

Mr. PADGETT. All up and down the coast.

Mr. MOORE. It appears, from the testimony of Assistant Secretary Roosevelt before the Committee on Naval Affairs, that the coal combination of which Secretary Daniels complained resulted in a test of Pennsylvania bituminous coal on the trial trip of the battleship *New York*, "when she exceeded her contract speed by about 1 knot," and the award of a contract for substantially 200,000 tons of that coal. What the Assistant Secretary told the committee about the coal combination included the following:

> I am speaking now of Hampton Roads coal. Every bidder—and there were 17 of them—bid $2.90 a ton, a flat price. Two bidders bid $2.85 a ton, the White Oak Coal Co. and the B. Nichols Co. Those two bids of $2.85 were subject, however, to an increase of 5 cents in case the Interstate Commerce Commission granted the rate increase.
>
> Mr. ROBERTS. How about the other $2.90 bids, were they subject to the increase?
>
> Mr. ROOSEVELT. No, sir.
>
> Mr. ROBERTS. The bids were the same, only the other people were willing to take the chance?
>
> Mr. ROOSEVELT. Yes, sir. Seventeen of them bid $2.90, irrespective of any change in the rate, and two firms bid $2.85 with a qualification.
>
> Mr. ROBERTS. But if the rate increase was granted, they would go up to $2.90, while the other people bid $2.90 and they could not get any more, and so it is fair to assume that they considered the increase of rates at the time that they put in the bid of $2.90.
>
> Mr. ROOSEVELT. I do not know what they considered.
>
> Mr. ROBERTS. On that assumption, they were all on the basis of $2.85?
>
> Mr. ROOSEVELT. The 17 firms did not make any bid on the $2.85 at all.
>
> Mr. ROBERTS. I assume that they had in mind the increase of rates.
>
> Mr. ROOSEVELT. I doubt if the 17 firms contemplated that, in view of the fact that the previous year's contract had been at $2.90, before the rate question was brought up at all.
>
> These tests as above outlined made sure that a widening of the fields would be secured without a lowering of the quality. Dealers of excellent reputation in the trade, of large financial resources, and of undoubted ability to carry out any contracts they undertook, were found who expressed their willingness to compete for coal and who, in addition, were willing to furnish coal which was then on the accepted list of the Navy, and about which, of course, there could be no dispute as to its quality. First, however, the department being exceedingly loath to make any changes unless absolutely necessary, coal was advertised for under practically the old conditions, the only difference being that public advertising instead of the personal letter was the method used. It was hoped that the attitude of this administration in regard to noncompetitive bids had been made so clear in the matter of armor plate that the dealers supplying coal would read the handwriting on the wall and would engage in real competition. Much to the disappointment of the department, however, these bidders, apparently secure in what they considered their exclusive privilege, bid a uniform price of $2.90 per ton for delivery at Hampton Roads, which was the main item, and contemplated the acceptance of 600,000 tons. Two bidders named a price of $2.85, but modified it by a reservation that this price would be increased by the amount of any increase granted by the Interstate Commerce Commission to the coal-carrying roads of that section. At the time this reservation was made it was generally hoped by the coal men that an increase of at least 5 cents per ton, and possibly more, would be granted within a very short time, which made the actual cost of the coal under this bid somewhat difficult to determine. A list of these bids is herewith filed, marked "A."

This effort to secure competition having failed, it was directed that all bids be rejected and new specifications made out. In this connection the attention of the committee is called to the Revised Statute 3728, which gives the Secretary of the Navy absolute discretion as to how and by what method he shall purchase coal and leaves him absolutely unhampered by the usual restrictions as to bidding or acceptance of bids.

Mr. ROBERTS. The Secretary of the Navy has a free hand, absolutely, in purchasing coal?

Mr. ROOSEVELT. Yes, sir.

Mr. ROBERTS. He does not have to advertise for bids?

Mr. ROOSEVELT. No, sir.

Mr. ROBERTS. He can make a contract with a dozen people or with one person?

Mr. ROOSEVELT. Yes, sir.

Mr. ROBERTS. As he sees fit?

Mr. ROOSEVELT. Several important modifications were made in the new specifications. The amount to be purchased was to be divided between deliveries at Hampton Roads and Philadelphia, thus bringing the Pennsylvania fields into the competition. This, however, was only optional with the department, and was intended simply to give the Pennsylvania field people a chance to come in for the Navy business, on the sole condition that they had an acceptable coal at an acceptable price. Furthermore, the department also removed the restriction compelling a bidder to be either an owner or the sole selling agent of a mine or of a sufficient amount of the output of the mine to cover the amount on which he bid. This threw it open to all reputable dealers of coal who were financially able to put up the bond and whose moral reputation insured that they would carry out the contract. Another change was made by the insertion of a paragraph, that there might be no misunderstanding, that it was the intention of the department to permit bidders in emergency to substitute for one kind of coal any other kind of coal, provided that it was on the old acceptable list of the Navy. So long as the coal was a coal which had been in the past an approved and acceptable one, under the extremely rigorous rules of the department, it was obviously immaterial to the department from which particular mine the coal came. The point was to secure coal which had been tried, tested, and found to be good coal. In other words, the department had distinctly in mind the possibility of a reputable coal dealer bidding on coal which he was then handling from a particular mine, and then, if he found himself refused that coal by those who had control of the mine, he could go out and get any other coal that was on the Navy acceptable list. The bids under these new proposals, which were opened June 18, show great improvement. As against the $2.90 price at Hampton Roads bids as low as $2.57 were received.

Mr. ROBERTS. For Hampton Roads?

Mr. ROOSEVELT. For Hampton Roads. Philadelphia coal was as low as $2.40. A summary of these prices is shown on the inclosed exhibit, which I will file with the committee. In going over the bids the first and absolute determination of the department was to make sure that no inferior coal was purchased. At the same time we wished to give every bidder an opportunity to have his coal tested, so that if he had discovered a mine or found somebody who owned a mine which had good coal in it, but which was not on the Navy acceptable list, he would have a fair chance to put it on the list if it was good enough.

Mr. ROBERTS. Mr. Secretary, before we get away from your statement of the price bid for Hampton Roads on June 18, in which you say they offered coal as low as $2.57—do you not want to revise that? If you will pardon me, that was at Philadelphia. The lowest bid you got, according to the official report we have, on page 344 of Admiral Griffin's hearing, at Hampton Roads was $2.80, with an alternative bid of $1.40 a ton at the mine, the Government to pay the freight from the mine to Hampton Roads. Now, we do not know what that would figure out. The bidders guarantee that the freight would not be in excess of $1.40, which would make $2.80. The $2.57 bid, you will find, was for Philadelphia delivery.

Mr. ROOSEVELT. I think you are quite correct on that. Two dollars and eighty cents was the lowest at Hampton Roads. Two dollars and fifty-seven cents was the Philadelphia bid.

Mr. ROBERTS. The lowest at Hampton Roads was $2.80?

Mr. ROOSEVELT. Yes, sir.

Mr. CULLOP. Mr. Chairman, I move to strike out the last word, for the purpose of asking the chairman a question. I desire to ask the chairman if the experiments have reached such a stage with the vessels on the Pacific side of the country, where they are using oil as fuel instead of coal, as to demonstrate an advantage in cost, and thereby saving the transportation from the east coast across the continent to the western slope?

Mr. PADGETT. I may state that all of the recent battleships burn oil exclusively.

Mr. CULLOP. On both sides?

Mr. PADGETT. Yes.

Mr. CULLOP. Either Atlantic or Pacific?

Mr. PADGETT. Yes; wherever they are they would burn oil. They are constructed only for oil.

Mr. CULLOP. I would like to ask the gentleman if they do not find that oil is much cheaper fuel than coal, and also that it saves space in the transportation of the fuel?

Mr. PADGETT. It saves space, and also cost in the labor in feeding it into the boiler. As to the cheapness of it, it depends upon whether it is on the Pacific or on the Atlantic. On the Pacific coal is very high and oil is very cheap, while on the Atlantic coal is much cheaper and oil is somewhat higher than on the Pacific, so that there is a difference as to whether the oil and the coal are burned upon one or the other ocean.

Mr. CULLOP. Has there ever been any test made as to how much oil it will take to supply in fuel the equal of a bushel of coal?

Mr. PADGETT. Yes, sir; there have been a number of such tests——

Mr. CULLOP. Can the gentleman give us such particulars?

Mr. PADGETT (continuing). As to their steaming qualities I do not recall, but if the gentleman will look over the hearings of last year he will find, either last year or the year before, we went into it very extensively, and comparative statements were made as to the steaming qualities of coal and oil, one related to the other.

Mr. CULLOP. Well, now, the gentleman spoke of the difference in the cost of coal and oil on the Atlantic Fleet, coal being much cheaper than oil——

Mr. PADGETT. I said that oil on the Pacific coast was cheaper than oil on the Atlantic, and that coal on the Atlantic was much cheaper than coal on the Pacific, and then the ratio of difference between the two is not so great, between oil on the Pacific and the Atlantic and between coal on the Pacific and on the Atlantic.

Mr. CULLOP. What is the difference between the cost of the two with reference to the Atlantic Fleet?

Mr. PADGETT. The difference is not so much because when you take coal on the Atlantic you get coal at about, I believe, $2.80 or $2.85 a ton on salt water, at tidewater, and on the Pacific coast coal costs anywhere from five to eight and a half or nine dollars, which is freight added, depending upon whether it is carried on a sailing vessel or a steam vessel, or the particular conditions that may exist at the time of the shipment.

Mr. CULLOP. What I wanted to know, if I can find out from the gentleman, is, what is the difference, say, between the two with regard to the Atlantic Fleet?

Mr. PADGETT. I can not give that to the gentleman, but there is not a great deal of difference on the Atlantic.

Mr. CULLOP. Coal, however, is cheaper.

Mr. PADGETT. No; oil.

Mr. CULLOP. On the Atlantic?

Mr. PADGETT. On the Atlantic; I am not sure, but coal may be a little bit cheaper on the Atlantic.

Mr. CULLOP. I understood the gentleman to say at the beginning that coal was cheaper on the Atlantic and oil was cheaper on the Pacific.

Mr. PADGETT. No; I said it depends upon where you consider it in making comparisons.

Mr. CULLOP. I should think oil would be the cheaper.

Mr. PADGETT. It may possibly be, but the difference is very close on the Atlantic; I am not prepared to state the exact difference, but we went into that very fully last year or the year before, and the difference between coal and oil on the Atlantic is not very much.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CULLOP. I withdraw the pro forma amendment.

The Clerk read as follows:

BUREAU OF CONSTRUCTION AND REPAIR.

Construction and repair of vessels: For preservation and completion of vessels on the stocks and in ordinary; purchase of materials and stores of all kinds; steam steerers, pneumatic steerers, steam capstans, steam windlasses, and all other auxiliaries; labor in navy yards and on foreign stations; purchase of machinery and tools for use in shops; carrying on work of experimental model tank; designing naval vessels; construction and repair of yard craft lighters, and barges; wear, tear, and repair of vessels afloat; general care, increase, and protection of the Navy in the line of construction and repair; incidental expenses for vessels and navy yards, inspectors' offices, such as photographing, books, professional magazines, plans, stationery, and instruments for drafting room, and for pay of classified force under the bureau; for hemp, wire, iron, and other materials for the manufacture of cordage, anchors, cables, galleys, and chains; specifications for purchase thereof shall be so prepared as shall give fair and free competition; canvas for the manufacture of sails, awnings, hammocks, and other work; interior appliances and tools for manufacturing purposes in navy yards and naval stations; and for the purchase of all other articles of equipage at home and abroad; and for the payment in labor in equipping vessels therewith and manufacture of such articles in the several navy yards; naval signals and apparatus, other than electric, namely, signals, lights, lanterns, rockets, running lights, lanterns and lamps and their appendages for general use on board ship for illuminating purposes, and oil and candles used in connection therewith; bunting and other materials for making and repairing of flags of all kinds; for all permanent galley fittings and equipage; rugs, carpets, curtains, and hangings on board naval vessels, $9,106,127: *Provided further*, That no part of this sum shall be applied to the repair of any wooden ship when the estimated cost of such repairs, to be appraised by a competent board of naval officers, shall exceed 10 per cent of the estimated cost, appraised in like manner, of a new ship of the same size and like material: *Provided further*, That no part of this sum shall be applied to the repair of any other ship when the estimated cost of such repairs, to be appraised by a competent board of naval officers, shall exceed 20 per cent of the estimated cost, appraised in like manner, of a new ship of the same size and like material: *Provided further*, That nothing herein contained shall deprive the Secretary of the Navy of the authority to order repairs of ships damaged in foreign waters or on the high seas, so far as may be necessary to bring them home. And the Secretary of the Navy is hereby authorized to make expenditures from appropriate funds under the various bureaus for repairs and changes on a submarine torpedo boat of the "E" type in a sum not to exceed $100,000: *Provided further*, That the sum to be paid out of this appropriation, under the direction of the Secretary of the Navy, for clerical, drafting, inspection, watchmen (ship keepers), and messenger service in navy yards, naval stations, and offices of superintending naval constructors for the fiscal year ending June 30, 1916, shall not exceed $958,100.

Mr. ROGERS. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 45, line 11, before the proviso, insert the following as an additional proviso:

"*Provided*, That no part of this sum shall be expended for bunting or other materials for making and repairing flags of any kind not manufactured in the United States."

Mr. PADGETT. Mr. Chairman, I make a point of order on the amendment.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. PADGETT. I do not care to argue it if it is not well taken.

Mr. ROGERS. Mr. Chairman, I submit it is a limitation.

The CHAIRMAN. The Chair thinks so, and the Chair overrules the point of order.

Mr. ROGERS. Mr. Chairman, I do not care to discuss this proposed amendment at any length. It seems to me, however—even admitting that it may be proper, in order to get the benefit of the lowest possible prices upon certain commodities, that the Secretary of the Navy should in rare cases have the power to go to the markets of foreign nations for supplies and equipment—that this possibility should not be open in the case of the material for the American flag which flies over our warships or which flies over our navy yards throughout the United States. I think, Mr. Chairman, that it would be repugnant to the sensibilities of every Member of this House, repugnant to the sensibilities of every citizen of this country, to think that any such result should be entailed with the law as it stands to-day. I therefore have suggested this amendment, which will require the Secretary of the Navy, in purchasing material for the flags of our vessels and for use anywhere in connection with the Navy Department, to purchase the material therefor in our home markets. In short, the Secretary ought not to have the power to purchase our flags of European manufacturers.

Mr. PADGETT. Mr. Chairman, I am satisfied that the department and the Secretary of the Navy will use all proper prudence in the purchase of home-manufactured goods. It is poor policy to prohibit competition and permit the home fellow to hold him up and make him pay any price he sees proper.

Mr. ROGERS. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. ROGERS. Does not the gentleman think that material of this sort ought, as a matter of patriotism, to be an exception? And, more than that, does he not think that on a commodity like bunting, that the competition which necessarily will be abundant in the United States will be amply sufficient to avoid any possibility of the holdup to which he refers?

Mr. PADGETT. I do not think we ought to have restrictive legislation to compel us to buy from anybody. I think we ought to have an open market. I hope the amendment will be voted down.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. ROGERS].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. ROGERS. Division, Mr. Chairman.

The committee divided; and there were—ayes 26, noes 40.

So the amendment was rejected.

Mr. MANN. I will offer an amendment to which I think the gentleman will agree. I move to strike out the word "further," in line 11, page 45.

Mr. PADGETT. That is correct, sir.

The CHAIRMAN. Without objection, the amendment will be agreed to.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For repairs and improvement of machinery and implements at plant at navy yard, Mare Island, Cal., $15,000.

Mr. CURRY. Mr. Chairman, I wish to offer an amendment.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 47, line 2, after the figures "$15,000," insert:

"For the purchase of a floating crane, $450,000.

"For the purchase of a boring mill, lathes, and planers, $125,000."

Mr. PADGETT. Mr. Chairman, I make the point of order against that. That has been universally held subject to a point of order. We have had the question up a number of times.

Mr. CURRY. I have no doubt it is subject to a point of order, but I would like to have the gentleman reserve it for half a minute.

Mr. PADGETT. I will reserve it for five minutes.

Mr. CURRY. I recognize that the amendment is subject to a point of order. I had hoped, however, it would not be raised. The Mare Island Navy Yard is the only one, public or private, on the Pacific coast that is prepared to construct a dreadnaught, and as a matter of efficiency, economy, and national defense it ought to be equipped with a floating crane and machinery, as specified in my amendment.

Mare Island does better work, at less cost, than any other yard in the country. All construction work assigned to her is on her lower estimates, submitted in competition with other yards, public and private. The work done at Mare Island is always done within the estimate, and the yard never asks for a deficiency.

Mare Island was recently awarded a contract to construct one of the torpedo-boat destroyers provided for in the last naval appropriation bill. This destroyer will be the first constructed in a Government yard. Contracts for building six new destroyers authorized in the last naval appropriation bill, to cost $4,436,000 in all, were recently let by Secretary of the Navy Daniels. The Fore River Shipbuilding Co., of Fore River, Mass., received two contracts at $795,000 each. The Bath Iron Works, of Bath, Me., two at $800,000 each; the Cramp Shipbuilding Co., of Philadelphia, Pa., one at $820,000; and the Mare Island Navy Yard, one at $626,000. The cost limit fixed by Congress was $925,000. Mare Island's estimate was $139,000 lower than the next lowest bid.

If Congress will adopt my amendment and equip Mare Island with a floating crane and the machinery specified in that amendment, Mare Island will be able to save all they cost out of the appropriation to construct one battleship, if such a ship should be assigned to her to build; and if she were so equipped, there would no longer be any excuse for not permitting the yard to submit estimates for the construction of a dreadnaught.

As a point of order has been raised against the amendment, and the point is well taken, I do not wish to detain the committee further at this late hour. I shall not further discuss it.

The CHAIRMAN. The gentleman from Tennessee makes the point of order against the amendment, and the Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

BUREAU OF STEAM ENGINEERING.

Engineering: For repairs, preservation, and renewal of machinery, auxiliary machinery, and boilers of naval vessels, yard craft, and ships' boats; distilling and refrigerating apparatus; repairs, preservation, and renewal of electric interior and exterior signal communications and all electrical appliances of whatsoever nature on board naval vessels, except range finders, battle order and range transmitters and indicators, and motors and their controlling apparatus used to operate machinery belonging to other bureaus; maintenance of coast signal service, including the purchase of land as necessary for sites for radio shore stations; equipage, supplies, and materials under the cognizance of the bureau required for the maintenance and operation of naval vessels, yard craft, and ships' boats; purchase, installation, repair, and preservation of machinery, tools, and appliances in navy yards and stations; pay of classified force under the bureau; incidental expenses for naval vessels, navy yards and stations, inspectors' offices, the engineering experiment station, such as photographing, technical books, and periodicals, stationery, and instruments; instruments and apparatus, supplies, and technical books and periodicals necessary to carry on experimental and research work in radiotelegraphy at the naval radio laboratory: *Provided*, That the sum to be paid out of this appropriation, under the direction of the Secretary of the Navy, for clerical, drafting, inspection, and messenger service in navy yards, naval stations, and other United States inspectors of machinery and engineering material for the fiscal year ending June 30, 1916, shall not exceed $650,000: *Provided further*, That the sum to be paid out of this appropriation for the purchase of land for sites for radio shore stations shall not exceed $50,000: *Provided further*, That the total expenditures under this appropriation at the naval radio laboratory shall not exceed $5,000; in all, engineering, $7,727,975.

Mr. MANN. Mr. Chairman, I reserve a point of order on the paragraph. I would like to ask the gentleman from Tennessee whether the act providing for the radio stations authorized the purchase of land; and if so, what is the limit of cost?

Mr. PADGETT. The limit of cost is fixed at $1,000,000. Is the gentleman speaking of high-power stations?

Mr. MANN. I am speaking of the expenditure of $50,000 for the purchase of land for sites for radio shore stations.

Mr. PADGETT. No, sir; there is no limit of cost fixed.

Mr. MANN. There is no authority granted, then. What need is there to spend $50,000 now for these sites? How long have we carried this $50,000 appropriation for the purchase of land, and how much of it has been expended?

Mr. PADGETT. I think it has been in there for several years.

Mr. MANN. They have had no occasion for it, have they?

Mr. PADGETT. I know of none. I know of no purpose to purchase any; but it has been in there so that if any emergency arose, and they needed it, they would have it.

Mr. MANN. Mr. Chairman, I make the point of order on the language on page 47, lines 16 and 17, as follows:

Including the purchase of land as necessary for sites for radio shore stations.

And also the language on page 48, commencing in line 10:

Provided further, That the sum to be paid out of this appropriation for the purchase of land for sites for radio shore stations shall not exceed $50,000.

The CHAIRMAN. Does the gentleman from Tennessee care to be heard on the point of order?

Mr. PADGETT. I do not know whether there was any authorization other than that which has been carried in the appropriation bills or not.

The CHAIRMAN. If there is not, the Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

High-power radio stations: Toward the purchase and preparation of necessary sites, purchase and erection of towers and buildings, and the purchase and installation of machinery and apparatus of high-power radio stations (cost not to exceed $1,500,000), to be located as follows: One in the Isthmian Canal Zone, one on the California coast, one in the Hawaiian Islands, one in American Samoa, one on the island of Guam, and one in the Philippine Islands, $400,000, to be available until expended.

Mr. MANN. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Illinois reserves a point of order on the paragraph.

Mr. MANN. How many of these stations have been provided out of the $400,000 that was appropriated? Is that the amount?

Mr. PADGETT. No, sir. There has been $800,000 appropriated.

Mr. MANN. Four hundred thousand dollars last year and $400,000 the year before?

Mr. PADGETT. Yes. There has been $800,000 appropriated altogether, and this appropriation here of $400,000——

Mr. MANN. How far have they progressed?

Mr. PADGETT. The one at Panama is about complete, and they have made progress with the others with reference to towers. They have procured land in California for the one to be located there. There was a question of title. I understand that has been cleared up, and they now have the land.

Mr. MANN. When we passed the bill authorizing the construction of these high-power radio stations the Navy Department stated, and so did the Committee on Naval Affairs, that with a million dollars they could erect one on the Canal Zone, another on the California coast, another on the Hawaiian Islands, another on the Samoan Islands, another on the Island of Guam, and another on the Philippine Islands. Now, how far have they got toward erecting these stations with the $800,000 which has been appropriated?

Mr. PADGETT. As I said, the one at Panama is about complete.

Mr. MANN. It was a long ways from being complete in November. I saw it.

Mr. PADGETT. I stated just what I understood to be the fact.

Mr. MANN. It was a long ways from being completed at that time.

Mr. PADGETT. The others are in course of construction, but I do not know what percentage of completion has been attained. It is true that when this matter was taken up several years ago, under the administration of Mr. Meyer, it was estimated or represented that $1,000,000 would be sufficient to do the work, and we fixed the limit of cost at $1,000,000. But it was a matter that was largely experimental. We had never undertaken anything of that kind before, and we find that the cost is much greater than was estimated at that time.

Mr. MANN. I remember when the bill was before the House. I stated then, not knowing much about the subject, but evidently knowing more than the Navy Department did, that they could not construct all these high-power radio stations for a million dollars, and I was chided by the members of the Committee on Naval Affairs, who frankly and kindly informed me that I knew nothing about it and that the Navy Department was thoroughly qualified to pass upon it.

Mr. PADGETT. I do not remember that.

Mr. MANN. I do. The gentleman was not attacked as I was.

Mr. PADGETT. The gentleman will remember that I was not the guilty party.

Mr. MANN. I am not sure of that. I have not the RECORD. But I know that if the gentleman did, he did it most graciously.

Mr. PADGETT. I think the gentleman will bear me witness that I never chided him at all.

Mr. MANN. The gentleman frequently does, but I do not criticize that. I may have needed it. What is the estimate now?

Mr. PADGETT. I understand they say a million and a half dollars.

Mr. MANN. They had $800,000, and the gentleman says they have nearly finished the Canal Zone. That was far from being the case in November. It may be nearly finished, but I do not know. That is one out of six or seven.

Mr. PADGETT. There has been considerable work on this, and yet not all the money has been expended on the others. But they need this appropriation.

Mr. MANN. How far have they progressed with the one on the California coast?

Mr. PADGETT. As I stated, they have secured the land and given orders for the construction of the steel.

Mr. MANN. That is a long way toward the construction of three wireless towers, 600 feet high each. How far have they gone with the one on the Hawaiian Islands?

Mr. PADGETT. I believe they have given orders, but how far it is completed I do not know.

Mr. MANN. How far have they gotten with the one on the American Samoan Islands?

Mr. PADGETT. I do not think they have done anything with that.

Mr. MANN. And how far have they gotten with the one on the Island of Guam?

Mr. PADGETT. I do not know.

Mr. MANN. Does the gentleman know how far they have gone with the one on the Philippine Islands?

Mr. PADGETT. They have given orders for a number of these. I do not know whether they have given the order for the one on the Philippine Islands.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. MANN. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. MANN. As I understand, they have had $800,000 appropriated up to date, and they have commenced the work on the one on the Canal Zone, and have obtained land at San Diego, Cal., and have thought about giving orders for some of the others. Now, if they can do only that much with $800,000, how near will they come to completing six of them with a million and a half dollars?

Mr. PADGETT. I said they had given orders for some of the others. I did not say they thought about it.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. STAFFORD. Is it not a fact, as disclosed by the hearings on page 328, in the testimony of Admiral Griffin, that the reason why they have not expended any money or gone ahead contracting for these additional stations is to let them all at one time, so as to get a better contract?

Mr. PADGETT. I said that they had not expended the money.

Mr. STAFFORD. They have not even let the contracts.

Mr. PADGETT. Not all of them.

Mr. STAFFORD. I will read to the gentleman to refresh his memory:

We wanted to let contracts at the same time for towers at three stations, in order to get the benefit of the reduced price of getting a large contract.

Mr. PADGETT. Yes.

Mr. STAFFORD. And a close reading of the hearing shows that they have not let the contract, and have only proceeded with the obtaining of the title at San Diego, and that only recently, because there was some difficulty about obtaining the title to that site.

Mr. PADGETT. That is true.

Mr. MANN. I make a point of order against the paragraph.

The CHAIRMAN. The Chair understands that the appropriation is authorized by law.

Mr. PADGETT. That is correct.

Mr. MANN. Authorized by law to the extent of $1,000,000, but this changes the authorization to $1,500,000, and hence is legislation, and subject to a point of order.

Mr. PADGETT. I hope the gentleman will not make the point of order. It will tie this up.

Mr. MANN. I know that "hope springs eternal in the human breast." [Laughter.]

Mr. PADGETT. This is a matter that is very important.

Mr. MANN. I think we ought to have some knowledge of what they are going to cost.

Mr. STAFFORD. Will the gentleman reserve the point of order?

Mr. MANN. No; I make the point of order.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

Current and miscellaneous expenses, Naval Academy: Text and reference books for use of instructors; stationery, blank books and forms, models, maps, and periodicals; apparatus and materials for instruction in physical training and athletics; expenses of lectures and entertainments not exceeding $1,000, including pay and expenses of lecturer; chemicals, philosophical apparatus and instruments, stores, machinery, tools, fittings, apparatus, and materials for instruction purposes, $28,000.

Mr. FITZGERALD. Mr. Chairman, I reserve a point of order for the purpose of asking a question. What is the purpose of inserting the words:

Expenses of lectures and entertainments not exceeding $1,000, including pay and expenses of lecturer.

Mr. PADGETT. On this subject the superintendent made the following statement:

The CHAIRMAN. But what do you estimate the entertainments would cost?

Capt. FULLAM. Probably not more than $1,000 a year at the outside. I, as superintendent, would not myself, under any circumstances, permit the expenditure to be very large. I think we have two lecturers now provided for, and I believe we want to get one college glee club down there. I do not want to try to make the wording of the appropriation cover things which are not specifically provided for.

Mr. ROBERTS. You can get the college glee club by merely paying their expenses?

Capt. FULLAM. Yes sir; that is all.

This is to provide entertainment of the kind indicated for the young men.

Mr. FITZGERALD. I withdraw the point of order.

The Clerk read as follows:

Purchase, binding, and repair of books for the library (to be purchased in the open market on the written order of the superintendent), $2,500: *Provided*, That section 3648, Revised Statutes, shall not apply to subscriptions for foreign and domestic periodicals to be paid for from this appropriation.

Mr. FITZGERALD. Mr. Chairman, I make a point of order against the proviso. I wish to say to the gentleman from Tennessee that the legislative bill has a provision that applies to all such things, and this will not be necessary here.

Mr. PADGETT. Is it taken care of in the legislative bill?

Mr. FITZGERALD. Yes.

Mr. PADGETT. All right.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

MARINE CORPS.

Pay, Marine Corps: For pay and allowances prescribed by law of officers on the active list, including clerks for assistant paymasters, six; and for the following additional officers hereby authorized, the President is hereby authorized to appoint, by and with the advice and consent of the Senate, the senior colonel of the line on the active list of the Marine Corps to be a brigadier general; one colonel, one lieutenant colonel, one major, five captains, one captain assistant quartermaster, one captain assistant paymaster, five first lieutenants, and five second lieutenants: *Provided*, That the increased compensation as now fixed by law for the Marine Corps for foreign shore service shall hereafter be paid to the officers and enlisted men of that corps while on sea duty, in the same manner and under the same conditions as is provided by the act approved May 13, 1908, for officers of the Navy; in all, $1,060,604.50: *Provided further*, That hereafter appointments to the Marine Corps which may be made from civil life shall be made only after such prospective appointees shall have served a probationary period of two years, as nearly as may be practicable, as acting second lieutenants, which grade is hereby authorized and established. Candidates for appointment from civil life to such grade shall be between the ages of 18 and 22 years at the time of appointment, which appointment shall be made by the Secretary of the Navy upon the recommendation of a marine examining board to be constituted as now provided by law, and shall further be revokable at any time during the probationary period at the discretion of the Secretary of the Navy: *Provided further*, That the rank, pay, and allowances of acting second lieutenants shall be the same as for second lieutenants, and said acting second lieutenants shall be subject to all laws governing pensions and other gratuities in the Marine Corps, but shall not be entitled to retirement or retirement pay unless the cause thereof is the result of or incident to active duty other than at the school at which they may be stationed to receive their instructions as officers of the corps. Said probationary period shall end two years from July 1 of the calendar year of original entry, and the number of appointments to said corps to be made in said grade in any calendar year shall be the number required to fill existing vacancies and prospective vacancies by operation of law in the authorized strength of the commissioned personnel of said corps in the same calendar year.

Mr. MANN. I reserve a point of order on the paragraph.

Mr. MOORE. Mr. Chairman, earlier in the bill a provision was stricken out which contemplated the expenditure of $200,000 at Norfolk and $200,000 at Mare Island, which was reappropriated out of an appropriation of $400,000 found not to be necessary for the erection of barracks at the Isthmus of Panama. It seems to me this is the proper place to make an inquiry——

Mr. PADGETT. That went out on a point of order.

Mr. MOORE. I wish to inquire whether there is any intent on the part of the department to change its bases for the Marine Corps? There have been frequent reports as to where the central base of the Marine Corps was to be. The provision stricken out on the point of order would seem to indicate an intent to centralize the Marine Corps at two points—Norfolk and Mare Island.

Mr. PADGETT. No; as I remember, the principal base is to be at Philadelphia.

Mr. MOORE. That is my understanding, and that is the common report. It has been so announced.

Mr. PADGETT. There is no intention to interfere with that.

Mr. MOORE. Why was it necessary to take the $400,000 from Panama and put it at Norfolk and Mare Island?

Mr. PADGETT. Because they must have marines at both those places in addition to those kept at Philadelphia, and they needed barracks at those places to accommodate the men who must be kept there.

Mr. MOORE. Would the expenditure of the money in the erection of barracks at these two places mean a drawing upon any other of the bases of the Marine Corps—as, for instance, at Philadelphia?

Mr. PADGETT. I think not Philadelphia. It means that the department is determined to withdraw them from Boston and from smaller places.

Mr. MOORE. Is that due to strategic or climatic conditions?

Mr. PADGETT. We maintain so many and can concentrate them at the most desirable places where they can be used.

Mr. FITZGERALD. Does not the department consider Philadelphia a desirable place?

Mr. MOORE. It is the most desirable place for marines, according to the testimony of those who go to Philadelphia in the marine service. When a man gets an opportunity to leave New York and go to Philadelphia he throws up his hands with delight and satisfaction. [Laughter.] I would not like to see Philadelphia drawn on to build up any other yard.

Mr. GOULDEN. I will agree with the gentleman's assertion if he goes there when he wants to sleep. [Laughter.]

Mr. MOORE. I know we have aroused New York, but I was trying to get information from the chairman of the committee whether or not there was any intent to build up this yard at the expense of other places?

Mr. PADGETT. The gentleman can realize that the marines on the Pacific coast——

Mr. MOORE. Are they using tents or buildings?

Mr. PADGETT. Tents and improvised wooden shanties that are but temporary.

Mr. MOORE. The gentleman knows that we have some cheap wooden structures at the Philadelphia yard?

Mr. PADGETT. Yes; but a few years ago we made an appropriation to build some handsome barracks there.

Mr. MOORE. And it is not the intent to reduce the work already done, to deplete the force?

Mr. PADGETT. I never heard of any such intention.

Mr. BORLAND. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. BORLAND. What is the meaning of the provision about future appointments to the Marine Corps?

Mr. PADGETT. In the Marine Corps when a man is appointed a lieutenant he gets his commission at once and becomes a commissioned officer. If after he is tried he is found to be lacking in military adaptability or efficiency there is no way to get him out except to prefer charges and have him court-martialed. This establishes a probationary period during which time the man is tested and tried. If he is found all right he gets his commission; if he is not found all right he does not go into the Navy. It is a probationary period.

Mr. BORLAND. It says appointments made hereafter from civil life. Are they not all made from civil life?

Mr. PADGETT. I think so; they come up from the ranks and from outsiders. Examinations are held.

Mr. BORLAND. None of them are appointed from the academy directly?

Mr. PADGETT. No.

Mr. BORLAND. But some who have been in the academy seek employment?

Mr. PADGETT. Yes. Last year or the year before there was a provision that they could be assigned to the Staff Corps or the Marine Corps and they can be assigned, but the great bulk of them come up from civil life.

Mr. BORLAND. This speaks of going to school while in the probationary period.

Mr. PADGETT. Yes; we have a school now—the school of application, I think it is called. They go there and are trained.

Mr. BORLAND. How long is the course?

Mr. PADGETT. One year.
Mr. BORLAND. It is a graduate school, an officers' school?
Mr. PADGETT. Yes.
Mr. BORLAND. Where is it located?
Mr. PADGETT. Near the city, I think.
Mr. BORLAND. Is there more than one of these schools?
Mr. PADGETT. Only one that I know of. I am informed that I am mistaken, that the school has been removed to Port Royal, N. C., to the station we used to have there.
Mr. BORLAND. Why to Port Royal, when we are arranging barracks at Norfolk and Mare Island as the place for marines?
Mr. PADGETT. We had Port Royal and we wanted some use for it, and we used it for that purpose. They had the building. It is only a school for officers.
Mr. BORLAND. Would not it be better to have the service school at a point where the marines have their base?
Mr. PADGETT. These young fellows have no command and have nothing to do with the enlisted personnel of the marines; they are going to school to receive instruction.
Mr. BORLAND. The final result of this is that if a young man is appointed from civil life, after he has passed an examination physical and mental, if he does not turn out to be fit he may be dismissed by the Secretary of the Navy and on the judgment of the Secretary of the Navy?
Mr. PADGETT. Or of a board.
Mr. FITZGERALD. Will the gentleman state how many officers this adds to the Marine Corps?
Mr. PADGETT. Twenty-one, I believe.
Mr. FITZGERALD. It creates a new rank on the active list?
Mr. PADGETT. It creates a new rank of brigadier general.
Mr. FITZGERALD. Why?
Mr. PADGETT. Because it was thought that the Marine Corps service has become of that importance and size that there should be a brigadier general in command.
Mr. FITZGERALD. How many men are there in the Marine Corps?
Mr. PADGETT. About 10,000.
Mr. FITZGERALD. There is a proviso which gives to the officers and enlisted men while on sea duty an extra compensation.
Mr. PADGETT. That is the 10 per cent increase for sea pay.
Mr. FITZGERALD. Do enlisted men of the Navy get 10 per cent increase while at sea?
Mr. PADGETT. The officers do.
Mr. FITZGERALD. Do the enlisted men?
Mr. PADGETT. I understand not.
Mr. FITZGERALD. Why do you give the enlisted men in the Marine Corps 10 per cent increase while on sea duty?
Mr. PADGETT. They are paid so much less than the men in the Navy.
Mr. FITZGERALD. But they need the money more on land than at sea. That has been my experience with these chaps in the Navy. They can not spend the money while at sea.
The CHAIRMAN. The time of the gentleman from Missouri has expired.
Mr. FITZGERALD. I thought I had the floor in my own right.
Mr. BORLAND. I had surrendered the floor, Mr. Chairman.
The CHAIRMAN. The gentleman from New York is recognized.
Mr. FITZGERALD. Mr. Chairman, if we give the enlisted men in the Marine Corps 10 per cent increase of pay when they serve at sea, will not the argument be made that we ought to give the enlisted men in the Navy 10 per cent increase when they serve at sea?
Mr. PADGETT. The enlisted men in the Navy get more pay.
Mr. MANN. But they really serve.
Mr. PADGETT. And these men serve, too. The marines on the ships do the regular duties that the bluejackets do.
Mr. FITZGERALD. Why do you not fix their pay the same?
Mr. PADGETT. Because the law fixes the pay of marines the same as in the Army and not the Navy. They have the same pay as the Army. I want to call attention to a condition. I can give you an illustration. In the Mexican situation the marines were ordered down there, and went on two ships. The marines from one of the ships landed, and under existing law they received 10 per cent additional pay. That is the existing law. The marines from the other ship did not land, but stayed anchored out in sight of the land. Those men did not get the additional pay, although they were in the expedition and serving and were there for the same purpose as the men who went ashore.
Mr. FITZGERALD. That might be an isolated example. But how about the members of the Marines Corps who are put on ships and go out to sea for maneuvers?
Mr. PADGETT. This is service. While they are serving on the ship they give them the per cent increase for sea pay.
Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield?
Mr. FITZGERALD. Yes.
Mr. ROBERTS of Massachusetts. I would like to cite to the gentleman from New York a still more glaring instance of the inequality of pay now existing in the Marine Corps. Take the same instance, the occupation of Vera Cruz. The marines who were sent down by transports and landed at Vera Cruz received foreign-service pay. The marines who were stationed on ships that were sent to Vera Cruz, and who were taken from the ships and who fought side by side with the marines who came down on the transports, did not get the 10 per cent increase, because they were held under the ruling of the Comptroller of the Treasury not to be on foreign service.
Mr. FITZGERALD. It is not much excuse to give anybody increased compensation because of foreign service, because they spend less on that service than when at home.
Mr. ROBERTS of Massachusetts. Whether it is an excuse or not, there is an instance of where two men in the Marine Corps were killed at Vera Cruz. One of them went down on a transport and the other on a battleship. They were both fighting in the same battle. Both were killed, and the one who went on the transport was entitled to 10 per cent extra pay, and those dependent on him to get a gratuity, and the other one, who went on the battleship, but who was killed there fighting with his comrade in the same battle, did not get the 10 per cent, and those dependent upon him did not get the gratuity.
Mr. FITZGERALD. That can easily be taken care of.
Mr. ROBERTS of Massachusetts. This places the men in the Marine Corps on the same footing in regard to pay——
Mr. FITZGERALD. If I understand correctly, the compensation of the enlisted men of the Marine Corps is fixed the same as the compensation of the enlisted men in the Army.
Mr. PADGETT. The Infantry in the Army.
Mr. FITZGERALD. Yes; and this is a step to give them the pay of enlisted men in the Navy.
Mr. PADGETT. No; it does not equal the pay of the enlisted men, but it gives 10 per cent additional for foreign-service pay.
Mr. ROBERTS of Massachusetts. It gives them foreign-service pay when they are on board ship, that is the purpose of it.
Mr. MANN. May I ask the gentleman where is the school now for officers in the service in the Marine Corps?
Mr. PADGETT. I just stated it is at Port Royal.
Mr. ROBERTS of Massachusetts. It is at Norfolk.
Mr. MANN. I am willing to deal with either fair charmer. Is there a school?
Mr. PADGETT. Yes; there is a school, and young men go there. I was personally under the impression that it was near Washington here, but the Clerk stated that it had been removed to Port Royal.
Mr. MANN. Then I understand we send a boy to Annapolis or West Point and train him before he goes, and also he is allowed $50 a month or something of that sort in addition for his keep, possibly, and——
Mr. PADGETT. These are boys who have never attended either of those places.
Mr. MANN. I understand that, although that might not be the case; but under this provision and under existing circumstances you pay a man a second lieutenant's salary—full pay—and then allow fogey pay based upon it and propose to give him an education that otherwise you give to the boys at these other schools. Is that correct?
Mr. ROBERTS of Massachusetts. No.
Mr. PADGETT. No.
Mr. MANN. That is correct; I do not care which one says no. They commission a man a second lieutenant, as is proposed, and give some instructions as to the duties he performs——
Mr. ROBERTS of Massachusetts. That is a different statement.
Mr. MANN. That is the same statement I made before.
Mr. ROBERTS of Massachusetts. Oh, no.
Mr. MANN. If I did not know any more about this I would not interrupt——
Mr. ROBERTS of Massachusetts. The gentleman does not seem to. The two statements do not jibe.
Mr. MANN. My statements not only jibe but they are true; and if some of the other gentlemen would be careful and

accurate with their statements they would vastly improve the information of the House. [Laughter.] Why do not they give an examination to these men so that they can go to work in the Marine Corps—take the boys out of the military schools of the country like they do in the Army?

Mr. PADGETT. Young men have to be trained, and if they were trained at the beginning they would not have to go to school; and a great many come in who do not have that training.

Mr. MANN. There is no necessity for a great many coming in who do not have any training. There are a lot of military schools in the country that are very good, indeed, and turn out boys well equipped to act as commissioned officers either in the Marine Corps or in the Army, and sometimes just as well if not better qualified than they are when they come out of West Point. Why do not they appoint those instead of starting a new school?

Mr. PADGETT. This school has been running for years.

Mr. MANN. Well, making the point of order will not affect it, and that will relieve my conscience; so I make the point of order on all of the paragraph commencing with the word "*Provided*," on page 54. I do not make the point of order against the increase in the officers, and I except the language of line 7, "in all, $1,060,604.50."

Mr. FITZGERALD. Mr. Chairman, I make the point of order commencing with the word "six," line 19, page 53.

Mr. MANN. The two points of order would cover everything contained in the paragraph except the appropriation.

Mr. FITZGERALD. The appropriation can be put in.

Mr. MANN. Except the language in line 7, page 54, "in all, $1,060,604.50."

Mr. PADGETT. Where does the gentleman make the point of order to?

The CHAIRMAN. The gentleman from New York makes the point of order on all the language of the paragraph, the Chair understands, after the word "six," line 19, page 53, down to and including the word "Navy."

Mr. MANN. "Lieutenants," in line 1. I am perfectly willing to make a point of order on all of them.

The CHAIRMAN. The gentleman from Illinois makes a point of order on the proviso.

Mr. MANN. Oh, no; the balance of the paragraph, except the appropriation, "in all, $1,060,604.50."

The CHAIRMAN. Does the gentleman from Tennessee [Mr. PADGETT] desire to be heard on the point of order?

Mr. PADGETT. No, sir; it is subject to a point of order.

The CHAIRMAN. The Chair sustains both points of order.

Mr. MANN. Now, Mr. Chairman, I wish to offer an amendment to strike out the word "six" and insert "five." There is no necessity for that extra one if this one goes out.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 53, line 19, strike out the word "six" and insert "five."

The CHAIRMAN. Without objection, the amendment will be agreed to.

There was no objection.

Mr. PADGETT. Now, I offer another amendment. After the word "five" insert the words "in all, $980,799.50." The appropriation in the bill was for this increased amount.

The CHAIRMAN. The Clerk will report the amendment.

Mr. FITZGERALD. Mr. Chairman, has the other amendment been adopted?

The CHAIRMAN. It has. The Clerk will report the amendment offered by the gentleman from Tennessee.

The Clerk read as follows:

Page 53, line 19, after the word "five" insert the figures "$980,799.50."

Mr. MANN. Mr. Chairman, I would like to ask the gentleman a question concerning this amendment. Where is there any need of an increase of this amount which for this year was $951,640? With the same number of men in the service why do you increase the amount from that to $985,000, which is an increase of about $34,000?

Mr. PADGETT. Twenty-nine thousand dollars. This is an increase of $29,000, and it is made up of four different items, three of them involving increases and one of them involving a decrease as compared with the corresponding items of last year. Then there is an increase of $50,070 for longevity of officers now in the service. As the officers of the corps grow older in the service, they become entitled to this longevity increase and it must be provided for.

Mr. MANN. It is all right if that is the reason.

Mr. PADGETT. And it goes on to explain the items.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee.

The question was taken, and the amendment was agreed to.

Mr. PADGETT. I understood the point of order took out all of the paragraph after the word "six," and did not leave in this amount of $1,000,000 and more?

The CHAIRMAN. I understood the gentleman from Tennessee desired to change the amount.

Mr. PADGETT. I did. I wanted to be sure that was done.

The CHAIRMAN. Strike out the amount where it now is and insert the provision the gentleman has just sent up?

Mr. PADGETT. That is correct.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For pay of officers prescribed by law, on the retired list: For 3 major generals, 4 brigadier generals, 6 colonels, 5 lieutenant colonels, 10 majors, 19 captains, 12 first lieutenants, 4 second lieutenants, and 1 paymaster's clerk, and for officers who may be placed thereon during the year, including such increased pay as is now or may hereafter be provided for retired officers regularly assigned to active duty, $189,702.50.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I would like to ask the gentleman from Tennessee or the gentleman from Massachusetts, or some other place, how many men there are on the active list of the Marine Corps who are brigadier generals.

Mr. PADGETT. We have no brigadier generals in the Marine Corps.

Mr. MANN. How many are there on the active list who are major generals?

Mr. PADGETT. There is one who has that rank while serving as commandant.

Mr. MANN. Here is a peculiar situation, especially in view of the action of the committee to-day authorizing the President to restore Tom, Dick, Harry, and all the other names to the active list in the Navy long enough to be promoted and then put on the retired list at high pay. They have no brigadier general in the Marine Corps. One major general in the Marine Corps, but one major general while he is commandant. And we have three major generals on the retired corps and four brigadier generals on the retired corps, making several officers on the retired list by passing through one place. That is "going some" for you.

Mr. PADGETT. Will the gentleman yield?

Mr. MANN. For information.

Mr. PADGETT. These men were put on by special act of Congress for special war service.

Mr. MANN. That does not help the matter any.

Mr. PADGETT. But it relieves the appropriation committee.

Mr. MANN. The appropriation committee ought not to put these men on the retired list, although they brought in a proposition to-day to put a whole lot more on the retired list under similar circumstances, and the number of men who will be on the retired list as rear admirals and captains will drive you crazy unless the President is able to withstand the temptation presented to him by the pressure brought to bear upon him by this body and other bodies in the United States.

Mr. PADGETT. I am not prepared to dispute any of those statements.

Mr. MANN. Seven retired officers on the retired list, at three-fourths pay, all passing through the same conduit, which, when it is full, blocks up any entrance or outlet. It is a great scheme, a fine thing.

Mr. FITZGERALD. How about trying it on Members of Congress?

Mr. MANN. Well, the gentleman from New York must be modest about that, because if we would put anybody up as major general it would be the gentleman from New York, and I hope he would not be retired in that place soon. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Pay of enlisted men, active list: Pay of noncommissioned officers, musicians, and privates, as prescribed by law, and the number of enlisted men shall be exclusive of those undergoing imprisonment with sentence of dishonorable discharge from the service at the expiration of such confinement, and for the expenses of clerks of the United States Marine Corps traveling under orders, and including additional compensation for enlisted men of the Marine Corps regularly detailed as gun captains, gun pointers, mess sergeants, cooks, messmen, shipmen, or holding good-conduct medals, pins, or bars, including interest on deposits by enlisted men, post-exchange debts of deserters, under such rules as the Secretary of the Navy may prescribe, and the authorized travel allowance of discharged enlisted men and for prizes for excellence in gunnery exercise and target practice, both afloat and ashore: *Provided*, That the number of gunnery sergeants heretofore authorized is increased by 20; that the number of sergeants heretofore authorized is increased by 20; that the number of corporals heretofore authorized is increased by 70; and that the number of privates heretofore authorized is decreased by 110; in all, $3,062,764.05.

Mr. CULLOP. Mr. Chairman, I desire to make a point of order against the proviso, or reserve it, at least.

Mr. ROBERTS of Massachusetts. Mr. Chairman, does the gentleman intend to insist upon his point of order?

Mr. CULLOP. Certainly.

Mr. ROBERTS of Massachusetts. Then, if the gentleman intends to insist, there is no object in explaining why it is essential to have this increase among the noncommissioned officers. It is essential and necessary in the military operations of the Marine Corps.

Mr. CULLOP. I am going to insist on the point of order.

Mr. PADGETT. It is not subject to a point of order.

Mr. CULLOP. I think it would make it top-heavy to increase the number of officers and decrease the number of men.

Mr. PADGETT. It is not subject to a point of order, in my opinion.

The CHAIRMAN. The Chair will hear the gentleman from Tennessee.

Mr. PADGETT. The law provides that the Marine Corps shall be one-fifth of the Navy, as Congress may provide. It is not up to the limit of one-fifth. These are enlisted men. They are not commissioned. They are simply warrant officers, and they are part of the enlisted personnel of the Marine Corps. The law fixes the size of the Marine Corps at one-fifth of the Navy, as Congress may authorize, so that it is in order for Congress to authorize it.

The CHAIRMAN. The Chair would like to ask the gentleman from Tennessee whether the Marine Corps is all one corps, or whether it is divided up into battalions, and how it is organized?

Mr. PADGETT. It is all one corps.

The CHAIRMAN. Under the law creating that corps how many sergeants does the law provide? Does this provision in the bill increase the number of sergeants authorized by law?

Mr. PADGETT. No; I think not.

Mr. FITZGERALD. It so says on the face of it.

Mr. PADGETT. It says that hereafter the number of enlisted men in the United States Marine Corps shall be such as the Congress may from time to time authorize.

The CHAIRMAN. That authorizes Congress to fix the number of enlisted men.

Mr. PADGETT. These are enlisted men.

The CHAIRMAN. That is true; but you are providing for sergeants and noncommissioned officers. They are enlisted men, it is true, but the Chair is arguing from what he knows of the Army, where each organization in the Army has so many sergeants and so many corporals, and the Chair assumes that it must be true with respect to the Marine Corps.

Mr. CULLOP. Now, Mr. Chairman, in each of these it increases the number over that now authorized. It must be authorized by law.

The CHAIRMAN. The Chair takes it that there must be some law that authorizes the number of gunnery sergeants in the Marine Corps.

Mr. PADGETT. I was looking to see if this act provided a limitation upon those specific ones. It provides for the number of sergeants.

The CHAIRMAN. It provides how many sergeants there shall be?

Mr. PADGETT. Yes.

The CHAIRMAN. Is this an increase over what is provided?

Mr. PADGETT. It is.

The CHAIRMAN. The Chair sustains the point of order.

Mr. ROBERTS of Massachusetts rose.

Mr. PADGETT. Mr. Chairman, I desire to offer an amendment first, to correct a total.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I desire to offer this amendment first.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

Mr. ROBERTS of Massachusetts. It is in line 9, page 56, after the word "ashore," to insert the following: "*Provided*, that the number of privates heretofore authorized is increased by 110, of whom 20 may be promoted to gunnery sergeants, and 20 may be promoted to sergeants, and 70 may be promoted to be corporals."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Massachusetts [Mr. ROBERTS].

The Clerk read as follows:

Provided, That the number of privates heretofore authorized is increased by 110, of whom 20 may be promoted to gunnery sergeants, 20 may be promoted to sergeants, and 70 may be promoted to be corporals.

Mr. CULLOP. Mr. Chairman, I make a point of order on that.

The CHAIRMAN. The Chair sustains the point of order. The gentleman from Tennessee [Mr. PADGETT] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 56, line 15, strike out "$3,062,764.05" and insert "$3,046,648.05."

Mr. FITZGERALD. The estimate was $2,916,684.

Mr. MANN. The present appropriation is $2,807,000.

Mr. FITZGERALD. The appropriation was $2,807,000, and the estimate was $2,916,684. I think there is a mistake about that total, and I ask unanimous consent that it be passed for the present.

The CHAIRMAN. The gentleman from New York asks unanimous consent to pass the paragraph for the present. Is there objection?

There was no objection.

The Clerk read as follows:

For pay and allowances prescribed by law of enlisted men on the retired list: For 6 sergeants major, 1 drum major, 26 gunnery sergeants, 29 quartermaster sergeants, 36 first sergeants, 71 sergeants, 20 corporals, 20 first-class musicians, 1 drummer, 1 trumpeter, 1 fifer, and 26 privates, and for those who may be retired during the fiscal year, $160,857.

Mr. CULLOP. Mr. Chairman, I should like to ask the chairman if that amount ought not to be corrected, since it doubtless provides for the increase that was intended under the proviso in the preceding paragraph?

Mr. PADGETT. No; the increase was provided for in the preceding figures.

Mr. CULLOP. So it is not included in this?

Mr. PADGETT. No.

The Clerk read as follows:

Pay of civil force: In the office of the major general commandant: One chief clerk, at $2,000; one clerk, at $1,400; one messenger, at $971.28.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I should like to know why they did not give this messenger the odd 2 cents and make the amount 30 cents instead of $971.28? It seems rather high pay for a messenger, but even at that I think we ought to pay him at least the even 30 cents in an annual salary.

Mr. PADGETT. He is on a per diem, and that is what it figures out.

Mr. MANN. Why is he on a per diem? Why is he not paid a monthly rate?

Mr. PADGETT. I do not know. That is the law under which he is appointed.

Mr. MANN. They could put this man on a messenger's pay of $50 a month without any difficulty at all.

Mr. ROBERTS of Massachusetts. He is getting more than that now.

Mr. MANN. Of course he is getting more than $50 a month now, and I dare say he gets pay for every day he is absent.

The CHAIRMAN. If there be no objection, the pro forma amendment will be considered as withdrawn, and the Clerk will read.

The Clerk read as follows:

Hereafter field clerks of the quartermaster's department of the Marine Corps shall receive the same pay and allowances and other benefits provided by law for Navy paymaster's clerks on sea or shore duty, and to be entitled to the same right of retirement with the same retired pay as allowed Navy paymasters' clerks: *Provided*, That in computing the pay and allowances of these clerks credit shall be allowed for all previous honorable civil or military service in the Navy, Army, or Marine Corps.

Mr. ROGERS. Mr. Chairman, I move to strike out the last word.

Mr. MANN. I make a point of order against the paragraph.

The CHAIRMAN. The Chair sustains the point of order.

Mr. PADGETT. Mr. Chairman, I wish to return to the provision that was passed over, for the purpose of correcting the total. I withdraw the other amendment and offer this one. I had only deducted for the pay of these particular officers in the last provision that was stricken out, and had overlooked the fact that further back we had stricken out the sea pay on a point of order.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 56, line 15, strike out "$3,062,764.05" and insert "$2,916,684.05."

The amendment was agreed to.

Mr. PADGETT. While I think of it, at this time I ask unanimous consent that the Clerk be given authority to correct the totals in the bill.

The CHAIRMAN. If there be no objection the Clerk will be authorized to correct the totals. Is there objection?

There was no objection.

The Clerk read as follows:

Commutation of quarters, Marine Corps: Commutation of quarters for officers serving with troops where there are no public quarters belonging to the Government, and where there are not sufficient quarters possessed by the United States to accommodate them; commutation of quarters for enlisted men employed as clerks and messengers in the offices of the commandant, adjutant and inspector, paymaster, and quartermaster, and the offices of the assistant adjutant and inspectors, assistant paymasters, assistant quartermasters, at $21 each per month, and for enlisted men employed as messengers in said offices, at $10 each per month, $79,000.

Mr. BORLAND. Mr. Chairman, I move to strike out the last word. Might I ask the chairman of the committee as to this division? This is a paragraph for commutation for enlisted men serving as messengers or clerks. Is not there a provision of law that enlisted men should take the place of civilian clerks?

Mr. PADGETT. I did not understand the gentleman.

Mr. BORLAND. What is the provision of law as to supplying the place of civilian clerks with enlisted men?

Mr. PADGETT. I have not heard of any change.

Mr. BORLAND. No change has been made? How many civilian clerks are there in the service?

Mr. PADGETT. That is carried in the legislative bill and is under the control of the Committee on Appropriations.

Mr. BORLAND. What, then, is the item on page 57?

Mr. PADGETT. Military clerks are carried in this bill.

Mr. BORLAND. I refer to the clerks that are found provided for on page 57.

Mr. PADGETT. They are in this bill.

Mr. BORLAND. Was not there a provision of law reported by the gentleman's committee by which enlisted men were to take the place of the civilian clerks?

Mr. PADGETT. There was a provision to make these clerks enlisted men, but it went out on a point of order.

Mr. BORLAND. Was not that the sense of the committee, that the enlisted men ought to be given an opportunity for filling these places?

Mr. PADGETT. If they took the position now they would cease to be enlisted men and become civilians.

Mr. BORLAND. Is it not possible to have a provision of law whereby enlisted men could take the place of these civilian clerks and thereby get some training in business life?

Mr. PADGETT. That is a provision we had in, but it has gone out on a point of order.

Mr. MANN. They would cease to be enlisted men and would become civilians.

Mr. BORLAND. They might be detailed to serve as clerks in the place of the civilian clerks, and that would have the effect of giving them some training in business life that they would not otherwise get.

Mr. PADGETT. That would be confusing and they would not get the pay; they would only get the enlisted pay.

Mr. BORLAND. But that could be adjusted.

Mr. PADGETT. It could by legislation.

Mr. BORLAND. It seems to me that the gentleman's committee ought to take care of it.

Mr. PADGETT. We tried to take care of it and did take care of it until we got into the House and we met the point of order.

The Clerk read as follows:

Contingent, Marine Corps: For freight, expressage, tolls, cartage, advertising, washing of bed sacks, mattress covers, pillowcases, towels and sheets, funeral expenses of officers and enlisted men and retired enlisted men of the Marine Corps, including the transportation of bodies and their arms and wearing apparel from the place of demise to the homes of the deceased in the United States; stationery and other paper, printing and binding; telegraphing, rent of telephones; purchase, repair, and exchange of typewriters; apprehension of stragglers and deserters; per diem of enlisted men employed on constant labor for periods of not less than 10 days; employment of civilian labor; purchase, repair, and installation and maintenance of gas, electric, sewer, and water pipes and fixtures; office and barracks furniture, camp and garrison equipage and implements; mess utensils for enlisted men; packing boxes, wrapping paper, oilcloth, crash, rope, twine, quarantine fees, camphor and carbolized paper, carpenters' tools, tools for police purposes, safes; purchase, repair, and maintenance of such harness, wagons, motor wagons, carts, drays, motor-propelled and horse-drawn passenger-carrying vehicles, to be used only for official purposes, and other vehicles as are required for the transportation of troops and supplies and for official military and garrison purposes; purchase of public horses and mules; services of veterinary surgeons, and medicines for public animals, and the authorized number of officers' horses; purchase of mounts and horse equipment for all officers below the grade of major required to be mounted; shoeing for public animals and the authorized number of officers' horses; purchase and repair of hose, fire extinguishers, hand grenades, carts, wheelbarrows, and lawn mowers; purchase, installation, and repair of cooking and heating stoves and furnaces; purchase of towels, soap, combs, and brushes for officers; postage stamps for foreign and registered postage; books, newspapers, and periodicals; improving parade grounds; repair of pumps and wharves; water; straw for bedding, mattresses; mattress covers, pillows, sheets; furniture for Government quarters and repair of same; packing and crating officers' allowance of baggage on change of station; deodorizers, lubricants, disinfectants; and for all emergencies and extraordinary expenses arising at home and abroad, but impossible to anticipate or classify, $460,000.

Mr. FITZGERALD. Mr. Chairman, I reserve a point of order. Why is it proposed to pay the civil expenses of men on the retired list? Is that something new?

Mr. PADGETT. I will read to the gentleman on that point from the hearings:

The CHAIRMAN. Under the next item, "Contingent, Marine Corps," you have stricken out the old language, "funeral expenses of officers and marine," and inserted new language, "funeral expenses of officers and enlisted men and retired enlisted men of the Marine Corps."

Col. MCCAWLEY. I will explain that change. Prior to May, 1913, the quartermaster's department paid the funeral expenses of deceased retired enlisted men of the Marine Corps. The auditor did not question the accounts under the law existing at that time, considering the word "marines" to cover men on both the active and retired lists, but on May 7, 1913, the Comptroller of the Treasury decided that the funeral expenses of retired enlisted men of the Marine Corps could not be paid in the absence of a specific law on the subject, and the object of the new wording is specifically to provide for the funeral expenses of retired men, which it is believed the Government should pay as heretofore. No additional funds will be required to cover the change. It is not a very usual thing that these retired men are buried at Government expense, but sometimes they go to a naval hospital, where they die, and they have no money and there is no way of burying them. The Government always did bury them under these circumstances.

Mr. FITZGERALD. This has been the practice heretofore?

Mr. PADGETT. Yes.

Mr. FITZGERALD. Mr. Chairman, I withdraw the point of order.

The Clerk continued the reading of the bill, and read to the bottom of page 63.

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 20975, the naval appropriation bill, and had come to no resolution thereon.

LEAVE OF ABSENCE.

Mr. VARE, by unanimous consent, was given leave of absence, indefinitely, on account of sickness in family.

CALENDAR WEDNESDAY.

Mr. PADGETT. Mr. Speaker, I ask unanimous consent to dispense with the business of Calendar Wednesday to-morrow and that this bill may be considered and finished up. If that is agreed to, I shall ask that when the House adjourn to-day it adjourn to meet to-morrow at 11 o'clock. I now ask unanimous consent to dispense with the business on Calendar Wednesday.

Mr. MANN. Reserving the right to object, of course on the increase of the Navy there will undoubtedly be a large attendance in the House. I think most Members understood that the bill would not come up to-morrow and some who want to be here are out of town. Does not the gentleman think it will be in ample time if we pass the bill on Friday?

Mr. PADGETT. Some gentlemen on this side as well as some on the other side have requested and urged me to take it up to-morrow, and insisting that if we take it up they would be glad to join in an effort to have it disposed of to-morrow.

Mr. MANN. Yes; but that is hardly fair to Members who did not know such a move was in contemplation. As far as I am concerned, if the Democratic side of the House thinks we are behind—I do not think we are in that position, necessarily—after to-morrow I would be very glad to agree to dispense with all Calendar Wednesdays. I do not know how many there are, but the last two Wednesdays are not Calendar Wednesdays. I do not think we ought to do it to-morrow. Let it go over until to-morrow, anyway.

Mr. PADGETT. Shall we meet at 11 o'clock?

Mr. MANN. Oh, no; we would not need to meet at 11 o'clock, anyway.

The SPEAKER. The gentleman from Illinois objects to both propositions.

HOUR OF MEETING.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent that when the House adjourns to-morrow it adjourn to meet at 11 o'clock on Thursday. I wish to say that the gentleman from Alabama [Mr. BURNETT] expects to take up the immigration bill on that day, and that there is a Democratic caucus on Thursday night. I make this request in order that we may get through with the business so as not to interfere with the caucus.

Mr. MANN. Mr. Speaker, of course this side of the House would be perfectly willing to accommodate that side of the House about the caucus in the evening in any way gentlemen desire. As I understand it, Thursday will be devoted to the immigration bill, and there will be nothing else called up in the House.

Mr. UNDERWOOD. That is my understanding.

The SPEAKER. The gentleman from Alabama asks unanimous consent that when the House adjourns to-morrow it adjourn to meet at 11 o'clock a. m., Thursday. Is there objection?

There was no objection.

Mr. PADGETT. Mr. Speaker, I ask that when the House adjourns on Thursday it adjourn to meet at 11 o'clock on Friday.

Mr. FITZGERALD. And I suggest that the gentleman ask that when the House adjourns on Friday it adjourn to meet at 11 o'clock on Saturday.

Mr. PADGETT. Very well.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that when the House adjourns on Thursday it adjourn to meet at 11 o'clock on Friday, and that when it adjourns on Friday it adjourn to meet at 11 o'clock on Saturday next. Is there objection?

Mr. MANN. Reserving the right to object, of course the naval bill will come up on Friday?

Mr. PADGETT. Yes.

Mr. MANN. I suppose it is expected that will probably take the day?

Mr. PADGETT. I do not know how much time it will take, but a good part of the day. I do not know that it will take all of it.

Mr. MANN. May I ask the gentleman from New York if he knows whether the pension bill from his committee or the sundry civil appropriation bill is likely to come up soon?

Mr. FITZGERALD. Mr. Speaker, the sundry civil appropriation bill will be reported on Thursday, and it is the expectation of the committee to follow the naval bill with the consideration of the sundry civil appropriation bill, because if that bill is gotten out of the way, there is less likelihood of a blockade on appropriation bills at the end of the session.

The SPEAKER. Is there objection to meeting at 11 o'clock on Friday and Saturday? [After a pause.] The Chair hears none, and it is so ordered.

ADJOURNMENT.

Mr. PADGETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 8 minutes p. m.) the House adjourned until to-morrow, Wednesday, February 3, 1915, at 12 o'clock noon.

EXECUTIVE COMMUNICATION.

Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, submitting an estimate of appropriation for additional remodeling and repair work in connection with the auditor's building (old Bureau of Engraving and Printing) to adapt it to the needs of the department (H. Doc. No. 1553), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. HOBSON, from the Committee on Naval Affairs, to which was referred the bill (H. R. 21257) to create the office of chief of naval operations, and for other purposes, reported the same without amendment, accompanied by a report (No. 1344), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. TAYLOR of Colorado, from the Committee on the Public Lands, to which was referred the bill (H. R. 19061) for the relief of homestead entrymen under the reclamation projects of the United States, reported the same with amendment, accompanied by a report (No. 1345), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. STOUT, from the Committee on the Public Lands, to which was referred the bill (S. 5092) for the relief of Charles A. Spotts, reported the same without amendment, accompanied by a report (No. 1343), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 3771) granting a pension to Joseph F. Flynn; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 10929) granting a pension to Alonzo Sidman; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 13690) for the relief of the Woman's Board of Domestic Missions, Reformed Church in America; Committee on Indian Affairs discharged, and referred to the Committee on Claims.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. JOHNSON of Washington: A bill (H. R. 21290) providing for the holding of terms of the district court for the southern division of the western district of the State of Washington at Aberdeen; to the Committee on the Judiciary.

By Mr. LOGUE: A bill (H. R. 21291) to provide for the protection of subcontractors and material men engaged in doing work or furnishing material for the erection of Government buildings; to the Committee on Public Buildings and Grounds.

By Mr. MORRISON: A bill (H. R. 21292) prohibiting the use of the name of any Member of either House of Congress or of any officer of the Government by any person, firm, or corporation practicing before the Patent Office in advertising his business; to the Committee on Patents.

By Mr. TAYLOR of Colorado: A bill (H. R. 21293) to authorize the use of the revenues in the Mesa Verde National Park in the management of the same, and the construction, repair, and improvement of roads, trails, and bridges in the park; to the Committee on the Public Lands.

By Mr. HAYDEN: Joint resolution (H. J. Res. 414) directing the Secretary of War to investigate the claims of American citizens for damages suffered within American territory and growing out of the insurrection in Mexico; to the Committee on Foreign Affairs.

By Mr. HAYES: Joint resolution (H. J. Res. 415) requesting the President of the United States to invite foreign Governments to participate in the International Congress on Education; to the Committee on Foreign Affairs.

By Mr. STEPHENS of Texas: Resolution (H. Res. 718) relating to the expenses of the fur-seal investigation in Alaska; to the Committee on Appropriations.

By Mr. FLOOD of Virginia: Memorial of the Legislature of Virginia, protesting against the rulings of the War Department in re fisheries in the waters of Virginia; to the Committee on the Merchant Marine and Fisheries.

By Mr. LAFFERTY: Memorial of the Legislature of the State of Oregon, requesting change of navigation laws; to the Committee on Interstate and Foreign Commerce.

By Mr. WEAVER: Memorial of the Legislature of Oklahoma, urging the passage of the Sheppard-Hobson resolution proposing an amendment to the Constitution of the United States to prohibit the manufacture, sale, transportation, exportation, and importation of intoxicating liquors; to the Committee on the Judiciary.

By Mr. HAWLEY: Memorial of the Legislature of the State of Oregon memorializing Congress to so amend the navigation laws that the lumber industry of the Pacific coast may transact its business with its natural customers on the Atlantic coast on terms at least as favorable as are now held by competitors operating in British Columbia; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CAMPBELL: A bill (H. R. 21293) granting an increase of pension to George D. Henning; to the Committee on Pensions.

By Mr. COADY: A bill (H. R. 21294) granting a pension to Sophie Bacon; to the Committee on Pensions.

By Mr. HAMLIN: A bill (H. R. 21295) for the relief of Mary S. Ming; to the Committee on War Claims.

By Mr. LINTHICUM: A bill (H. R. 21296) granting a pension to Pellvenia Emmert; to the Committee on Pensions.

By Mr. LONERGAN: A bill (H. R. 21297) granting a pension to Ida E. Thorman; to the Committee on Invalid Pensions.

By Mr. PATTEN of New York: A bill (H. R. 21298) for the relief of Richard Henry Greene and Walter F. Jones; to the Committee on Military Affairs.

By Mr. REED: A bill (H. R. 21299) granting an increase of pension to George C. Jackman; to the Committee on Invalid Pensions.

By Mr. RUBEY: A bill (H. R. 21300) granting a pension to George M. Laquey; to the Committee on Pensions.

By Mr. SIMS: A bill (H. R. 21301) for the relief of the legal representatives of W. G. Wilson, deceased; to the Committee on War Claims.

By Mr. VOLLMER: A bill (H. R. 21302) for the issuance of a patent for certain Government land to Benjamin F. Robinson and John Dows; to the Committee on the Public Lands.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of Central Labor Union of Washington, D. C., against prohibition in the District of Columbia; to the Committee on the District of Columbia.

Also (by request), petition of citizens' meeting held at Cooper Union, New York, favoring certain restrictions on immigration; to the Committee on Immigration and Naturalization.

Also (by request), petition of Society of Friends at Swarthmore, Pa., favoring international arbitration; to the Committee on Foreign Affairs.

By Mr. ALLEN: Protests of Henry Haefner and sundry other residents of Cincinnati, Ohio, against shipments abroad of munitions of war; to the Committee on Foreign Affairs.

By Mr. ASHBROOK: Petition of Newark (Ohio) Branch of American Brewery Workers, favoring bill forbidding export of arms; to the Committee on Foreign Affairs.

Also, petitions of Newark (Ohio) Branch of the American Glass Blowers' Association; Cigarmakers' Union, Branch 86, Mansfield, Ohio; Coshocton (Ohio) Branch of the Journeymen Barbers' International Union, favoring passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, evidence to accompany H. R. 21274, for the relief of John W. Daniels; to the Committee on Invalid Pensions.

By Mr. BAILEY: Petition of German Beneficial Union, District 97, of Johnstown, Pa., protesting against export of war material; to the Committee on Foreign Affairs.

Also, petition of George W. Lentz, of Spangler, Pa., protesting against the sending of the Menace through the mails; to the Committee on the Post Office and Post Roads.

By Mr. BEAKES: Petition of George C. Burger and 21 citizens of Adrian, Mich., in support of House joint resolution 377, prohibiting the shipment of munitions of war to foreign countries; to the Committee on Foreign Affairs.

Also, petition of Branch 818 of Polish Roman Catholic Union of America, of Wyandotte, Mich., protesting against the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. BOOHER: Petition of Gustave Krutz and 40 other citizens of Corning, Mo., favoring bill to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. BURKE of Wisconsin: Petitions signed by 75 merchants of the city of Sheboygan; 53 merchants of the city of Port Washington and Ozaukee County; 29 merchants of West Bend; 27 merchants of Plymouth; and 32 merchants of Elkhart Lake and other places in the second congressional district of Wisconsin, asking for the passage of H. R. 5308, to provide for a tax upon all persons, firms, or corporations engaged in interstate mail-order business, and for other purposes; to the Committee on Ways and Means.

By Mr. CALDER: Petition of the Fulton Street Board of Trade, Brooklyn, N. Y., favoring civil-service retirement bill; to the Committee on Reform in the Civil Service.

Also, memorial of sundry citizens of New York, protesting against the literacy test in the immigration bill; to the Committee on Immigration and Naturalization.

By Mr. COOPER: Petition of Allie J. O'Conor and other members of the Minneiska Club, of Whitewater, Wis., urging the passage of H. R. 12292, the child-labor bill; to the Committee on Labor.

By Mr. DALE: Petition of the International Brotherhood of Teamsters, Chauffeurs, etc., of America, and the New York State Federation of Labor, favoring passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of sundry citizens of New York, protesting against the literacy test in the immigration bill; to the Committee on Immigration and Naturalization.

Also, memorial of St. Paul's Evangelical Lutheran Church, of Brooklyn, N. Y., protesting against the export of war material; to the Committee on Foreign Affairs.

By Mr. DILLON: Petition of citizens of South Dakota, favoring passage of bill to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. DONOVAN: Petition of German-American Central Alliance of Norwalk, Conn., favoring House joint resolution 377, forbidding export of arms; to the Committee on Foreign Affairs.

By Mr. ESCH: Memorial of Germania Club, Reedsburg, Wis., urging support of resolution to prohibit export of war material; to the Committee on Foreign Affairs.

Also, petitions of the president of Ripon (Wis.) College and 56 members of men's class, urging passage of Palmer-Owen child-labor bill; to the Committee on Labor.

By Mr. FARR: Petitions of Charles O'Boyle, Anthony Finnerty, Joseph McNulty, M. F. McAndrew, Edward C. Maloney, John J. Cox, P. J. Tallen, Michael Carney, Thomas Carney, M. J. Sullivan, John F. Gillespie, Frank Shanley, John M. McHale, and Anthony F. Murphy, all of Olyphant, Pa., against the circulation of certain anti-Catholic publications; to the Committee on the Post Office and Post Roads.

Also, petitions of St. Stanslaw Society, No. 656, and St. Peter and Paul Society, of Old Forge; Polish National Alliance, of Dickson City; and St. Francis Branch, Roman Catholic Union, Priceburg, all in the State of Pennsylvania, against Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. FINLEY: Petition of the People's Bank of Chester, S. C., against bill prohibiting manufacture by the Government of stamped envelopes; to the Committee on the Post Office and Post Roads.

Also (by request), petition of C. E. Holmes and other citizens of Takoma Park, Md., against H. R. 20644, to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. FOSTER: Petitions of citizens of Altamont, Bible Grove, Centralia German National Alliance, of Centralia, and Centralia Turn Verein, all of Illinois, favoring resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. GOODWIN of Arkansas: Petition of Democratic State committee of Massachusetts, protesting against the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. GRAHAM of Pennsylvania: Petitions of United Brotherhood of Carpenters and Joiners and other organizations of workers in the United States, favoring the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of the Outlook Association of California, favoring passage of House joint resolution 344, for national marketing commission; to the Committee on Agriculture.

By Mr. GREENE of Vermont: Petition of Adolph Woehr, of first congressional district of Vermont, favoring resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. LOBECK: Petitions of 35 citizens of Omaha and 40 citizens of Kearney, Nebr., protesting against the passage of H. R. 20644, the Fitzgerald bill; to the Committee on the Post Office and Post Roads.

Also, petitions of 65 citizens of Omaha, Nebr., favoring legislation to prevent circulation of publication called the Menace; to the Committee on the Post Office and Post Roads.

By Mr. LONERGAN: Petition of G. F. Hurty, Sound Beach, Conn., favoring House joint resolution 344, for national marketing commission; to the Committee on Agriculture.

By Mr. MAGUIRE of Nebraska: Petition of German-American National Bund of Otoe County, Nebr., favoring bill prohibiting export of arms; to the Committee on Foreign Affairs.

By Mr. MAPES: Petition of citizens of Grand Rapids, Mich., protesting against prohibition in District of Columbia; to the Committee on the District of Columbia.

By Mr. MOORE: Memorial of German Evangelical Lutheran Church of St. Paul's, Philadelphia, Pa., urging passage of resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. MORIN (by request): Petition of C. H. McKee, Pittsburgh, Pa., against seamen's bill; to the Committee on the Merchant Marine and Fisheries.

Also (by request), petition of Helpenstall Forge & Knife Co., Pittsburgh, Pa., against ship-purchase bill; to the Committee on the Merchant Marine and Fisheries.

Also (by request), petition of Allegheny Lumber Co., Pittsburgh, Pa., against discontinuance in manufacture of stamped envelopes by the Government; to the Committee on the Post Office and Post Roads.

Also (by request), petition of delegates of the Evangelical Protestant Churches of the Pittsburgh (Pa.) district, against export of arms; to the Committee on Foreign Affairs.

Also (by request), petition of B. C. Ketcham, Canaseraga, N. Y., favoring Senate bill 392, providing for a volunteer officers' retired list of the Civil War; to the Committee on Military Affairs.

Also (by request), petition of Prof. A. J. Todd, University of Pittsburgh, and J. H. Macalpine, Pittsburgh, Pa., favoring Palmer-Owen child-labor bill; to the Committee on Labor.

Also (by request), petition of I. G. Williams, Philadelphia, Pa., against House bill 15401, to prohibit use of name of any church for purposes of commerce; to the Committee on the Judiciary.

Also (by request), petition of Women's Missionary Society of the Oakland Presbyterian Church, Pittsburgh, Pa., favoring constitutional amendment prohibiting polygamy in the United States; to the Committee on the Judiciary.

Also (by request), petition of Duquesne Council, 387, United Commercial Travelers of America, Pittsburgh, Pa., favoring bill changing day of election of Representatives to the first Monday in November; to the Committee on Election of President, Vice President, and Representatives in Congress.

Also (by request), petition of citizens of Pittsburgh, Pa., favoring House joint resolution 377, forbidding export of arms; to the Committee on Foreign Affairs.

Also (by request), petition of Washington (D. C.) Central Labor Union against prohibition in District of Columbia; to the Committee on the District of Columbia.

Also (by request), petition of G. W. Lautzy, Spangler, Pa., favoring prohibiting the Menace from use of the mails; to the Committee on the Post Office and Post Roads.

Also (by request), petition of citizens and organizations of Pennsylvania, favoring passage of immigration bill; to the Committee on Immigration and Naturalization.

Also (by request), petition of citizens of Pennsylvania, against immigration bill; to the Committee on Immigration and Naturalization.

By Mr. O'SHAUNESSY: Petition of Central Trades and Labor Union, Pawtucket, R. I., favoring immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of Mrs. W. S. Sims, of Newport, R. I., favoring Owen-Palmer child-labor bill; to the Committee on Labor.

Also, petition of F. E. Chadwick, of Newport, R. I., favoring a bill to incorporate the American Academy of Arts and Letters; to the Committee on Patents.

Also, petition of W. L. Medhurst, of Providence, R. I., favoring Hamill civil-service retirement bill; to the Committee on Reform in the Civil Service.

Also, petition of Edward Cogan, of Providence, R. I., favoring embargo on arms; to the Committee on Foreign Affairs.

By Mr. PROUTY: Petition of citizens of Des Moines, Iowa, favoring passage of bills to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. RAKER: Petitions of Harry W. Walsh and 7 other citizens of Jamestown; R. A. Agostini and 3 other citizens of San Andreas; D. S. Mason and 9 other citizens of Sonora; E. L. Rehm & Co., J. B. Lester, and 12 other citizens of Sonora; Paul Holtz, of Bagby; G. E. Parker and 8 other citizens of Angels; the Amador Mercantile Co. and 9 other citizens of Amador City and Plymouth; the Brignoli Estate Co. and 10 others, of Sutter Creek; C. C. Carven & Co. and 11 other citizens of Jackson; Chichijola Co. and 2 other citizens of Jackson, all of California, favoring H. R. 5308, to tax mail-order houses; to the Committee on Ways and Means.

By Mr. STEPHENS of California: Petition of Shipowners' Association of Pacific Coast, protesting against the ship-purchase bill; to the Committee on the Merchant Marine and Fisheries.

Also, petition of Shipowners' Association of Pacific Coast, favoring passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of Mrs. Sophie M. Hodges, of Pasadena, Cal., favoring bill to prohibit export of war material; to the Committee on Foreign Affairs.

Also, petition of sundry citizens of Los Angeles, Cal., urging Congress to invite all nations to join us in a world federation for the adjudication of international disputes; to the Committee on Foreign Affairs.

Also, petitions of sundry citizens of the State of California, protesting against the Fitzgerald amendment to the Post Office appropriation bill; to the Committee on the Post Office and Post Roads.

By Mr. STEVENS of Minnesota: Memorial of citizens of St. Paul and Minneapolis, Minn., favoring resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. VOLLMER: Petitions of 185 American citizens, favoring passage of House joint resolution 377, relative to export of war material; to the Committee on Foreign Affairs.

By Mr. WEAVER: Memorial of International Brotherhood of Paper Makers, in favor of the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of the Switchmen's Union, urging the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of the International Typographical Union, representing 65,000 members, urging passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of the Tobacco Workers' International Union, favoring passage of immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of the United Mine Workers of America, urging the Congress to pass the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of the Boot and Shoe Workers' Union, urging the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of Illinois State Federation of Labor; Cigar Makers' International Union; Hotel and Restaurant Employees' International Alliance; Bartenders' International League of America; Minnesota State Federation of Labor; New York State Federation of Labor, representing 700,000 workers; and International Seamen's Union of America, favoring passage of immigration bill; to the Committee on Immigration and Naturalization.

SENATE.

WEDNESDAY, *February 3, 1915.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we call upon Thee after the manner of our fathers in the spirit in which our Nation has grown to its greatness and its influence in the world. If it is true that to serve Thee we must serve our fellow men, it is also true that our service to our fellow men will be in vain unless it is in the spirit of God's great purpose and God's plan in life. So we seek Thee for guidance and for blessing. We pray that every thought may be brought into subjection to Thy will, that our service may be rendered in accord with God's great plan, that it may be permanent and abide, for the achievement of greatness and power will not satisfy the longings of the immortal spirit. Help us in our quest for God, lest we forget that highest interest to our immortal souls. So may we plan to live and work and achieve God's plan. We ask for Christ's sake. Amen.

The Journal of yesterday's proceedings was read.

Mr. STONE. Mr. President, I make the point of no quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Fletcher	Nelson	Smith, Md.
Borah	Gallinger	Norris	Smith, Mich.
Brady	Goff	O'Gorman	Smoot
Brandegee	Gore	Oliver	Stephenson
Bristow	Gronna	Overman	Sterling
Bryan	Hardwick	Page	Stone
Burleigh	Hitchcock	Perkins	Sutherland
Burton	Hollis	Pittman	Swanson
Camden	James	Poindexter	Thomas
Catron	Johnson	Pomerene	Thompson
Chamberlain	Jones	Ransdell	Thornton
Chilton	Kern	Reed	Tillman
Clapp	La Follette	Root	Townsend
Clark, Wyo.	Lane	Saulsbury	Vardaman
Clarke, Ark.	Lippitt	Shafroth	Walsh
Colt	Lodge	Sheppard	Warren
Crawford	McCumber	Sherman	White
Culberson	McLean	Shields	Williams
Cummins	Martin, Va.	Shively	Works
Dillingham	Martine, N. J.	Smith, Ariz.	
du Pont	Myers	Smith, Ga.	

Mr. LANE. The Senator from Arkansas [Mr. ROBINSON] is detained on official business.

The VICE PRESIDENT. Eighty-two Senators have answered to the roll call. There is a quorum present.

Mr. LODGE. Has the Journal been approved?

The VICE PRESIDENT. Not yet. The Chair was about to announce that if there were no objections or exceptions the Journal would stand approved as read.

ATTENDANCE OF ABSENT SENATORS.

Mr. LODGE. Mr. President, I rise to a question of privilege.

The VICE PRESIDENT. The Senator from Massachusetts.

Mr. LODGE. On Friday night an order was made that the Sergeant at Arms request or, if necessary, compel the attendance of absent Senators. That power, of course, is given to the Senate, as it is to the House, in order that the body may maintain itself and not be rendered helpless by absenteeism. Both in the Constitution and the rules the order to be given to the officer of the Senate contemplates a reference to the absence of a quorum.

I am not going to enter into a discussion this morning of the precise time for the expiration of the order, but there is one thing very clear, Mr. President, there can be no possible authority found either in the Constitution or the rules for having that order permanently in existence. Here we have been adjourning regularly for two days, doing business regularly, with a full and ample quorum apparent on every call, and yet the Sergeant at Arms has the order of the Senate to compel the attendance of absent Senators.

Mr. BRANDEGEE. And he ought to be executing it.

Mr. LODGE. And he ought to be executing at this moment that order to compel their attendance. It seems to me manifestly absurd, and I believe it is in violation of the power given by the Constitution, certainly of the power given by the rules, to have a permanent order to the Sergeant at Arms to hunt down Senators at any time during the transaction of the ordinary business of the Senate.

I think the order ought to be rescinded, and I move that it be rescinded.

The VICE PRESIDENT. It seems to be the fate of the Chair to ask the Senator from Massachusetts for permission to insert something in the RECORD.

I do not know whether it is the fault of the Chair or not; the Chair was not here when that order was made, but the Chair found on his desk here a report from the Sergeant at Arms which the Chair has never handed down to the Senate. The Chair does not know whether he should now hand it down or not.

Mr. LODGE. It is a pleasure to be interrupted by the Chair, and I shall be extremely obliged if the Chair would have that report read.

The VICE PRESIDENT. The Chair will hand down the report now and we will see "where we are at." The Secretary will read the report of the Sergeant at Arms.

The Secretary read as follows:

SENATE OF THE UNITED STATES,
OFFICE OF THE SERGEANT AT ARMS,
January 29, 1915.

To the PRESIDENT OF THE SENATE.

SIR: In obedience to the following order received by me at 8.30 p. m. January 29, 1915, "*Ordered*, That the Sergeant at Arms be directed to compel the attendance of absent Senators; that warrants for the arrest of all Senators not sick nor excused be issued under the signature of the Presiding Officer, and attested by the Secretary, and that such warrants be executed without delay," I have the honor to make the following report:

The following Senators, who were absent, appeared in the Senate Chamber without being served: Messrs. CLARK of Wyoming, LIPPITT, LODGE, NELSON, SMITH of Michigan, STEPHENSON, SUTHERLAND, and VARDAMAN.

The following Senators were served by my deputies, responded, and appeared in the Senate Chamber: Messrs. BORAH, BRADY, COLT, CRAWFORD, DU PONT, GRONNA, JONES, MCLEAN, NORRIS, and STERLING.

Senator BURTON was served, but has not appeared in the Senate Chamber.

Senators BURLEIGH, CULBERSON, DILLINGHAM, and PERKINS are reported sick.

Senators CAMDEN, FALL, GOFF, LEA of Tennessee, NEWLANDS, PENROSE, SHERMAN, and WEEKS are reported to be out of Washington, and with the exception of Senator PENROSE, who is reported sick, they have been telegraphed.

No responses could be obtained at the residences of Senators BANKHEAD and POINDEXTER.

This accounts for all absent Senators who were not excused.

CHARLES P. HIGGINS,
Sergeant at Arms.

Mr. VARDAMAN. Mr. President——

Mr. LODGE. Mr. President——

The VICE PRESIDENT. Just one moment, Senators, if you please.

Mr. LODGE. Certainly. I think I have the floor.

The VICE PRESIDENT. The Chair is now first in possession of further reports from the Sergeant at Arms, which the Chair will order read.

The Secretary read as follows:

SENATE OF THE UNITED STATES,
OFFICE OF THE SERGEANT AT ARMS,
January 30, 1915.

To the PRESIDENT OF THE SENATE:

In reference to motion this day by Senator OWEN, to wit:

"Mr. OWEN. There are a number of Senators whose absence has not been permitted by the Senate and who have not responded to the roll call, and I demand that they appear before the Senate.

"The PRESIDING OFFICER. The point of order is well taken. The Sergeant at Arms will enforce the writs that are in his hands."

Since the above order the following have reported without having been served: Senators BANKHEAD, BORAH, BRANDEGEE, BRYAN, CATRON, CLARKE of Arkansas, CRAWFORD, CULBERSON, CUMMINS, DU PONT, GALLINGER, GORE, HARDWICK, HITCHCOCK, KENYON, LIPPITT, MCLEAN, NORRIS, OLIVER, PAGE, POINDEXTER, POMERENE, ROOT, SHIVELY, SMITH of Arizona, SMITH of Georgia, SMITH of Michigan, STEPHENSON, STERLING, STONE, TILLMAN, TOWNSEND, WARREN, and WEEKS.

Senators BURLEIGH and PENROSE are reported sick.

Senators FALL, GOFF, HUGHES, LEA of Tennessee, LEWIS, NEWLANDS, SHERMAN, SMITH of South Carolina, reported out of the city, have been telegraphed, Senators FALL and LEA responding they will come. Senator GOFF responded that though ill, he hoped to return Monday. Senator CAMDEN'S office having reported the Senator in New York City, I telephoned the Waldorf-Astoria, but he was not there. I then endeavored to reach him by telegraph. Telegraph company reported being unable to locate him at any of the leading hotels. Am informed, however, this evening that the Senator is in Washington, but his residence, University Club, reported by telephone that he had gone out some time before.

Respectfully,

CHARLES P. HIGGINS,
Sergeant at Arms, United States Senate.

The VICE PRESIDENT. The Chair also directs that the following daily report from the Sergeant at Arms be read.

The Secretary read as follows:

SENATE OF THE UNITED STATES,
OFFICE OF THE SERGEANT AT ARMS,
February 1, 1915.

To the PRESIDENT OF THE SENATE.

SIR: In obedience to an order received by me at 10.15 a. m. this day, when a roll call disclosed no quorum, directing the Sergeant at Arms to enforce the standing order of the Senate compelling the attendance of absent Senators, I have the honor to report that all Senators not answering to that roll call appeared in the Senate Chamber this day excepting Senators FALL, GOFF, LEA of Tennessee, LEWIS, NEWLANDS, PENROSE, and SMITH of South Carolina, who are out of Washington.

Respectfully,

CHARLES P. HIGGINS,
Sergeant at Arms.

Mr. LODGE. Mr. President, it illustrated what I am saying. Under this order the Sergeant at Arms has a perpetual supervision over all of us, to arrest us at any moment, no matter what the character of business is, and to report every morning upon us. I have not been subjected to arrest personally; I responded without being notified, but there are Senators here who have been arrested three or four times lately. It is reduced to a mere absurdity to keep a permanent order like that in operation. Of course, if this order is to be permanent and the Sergeant at Arms is to be charged with seeing that we are all in our seats every morning and to make a morning report on the conditions of the military company assembled in this Chamber, he ought to have with him an ample force of detectives to follow us about and see where we are.

Such a thing never before was done in the history of any legislative body. The weapon is put by the Constitution in the rules, and properly put in the hands of the body, if it finds itself without a quorum, to compel the attendance of absent Senators. That has been fulfilled; the warrant issued to the Sergeant at Arms has been fulfilled; and I think it worse than absurd to have this a permanent standing order and to have the Sergeant at Arms exercise this strange authority, suddenly thrown upon him, although he may do so with great discretion and good sense, and compelled every morning to make a report as to where we are. Nothing like it ever was heard of before. That is the reason I move that the order be rescinded.

Mr. BORAH. Mr. President, I am unable to determine from the reading of the reports whether I am present or whether I am not; but I desire to say that on the night of the 29th of January I had the pleasure of attending a farewell dinner—that is, there was no pleasure in the farewell, but it was in the dinner—given to the distinguished Senator from Ohio [Mr. BURTON]. While there I was notified that my presence here was desired, and I came as soon as I could conveniently leave. I have been in close attendance since, either in the Chamber or committee rooms. I have no complaint as to the order or as to the manner in which I was notified. I simply desire to have the RECORD speak the facts.

Mr. JONES. Mr. President, I want simply to say that when the warrant was served on me I was getting ready to start for the Senate Chamber, having been advised that my presence here was needed, and so should have been here whether the warrant had been served or not.

Mr. STERLING. Mr. President, I simply desire to say in regard to the service of the warrant upon myself that I ap-

peared in response to the service, but my name appears among the absentees in the second day's report of the Sergeant at Arms. I wish to say that no warrant was formally served upon me on the second day, but that the Sergeant at Arms, or his deputy, appeared in the committee room where I was, the committee at that time being in session, and suggested that within a certain time—half an hour, I think—or that in about half an hour I appear in the Senate Chamber; yet from the return of the Sergeant at Arms it would appear that the warrant was served upon me. I was in the committee room on the business of the Senate attending a regular meeting of the Committee on Public Lands at the time. I think it very apparent that the order should be rescinded.

Mr. ROOT. Mr. President, I only want to say one word on this subject, which seems to me to be a rather serious one. I have been subjected to no personal inconvenience; I am about to leave the Senate; and I shall not be troubled by this as a precedent in the future; but I am inclined to resent, and I do resent, the attempt to reduce the Members of the Senate to a condition of involuntary servitude to the Sergeant at Arms.

Mr. President, the public business of a great free country can not be conducted in that spirit with success. Sir, I was present in the Chamber when this order was made; I had answered to my name on the roll call; I was not one of the absent Senators to whom the order could be held to apply; I was not one of the absent Senators to whom the constitutional authority could be held to apply, which is to compel the attendance of absent Senators; yet that order having been made, the next time I walked out of the Senate I became subject to arrest by the Sergeant at Arms. Warrants were issued under the order for the arrest of Senators; and as to many the first notice that they received that their attendance in the Senate in the early hours of the morning or the late hours of the night—between midnight and dawn—was an arrest by the Sergeant at Arms. They appeared.

Mr. CLARKE of Arkansas. Will the Senator from New York yield to me for a suggestion?

Mr. ROOT. Certainly.

Mr. CLARKE of Arkansas. Would it not be well to have the over of the writ of the Sergeant at Arms, so as to see what its text is, to see what it authorizes him to do, and to see whether or not it is not at this time functus officio, and if this whole discussion is not based on something which does not exist?

Mr. ROOT. I accept readily the suggestion of the Senator from Arkansas, and will say but one word before I take my seat, and then yield to his suggestion.

When those Senators made their appearance in the Senate and were recorded as being here the power of the Sergeant at Arms under that order and in the execution of that writ was spent; it was executed; and there could be no new or extended authority given to him except by another act of the Senate.

The VICE PRESIDENT. The present occupant of the chair was not in the Chamber when the proceedings referred to took place; but the Chair has just consulted with the Sergeant at Arms as to whether any writ was regularly issued and signed by the then Presiding Officer. The Chair is informed by the Sergeant at Arms that no writ was issued and signed by the Presiding Officer; that all that the Sergeant at Arms did was to serve a copy of the order of the Senate signed by the Presiding Officer and the Secretary, but that no formal writ was ever issued.

Mr. ROOT. Then, Mr. President, there appears to have been a false pretense here. The order of the Senate was in express terms that writs issue. The Sergeant at Arms has been going about under that order arresting Senators without the authority required by the order itself and without the warrant which was required by the order of the Senate and by the law.

Mr. KERN. Mr. President, it seems that the order issued has had a most salutary effect upon the attendance of Senators upon this body. I think it has served its purpose, and served its purpose well. It is regrettable if unpleasant incidents have grown out of the execution of the order. The Senator from New York [Mr. ROOT] has criticized this method of conducting the business of a great country, but the business of a great country can not be conducted at all unless Members of this great body attend upon its sessions.

This rule, adopted long ago, was put in force to the end that Senators who were derelict in their duties might be compelled to do their duty in the way of attendance. The proceedings had were in strict conformity with the rule, and the rule will be invoked again whenever the necessity for it arises. However, as the necessity no longer exists, I see no objection to the rescinding of the order.

The VICE PRESIDENT. The Chair feels that the Sergeant at Arms is entitled to have in the RECORD the document that came to his hands, and the Secretary will read it.

The Secretary read as follows:

IN THE SENATE OF THE UNITED STATES,
January 26 (calendar day, January 29), 1915.

The undersigned, Secretary of the Senate, hereby certifies that the following order has been agreed to by the Senate and is now in force:

"*Ordered*, That the Sergeant at Arms be directed to compel the attendance of absent Senators; that warrants for the arrest of all Senators not sick or excused be issued under the signature of the Presiding Officer and attested by the Secretary, and that such warrants be executed without delay."

Attest:

JAMES M. BAKER, *Secretary.*

The Sergeant at Arms is hereby directed to execute the above order.

CLAUDE A. SWANSON,
Presiding Officer.

Mr. CUMMINS. Mr. President, I rise rather to a parliamentary inquiry. Am I still under arrest? I desire to add to that inquiry—and I ask it in all seriousness—this statement: I have been here almost continuously; I am not conscious of having missed a roll call. I was arrested in the cloakroom just as I was entering the Senate—or the warrant was served upon me—having been detained for a moment somewhere. As I stood in the cloakroom, just prior to opening the door into the Senate Chamber, the warrant was served upon me, or the order, or whatever it might have been; and I immediately entered the Senate. Of course I was on my way to the Senate when it was served, and I took no steps to liberate myself.

I do not want the RECORD to show that I am perpetually under the ban, at any rate, and therefore I ask whether, having done nothing more than enter the Chamber and participate in the proceedings of the Senate, I am still under arrest?

Mr. OVERMAN. Mr. President, may I ask the Senator a question?

Mr. CUMMINS. Certainly.

Mr. OVERMAN. The Senator was not arrested, was he?

Mr. CUMMINS. I do not know what you would call it.

Mr. OVERMAN. The Senator never was arrested; he was merely served with the order of the Senate, I suppose.

Mr. CUMMINS. Certainly the Deputy Sergeant at Arms was very polite and did not threaten to interfere with my person in any way.

Mr. OVERMAN. I understand; but the Senator does not think that he was arrested, does he?

Mr. CUMMINS. I do not know.

Mr. OVERMAN. Well, now, was the Senator——

Mr. CUMMINS. I was told that I had to come in here and report to the President of the Senate, or to somebody, in order to be liberated from the order, whether you call it a warrant of arrest or call it something else. I did not do that; I simply entered the Chamber and continued to perform my duty as best I could.

Mr. OVERMAN. Mr. President, the Senator, like other Members of this body, I presume, was notified of this order. There was no warrant of arrest issued for anybody; there was merely an order of the Senate. Instead of the Sergeant at Arms getting a warrant to bring Senators in here, as he had a right to do, he merely served this notice and requested their attendance. What else could he do? There were no warrants issued.

Mr. CUMMINS. Does the Senator from North Carolina say that no warrants were issued?

Mr. OVERMAN. No warrants were issued. There was an order of the Senate made, and the Sergeant at Arms, instead of having warrants issued, arresting Senators, and bringing them in here—which seems to be what they are complaining about—simply went to them politely and notified them of the order of the Senate. The place for Senators is here in this Chamber and not to be absent breaking up a quorum, and all the Sergeant at Arms did was to serve this notice upon them.

Mr. CUMMINS. I really did not pay enough attention to it to observe accurately what the order was. I had assumed from the report of the Sergeant at Arms that he took me in charge under the order to arrest, but I may be mistaken about that.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Connecticut?

Mr. CUMMINS. I yield the floor.

Mr. BRANDEGEE. I was going to ask the Senator a question, but I can state it in another form.

Mr. SHAFROTH. I call for the regular order.

Mr. LODGE. The regular order is the question of personal privilege.

The VICE PRESIDENT. This is the regular order.

Mr. BRANDEGEE. I understand there is a motion pending to rescind the order, and I am discussing that motion. The motion is debatable, as I understand.

The VICE PRESIDENT. Debate is in order.

Mr. BRANDEGEE. If I heard correctly the order which the Senate adopted and which was within a few moments read by

the Secretary from the desk, it was an order of the Senate that the Sergeant at Arms be directed to compel the attendance of absent Senators, and in the enforcement of that order the Senator from Iowa was directed to come into this Chamber. The order provided that it was the duty of the Chair to issue warrants to enforce the order, and if the order and the compulsion which the order provided were enforced without a warrant, it was no less an arrest. When the Senator was told by the Sergeant at Arms that he had an order of the Senate to compel his attendance, and asked him to please come along in order that he might not be compelled by force or by arrest to come here, that was an arrest to all intents and purposes.

Mr. JONES. Mr. President, will the Senator allow me?

Mr. BRANDEGEE. I yield to the Senator.

Mr. JONES. I simply want to state, by way of answer to the suggestion of the Senator from North Carolina [Mr. OVERMAN], that the Sergeant at Arms was courteous to me, and I have no complaint at all to make, but I simply want to say that he told me he had a warrant for me, and he handed me a paper. I handed it back to him without looking at it, telling him that I was just getting ready to start for the Senate. He said to me, however, that he had a warrant for me.

Mr. BRANDEGEE. I do not blame the Sergeant at Arms, unless he is an attorney at law, for not understanding the technical distinction between a legally issued and signed warrant and a certified copy of an order of the Senate ordering him to compel the attendance of Senators. I think that is entirely immaterial.

Mr. PAGE. Mr. President, I do not like to take the valuable time of the Senate, but inasmuch as my name is amongst those of the Senators alleged to have been arrested and brought into the Senate Chamber I feel that I should like to have the RECORD show the facts in regard to my own case.

I came into the Senate Chamber last Friday morning at 11 o'clock, the time we convened, and, barring stepping out for a moment into one of the anterooms, I was here all night long and until 9 o'clock the next morning, when I did go out to take a little rest. The only appearance of the Sergeant at Arms in my case was this: I went to one of the deputies of the Sergeant at Arms and told him that I wished to step out for a few moments, but that if I were wanted all that would be necessary would be to call me and that I would respond at once. The Sergeant at Arms called me at the place where I had informed the deputy I would be and told me that he had been instructed to compel my attendance in the Senate. I said "I will be there in one minute."

I say now that I do not like to have my record for attendance here impeached, for I have been very careful, indeed, to be here almost all the time; it is very rare that I absent myself from the Senate or from the Senate Office Building, and I should like to have——

Mr. STONE. Mr. President, if the Senator will permit me, I should like, as one Democratic Senator, to testify to the fact that no Senator, as a rule, attends more closely upon the sessions of the Senate than does the Senator from Vermont [Mr. PAGE].

Mr. PAGE. I thank the Senator.

Mr. THORNTON. Mr. President, I am very glad to add my testimony to that of the Senator from Missouri on that subject.

Mr. PAGE. I think I am all right, Mr. President. I was simply asking that the RECORD be made right.

Mr. SAULSBURY. Mr. President——

The VICE PRESIDENT. The Senator from Delaware.

Mr. SAULSBURY. For the consolation of my friends on the Republican side of this Chamber, I desire to relate a historical incident which occurred in this country in one of the great States when somewhat similar tactics were resorted to by those who were not willing to attend a great body and were compelled to be present. I think it was in 1797. A constitutional convention was being held in the State of Pennsylvania. Among those who, by force, compelled the presence in that convention of certain of its members to perform their duties was Commodore John Barry. The consolation, I wish to state to our friends on the other side, is that the names of the members of that constitutional convention who failed to perform their duties in that convention have been forgotten, while recently we unveiled in this city a monument to the memory of John Barry, and the most prominent officials of this country attended its unveiling.

Mr. VARDAMAN. Mr. President——

The VICE PRESIDENT. The Senator from Mississippi.

Mr. VARDAMAN. My name appears among the list of Senators for whom warrants were issued, but who appeared upon the floor of the Senate before they could be served. The RECORD will disclose the fact that I answered to nearly every roll call that was made during the session of the night of the 29th of January. The balance of the evening I spent in a committee engaged in the work of the Senate. I was on the conference committee on the seamen's bill.

I do not care anything about the warrant being issued or the notice being given that I was not present in the Chamber, but I do not want the country to understand that I was neglecting my duty, and I shall not quietly submit to the odium which the distinguished junior Senator from Indiana seemed inclined to put upon those of us whom he happened to mention as among the derelict. I have endeavored since I have been a Member of this body to attend upon its deliberations; and during all this fight against a measure which I think indefensible in many respects I have aided in making a quorum in order that the business of the Senate might be conducted, though I expected to vote against the measure and was exceedingly desirous that it be defeated.

Mr. CLARKE of Arkansas. Mr. President——

The VICE PRESIDENT. The Senator from Arkansas.

Mr. CLARKE of Arkansas. I was among the absentees mentioned in one of the several communications which have been read at the desk; but I do not rise to explain about that, because it recites nothing that is not true. I was excused by the junior Senator from Indiana, the Democratic leader, for what seemed to him to be sufficient cause; but I am a friend of the Sergeant at Arms, and I want to give him a little professional advice.

The business of arresting people in any country having institutions derived from the Anglo-Saxon race contemplates that there shall be a writ, in which the name of the person whom it is proposed to arrest is mentioned and the offense to which he is to respond is set out. Without that the officer is a trespasser and subject to be dealt with in a very summary way. The Sergeant at Arms of the House of Representatives was dealt with in a very summary way, and a judgment for $100,000 rendered against him and affirmed by the Supreme Court of the United States; and I commend the Sergeant at Arms here and elsewhere to a perusal of that case, under the title of Thompson against Kilbourn, reported somewhere near One Hundredth United States.

I want to say for the present Sergeant at Arms, however, that he is always courteous and considerate of the rights of Senators; and I am sure that if he had felt it to be his duty, under the particular paper that was delivered to him, to bring to the notice of a Senator the fact that his presence in the Senate was wanted, it would be done in a very polite and proper way. What I want to advise him about, and what I want to assert as one of the rights of a Senator, is that the Sergeant at Arms has no right to arrest a Senator unless he has a warrant naming that particular Senator, and announcing that the Senate has directed him to arrest him for his failure to attend a daily session of the Senate which has not come to an end by an adjournment after that time.

Our rules effectuate the provision of the Constitution which permits less than a majority of the Senate to compel the attendance of absent Senators. The whole thing is what would be called in a court of justice a statutory proceeding, and you can not go outside of it for the authority to enforce it. The rule says:

> If at any time during the daily sessions of the Senate a question shall be raised by any Senator as to the presence of a quorum, the Presiding Officer shall forthwith direct the Secretary to call the roll and shall announce the result, and these proceedings shall be without debate.

That is the foundation for any proceedings—a roll call directed by the Chair upon a suggestion of a Senator that a quorum is not present.

Next the rule says:

> Whenever upon such roll call it shall be ascertained that a quorum is not present, a majority of the Senators present may direct the Sergeant at Arms to request—

Before anything further can be done a request must be addressed to each Senator. Before he can be proceeded against for contumacy he must have an opportunity to attend voluntarily. That is due to his station, the dignity of the body of which he is a Member, and the presumption that he will do his duty when his attention is called to the fact that his presence at a certain place is required to do it. He is not treated as a criminal in the first instance and arrested simply because he happens to find it necessary to absent himself for a short time from the session of the Senate. It is habitually done. Ninety per cent of the business of the Senate is conducted when there are not 25 Senators present, and if any such thing were possible as to give a continuing authority to the Sergeant at Arms and his deputies he might make service here absolutely unendurable. If he could pick up a Senator on the

street and say, "You are needed in the Senate, and you must go there with me now," it would not be long until service here would be less desirable than it is at the present time.

After having notified absent Senators, and after that has failed to produce the necessary quorum, then there is an additional power conferred upon the Senators present, no matter how small the number may be, for the rule proceeds:

And, when necessary, to compel the attendance of the absent Senators, which order shall be determined without debate.

At that stage, after having notified Senators that their presence in the Chamber is required, those Senators present bring into execution the power delegated by the Constitution of the United States, which is to issue a writ for the individual Senators who are absent—not a blanket proposition to bring in any Senator the Sergeant at Arms may come up with at any time during that session of the Senate or during that Congress.

Mr. GALLINGER. Mr. President——

Mr. CLARKE of Arkansas. I yield to the Senator from New Hampshire.

Mr. GALLINGER. Would it not be a correct proceeding, and one that ought to be followed, if the Sergeant at Arms fails to secure the attendance of the absent Senators by the first order, that he should so report to the Senate before the second order is made?

Mr. CLARKE of Arkansas. Evidently; because his report is the foundation upon which to proceed.

Mr. GALLINGER. Certainly.

Mr. CLARKE of Arkansas. But I object to the use of the words "The Sergeant at Arms shall procure the attendance of absent Senators" in the first instance. He is not required to procure the attendance of anybody until he has a writ directing that the Senator shall be brought there, and that the particular Senator shall be brought there, and that he shall be brought to that particular session. He can not be furnished with a blanket writ to go out and arrest any Senator that he finds outside of the walls of this Chamber.

I think the explanation made by the Senator from North Carolina has cleared up this entire transaction. The Sergeant at Arms did not pretend to arrest anybody, and he did not deem himself to be authorized to arrest anybody. He treated the action of the Senate as a request for the attendance of Senators, and politely brought that to their notice, and that proved to be sufficient. The more drastic remedy of a writ was never resorted to, because no writ has ever been issued.

Mr. CRAWFORD. Mr. President, will the Senator permit me there?

Mr. CLARKE of Arkansas. I shall be very glad to yield to the Senator.

Mr. CRAWFORD. Simply in justice to the Sergeant at Arms and his deputies, I think it is only fair to them that I should say that there was not a suggestion, when his assistant came to my apartment, that he came there to arrest me, that he had any written order, or that there was any coercion about it. I had gone to my apartment with the impression that the Senate would adjourn that evening, as usual, and along pretty late in the evening this assistant came there and said that they were having quite a contest down in the Senate and that it was desired that the absentees should be present. I, of course, immediately accompanied him down here, but I did not understand that I was under arrest.

Mr. CLARKE of Arkansas. I am sure the Sergeant at Arms did not invade the rights of the Senator. I am sure the Sergeant at Arms acted discreetly and in accordance with what the paper in his hands authorized him to do. The power of picking out Senators for arrest can not be delegated to a ministerial officer. That designation and that authority must proceed from the Senate itself. That is the point I want to make, and that is the information I want to communicate to the Sergeant at Arms.

Mr. STONE. Mr. President——

The VICE PRESIDENT. The Senator from Missouri.

Mr. STONE. I wish to say just a word about the Sergeant at Arms. He did not attempt to use force in compelling the attendance of any Senator under the order he held in his hands. The Senate did order him to secure the attendance of Senators in the terms of the order which has been read. I hope no criticism is to be implied, much less expressed, of the action of the Sergeant at Arms. He had this order, made by the Senate in accordance with its rules and in accordance with the Constitution; and it was certified to him by the Presiding Officer, with instructions to carry it out. What could he do other than he did?

Nothing has been developed here to lay the basis of any complaint against the Sergeant at Arms, unless possibly it is the statement made by the Senator from Washington, who says that when the paper was handed to him the officer remarked that he had a warrant for him. He did not read the paper which was in his hands. If he had done that, he would of course have seen that the officer had mistaken the nature of the paper, or did not understand what it was; and, as the Senator from Connecticut said, he could easily understand, as anyone can, how an officer might use a term which was not fairly or properly descriptive.

Mr. JONES. Mr. President, will the Senator permit me to interrupt him?

Mr. STONE. Certainly.

Mr. JONES. As I said a moment ago, I do not want to reflect on the Sergeant at Arms at all. His deputy was very courteous and very kind, and I would not have made the remark except for the statement made by the Senator from North Carolina. I simply stated it as a fact, and that was all. The Deputy Sergeant at Arms was very kind, and there is no reflection at all upon him in what I said.

Mr. STONE. Mr. President, just a word or two, and I am through with this subject.

I can hardly agree with one view expressed by the Senator from Arkansas—that the Senate must first direct the Sergeant at Arms to request the attendance of absent Senators, and that no further action can be taken by the Senate until the Sergeant at Arms has exhausted his ability to carry out that direction, and that the Senate must wait until he makes final return in that direction.

Mr. JAMES. Mr. President, will the Senator from Missouri yield to me?

Mr. STONE. I yield.

Mr. JAMES. The very thing was done that the Senator from Arkansas says should be done in this instance before the order was issued to the Sergeant at Arms to compel the attendance of absent Senators by arrest, because the RECORD shows the following:

Mr. KERN. I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

Mr. SMOOT. The rule requires that the names of absentees shall be called before that motion is made.

Mr. KERN. I do not understand that the rule so requires.

The PRESIDING OFFICER. The Chair does not know of any rule that requires it. It has only recently been adopted as a custom. The question is on agreeing to the motion of the Senator from Indiana [Mr. KERN] that the Sergeant at Arms be directed to request the attendance of absent Senators.

The motion was agreed to.

After that the order was issued to compel the attendance of absent Senators, and to issue warrants for their arrest.

Mr. STONE. I do not recall the exact successive steps taken. What I was about to say was that the Constitution provides that less than a majority can secure a quorum by requesting the presence of Senators who are absent, and, when necessary, by compelling their attendance.

Mr. CLARKE of Arkansas. Mr. President, will the Senator from Missouri permit me to call to his attention the precedent of the Senate which I relied on in making the statement I did? It is reported in the last edition of Gilfry's Precedents, page 15, at the top of subdivision 7 on that page, where it says:

On motion by Mr. Harris that the Sergeant at Arms be directed to compel attendance of absent Senators,

Mr. Merrimon raised a question of order, viz, that under the third rule of the Senate the motion should be preceded by a motion to request the attendance of absent Senators.

The Presiding Officer submitted the question to the Senate, Should the motion to compel be preceded by a motion to request the attendance of absent Senators? and it was determined in the affirmative—yeas 24, nays 12.

Mr. STONE. That does not at all conflict with what I was trying to say. The Constitution authorizes less than a majority of the Senate to compel the attendance of absent Senators, and the rule authorizes the Senate to do the same thing. The rule provides that we shall request their attendance, and, when that is necessary, compel the attendance of absent Senators.

Now, Mr. President, while we are not settling anything this morning about it, I wish to say that it rests in the discretion and judgment of the Senate itself under the highest law in this Nation, and it alone can determine when it is necessary to issue compulsory process in the premises.

Mr. President, I do not think the course we have been pursuing heretofore for many sessions past is exactly the course that ought to be pursued. I agree with what the Senator from Arkansas and other Senators have said, that before a physical arrest can be made the Senator arrested should be named in a warrant authorizing and directing the arrest to be made.

Mr. WILLIAMS. Was not that done?

Mr. STONE. I do not know whether it was done in this case or not.

Mr. WILLIAMS. In every case.

Mr. STONE. I have more than once endeavored to have a more complete and, as I think, legal procedure adopted. The other night while we were here I prepared an order which I supposed we might want to use in the future during this session. It is very brief, and I propose to read it:

IN THE SENATE OF THE UNITED STATES.

Whereas under the rules of the Senate a call of the Senate was ordered; and

Whereas the following-named Senators are absent without leave of the Senate, to wit—

There naming them—

Therefore it is ordered that the Sergeant at Arms be, and hereby is, directed to compel the attendance on the Senate of said named absent Senators; and it is further ordered that warrants for the arrest of said Senators be issued under the signature of the presiding officer, attested by the Secretary, and that the Sergeant at Arms be, and hereby is, directed to execute such warrants forthwith by arresting each of said named Senators and bringing him before the bar of the Senate, and that he make due return to the Senate of the execution of said warrants, and that this order shall be continuing until fully executed unless otherwise ordered by the Senate.

Then this form of warrant ought to be issued, or something in its similitude:

UNITED STATES SENATE,
Washington, D. C., ———, 191—.

To CHARLES P. HIGGINS,
Sergeant at Arms, United States Senate:

The undersigned presiding officer of the Senate, by virtue of the power vested in me, hereby command you, in pursuance of the order of the Senate this day made, to forthwith arrest and take into custody and bring to the bar of the Senate the following-named Senators who are absent without leave, to wit—

Naming them—

Herein fail not and make due return of this warrant.

In testimony whereof I have hereunto set my hand and caused to be affixed the seal of the United States Senate, this — day of ———, 1915.

Signed by the Presiding Officer and attested by the Secretary with the seal of the Senate.

If that sort of an order were made and that sort of warrant issued, the Sergeant at Arms would be acting as a sheriff with a capias under an authority and direction to lay hands, if need be, upon those who were contumacious and bring them to the bar of the Senate. I hope that some such more accurate proceeding like that I have indicated will be followed.

Mr. SUTHERLAND. Mr. President, I hope the Senator from Missouri will not offer such a resolution as that which he has just read without more reflection than I think he has yet given the subject, because if he does he will involve the Sergeant at Arms of the Senate, very likely, in somewhat expensive lawsuits. Because a man happens to be a Member of the Senate of the United States he has not forfeited his right to his personal liberty, and because he happens to be a Senator of the United States the right to bring an action for false imprisonment has not been suspended in his case.

The Senator from Arkansas [Mr. CLARKE] is entirely correct, in my judgment, in his construction of the powers of the Senate. The Constitution provides not that the minority may compel the attendance of absent Senators, but it provides that they may be authorized to compel the attendance of absent Senators. The provision of the Constitution is not self-executing in its nature. It requires the action of the Senate laying down a rule according to which the constitutional power must be exercised before the minority may resort to that power at all.

Now, that the Senate has undertaken to do in the rule which has already been quoted:

Whenever upon such roll call—

That is, a roll call to ascertain whether or not a quorum is actually present, whenever upon that roll call—

it shall be ascertained that a quorum is not present, a majority of the Senators present may direct the Sergeant at Arms to request, and when necessary to compel, the attendance of the absent Senators.

Very clearly, under the rule itself, the motion must first be to request the attendance of absent Senators, and very clearly before the more drastic power can be resorted to that request must be made, and it must be made of the individual Senator. If it is not made, if he has not been requested first to attend the session, then a warrant for his arrest and his arrest upon that warrant would be absolutely beyond the authority of the arresting officer to execute, because beyond the authority of the minority of the Senate to authorize.

It required a rule to carry that provision of the Constitution into operation in order to give it any vitality whatever, because, as I have said, it is not self-executing. Prior to the adoption of the rule which has been quoted here it was held by the Senate itself that the Senate had no power to compel the attendance of absent Senators. I call attention to the precedent to that effect at page 14 of Precedents of the Senate:

The Senate, in the absence of a quorum, can not compel, but can only request, the attendance of absent Senators.

That was on April 20, 1872.

On a motion to proceed to the consideration of H. R. 174, "repealing the duty on tea and coffee," the yeas were 22, nays 7, no quorum voting; and the Sergeant at Arms, by a vote of 16 yeas to 8 nays, was directed to request the attendance of absent Senators. After debate, the Presiding Officer (Mr. Ferry of Michigan in the chair) announced that the Sergeant at Arms had reported that he had executed the order of the Senate, to request the attendance of the absent Senators; but that it still appeared, by the vote just taken, that a quorum of the Senate was not present.

Whereupon Mr. Howe submitted a motion that the Sergeant at Arms be directed to compel the attendance of such number of absent Senators as would make a quorum of the Senate; and

* * * * * * * *

Mr. Pomeroy made a point of order, viz, that the Senate having made no provision in its rules for compelling the attendance of absent Senators, which could be made only by a quorum of the body, it was not in the power of a minority of the Senate, by adopting the proposed order, to change the existing rule on the subject, and that the motion of Mr. Howe was therefore not in order.

The Presiding Officer (Mr. Ferry of Michigan in the chair) sustained the point of order, and ruled the motion of Mr. Howe not in order.

So, following that, the rule was made by the Senate which has been read, and since that rule has been in operation I think it has never been doubted that the request must precede the order to compel the attendance of absent Senators, and that request must be made upon the individual Senator before that individual Senator can be compelled to attend.

The Senator from Arkansas called attention to the case of Kilbourn against Thompson, which is an authority directly in point, although it had to do with the case of a witness and not with a case of a Member of Congress. The case is to be found in One hundred and third United States.

Mr. DU PONT. Mr. President, as my name was announced among the absentees, I merely wish to state that the Sergeant at Arms met me on the street and told me that the attendance of absent Senators was required. Before I met him I had no idea the Senate was in session. I told him I would at once proceed to the Senate Chamber, which I did, and I remained there until half past 8 the following morning.

Mr. GRONNA. Mr. President, the RECORD, of course, discloses that I was absent when the order was made. I wish to say, however, that I was here all day and a part of the night, but I understood, or, at least, I was informed by those whom I thought ought to know, that the Senate would not be in session all night, and I did go to my home for the purpose of getting rest. I was not arrested by the Sergeant at Arms. I was simply notified that the Senate requested me to be present; and just as soon as I received that notice I immediately came to the Senate, and I was here all night and attended the session.

Mr. WHITE. Mr. President, I do not quite agree with the Senator from Utah [Mr. SUTHERLAND] or the Senator from Arkansas [Mr. CLARKE] in the statement that the individual Senator must be notified to attend before a warrant of arrest can be issued for him; that is, that he must first be requested to come here by the Sergeant at Arms. If that is true, then it is within the power of a Senator, after he has evaded arrest, to put it beyond the power of the Sergeant at Arms to ever arrest him to attend.

I have known a somewhat striking situation, but one which presents this view of the question. Once my State became the refuge for numerous members of the legislature of an adjoining State, who left their State with a view of preventing a quorum in their legislature. They placed it beyond the power of the sergeant at arms to cause them to attend, and even beyond the power of the sergeant at arms to arrest them. Some of us were somewhat in sympathy with these fleeing representatives, and we tried to make matters as comfortable for them as we could. We provided them religious worship on Sunday and asked the hotels to be as liberal and as kind as they could be for the benefit of these gentlemen. However, that simply illustrates the idea I intend to express, that it is not essential before a Senator can be compelled to attend that he be personally requested to attend. If it were, then he could never be made to attend, because he could put it beyond the power of the Sergeant at Arms to make a request by concealing himself or fleeing.

Mr. SMITH of Georgia. Mr. President, I notice that in the report of January 30 the Sergeant at Arms mentioned the fact that after the roll call, but before having been served, certain Senators reported in the Senate Chamber. I find my name among the number. I find that the Senator from Missouri [Mr. STONE], the Senator from Indiana [Mr. SHIVELY], the Senator from Arizona [Mr. SMITH], the Senator from Ohio [Mr. POMERENE] and a number of other Democratic Senators so appeared. It is at least gratifying to us that the Sergeant at Arms has been entirely nonpolitical in the performance of his duties.

I wish to say, Mr. President, that on Saturday morning the roll call was had about 8 o'clock.

Mr. SMOOT. About 10.

Mr. SMITH of Georgia. It is a little difficult to remember what the hour of the morning was, as we had spent the entire Friday night in session, and many of us had remained here all night. Some time during that morning, at an appropriate hour, I left the Chamber for a few minutes to obtain my breakfast and returned. I am sure that was the full extent of my offense.

Mr. OWEN. Mr. President, the Constitution, Article I, section 5, provides as follows:

Each House shall be the judge of the elections, returns, and qualifications of its own Members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent Members, in such manner and under such penalties as each House may provide.

Under that authority the Senate provided a method by which the minority of the Members could require the presence of a quorum in Rule V, paragraph 3, as follows:

Whenever upon such roll call it shall be ascertained that a quorum is not present, a majority of the Senators present may direct the Sergeant at Arms to request and, when necessary, to compel the attendance of the absent Senators, which order shall be determined without debate; and pending its execution, and until a quorum shall be present, no debate nor motion, except to adjourn, shall be in order.

The Constitution therefore provides that a minority of this body, however small, may under this rule compel the attendance of Senators necessary to make a quorum. That is the language of the Constitution and the rule is that a minority of Senators present may direct the Sergeant at Arms to request and when necessary to compel the attendance of the absent Senators. The Constitution, however, does not stop there. It goes on to say that—

Each House may determine the rules of its proceedings, punish its Members for disorderly behavior, and, with the concurrence of two-thirds, expel a Member.

Under the authority that each House may determine the rules of its proceedings the House is authorized to pass the rules which are necessary to make effective the work of the House and the Senate to make effective the rules of the Senate. Rule V, section 1, declares:

No Senator shall absent himself from the service of the Senate without leave.

To do so is a violation of the rule established under the Constitution and each Senator takes the oath of office to this effect: That he will support and defend the Constitution of the United States; that he takes this obligation freely, without any mental reservation or purpose of evasion; and that he will well and faithfully discharge the duties of the office on which he is about to enter.

So he is bound by the oath of his office to obey these rules and observe them, and while it might be contended, as some Senators have, that a minority might not under the order or rule to compel the attendance of absent Senators issue a warrant of arrest, undoubtedly when a quorum is established by the call of the minority present in the Chamber under Rule V, then a quorum being present the Senate would under the Constitution have the right to pass the rule necessary to compel attendance by a physical arrest if necessary.

Mr. President, we have witnessed in the Chamber the fact that one or two Senators on the Republican side of the Chamber would take the floor and speak from 3 hours, 4 hours, 5 hours, 6 hours, 9 hours up to 12 hours of continuous so-called debate. It is not really debate. Nobody pretends it is debate. Some things were said which are essential, some things which are not very pertinent, and some things which are grossly impertinent and do not at all relate to the subject matter. Under that color of debate the time of this body has been consumed day after day during the last two years.

A prolonged filibuster was carried on when the question of changing our policy with regard to the tariff was before the Senate. A similar filibuster was engineered over the question of a water supply for San Francisco. There was a similar filibuster over the question of passing the Federal reserve act. It comes down to this: A single Senator on the other side may take the floor and may occupy the floor for 10 or 12 hours, and the Democrats on this side, representing the majority, the Democrats representing the people of the United States, are not permitted to govern, as they are authorized to do under the charter of the national election giving them the authority nominally and under the law. They are compelled to stay here day and night in order to respond at any instant to the call for a quorum by some one of the conspirators against the time of the Senate on the other side who may make a point of no quorum. The Democrats are compelled, therefore, to stay and make a quorum, while Senators on the other side go off to their several homes, go off to dinner parties, entertain themselves as they please, enjoy themselves, take their rest, and come in by relays to make these 9, 10, and 12 hour speeches, so called, for the purpose of carrying on a filibuster in this Chamber.

Therefore the majority has been fully justified in the very mild and moderate means which were taken to require those who were absent to come into the Chamber, perform their duty, and fulfill their oath of office.

Mr. BRYAN. Mr. President——

The VICE PRESIDENT. The Senator from Florida.

Mr. BRYAN. Mr. President, I had not intended to contribute to this filibuster, but every other Senator, I believe, who was arrested has undertaken to purge himself of contempt, and I will follow that example.

At about 9.30 o'clock on Saturday morning the senior Senator from Utah [Mr. SMOOT] completed his all-night speech. Before he completed it, he suggested the absence of a quorum. The Presiding Officer declined to have the roll called, on the ground that no business had intervened. Then the colleague of the Senator from Utah, the junior Senator [Mr. SUTHERLAND], addressed the Chair. Those of us who had remained here all night understood that the junior Senator from Utah would undertake to equal, if not to excel, the record of his colleague. I had a very kind invitation from the senior Senator from Georgia [Mr. SMITH] to go with him to breakfast, of which I very gladly availed myself after an all-night session. Upon my way back to the Chamber I stopped at my office in the Senate Office Building. I had been there about five minutes, when I was arrested and brought here or was told to come into the Senate Chamber. Altogether I was gone about an hour.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. The Senator from Nebraska.

Mr. NORRIS. Mr. President, it seems to me that all this debate illustrates another proposition that has not been immediately under consideration; that is, that the Senate under its rules is absolutely powerless to do business. It will not do for one Senator to say that when Republicans are in a minority they are filibustering, and try to place the odium of a filibuster on any political party, any more than it will do for the pot to call the kettle black. If you go back over the history of the Senate, you will find that these filibusters have always been conducted by Democrats when they were in the minority and by Republicans when they were in the minority. It is the method the Senate has to get a cloture; it is a cloture rule of the Senate. We have the fiction, all men proclaim, that in the Senate unlimited debate is allowed, and that this is the forum where everything can be debated to a finality; yet we have a cloture rule—the cruelest, the most hard-hearted, the most inhuman rule of cloture that has been adopted by any civilized legislative body in the world.

I am not finding fault with any minority when they resort to any means that the rules of the body give them to accomplish what they want to accomplish. They take the responsibility for it. I have myself been engaged in filibusters, although I have had no part in or sympathy with what has been termed the present filibuster. I am not complaining, either, of Democrats or Republicans, whenever they are in the minority in the Senate, to use the methods that the rules give them. It seems to me they have an honorable right to do it.

My complaint is—and I believe this illustrates it—that the Senate of the United States ought to adopt in its rules some method of orderly debate by which, under the rules themselves, every question must of itself naturally come to a vote without first resorting to a physical-endurance test to see who can stand the contest the longest.

Then, Mr. President, what a fiction this matter of a quorum is! It is illustrated by what happened to me. I am one of the Senators whose name has been read amongst those who were brought into the Senate by the Sergeant at Arms. The Senate had been in session all night, and the day before that practically all night, and along in the evening I went home. I was just going to bed—I had undressed—when the Sergeant at Arms called and said I was wanted in the Senate. I dressed again and came up here with him. We got here about 12 o'clock at night. There was no quorum here, but the records of the Senate showed there was a quorum. A Senator was addressing the Senate. I remained here until 4 o'clock in the morning. No vote was taken; no quorum call was made; at no time were there to exceed a dozen Senators in the Chamber, and during a great deal of the time there were only four or five Senators in the Chamber; yet the records of the Senate, if now examined, would show that there was a quorum present. There being no vote, there being no roll call, my name did not get into the RECORD. So the RECORD shows I was absent while I was really present. The RECORD also shows dozens of other Senators as being present when, as a matter of fact, they were absent. That

is one of the fictions of our rules. If this will bring about the adoption of a rule by the Senate that will close debate within a reasonable time, the time we are spending here, it seems to me, will be well spent.

I was here practically all night, but I was absent when the Sergeant at Arms sent for me. So the roll call—the only one that happened—shows I was absent, and, although I sat here from midnight until 4 o'clock in the morning, the RECORD shows, if that is to cast any odium, that I was disregarding my duty.

Mr. President, at 4 o'clock in the morning, after hearing—and it developed later that it was true—that the Senator then speaking was going to talk until morning—and he did talk until 9.30—I went home, as other Senators had done who were on record as present, and I got the odium of being absent, while those who were absent got the honor, if such it was, of being present. Waiting in the inclement weather—and I had to wait quite a while for a car and for a transfer at that hour of the night—I caught a cold, which I have not been able to get rid of, and at the present rate I do not know when I shall get rid of it.

It seems to me that it brings us to an outrageous conclusion, to an illogical conclusion, that Senators must stay here all night, knowing that there will be no vote, knowing that there will be nothing done, simply to help carry out the ancient rule of Senate cloture, that may be called by another name—unlimited debate.

Mr. President, the Senator from Oklahoma [Mr. OWEN] spoke of several other bills in connection with which filibusters have taken place, as to some of which I think he was mistaken; for instance, in the case of the Hetch-Hetchy bill. I was one of those who favored the bill, but I do not have any recollection of its opponents opposing it in any way except legitimately, and I do not believe I would have a right to object if they had resorted to a filibuster, because the rules provide for it. I am inclined to think it would be a good thing if some Senator would filibuster against every bill to which he is opposed in order that we may be brought, as I believe we eventually will be brought, to have a cloture rule that of itself, under proper and guarded circumstances, would close debate.

It is not right to expect a man to stay here all day and all night when everybody knows he can do nothing, and if he goes out to get a meal make him liable to arrest by the Sergeant at Arms. It seems to me that the Senate ought to be above that; it seems to me that we ought to learn the lesson that we are doing something illogically, something hard-hearted, something cruel, that we could just as well accomplish in an orderly way, and yet not prohibit any debate that is fair or necessary.

The VICE PRESIDENT. The question is on the motion of the Senator from Massachusetts [Mr. LODGE] to rescind the order directing the Sergeant at Arms to compel the attendance of absent Senators.

The motion was agreed to.

Mr. BRANDEGEE. Mr. President, has morning business closed?

The VICE PRESIDENT. It has not opened yet.

Mr. BRANDEGEE. I understood that the motion of the Senator from Massachusetts to rescind the order of the Senate was agreed to in the morning hour.

The VICE PRESIDENT. That was the very first thing done.

Mr. BRANDEGEE. Then we are still in the morning hour?

The VICE PRESIDENT. The Senate is just about to start in on morning business.

ENROLLED BILL SIGNED.

The VICE PRESIDENT announced his signature to the enrolled bill (S. 6839) extending the time for completion of the bridge across the Delaware River, authorized by an act entitled "An act to authorize the Pennsylvania Railroad Co. and the Pennsylvania & Newark Railroad Co., or their successors, to construct, maintain, and operate a bridge across the Delaware River," approved the 24th day of August, 1912, which had heretofore been signed by the Speaker of the House of Representatives.

HOUSE BILLS REFERRED.

H. R. 15869. An act to provide for the establishment and maintenance of mining-experiment and mine-safety stations for making investigations and disseminating information among employees in mining, quarrying, metallurgical, and other mineral industries, and for other purposes, was read twice by its title and referred to the Committee on Mines and Mining.

H. R. 16637. An act to provide divisions of mental hygiene and rural sanitation in the United States Public Health Service, was read twice by its title and referred to the Committee on Public Health and National Quarantine.

H. R. 17330. An act to authorize the sale and disposal of an island in the Coosa River, in the State of Alabama, was read twice by its title and referred to the Committee on Military Affairs.

H. R. 18783. An act to increase the limit of cost of the United States post-office building and site at St. Petersburg, Fla., was read twice by its title and referred to the Committee on Public Buildings and Grounds.

The following bills were severally read twice by their titles and referred to the Committee on Pensions:

H. R. 21037. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war;

H. R. 21089. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; and

H. R. 21218. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

NOTING OF RECOGNITION OF SENATORS IN RECORD.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. The Senator from Connecticut.

Mr. BRANDEGEE. Mr. President, I wish to take a minute of the time of the Senate during the morning hour to call the attention of the Senate to what I think is an error in the RECORD. I do not think the error pertains peculiarly to the particular case that I am about to cite, but I think it is in the method of reporting the proceedings of the Senate. For the purpose of illustrating it—and it presents a question of privilege, Mr. President—I call attention to the fact that on page 2585 of the RECORD under the date of January 29 this procedure is alleged to have taken place:

Mr. BRANDEGEE. I appeal from the ruling of the Chair, Mr. President.

The PRESIDING OFFICER. Evidently a sufficient number. The Secretary will call the roll.

Mr. JAMES. What is the question?

The Secretary called the name of Mr. ASHURST, and he voted in the affirmative.

Mr. BRANDEGEE. Mr. President, a parliamentary inquiry. What is the question to be voted on?

The PRESIDING OFFICER. The question is the motion of the Senator from Missouri to lay on the table the motion of the Senator from Michigan to take up Senate bill 392. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. BRANDEGEE. Mr. President, I rise to a question of order.

Mr. WILLIAMS. I make the point of order that the Chair has ordered the Secretary to call the roll, and the Secretary has begun to call the roll.

The PRESIDING OFFICER. The Secretary will proceed with the roll call.

Mr. BRANDEGEE. I rise to a point of order. The Senator from Connecticut was on his feet——

The PRESIDING OFFICER. The Secretary will proceed with the calling of the roll.

The Secretary resumed the calling of the roll.

Mr. BRANDEGEE (continuing). Demanding recognition before the Chair ordered the Secretary to call the roll; and this is equivalent to denying to a Senator his rights under the rules of the Senate.

Mr. President, it does not appear there that the Chair recognized me at any point of the proceedings which I have read, and yet the Chair did recognize me, and I took an appeal from the ruling of the Chair. The occupant of the chair at that time, as I understand, justifies his conduct on the ground that the RECORD does not disclose that he had recognized me. If the Chair will examine the RECORD in any place, he will see that the RECORD never shows that the Chair recognizes any Senator, so that it is impossible for a Senator, if the Chair wants to be arbitrary, to sustain his contention that he was recognized by the Chair, if the Chair forgets that he did recognize him. For instance, in order to show the deficiency of the RECORD in this respect I read from the first page of the RECORD of yesterday:

Mr. LODGE. Mr. President, I have no desire to oppose or delay the approval of the Journal—

Then he proceeds for the rest of that column and a part of the next, and it does not appear that he was ever recognized by the Chair at all.

The VICE PRESIDENT. Well, he was.

Mr. BRANDEGEE. Of course, I know he was; but why should not the RECORD show what the Chair says as well as what Senators say? It ought to appear. In my opinion every time a Senator stands up and says "Mr. President," the Official Reporter ought to read into the RECORD and into his notes that the Presiding Officer said, "The Senator from Massachusetts" or "The Senator from Connecticut," as the case may be, so that it may be of record whether the Senator had the floor, and, therefore, whether he was ignored by the Chair in a motion that he made when he had the floor.

The VICE PRESIDENT. If the Chair has authority, the Chair will instruct the reporters from now on to note the fact of recognition in the RECORD.

Mr. BRANDEGEE. That is the very point I was coming to as the conclusion of my remarks. The very night of these proceedings, when I found the Chair was claiming that he had not recognized Senators after Senators had thought that they had heard him give them recognition, I went to the Official Reporters and requested them to take down what the Chair said, so that a Senator would not be helpless and could not be denied the floor; but it was not done. Of course, I have no authority to direct the Official Reporters, and I do not know whether the Chair has. I am simply bringing this matter up for the attention of the Senate.

The VICE PRESIDENT. It seems to the Chair that the Chair has authority to so instruct the Official Reporters, because the rule provides that a Senator shall rise in his seat and address the Presiding Officer—the Chair does not quote the rule accurately, but quotes the substance of the rule—and that a Senator shall not proceed until recognized by the Presiding Officer. The Chair believes he has the power to do so, and he will instruct the Official Reporters hereafter to show recognition by the Chair whenever the Chair recognizes a Senator.

PETITIONS AND MEMORIALS.

Mr. THORNTON. I present the following petitions, which I ask leave to have printed in the RECORD: First, a petition of certain citizens of Louisiana, asking that an embargo be placed on the shipment of all munitions of war from the United States to any country now engaged in the European war; second, a petition of the State Farmers' Union of Louisiana, protesting against the passage of any law that would interfere with the power of the Interstate Commerce Commission to set aside rulings of any State railroad commission regulating freight rates in a State; and, third, a petition of State Farmers' Union of Louisiana, protesting against any restrictions being placed by England on exportation of cotton.

There being no objection, the petitions were ordered to be printed in the RECORD, as follows:

We, the undersigned citizens of the United States, most earnestly request the President of the United States, the Senators of our State, and the Representative of our District to pass the necessary laws that will enable the President of the United States to levy an embargo on all material useful in war, save foodstuffs and wearing apparel and surgical supplies only, and thereby withdraw from all contending powers all aid and assistance of this Republic.

We especially request our Senators and the Representative of our district to vote for Senate resolution 6688, or any similar measure of the House of Representatives.

Rev. Wm. Wedig, H. B. Hesse, R. E. Meisner, Jas. P. Allcoate, Chas. Hainebach, Thos. Kahn, Chas. S. Miller, J. B. Zobalio, N. L. Miller, Valentin Huber, W. S. Young, G. U. Wilder, H. F. Hart, W. C. Peters, F. E. Morse, A. La Bowe, John Hoffhaus, John Taylor, P. H. Hosea, C. B. Banknight, J. Cecil Hazel, T. Turpillo, J. A. McCorkle, Jas. H. Wagnon, F. Huber, jr., F. Huber, Nick Keller, H. C. Banknight, J. O. Modisette, W. H. Adams, Alonzo Early, Peter Parker, C. O. Woyles, Henry Fossbender, William M. Williams, J. H. Heineu, V. E. Richard, G. O. Browning, Frank Schmitt, J. W. Alfords, Will Brown, N. A. Carr, J. Geo. Christian.

Whereas if farmers get the results to which they are entitled in the sale of their products we must take into our own hands the matters of traffic, financing, and distribution and sales of our farm products; and

Whereas of recent years we have succeeded in being greatly benefited by cooperating with transportation and other business interests, and which interests have shown a willingness to cooperate with us, and we have secured advantageous rates to points outside of Louisiana, which has resulted in us getting increased prices for some of our farm products; and

Whereas we notice in the press reports that at a recent meeting of the State Railroad Commissioners' Association in Washington, D. C., a resolution was adopted asking Congress to pass a law which would forbid the Interstate Commerce Commission from interfering with any rate which might be fixed by a State railroad commission within a State; and

Whereas if Congress should pass such a law it would prove against the interests of the farmer, as we want to be free to ship our products to any point outside of the State, where we can get better prices, and also to purchase our supplies either from points within the State or from points outside the State and be in position to buy where it might be cheaper and to our interests: So be it

Resolved by the Louisiana State Farmers' Union, That we oppose Congress passing any law that will interfere with the rights of the Interstate Commerce Comaission and gave them full authority to act as they did in the Shreveport Rate case, and which action has been upheld by the Supreme Court of the United States, and which was in favor of the farmers, and that the secretary be instructed to send a copy of this resolution to Brother O. W. Taylor, president Oklahoma Farmers' Union, at Roff, Okla., and to Brother W. D. Lewis, president Texas Farmers' Union, Fort Worth, Tex., with the request that they take similar action, and a copy to each of our worthy Senators, Hon. J. E. RANSDELL and Hon. JOHN R. THORNTON, with the request that they see that our rights are protected.

J. M. DAVIS, *Chairman.*

Whereas the cotton farmers of the Nation are suffering from the worst depression that has overtaken this country since 1860, and the business interests are correspondingly affected in common with the farmer; and

Whereas, taking the European war as an excuse, England placed such restrictions on the exporting of cotton from the United States that it caused a ruinous decline in the price of cotton, owing to our inability to ship it to our customers in foreign countries, and England did not relax her interference with the shipment of cotton until her subjects had practically bought a year's supply of cotton at about 6 cents per pound from our farmers, who are forced to sell in order to exist; and

Whereas the waters of the seas are the only means of carrying the commodities interchanged between the various nations of this earth; and

Whereas the citizens of the United States of all classes, who are at peace with the world and neutral, should be permitted to use the high seas and ship our products in ships bearing the Stars and Stripes to any part of the world, irrespective of other nations who may be at war with each other; and

Whereas great injustice resulted from the efforts of some nations to interfere with the untrammeled and free use of the interchange of commodities of all kinds and interchange of intelligence; and

Whereas the interference referred to is causing unbearable losses and suffering to the great majority of farmers and other citizens of Louisiana and other States in the United States: So be it

Resolved by the Louisiana State Farmers' Educational and Cooperative Union of America, That we hereby pledge ourselves to do all in our power to obtain for ourselves and our fellow citizens, and mankind generally, the freedom and unhindered use of the seas and of the air, and we hereby respectfully petition our Federal Government to give due notice to all nations that in view of the losses sustained by the people of these United States, that in future that we henceforth shall ship all of our products at all times and to our customers in any nation just as in the past; that this Nation, being neutral, will not favor one over the other, but will treat all alike, as it ought to do, but that our Government proposes to send its own ships, under its own flag, with the products of its own citizens, to its customers in any nation on earth, and will brook interference from no one in protecting the right and the property and trade relations of its own people; and be it further

Resolved, That our secretary be instructed to mail a copy of this resolution to our national president, Brother C. S. Barrett, Atlanta, Ga., and request that he submit this to our national executive committee for action; and also to Brother O. W. Taylor, president Oklahoma Farmers' Union, Roff, Okla.; and also to Brother W. D. Lewis, president Texas Farmers' Union, of Fort Worth, Tex., and request that they take similar action in their State meetings, which we notice in the Farmers' Fireside Bulletin, that will be in January and February next; and also to give a copy to the press, with the request that the fullest publicity be given this resolution all over the United States; and also a copy to our worthy United States Senators, at Washington, D. C., Hon. JOSEPH E. RANSDELL and JOHN R. THORNTON, and request that they have this read in the Journal of the United States Senate; and also that they furnish a copy for us to every Representative of the State of Louisiana, with the request that it be read in the House of Representatives; and that a copy be also mailed to the President of the United States, Hon. Woodrow Wilson.

I. N. MCCOLLISTER,
President.
J. M. DAVIS,
Vice President.
Miss MINNIE CARRON,
Secretary Treasurer.
R. LEE MILLS,
Chairman Executive Committee.
S. B. DAVID,
Secretary Committee.
J. H. CRAIG,
H. A. MORGAN,
Of the Committee.

Mr. GALLINGER. I present a petition signed by Rev. John Knox Tibbitts and 16 other members of St. Timothy's Church, of Concord, N. H., advocating and urging the passage of the Palmer-Owen child-labor bill, being House bill 12292. I move that the petition be referred to the Committee on Education and Labor.

The motion was agreed to.

Mr. GALLINGER presented the petition of Otto Granz, of Bedford, N. H., praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which was referred to the Committee on Foreign Relations.

Mr. JONES. I have three or four short resolutions, adopted by the Washington State Federation of Labor, in convention assembled, which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

We favor the enactment of a mutual savings bank law, for the purpose of securing the great benefits which such institutions have produced in other States during the past 100 years.

Four and one-fourth billion dollars of assets are now held by the mutual savings banks of the United States, including 61 per cent of the entire reported savings deposits of the United States. Their investments are confined to the highest class of rigidly prescribed securities, including real estate mortgages at moderate rates of interest, thereby greatly advancing the upbuilding of the communities where located.

Whereas the present industrial crisis in the State of Washington demands remedy, and it is apparent that the Immigration Service is seriously handicapped for the lack of funds to properly enforce the present existing laws; and

Whereas statistics show that 1,400,000 immigrants entered the United States during the last fiscal year; and

Whereas the Immigration Service is the only department of our Government that is self-supporting, a head tax of $4 per head being required from every immigrant entering this country, and, as Government figures show, during the last fiscal year $6,700,000 was expended in the administration of existing immigration laws, and it appears that immigrants in large numbers are crossing the boundary line into Washington, with but little inspection, because of the parsimonious attitude of the Federal Government: Therefore be it

Resolved, That we call upon our representatives in Congress to demand that the money acquired for the purpose of administration of existing immigration laws be expended for that purpose.

Whereas in many States it is customary for the labor of convicts in the State penitentiaries to be leased to private contractors, with no return to the prisoners, making of them virtual slaves; and

Whereas this system of contract prison labor has been the means of increasing the hold of the sweatshop system of free labor and undermining the conditions of the wage laborers in the industries coming into competition with convict labor, particularly in the case of the garment workers engaged in making shirts, overalls, etc.; and

Whereas in the Sixty-third Congress a bill was introduced in the House of Representatives by Representative BOOHER, of Missouri, and in the Senate by Senator HUGHES, of New Jersey, having for its object the prohibition of interstate commerce in prison contract-made goods produced in competition with free labor; and

Whereas this bill has already passed the House and is pending in the Senate, every effort being made to prevent final consideration until too late for action this session: Therefore be it

Resolved, That the Washington State Federation of Labor demand immediate and favorable action in the Senate on this most important measure and notify the Senators from this State to that effect, requesting their cooperation; and be it further

Resolved, That central bodies and local unions be requested to immediately take like action.

Whereas the policy of the State of Washington is and always has been to refrain from employing penal labor in pursuits which would place the products of that labor in competition with that of free labor; and

Whereas the penal labor of Kentucky is sold to contractors at from 35 to 40 cents per day; of Maryland, at from 35 to 50 cents per day; of Missouri, at from 50 to 75 cents per day; of Virginia, at from 60 to 85 cents per day; of Nebraska, at 62½ cents per day; of South Dakota, at 58½ cents per day; of West Virginia, at from 70 to 75 cents per day; and of Rhode Island, at 50 cents per day; and

Whereas fully 3,000 men and women are thus employed at wages between one-third and one-half of that of free labor; and

Whereas the produce of this labor is engaged in manufacturing boots and shoes, furniture, leather goods, hollow ware, farm implements, brooms, wire goods, pearl buttons, umbrellas, hosiery, underwear, men's and women's clothing, and other merchandise, which goods are sold in open competition with the products of free labor; and

Whereas all efforts heretofore made to prevent the shipping of such convict-made goods into States that recognize the injustice of such competition have failed because of the courts' interpretation of all such legislation as unconstitutional because of its interference with interstate-commerce rights, etc.; and

Whereas in an effort to overcome such court interpretation there has been introduced into Congress what is known as the Booher-Hughes bill, which bill specifically proposes to invest each State with authority to regulate the sale of convict-made goods within its borders; and

Whereas the Booher-Hughes bill has passed the House of Representatives by the overwhelming vote of 302 to 3 and is now pending in the United States Senate: Therefore be it

Resolved, That the Washington State Federation of Labor urge our United States Senators not only to vote but to work unceasingly for its passage during this session of Congress, and that the secretary of the State federation of labor be instructed to urge other State federations of labor through their executive officers to bring all possible pressure to bear upon their Senators, to the end that this bill be passed, so that States that so desire can protect free labor against such unfair conditions.

Whereas it appears that because of the cheaper timber procurable by the manufacturers in British Columbia the shingle manufacturers in the United States are placed at a decided disadvantage in their home markets: Therefore be it

Resolved, That the thirteenth annual convention of the International Union of Timberworkers instruct its international officers to cooperate with the manufacturers in a movement to establish a tariff sufficient to offset the advantages the British Columbia manufacturers now have; and be it further

Resolved, That the delegates of the International Union of Timberworkers in attendance at the fourteenth annual convention of the Washington State Federation of Labor be instructed to work toward securing the aid of the State Federation of Labor in this movement.

Resolved, That the Washington State Federation of Labor favors a tariff on shingles and indorses the above resolutions, and pledges its support to the timberworkers

---

Whereas organized labor has always advocated the caring for aged workers, who after years of toil are left dependent, because of not receiving sufficient competence to put away funds to care for themselves in their declining years; and

Whereas we believe the question is of national importance, it should be the function of the National Government to provide ways and means to put into effect an adequate system for the pensioning of aged and disabled workers; and

Whereas House record No. 5139, known as the Hamill bill, an act to provide for the retirement of employees in the Government civil service, is a step in the direction of providing a system of pensioning the aged workers: Therefore be it

Resolved, That the Washington State Federation of Labor in convention assembled indorses the proposed measure, and instructs its executive officers to communicate the action of this convention on this matter to the Washington congressional delegation.

Resolved, That the State Federation of Labor, through our representatives, Senators and Congressmen, in Washington, asks for a deficiency appropriation to protect the said borders from the influx of foreigners.

Mr. BURTON presented petitions of sundry citizens of Ohio, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. MARTINE of New Jersey. I have a letter from the secretary of the States Permanent Exposition Society relative to Senate bill 3971, providing for an investigation and report upon the feasibility of the establishment of a permanent exposition of the resources of the States of the Union in or near Washington, D. C. The letter is short and of interest, and I ask that it be printed in the RECORD and referred to the Committee on Industrial Expositions.

There being no objection, the letter was referred to the Committee on Industrial Expositions and ordered to be printed in the RECORD, as follows:

JANUARY 26, 1915.

Hon. JAMES E. MARTINE,
United States Senate, Washington, D. C.

MY DEAR SENATOR: I have the honor, on behalf of the States Permanent Exposition Society, to present for the consideration of the Senate of the United States the following facts relative to Senate bill 3971, providing for an investigation and report upon the feasibility of the establishment of a permanent exhibit of the resources of the States of the Union in or near Washington, D. C.

At the request of the States Permanent Exposition Society, there was introduced in the Senate on January 12, 1914, by the Hon. HENRY L. MYERS, the measure now before your honorable body for consideration. A similar bill was previously presented to the House of Representatives.

Immediately after the introduction of the bill in the House, governors of the various States manifested their keen interest and their approval of the measure. In fact, so strongly did the purpose of the bill commend itself that a number of the governors have selected State committees to cooperate in the establishment of permanent exhibits at the Nation's Capital. The purposes of the measure have not only received the approval of the States' executives, but also has the favorable indorsement of hundreds of commercial associations, trades bodies, and civic organizations in every part of the United States.

All preliminary work incident to the preparation of the bills, including all exploitation work, correspondence, etc., has been accomplished through the earnest, patriotic, and gratuitous services of two members of our society, Mr. Mark A. Woodell and Mr. R. Gordon Finney, both of said gentlemen having had long experience in exposition matters, and who fully appreciate the great industrial and commercial advantages which will result through the establishment of such permanent exhibits.

Aside from the great commercial advantages to be gained by such permanent exhibits at Washington, such an exposition will tend to inspire a wholesome and friendly competition among the States of the Union. The project will also prove a means of the saving of millions of dollars which have heretofore been expended by the States through their participation in great expositions of a temporary character. This great economy can be more readily appreciated when we pause to consider the vast sums of money which have in the past and which is at the present time being expended in the construction and maintenance of handsome and imposing State buildings on the sites of our great expositions in the West, and which buildings, after having served their purpose for but a few months, are dismantled and demolished.

It is for the above and numerous other good reasons that our States are anxious for a permanent exposition at their National Capital, and we earnestly ask that the initial steps may be taken at the present session of Congress for the accomplishment of this great enterprise of world-wide importance.

Assuring you of our high esteem and of our hearty cooperation in your efforts, we have the honor to remain,

Faithfully, yours,

STATES PERMANENT EXPOSITION SOCIETY,
M. A. WOODELL, *Secretary*,
Room 8, 729 Fifteenth Street NW., Washington, D. C.

[From report of House committee.]

For many years past the various States of the Union have been expending large sums of money for the purpose of advertising to the outside world the advantages possessed by each State over other sections of the country, and these expenditures and these efforts have been largely supplemented by appropriations made by railroads, commercial organizations, and individuals. This advertising takes many shapes, but in probably no other form of advertising does a State—through appropriations made from the treasury—expend such large sums as in exhibits made of its resources at the various State, national, and international expositions which are constantly being held in this country and abroad.

There are two great objections to exhibits of this character, however, so serious that it can well be doubted whether a State receives from such sources an adequate return for the moneys invested. The first of these objections is, that an exposition is temporary in character, and the displays made there must be viewed, if at all, within three, four, or six months. The second objection is that visitors to expositions are there in a holiday mood and are not disposed to make a study of exhibits illustrating the resources of any particular community. But the practice has so grown that it is doubtful whether a State can refuse to make an exhibit at any national or international exposition, because to refuse to do so would be to make that State conspicuous by its absence.

The erection at the city of Washington in the District of Columbia of State buildings within which to house a complete display of the national wealth and resources of the several States and Territories in education, manufacturing, agriculture, and in the arts is worthy of consideration. The erection of these buildings upon an appropriate site would add much to the beauty of the National Capital; it would stimulate a greater feeling of patriotism in the Federal Government, and would have a tendency to cement in closer bonds the people of the various States. It would furnish a most complete advertisement of the resources of a State, located at a strategic point where it could be viewed by thousands of visitors every year. What more appropriate exposition idea than to display here, in permanent manner, exhibits illustrative of the wealth of the States in agriculture, forestry, mining, manufacturing, and the arts? Such an exhibit would be of great educational value to the people of our country, and it would

prove an important factor in increasing trade, not alone with the several States of the Union but with foreign nations.

The establishing of the various State exhibits would furnish to foreign nations a most convincing argument for peace, in that the representatives of such foreign Governments could see at a glance the tremendous resources and wonderful possibilities of the United States. All that would be required of the National Government would be to furnish to the different States a proper and convenient site, on lands now owned by the Government, upon which to erect these buildings. Further than this the committee thinks the National Government should not go. The cost of the erection of the buildings, the expense of the installation of the various exhibits and the maintenance thereof, and all or any expenses incident thereto should be borne solely, wholly, and alone by the respective States which may establish their exhibits.

Mr. SHERMAN. I have divers petitions from citizens of the State of Illinois favoring the passage of Senate bill 6688, to prohibit individuals, partnerships, or corporations in the United States from selling arms, ammunition, artillery, and explosives of any kind for exportation during the existence of war except upon proof that said arms, ammunition, artillery, and explosives are not to be used in war against a country with which the United States is at peace. I ask that one of the petitions may be printed in the RECORD and that the remainder be referred to the Committee on Foreign Relations.

There being no objection, the petitions were referred to the Committee on Foreign Relations and the body of one of the petitions was order to be printed in the RECORD, as follows:

JANUARY, 1915.

Senator LAWRENCE Y. SHERMAN,
Washington, D. C.

HONORABLE SIR: As an American I respectfully ask you to vote for and lend your active support to Senate resolution 6688, so that it may pass the Senate at this session of Congress, and I also ask you to impress upon the Committee on Foreign Relations the fact that the majority of the people of your senatorial district are in favor of such a law.

Respectfully,
JULIUS VOSS,
4464 Fifth Avenue, Chicago, Ill.

Mr. CATRON. I present a joint resolution adopted by the House of Representatives of the State of New Mexico relative to an appropriation of $300,000 for suppressing carnivorous wild animals destructive to livestock in the public-land States of the West. I ask that the joint memorial may be printed in the RECORD and referred to the Committee on Agriculture and Forestry.

There being no objection, the joint resolution was referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

[House joint memorial No. 1, introduced by Mr. Secundino Romero.]

Memorial to the Congress of the United States of America petitioning the United States Government to appropriate $300,000 for suppressing carnivorous wild animals destructive to livestock in the public-land States of the West.

Your memorialists, the governor and Legislature of the State of New Mexico, respectfully represent that—

Whereas in the Western States, known as the public-land States, the losses of livestock and poultry due to the attacks of coyotes, wolves, wildcats, cougars, and bears amount to not less than $15,000,000 annually; and

Whereas in these western public-land States the State, county, and stockmen do now and have for years paid large bounties and used other means to bring about the eradication of these carnivorous wild animals; and

Whereas in these western public-land States there is now withdrawn from settlement in some form or other approximately 225,000,000 acres of Federal land, which constitutes the principal breeding ground and refuge of these carnivorous wild animals and enables them to increase their numbers in spite of the efforts made by State, county, and stockmen to exterminate them: Now therefore be it

Resolved, That the Legislature of the State of New Mexico does hereby most respectfully urge and request that Congress immediately appropriate the sum of $300,000 to be used by the United States Department of Agriculture for the destruction of coyotes, wolves, wildcats, cougars, and bears in these western public-land States in order that the meat supply of the Nation may be increased and the proper development of the West encouraged.

I, Blas Sanchez, chief clerk of the House of Representatives of the State of New Mexico, do hereby certify that the above and foregoing is a true and correct copy of house joint memorial No. 1.

BLAS SANCHEZ, *Chief Clerk.*

Mr. TOWNSEND. I present a petition signed by 70 merchants and business men of the city of Iron Mountain, Mich., stating that they believe in equal taxation, establishing of home industries, and protection of local trade, and are heartily in favor of House bill 5308, to provide for a tax upon the persons, firms, or corporations engaged in interstate mail-order business, and for other purposes, and indorsing the sentiments expressed in a letter dated January 14, 1915, from the Retail Furniture Dealers' Association of the State of Tennessee, and petitioning every effort to be made to secure the passage of such legislation. I move that the petition be referred to the Committee on Post Offices and Post Roads.

The motion was agreed to.

Mr. HOLLIS. I present a petition signed by members of St. Timothy's Church, of Concord, N. H., which I ask may be printed in the RECORD.

There being no objection, the petition was ordered to be printed in the RECORD, as follows:

CONCORD, N. H., *January 27, 1915.*

To the Hon. HENRY F. HOLLIS,
Senator from New Hampshire, Washington, D. C.

DEAR SIR: We, the undersigned, members of St. Timothy's Church, of Concord, N. H., request that you advocate and urge the passage of the Palmer-Owen child-labor bill, H. R. 12292:

John Knox Tibbits, William Casno Silver, George Evans, George Angwin, Lillian B. Angwin, R. Waldo Wilson, Agnes E. Dexter, John Stanley, Mrs. J. Coleman, Ruth W. Abbott, Alice A. Abbott, Mrs. J. Baxter, Isabel Baxter, Mrs. G. Angwin, Rhoda J. Angwin, Mrs. John Angwin, John Angwin.

Mr. HOLLIS. I present a letter from E. M. Slayton, of Manchester, N. H., which I ask may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MANCHESTER, N. H., *February 1, 1915.*

DEAR SIR: Although general business through New Hampshire for January was the poorest for the corresponding month for many years, I can see a large business coming for the balance of 1915.

The basic conditions are such as to force it onto us. The passage of the steamship bill now before Congress will remove the last large deterrent. There are tens of millions of tons of our coal, iron products, food, and miscellaneous manufactured products wanted by neutral nations, but the English owners of 80 per cent of the present ocean carriers are charging four to eight times the usual freight rates, at the same time there are idle steamships to carry these goods, but because a Democrat proposes the bill the old-line Republicans oppose.

This war was brought on for business reasons. Russia wants free passage of the Dardanelles for its food crops, England was jealous of Germany's continuous advancement in getting a share of its overseas trade, Germany wanted Belgium for its seaports; it was, and is, a war for control of world's trade, and it is the height of folly for our people to let slip by the opportunity to step in and get a large share of the same. Don't think for a second England would, "if in our situation," neglect to buy ships wherever it could. Their game is to keep ocean freights so high that we have to sell underpriced in order to sell the merchandise. If ocean freights were at only double one year ago prices, we would be moving two and three million tons coal per month. Just think what that would bring in wages to the coal miners and railroads that bring the coal to seaboard. There would be an enormous demand for iron products, and consequently full employment for labor in that line; it would increase railroad earnings; in fact, bring full employment to all and prosperous times to all.

Most respectfully, yours,
E. M. SLAYTON.

Mr. PERKINS presented petitions of sundry citizens of Los Angeles, Cal., praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. McLEAN presented petitions of the German-American Alliance of Middletown; of the German-American Alliance of Seymour; and of sundry citizens of Broad Brook and Bridgeport, all in the State of Connecticut, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented a memorial of sundry citizens of Wallingford, Conn., remonstrating against the exclusion of certain matter from the mail, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of the Unity League of Norwalk, of South Norwalk, Conn., remonstrating against the passage of the immigration bill over the President's veto, which was ordered to lie on the table.

He also presented a petition of the Cigar Makers' Local Union No. 282, of Bridgeport, Conn., and a petition of Local Union No. 481, Brotherhood of Painters, Decorators, and Paperhangers, of Hartford, Conn., praying for the passage of the immigration bill over the President's veto, which were ordered to lie on the table.

Mr. KERN presented petitions of sundry citizens of Fort Wayne, Hobart, Indianapolis, Porter, McCool, Evansville, Hammond, Kokomo, Waymansville, Mishawaka, Huntington, and Brazil, all in the State of Indiana, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented memorials of sundry citizens of Ockley, Delphe, Colburn, Mulberry, Frankford, Hammond, La Porta, and Dayton, all in the State of Indiana, remonstrating against the exclusion of certain matter from the mail, which were referred to the Committee on Post Offices and Post Roads.

He also presented a petition of sundry citizens of Elkhorn, Ind., praying for the extension of the Federal migratory bird law, which was referred to the Committee on Forest Reservations and Protection of Game.

He also presented a memorial of Local Branch, Brotherhood of Railway Car Men of America, of New Albany, Ind., remonstrating against a change in the locomotive boiler-inspection law, which was referred to the Committee on Interstate Commerce.

Mr. SHIVELY presented a memorial of the Ministerial Association of Richmond, Ind., remonstrating against a change in the

compensatory time service of post-office employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of Local Union No. 565, Brotherhood of Carpenters and Joiners, of Elkhart, Ind., praying for the enactment of legislation to regulate interstate commerce in convict-made goods, which was referred to the Committee on Interstate Commerce.

He also presented a petition of the Woman's Christian Temperance Union of Kokomo, Ind., praying for the enactment of legislation to provide Federal censorship of motion-picture films, which was referred to the Committee on Education and Labor.

Mr. CHAMBERLAIN presented petitions of sundry citizens of Oregon, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

He also presented petitions of sundry citizens of Oregon, praying for the passage of the immigration bill over the President's veto, which were ordered to lie on the table.

He also presented petitions of sundry citizens of Oregon, remonstrating against the exclusion of certain matter from the mail, which were referred to the Committee on Post Offices and Post Roads.

Mr. ASHURST. I present a concurrent resolution of the Legislature of Arizona, which I ask may be printed in the RECORD and referred to the Committee on Commerce.

There being no objection, the concurrent resolution was referred to the Committee on Commerce and ordered to be printed in the RECORD as follows:

House concurrent resolution for the construction of a bridge across the Gila River near the Pima Indian Agency.

To the Hon. MARCUS A. SMITH and HENRY F. ASHURST, United States Senators, and the Hon. CARL HAYDEN, Member of Congress:

Whereas a bridge across the Gila River near the Pima Indian Agency will be of a great benefit and convenience to the Pima Indians in crossing the river in times of flood; and

Whereas a diversion dam is contemplated by the Federal Government at the intake of a large canal near the Pima Indian Agency: Now, therefore, be it

Resolved by the House of Representatives of the Second Legislature of the State of Arizona (the Senate concurring), That it is the desire of the legislature that the Arizona representatives in the Federal Congress use their best efforts to procure by the Congress now in session an appropriation for the construction of a combined bridge and diversion dam, to be located in the Gila River, Pinal County, Ariz., at a point about 2½ miles above the Pima Indian Agency and within the Gila River Indian Reservation.

Passed the house January 28, 1915, by a vote of: Ayes 35, noes 0.
WM. E. BROOKS,
Speaker of the House.

Passed the senate January 28, 1915, by a vote of: Ayes 19, noes 0.
W. P. SIMS, *President.*
OSCAR COLE, *Secretary.*

REPORTS OF COMMITTEES.

Mr. MYERS, from the Committee on Public Lands, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

S. 4320. A bill for the relief of certain homestead entrymen for lands within the limits of the Glacier National Park (Rept. No. 951); and

S. 3200. A bill relating to desert-land entries (Rept. No. 952).

Mr. MYERS, from the Committee on Public Lands, to which was referred the bill (H. R. 16029) to authorize the Secretary having jurisdiction of the same to set aside certain public lands to be used as national sanitariums by fraternal or benevolent organizations, and for other purposes, reported it with an amendment and submitted a report (No. 953) thereon.

Mr. NELSON, from the Committee on the Judiciary, to which was referred the bill (S. 4495) providing for the establishment of a term of the district court for the district of Kansas at Salina, Kans., reported it without amendment and submitted a report (No. 955) thereon.

LANDS IN NEVADA.

Mr. PITTMAN. Mr. President ——

The VICE PRESIDENT. The Senator from Nevada.

Mr. PITTMAN. I have here a bill from the Committee on Public Lands, respecting the State of Nevada, to encourage the development of water on arid lands. It has been ordered favorably reported by the committee, with amendments, which has had two hearings upon it, and has also been favorably reported upon by the Department of the Interior. It is Senate bill 7109 to encourage the reclamation of certain arid lands in the State of Nevada, and for other purposes, and I submit a report (No. 954) thereon. I ask for the present consideration of the bill.

Mr. SMOOT. I shall have to object to the present consideration of the bill.

The VICE PRESIDENT. Objection being made, the bill will be placed on the calendar.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CULBERSON:

A bill (S. 7545) to provide for the acquisition of a site and the erection of a public building thereon at Fort Worth, Tex., and for the remodeling, altering, etc., of the present post-office building; to the Committee on Public Buildings and Grounds.

By Mr. THOMPSON:

A bill (S. 7546) granting a pension to Myrtle J. Hayes (with accompanying papers); to the Committee on Pensions.

By Mr. STEPHENSON:

A bill (S. 7547) granting a pension to Walter K. Neal (with accompanying papers); to the Committee on Pensions.

By Mr. TOWNSEND:

A bill (S. 7548) granting a pension to Lucy A. Palmer (with accompanying papers); and

A bill (S. 7549) granting an increase of pension to John E. Graham (with accompanying papers); to the Committee on Pensions.

By Mr. SMOOT:

A bill (S. 7550) to correct the military record of Almond S. Root (with accompanying papers); to the Committee on Military Affairs.

By Mr. SMITH of Georgia:

A bill (S. 7551) to provide for the establishment, operation, and supervision of a cooperative national farm-land bank system in the United States of America, and for other purposes; to the Committee on Banking and Currency.

By Mr. BURLEIGH:

A bill (S. 7553) granting an increase of pension to John Hawksley; to the Committee on Pensions.

THE MERCHANT MARINE.

Mr. GORE. I introduce a bill and ask that it be read the first time by its title.

The bill (S. 7552) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia, to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes, was read the first time by its title.

The VICE PRESIDENT. The bill will lie on the table.

Mr. SHEPPARD. I introduce a joint resolution relative to an investigation of a system of rural personal credit. I ask that the joint resolution be printed in the RECORD and referred to the Committee on Agriculture and Forestry.

The joint resolution (S. J. Res. 232) to authorize the Committees on Agriculture of the Senate and House to investigate a system of rural personal credit was read twice by its title, referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

Joint resolution (S. J. Res. 232) to authorize the Committee on Agriculture of the Senate and House to investigate a system of rural personal credit.

Whereas none of the several rural credit investigating bodies appointed by Congress within the past few years has drafted a personal rural credit bill; and

Whereas personal rural credit is more necessary than a land-mortgage system, although such system is good so far as it goes; and

Whereas nearly every highly civilized country has in successful operation a personal rural credit system through which the farmers of those countries obtain credit for productive purposes at low rates of interest and in sufficient amounts to enable them to produce agricultural products more economically than is done in this country, even though our farmers possess many natural advantages not enjoyed by them; and

Whereas the great European war now being waged is wasting capital at a rate never before approached, which condition is bound to result in materially affecting the world's capital and credit markets; and the American farmers having no organized credit machinery it naturally follows that their interests will suffer more than any other interests in the country and make it more difficult for them to obtain credit in the future than it has been in the past: Therefore be it

Resolved, etc., That the Committees on Agriculture of the Senate and House of Representatives are hereby authorized, through a subcommittee, to investigate and hold hearings on such personal rural credit bills as may be presented to them, in the manner hereinafter more specifically set forth, and make a report thereof not later than the 10th day of December next.

SEC. 2. That such subcommittee or investigating body, which is hereinafter referred to as the commission, shall hold its hearings and investigations in such manner that will permit persons who, in the commission's opinion, have sufficient authoritative backing, to present bills for a personal rural-credit system in the United States to the commission and appear before them by experts of their own selection to establish the merits of their respective bills and to disprove any provisions contained in bills not presented by themselves. The commission shall notify at least one leading representative of every interest affected by such bills, including the president of the American Bankers' Association, of his privilege to appear before the commission by an expert of his own selection and to advocate or oppose any bill presented, who shall enjoy

the same rights and privileges before the commission as the experts of the proponents.

SEC. 3. That it shall be the further duty of the commission to send for persons and papers; to administer oaths; to summon and compel the attendance of witnesses and have the same examined by themselves or by the representatives of the parties at interest appearing before them, or both; to adopt rules of procedure and the same to amend; and to employ such secretaries, experts, stenographers, and other assistants as shall be necessary to carry out the purposes for which the commission was created.

SEC. 4. That the members of the commission shall receive no compensation for their services on the commission, except traveling expenses incurred outside of the District of Columbia while attending to the duties imposed under this act.

SEC. 5. That the sum of $9,000, or so much thereof as may be necessary to carry out the purposes of this act and to defray the expense of the commission, is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated. Such appropriation shall be immediately available and shall be paid out on the audit and order of the chairman or acting chairman of said commission, which audit and order shall be conclusive and binding upon all departments as to the correctness of the accounts of said commission.

INTERNATIONAL PEACE.

Mr. SHAFROTH. I introduce a joint resolution providing for world organization to secure permanent international peace. I ask that the joint resolution may be printed in the RECORD and referred to the Committee on Foreign Relations.

The joint resolution (S. J. Res. 233) providing for world organization to secure permanent international peace was read twice by its title, referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

Joint resolution (S. J. Res. 233) providing for world organization to secure permanent international peace.

Whereas it is the duty of all men to aid in ameliorating harsh conditions suffered by others; and

Whereas multitudes of men in all lands are now burdened by the cost of armaments due to an ever-present fear of international war; and

Whereas means of communication now exist which give to the people of different nations a larger understanding of their common interest than they could have had heretofore; and

Whereas that common understanding, if supplied with an organ of expression and of action, may bear proper fruit in preventing the desolations of war and in promoting human happiness through peaceful cooperation of States: Now, therefore, be it

Resolved, etc., That this Congress hereby declares its acceptance of the principle that international disputes threatening war should be submitted for final determination to an international court having armed power to enforce its decrees; the constitution of said court to be substantially as set forth in the tentative draft of articles of agreement hereinbelow set forth.

Resolved further, That this Congress does hereby request the President to initiate negotiations, through the usual diplomatic channels, looking to the establishment of a system of international control based upon the principles appearing in the said tentative draft.

TENTATIVE DRAFT OF ARTICLES OF AGREEMENT CONSTITUTING AN INTERNATIONAL COURT OF DECREE AND ENFORCEMENT.

ARTICLE 1.

The object of this agreement is declared to be the abolition of international war and the furtherance of peaceful cooperation between the Governments assenting to these articles.

ARTICLE 2.

In the pursuit of this object the signatories hereto undertake to create a sovereign body to be called the International Court of Decree and Enforcement, hereinafter designated the court. And they bind themselves to perform the things required of each for the establishment and maintenance of the court.

ARTICLE 3.

SECTION 1. The court shall be composed of representatives of the signatories hereto, hereinafter referred to as member States.

SEC. 2. The number of such representatives, plus those determined by the provisions of section 4 of this article, shall be as follows: Two members from each of the following States and groups of States, namely: Austria-Hungary, China (including Thibet), France, German Empire, Great Britain, Italy, Japan, Russia, Spain and Portugal, Turkey, United States of America.

SEC. 3. One member from each of the following States and group of States, namely: Afghanistan and Persia; Argentine Republic and Uruguay; Belgium and Luxemburg; Bolivia, Chile, and Peru; Brazil and Paraguay; Bulgaria, Greece, Roumania, and Servia; Colombia, Ecuador, Panama, and Venezuela; Costa Rica, Guatemala, Honduras, Mexico, Nicaragua, and Salvador; Denmark, Sweden, Norway; Holland; Siam; Switzerland.

SEC. 4. From each State or group of States (except China) named in section 2 of this article one additional member for every 20,000,000 inhabitants in excess of 30,000,000; from each State or group of States in section 3 of this article, one additional member for every 20,000,000 inhabitants in excess of 20,000,000. For China (including Thibet) one member for every 100,000,000 inhabitants in excess of 200,000,000: *Provided*, That in the enumeration of inhabitants for the purpose of representation no count shall be taken of any persons held in slavery. Inhabitants of colonies, protectorates, or possessions not self-governed shall entitle their controlling power to representation on the following basis, namely: For the first 30,000,000, one member; for each 100,000,000 in excess of the first 30,000,000, one member.

SEC. 5. The membership of States affected now by the provisions of section 4 of this article shall, during the first 10 years of the exercise of this constitution, be taken as follows: Austria-Hungary, 2; France, 3; German Empire, 3; Great Britain, 6; Holland, 2; Japan, 3; Russia, 6; United States of America, 7.

At the end of said period of 10 years, and thereafter every tenth year, the court shall inquire into and fix for the purpose of representation in this union the population of member States and groups of States.

ARTICLE 4.

SECTION 1. The pay of members of the court shall be $20,000 per annum.

SEC. 2. The manner of selection, the personal qualifications, and the term of office of members shall be such as may be determined by their respective Governments.

ARTICLE 5.

SECTION 1. The first place of meeting of the court shall be at The Hague, in Holland. This meeting shall take place and the conditions of this agreement shall become operative one year from the date when any six of the following-named States may have adopted and signed these articles, namely: The United States of America, Great Britain, France, Germany, Austria-Hungary, Russia, Japan, and Italy.

SEC. 2. During a period of five years after the first year of the exercise of this agreement the court may sit in such capitals of member States as it may select. During the same period of five years the court shall endeavor to obtain sole sovereignty of an area not exceeding 10 miles square, and there fix its seat of government; and if it should not succeed in obtaining such sole sovereignty, the court shall thereafter have its sittings wherever it may determine: *Provided, however*, That the persons of members of the court shall always be inviolable when journeying to and from, or in attendance upon, the court.

ARTICLE 6.

SECTION 1. The rules of procedure of the court shall be such as from time to time may be fixed by it: *Provided, however*, That a majority vote of the members shall always be required for the following purposes, namely:

First. For adopting or altering rules of procedure.

Second. For rendering final decision in any dispute between member States.

Third. For authorizing the use of violence by the armed forces of the court.

Fourth. For determining the sums required for meeting the expenses of the operations of the court.

Fifth. For electing a president and vice president (from among their number) and for defining the powers and terms of office of said officers.

Sixth. For passing upon the credentials of members whose right to recognition as such may be in dispute.

SEC. 2. Communication between the court and the member States shall be carried on by their respective executives, unless other officials be specially appointed thereto by the court or the member States.

SEC. 3. The court shall cause to be printed in French, with reasonable promptness, and to be furnished to the member States, full reports of its decisions, whether judicial or executive, but its deliberations may be made public or not as the court may decide.

ARTICLE 7.

The powers of the court shall be as follows:

SECTION 1. To decide by decree all disputes submitted to it by any State (whether a member or not) and arising between a member State or any other State (whether a member or not). Such decision may be made upon the evidence presented by the State submitting the dispute if, within such period as may be fixed by the court, the other State or States concerned, having been admonished thereto by the court, shall have failed to present other evidence.

SEC. 2. To enforce by arms the execution of its decrees, the fulfillment of demands made in accordance with this constitution, and the exercise of all powers granted herein.

SEC. 3. To repel any attack, or to repress preparations therefor, by any State against any member State.

SEC. 4. To intervene in the affairs of any State disordered by violence and to pacify such disorder by advice, decree, or force: *Provided, however*, That no such intervention shall take place unless the court be requested thereto by two or more States, other than the State or States directly concerned, and that two-thirds of the members of the court shall consent to such intervention.

SEC. 5. To establish, maintain, and control such civil organization and such armed force on land and sea as the court may deem necessary. Conscription of the armed personnel shall be effected, when necessary, through demand made upon the member States, for numbers of men fixed in the ratio of the relative populations of the States. And for this purpose the population shall be determined in the manner specified in section 4 of article 3.

SEC. 6. To determine annually the sums required for meeting the expenses of the government hereby constituted; to demand of each member State payment of its due proportion of said sums, the apportionment among the States and groups of States to be made in the ratio which the number of representatives of each State or group of States may bear to the total number of members of the court on the 1st day of July of the year for which the apportionment is made. If in any of the groups of States mentioned in article 3 there should be failure at any time to agree upon and report in due time to the court the proportion which each is to bear in paying the group apportionment for the expenses of the court, then those States of the group or any one of them which shall assume and pay the group apportionment shall be entitled to the group representation.

SEC. 7. To acquire and hold such lands, buildings, docks, anchorages, and rights of way as may be necessary for the efficient maintenance of its civil and military establishment. Such acquirement may be effected through purchase, gift, or demand made upon any member State for the exercise by it of its right of eminent domain in respect to property desired and which can not otherwise be had on conditions satisfactory to the court.

SEC. 8. To demand of member States that, within three months from the date when these articles of agreement shall become effective, they shall surrender to the control of the court all armed vessels of war and all material appurtenant thereto; to select from such surrendered vessels and material whatever the court may desire to retain in its naval establishment; to disarm the remaining vessels, and to return them, with material not desired, within six months from the date of their surrender; to demand of member States that they shall not build armed vessels of war; to demand that, within one year from the date when this constitution shall become effective, the standing armies of all member States shall be reduced to a footing of one soldier for each thousand inhabitants, determined according to the provisions of section 4 of article 3, and provided that land forces maintained solely for services in colonies not self-governing shall not be subject to the restrictions of this article; to demand of each member State such portion of its material for land forces as the court may require; to value all vessels and material retained by the court under the provisions of this article, and to pay for the same within 10 years from

the date of its acquirement; to demand the disarmament of fortifications fronting the land frontier between member States; to occupy, maintain, alter, or disarm seacoast fortifications of member States and fortifications fronting the frontiers between member States and other States.

SEC. 9. To make terms of peace which shall be binding upon all member States affected, in order to conclude any war waged between the forces of the court and those of any State.

SEC. 10. To propose to States for their consideration methods of promoting the common good of mankind in literature, science, art, and commerce.

SEC. 11. To recognize any sovereign State that may hereafter come into existence, and to fix the number of representatives in the court to which such State shall be entitled as a signer of these articles of agreement.

ARTICLE 8.

An amendment to these articles of agreement shall have full force and effect as a part of it when it shall have received the assent of three-fourths of the members of the court and two-thirds of the member States: *Provided*, That for the purposes of this article each group of States named in article 3 shall be taken as one State.

RIVER AND HARBOR APPROPRIATIONS.

Mr. WORKS submitted an amendment intended to be proposed by him to the river and harbor appropriation bill (H. R. 20189), which was referred to the Committee on Commerce and ordered to be printed.

Mr. JONES submitted an amendment intended to be proposed by him to the river and harbor appropriation bill (H. R. 20189), which was referred to the Committee on Commerce and ordered to be printed.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. OVERMAN submitted an amendment providing that hereafter the President of the United States be authorized to designate a list of areas of any lands purchased by the United States under the provisions of the act of March 1, 1911, as should, in his opinion, be set aside for the protection of game animals, birds, or fish, etc., intended to be proposed by him to the Agriculture appropriation bill (H. R. 20415), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. GRONNA submitted an amendment providing for the creation of a national farm-loan association and State and local associations, etc., intended to be proposed by him to the Agriculture appropriation bill (H. R. 20415), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. LODGE submitted an amendment providing that the pay of electrical expert aids and electrical experts in the classified service of the Navy of the first class be $3,600 per annum; the second class, $3,000; the third class, $2,400 per annum; and the fourth class, $1,800 per annum, intended to be proposed by him to the naval appropriation bill (H. R. 20975), which was ordered to be printed and, with the accompanying papers, referred to the Committee on Naval Affairs.

STOCK-RAISING HOMESTEADS.

Mr. ASHURST. Mr. President——

The VICE PRESIDENT. The Senator from Arizona.

Mr. ASHURST. About 10 minutes are left before the morning hour closes. The Committee on Public Lands of the Senate yesterday favorably reported House bill 15799, to provide for stock-raising homesteads, and for other purposes. I ask unanimous consent for the present consideration of that bill.

Mr. SMOOT. I shall have to object, Mr. President.

The VICE PRESIDENT. Objection is made.

INTERSTATE COMMERCE COMMITTEE HEARINGS.

Mr. POMERENE submitted the following resolution (S. Res. 533), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Interstate Commerce, or any subcommittee thereof, be authorized during the Sixty-third Congress to subpœna witnesses, to send for books and papers, to administer oaths, and to employ a stenographer, at a price not to exceed $1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before the said committee; that the committee may sit during the sessions or recesses of the Senate, and the expense thereof shall be paid out of the contingent fund of the Senate.

Mr. BURTON. Mr. President, a parliamentary inquiry. Does a Senate resolution submitted to-day have precedence over resolutions coming over from yesterday?

The VICE PRESIDENT. A resolution coming over from yesterday will come up in its regular order, which will be the next order of business.

Mr. POMERENE. Mr. President——

The VICE PRESIDENT. The Senator from Ohio.

Mr. POMERENE. Just a word in explanation of this resolution. The Committee on Interstate Commerce some days ago appointed a subcommittee to hold hearings with respect to a bill on the subject of boiler inspection. Before this reference was made there were a number of applications for hearings, and the subcommittee is now conducting those hearings; but I am informed by the clerk of the committee that there is no formal resolution authorizing the committee to hold hearings. I simply suggest this so that there may be early action on the resolution by the Committee on Contingent Expenses.

SHIPS OF BELLIGERENT NATIONS.

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from a previous day, the title of which will be stated by the Secretary.

The SECRETARY. Senate resolution 527, submitted by Mr. BURTON, directing the Secretary of the Treasury to transmit to the Senate certain information relative to interned merchant ships of belligerent nations.

Mr. KERN. I ask that the resolution be read.

The VICE PRESIDENT. The Secretary will read the resolution.

The Secretary read the resolution, as follows:

Whereas the pending ship-purchase bill, being S. 6856, contemplates by certain of its provisions the purchase of shipping tonnage already constructed, and therefore suggests the possible acquisition of ships belonging to belligerents, some of which are interned in American and other ports as the result of the war; and

Whereas the purchase of such vessels would raise questions of vital importance to the interests of the United States, a knowledge of which is of supreme importance in order that the Senate may reach an intelligent conclusion as to the advisability of enacting said bill and as to the propriety of incorporating in its provisions certain amendments: Therefore be it

Resolved, That the Secretary of the Treasury be requested, and is hereby directed, to transmit, at his earliest convenience, to the Senate of the United States information responsive to the following queries:

First. Has the Secretary of the Treasury knowledge that any officer of the Government has made overtures or addressed inquiries to the owners of ships under the flags of belligerent nations, including those ships now interned in ports of the United States or other neutral ports, for the purchase of such ships on the part of the Government of the United States or any of its authorized agencies?

Second. Have tenders of sale of any interned merchant ships or other merchant ships carrying the flag of any of the belligerent nations been made to the United States or any of its officers or agencies?

Third. Have there been any tenders for the sale of vessels at present carrying the flag of any neutral nation to the United States or any responsible officer or agent thereof?

Fourth. Is it within the knowledge of the Secretary of the Treasury that any person, firm, or corporation, acting either in private capacity or that of agent for the Government, holds any option upon any vessels of a belligerent nation interned in ports of the United States or elsewhere contemplating their transfer either to private citizens of the United States or the Government of the United States or an agency thereof?

Fifth. Is it within the knowledge of the Secretary of the Treasury that the Government of the United States, or any official thereof, has in his employ or under his direction any person or agent who is making inquiry as to the possibility of purchasing any ship or ships of any description whatsoever contemplating their eventual transfer to the United States or an agency thereof?

In each of the above instances the names of the persons, ships, and terms involved in each contemplated sale or purchase is requested.

Mr. FLETCHER. Mr. President——

The VICE PRESIDENT. The Senator from Florida.

Mr. FLETCHER. Mr. President, I have no objection to the resolution, so far as I am concerned. Still, it contains some matters which seem to me unimportant and possibly irrelevant. For instance, the third paragraph reads:

Have there been any tenders for the sale of vessels at present carrying the flag of any neutral nation?

Whether there has been or has not been any such tender I do not see that it amounts to anything in connection with the arguments made with reference to this measure. For instance—I have no information on that subject, but I am supposing a case—suppose some ship broker in New York writes to the Secretary of the Treasury and says: "I can get you Norwegian, Danish, and Italian ships of such and such description," could there be any possible fault found with anybody on that account?

Mr. BURTON. Certainly not; but this is a part of the general inquiry. The resolution seeks to ascertain, I may say, two things. In the first place, the possibility of acquiring ships, so that we may know how many boats the Government might acquire if this bill should pass. In the second place, it seeks to know whether there is any danger of complications arising out of purchases from belligerents. The resolution is intended to be comprehensive, and to include that general subject.

Mr. FLETCHER. The fifth paragraph also covers an inquiry as to the possibility of purchasing any ship or ships of any description.

Mr. BURTON. The third is distinguished from the fifth in this particular: The third is with regard to tenders for the sale of vessels or offers from the owners of neutral ships. The fifth is in regard to inquiries made by officials of our own Government. I do not see how it can do any harm to include both.

Mr. STONE. I see how it can do harm.

Mr. FLETCHER. I have no objection so far as I am concerned. I will say that my information is that Danish, Norwegian, and Italian ships have been offered. Of course, if this bill passes, there could be no objection on the part of anybody to transactions of that kind, I should think.

Mr. BURTON. I repeat what I said; no, but I think it very desirable that the Senate should know to what extent those boats are offered to this Government, so that we may know whether or not any shipping property may be readily available.

The VICE PRESIDENT. The question is on the adoption of the resolution.

Mr. STONE. Mr. President——

The VICE PRESIDENT. The Senator from Missouri.

Mr. STONE. It would likewise be very desirable for the Shipping Trust, the shipping combine between the shipping interests of the United States and Great Britain, to know what ships were offered to or might be purchased by the Government or by the corporation it is proposed to create in the event the bill becomes a law.

Mr. President, the Senator from Ohio [Mr. BURTON] has submitted two resolutions—one addressed to the Secretary of State and the other one, which has just been reported, addressed to the Secretary of the Treasury. The one addressed to the Secretary of State requests the Secretary to transmit to the Senate, at his earliest convenience, information responsive to this inquiry:

Has the Secretary of State, through private or official channels, received any information from any responsible foreign source as to the attitude the Governments of the belligerent nations, or any of them, might be expected to assume in relation to the transfer to the American flag and American register of merchant ships which have heretofore carried the flag of a belligerent State?

I see absolutely no objection to the passage of that resolution. If any foreign State, or anyone pretending to represent a foreign State, has made any representations to our State Department in the nature of a protest or for any other purpose intended to be expressive of the attitude of such foreign State, I think the Senate ought to be advised of that fact, not alone because of any possible effect it might have on the pending legislation but for even more important reasons than that.

Speaking for myself, I have no objection to the passage of the resolution; but as to the other resolution, the one addressed to the Secretary of the Treasury, which is now pending, it seems to me it would be the effect of the resolution to give to every nation in the world and every corporation or interest in the world opposing this legislation and seeking to defeat it an opportunity in advance to know what it might be possible for the Government of the United States or the corporation to accomplish.

Mr. BURTON. Will the Senator from Missouri yield to me for a question?

Mr. STONE. In just a moment, Mr. President, I do not believe that any person or corporation that was about to enter upon a business enterprise would care in advance to lay all the information it had respecting that business before its competitors. I yield to the Senator.

Mr. BURTON. Is it not true that the Secretary of the Treasury and the Secretary of Commerce, in a document transmitted here and laid before the Senate, have made public a long list of some 22 boats they said were available? Possibly they were imposed upon. It seems to have come from a man who is not a shipping broker, but a real estate agent, on whose door there was printed "shipping broker" about 10 days ago.

Mr. STONE. What is the pertinency of the suggestion?

Mr. BURTON. That this resolution is exactly in line with what the Secretary of the Treasury and the Secretary of Commerce have already been doing. What we want is accurate information on the subject.

Mr. STONE. If that is all the information there is about it, then the Senator has it. If that is all the information the Secretary of the Treasury may have on the subject——

The VICE PRESIDENT. The hour of 2 o'clock having arrived——

Mr. BURTON. I ask unanimous consent——

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which is Senate bill 6856.

THE MERCHANT MARINE.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

Mr. BURTON. I ask——

Mr. JAMES. I suggest the absence of a quorum, Mr. President.

The VICE PRESIDENT. The Senator from Kentucky.

Mr. BURTON. I think I had the floor, did I not?

The VICE PRESIDENT. In accordance with the rule which has just been entered, the Chair recognizes the Senator from Kentucky to suggest the absence of a quorum, and the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Goff	Nelson	Smith, Md.
Bankhead	Gore	Norris	Smoot
Brady	Gronna	O'Gorman	Sterling
Brandegee	Hardwick	Oliver	Stone
Bryan	Hitchcock	Overman	Sutherland
Burleigh	Hollis	Page	Swanson
Burton	James	Perkins	Thomas
Camden	Jones	Pittman	Thompson
Catron	Kenyon	Pomerene	Thornton
Chamberlain	Kern	Ransdell	Tillman
Chilton	La Follette	Reed	Townsend
Clapp	Lane	Root	Vardaman
Clark, Wyo.	Lea, Tenn.	Saulsbury	Walsh
Clarke, Ark.	Lee, Md.	Shafroth	Warren
Crawford	Lippitt	Sheppard	Weeks
Culberson	Lodge	Sherman	White
Cummins	McCumber	Shields	Williams
Dillingham	McLean	Shively	Works
du Pont	Martin, Va.	Simmons	
Fletcher	Martine, N. J.	Smith, Ariz.	
Gallinger	Myers	Smith, Ga.	

Mr. LANE. I wish to announce the unavoidable absence of the Senator from Arkansas [Mr. ROBINSON], who is engaged on official business.

Mr. SHEPPARD. I wish to state that the junior Senator from South Carolina [Mr. SMITH] is unavoidably absent on account of illness in his family.

The PRESIDING OFFICER (Mr. ASHURST in the chair). Eighty-one Senators have answered to their names. A quorum is present.

Mr. STONE. Mr. President——

The PRESIDING OFFICER. The Senator from Missouri.

Mr. STONE. Mr. President, on yesterday or the day before the Senator from Connecticut [Mr. BRANDEGEE] in calling attention to what he asserted to be an irregularity in some proceeding of the Senate, as shown in the RECORD, stated in substance that a failure to observe the rules and the proper methods of procedure might involve the constitutionality or validity of legislation.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Connecticut?

Mr. BRANDEGEE. I know the Senator——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Connecticut?

Mr. STONE. Certainly.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. BRANDEGEE. I know the Senator does not wish to draw wrong inferences from any remark I made. I did not intend to make the remark the Senator attributes to me. I do remember having said yesterday that the accuracy of the Journal might involve constitutional questions, but I did not refer to the legality of any legislation. That was not in my mind at all. It was the constitutional privileges of Senators that I had in mind.

Mr. STONE. After that there is perhaps nothing more for me to say on that subject.

Mr. BRANDEGEE. I had no idea what the Senator was about to say. I simply wanted his premise to be correct if he was about to say anything.

Mr. STONE. Since the premise is incorrect, I will forego predicating any remarks thereon further than to say that I have no doubt the great interests combined to defeat this legislation will seek, through judicial procedure, to prevent the enforcement of the law if it be enacted. I would not be surprised if the constitutionality or the validity of the statute which we are seeking to make would be called in question and such process utilized as might tend, in the first instance, to delay the execution of the law and ultimately to defeat it. And now, Mr. President, I will pass by any further observations on that subject, which after all I intended to give only a passing notice, and come to that I have risen to talk about.

Mr. President, in northern France there are to-day, and for months have been, two great armies confronting each other in a titanic struggle and in enacting one of the most stupendous tragedies of history. Suppose a fraction of some company of

French soldiers or German soldiers should secretly withdraw from among their fellows to some secluded spot and there plot together to aid the enemy and betray their comrades; suppose prearranged signals should be agreed upon through which the plotters might inform the enemy just when, where, and how to strike a deadly blow, what would the comrades of such betrayers think of them? What would France think of them? What would Germany think of them?

Suppose, again, that during the closing days of that long struggle carried on in the British Parliament to establish home rule for Ireland some Irish members of the House of Commons who had been allied with Redmond and the Irish National Party, working with them to accomplish reforms of tremendous import to Ireland, had slipped away into secret places and plotted, upon signals to the enemy, to rush in at a crucial moment to surprise their old associates, in whose confidence they knew they held a secure place, and help the Tories to strike down that great measure in the interest of human rights, what would the people of Ireland and the world have thought of that?

Mr. President, do not the cases I have supposed make their own application here? Is there any need to be more specific? This we know, that on Monday last the Democrats of this body were subjected to one of the greatest surprises which has ever occurred in American politics. What are the facts? Seven Democrats, Members of the Senate—I did not believe there were seven such Democrats in the world, and certainly not in the Senate—who had been holding secret conclaves, whispering and conspiring together, came in here, without a word of warning to their associates on this side, but after Republican Senators on that side had been duly notified of what was coming, and notified sufficiently long in advance for every Republican to be in his seat—which, by the way, is a rare sight nowadays—and then these seven conspirators——

Mr. O'GORMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from New York?

Mr. STONE. Yes; I yield.

Mr. O'GORMAN. I rise to a point of order—that the Senator from Missouri is violating paragraph 2 of Rule XIX, imputing conduct or motives unworthy and unbecoming a Senator.

Mr. STONE. Mr. President, I think I am amenable to the rule, for the conduct I refer to was unbecoming and unworthy of a Senator.

Mr. O'GORMAN. Mr. President, I press the point of order, and I ask that the Senator from Missouri be requested to take his seat until he purges himself of his contemptuous conduct in this body.

Mr. VARDAMAN. Mr. President, I want to say——

The PRESIDING OFFICER. The Senator from Missouri has not the floor until the point of order has been disposed of.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER. The Senator from Mississippi has not the floor. Will the Official Reporter please read the language complained of?

Mr. STONE. I will apologize without having it read to the Senate, Mr. President.

Mr. O'GORMAN. On the apology of the Senator from Missouri, I withdraw the point of order.

The PRESIDING OFFICER. The Senator from New York withdraws the point of order. The Senator from Missouri will proceed. Does he yield to the Senator from Mississippi?

Mr. STONE. I think I should not have designated these seven Senators as conspirators. I withdraw that expression as objectionable under the rule.

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Mississippi?

Mr. STONE. He is not now asking me to yield.

Mr. VARDAMAN. If the Senator has withdrawn his unwarranted——

The PRESIDING OFFICER. The Senator from Missouri has not yielded yet. Does the Senator from Missouri yield to the Senator from Mississippi?

Mr. STONE. I do.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. VARDAMAN. I rose, Mr. President, to protest against the statement made by the Senator from Missouri, because I am one of the Senators who voted against and have done all I could to defeat this bill. His reference to Democratic Senators who participated in that was offensive to me, and I rose to characterize it as I felt. The Senator has withdrawn it, and I have nothing further to say.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. STONE. Mr. President, I think I will be in order if I say that there was an innocent meeting, highly patriotic in its purposes and very democratic in every way, attended by seven Senators, who still by courtesy, if not by right, are occupying seats on this side of the Chamber, at which meeting they conferred, of course always with the good of the country and the Democratic Party uppermost in thought and heart, with no extraneous influence operating upon any of them, for these Senators would spurn such a thing as that, all being like Brutus—most honorable men. I think I am within my rights when I say that these most honorable Senators, after maturing their plans, marched in here and sprang a complete and cruel surprise on their colleagues on this side of the Chamber. I think I am within my rights when I say that these seven and the Republicans of this body collaborated to make the surprise as complete as possible, and throughout acted in concert. I congratulate our friends the enemy on their coup. It was well done. You did upset us. You did get us in a hole, and I do not know now whether we are going to get out of it. It was indeed a fine, a most artistic performance, and I again extend my compliments to Senators on that side of the Chamber.

Mr. President, what was the situation up to the hour when this unexpected blow was struck? The shipping bill was before the Senate as the unfinished business, and had been for two weeks. The majority Members of this body in conference had determined to make it the unfinished business and keep it the unfinished business until every possible expedient had been exhausted to enact it into law. To that end we made it a party measure. Let me read from the record of the Democratic caucus or conference to show why it was a party measure and how we made it so. On December 15, 1903, the Senate Democrats held a party conference, at which certain proceedings were had and entered upon the caucus record. From that record I read:

Resolved, That hereafter all members of the Senate Democratic caucus shall be bound to vote in accordance with its decisions made by a two-thirds vote of all its members on all questions, except those involving a construction of the Constitution, or upon which a Senator has made pledges to his constituents, or received instructions from the legislature of the State which he represents.

That was adopted by the conference with only two dissenting votes, and has been the rule of our party here from that day forth. It means—of course it can mean nothing else—that when a proposition is submitted to the party conference and two-thirds, not of those present but of all its members, determine to support a given measure a party obligation attaches to every Democrat to support the proposition, with the exceptions named.

I was a member of the conference at that time, and I approved the rule. It was the first year of my service here. The Senator from Arkansas [Mr. CLARKE], who is leading this revolt, was also a member of that conference. He and I came to the Senate at the same Congress. This is the first time in these 12 years, so far as I recall, that Senators have disregarded this party obligation. The Senator from South Carolina [Mr. TILLMAN] prompts me to say that this is the first time that we have had occasion to invoke it. This is the first time it has ever been called in question.

Now, Mr. President, let me read from the caucus record made on January 23 of this year:

The Democratic conference of the United States Senate, January 23, 1915, having under consideration the shipping bill, and the bill having been perfected, Senator FLETCHER offered this resolution:

"*Resolved*, That in the judgment of this Democratic conference the bill S. 6856, as amended and agreed upon by this conference, should be enacted, and that it is the judgment of the conference that said bill should be continued as the unfinished business of the Senate and that it should be supported as a party measure."

That is the resolution we adopted. Let us understand it. There were three parts to it. First, that it was the judgment of the conference that it should be agreed upon in the final form then presented; second, that it was the judgment of the conference that it should be continued as the unfinished business of the Senate; and, third, that it should be supported as a party measure. Then the record continues:

The question was, on demand, divided, and the first two paragraphs were adopted by a viva voce vote. A roll call was asked on No. 3, which was then adopted by a vote of 35 yeas and 3 nays, one of which was then changed to "yea," making the vote 36 yeas and 2 nays. All agreed to support the measure.

There were 36 yeas—two-thirds of all the Democratic Members of the Senate. After that vote was cast—36 to 2—on the motion of a Senator the vote adopting the resolution as an entirety was made unanimous. It was to be a party measure, then, as well as a public measure. So great was the public import of the bill and so high the public considerations involved that the majority Members of the Senate, in view of the circumstances then surrounding us—I refer to the stubborn, organized opposition on the other side—determined to make it a party question under the rules of our caucus, and thus try to hasten its passage. We left the caucus and came back to the Senate with the bill backed up by the unanimous vote of

38 Democratic Senators, all who were present, and with more than half of those absent known to favor the measure. The fight went on day after day and night after night, and when we were pressing them the hardest this most lamentable event of which I am speaking occurred. The distinguished senior Senator from Arkansas, the President pro tempore of this body, elected to that high office by this identical Democratic caucus, rose suddenly and moved to recommit the bill, intending thereby to kill it. This unexpected blow was struck by the man upon whom we had conferred the highest honor within the gift of the Democrats of the Senate. The lamented Bacon, that old Roman from Georgia who never faltered, wanted that great honor at our hands, but we turned him down, almost breaking his heart, to elevate the Senator from Arkansas to this conspicuous and most honorable position. I myself voted for him, not that I loved Bacon less, but because of my personal relations to the Senator from Arkansas. He is in consequence of this office in a sense the official head of our party in the Senate, and yet he comes——

Mr. CLARKE of Arkansas. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Arkansas?

Mr. STONE. In a moment—he comes, before the Congress has expired in which he was elected to preside over the Senate, and performs with exceeding grace an act intended to unhorse the Democracy.

Mr. CLARKE of Arkansas. Will the Senator allow me?

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Arkansas?

Mr. CLARKE of Arkansas. Does the Senator——

The PRESIDING OFFICER. The Chair has not heard the Senator from Missouri indicate to the Chair whether he yields or not.

Mr. CLARKE of Arkansas. I do not care to interrupt the Senator if he objects.

Mr. STONE. I do not object.

Mr. CLARKE of Arkansas. I simply wanted to state that I am satisfied that the Senator from Missouri is attempting to perform some useful public service, and not particularly to say offensive things about Senators. It is true that I was elected President of the Senate pro tempore by the action of the Democratic caucus. There has never been a Democratic caucus, of which I have been notified, held since I have been here that I did not attend, and there has never been one whose proper act I have not obeyed, and there never will be one.

When the resolution to which the Senator from Missouri makes reference as having been passed in 1903 was adopted, that was then directed at me because I maintained that the ratification of the Panama treaty was not a party question and could not be made one; that the Democratic Party had always advocated the construction of an Isthmian canal and did not thereby intend to bind anybody down to any particular point of location for having that construction made, either at Nicaragua or at Panama. I conceived that I owed some obligation to the opinion I held and to the position I had assumed. Seventeen out of the thirty-five Democrats in the Senate at that time, notwithstanding the adoption of that rule, agreed with me about it, and the RECORD will show that they voted that way. I did not then concede to any number of Senators to determine for me, against my own convictions and preferences, that the construction of a canal at Panama was contrary to Democratic principles and purposes, and that the construction of a canal somewhere else would be, just as I refuse now to permit any such directions to be given to me about the Democratic character of this measure simply because more Democratic Senators are in favor of the motion than appear to be against it.

The other day, when this particular matter first came up, I attended the first meeting of Senators, under a warning, not to attend a Democratic caucus, but to attend a meeting of the Democratic Senators. There was no intimation in the notice sent me that there was to be a caucus held, as is provided in the resolution read by the Senator from Missouri from the records of the Democratic caucus. I said then that this particular question never had been an accepted tenet of the Democratic Party; that no Democratic convention had ever lent itself to support anything like it; but, on the contrary, every declaration that had ever been made by the Democratic Party had been against maintaining ship lines at the public expense; that no Democratic patron saint ever had promulgated it as a matter of positive doctrine which that party was ever likely to assume; that the party, at intervals, had administered the affairs of this Government for nearly half a century, and that such a thing was never by any organ of the party thought to be a party duty.

It was originally projected to meet a supposed emergency in the agricultural and manufacturing interests of our country growing out of the deplorable war in Europe, an emergency that, so far as my people are concerned, has now passed away. I am now confronted with the naked problem of advocating and supporting something, as a permanent policy, that no Democrat had ever before dreamed of presenting as Democratic doctrine. I then felt constrained to state to that assembly of Democratic Senators that I was then ill and would not therefore be able to attend its sessions, but I wanted there and then to put them on notice that I should not by act or omission be put in any situation where I should be deprived of my right to vote against this measure if I saw proper to do so.

As relative to the question that we had no notice of a caucus going to be held—but I would not have made a point on that now, but I believe that if the Democratic Senators who are now opposing this bill, which is being used to obstruct the enactment of wholesome and more important legislation that the interests of the country demand, had been there, no such resolution as the Senator from Missouri read declaring this measure to be a matter of Democratic doctrine imperatively entitled to the support of all professed Democrats, even if to do so they must surrender their own well-matured convictions.

Ever since 1903 that resolution, as the Senator from South Carolina [Mr. TILLMAN] says, never was invoked; but every meeting of the Democratic Senators that has taken place in 12 years has been of such a character that whenever the party and political side of a question had been developed and recognized, that that obligation has been sufficient to get a unanimous vote, and it always will be, as I firmly believe, without coercive directions from a caucus.

Another word and I am through. I did not suppose that when a meeting of Democratic Senators—without indicating then that it was to be a conference or a caucus—was held that any action could be taken that would put me in the attitude of having some Senators agree for me that I should do something, and that I had failed to recognize the binding force of what had been done by my consent. No such charge has ever been truthfully laid at my door anywhere nor at any time.

When I went back to Arkansas at the close of the last session of Congress and this general matter was talked about pending my election, I did not hesitate to say that I would not vote for it; that it would be of no service to the cotton-growing people of my section; that the time had passed when they could get any benefit from it or any similar measure; that we had appealed to this Congress to help out the cotton situation and were bluntly informed that nothing could be done. I knew that a war tax had been levied on the people to raise revenue to pay current expenses, and that I could not conceive that the time would ever come when the Democratic Party in that situation would enter upon so new, so broad, and so questionable a proposition as this. If I had been specifically notified to come to a Democratic caucus, I think I should have attended and said something along this line.

The Senator from Missouri voted for me for President of the Senate; our relations have always been cordial; and I should regret to see the day come when they would ever be of any other character; but I must not be deprived, under any fear of being criticized or abused, from doing what I think to be right. I have always done this since I have been here, and I would not want to serve one day longer than that right was left to me; and whenever it is taken away from me the hour is struck when my longer service here will not be worth while to me.

Mr. STONE. Mr. President, the caucus rule, which I read, has not been heretofore invoked because there has been no occasion to invoke it. Everyone has accepted it without question.

The Senator from Arkansas said he did not know we were having a caucus——

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to his colleague?

Mr. REED. I call for order in the Chamber.

The PRESIDING OFFICER. The point is well taken. There is some audible conversation in the galleries, which must cease.

Mr. STONE. The Senator from Arkansas said he did not know we were going to hold a conference.

Mr. CLARKE of Arkansas. A caucus.

Mr. STONE. Or a caucus. I got the usual notice sent out——

Mr. CLARKE of Arkansas. Will the Senator let me put into the RECORD the notice sent to me, if it does not disturb him?

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Arkansas?

Mr. STONE. Let it go in.

Mr. CLARKE of Arkansas. Let me read it, so that you may have the effect of it. It is as follows:

UNITED STATES SENATE CHAMBER,
Washington, D. C., January 22, 1915.

There will be a meeting of the Democratic Senators in the Finance Committee room, Senate Office Building, room No. 312, on Saturday, January 23, 1915, at 11 o'clock a. m.

THOMAS W. KELLER,
Assistant Doorkeeper.

Mr. STONE. Mr. President, that is a printed notice, except as to the date, which is inserted in a blank left for that purpose. This is the same notice in words and terms that has been sent out assembling Democrats ever since I have been a Member of this body. What do Democrats assemble for? What do we assemble for under these notices? Not merely to sit around in social converse, discussing anything that may happen to be suggested by talkative Senators. We assemble for a purpose; and if the Senator from Arkansas did not know for what purpose we were called together when he got that notice, he is the only Senator on this side of the Chamber who did not. We met there to confer about this bill.

Mr. CLARKE of Arkansas. I knew that.

Mr. STONE. The Senator was present at one of the meetings—there were several of them—and made some observations which I suppose I am not permitted to advert to.

Mr. CLARKE of Arkansas. If it is with me, I relieve the Senator of any restraint.

Mr. STONE. I will only say that while the Senator was deeply impressed with the notion that this sort of legislation was not desired by the American people, that they were opposed to it, and that if it resulted in an extra session it would bring disaster to the party, I never heard a declaration by the Senator hostile to the measure itself until he uttered it here the other day.

Of course, like any other man, he has the right to think he knows just what the people want or do not want, and just what the political effect of legislation will be. Mr. President, I am not one of those who pretends to know exactly what the people want or do not want with respect to legislation. I have found out that whenever a man is opposed to a measure he becomes very sure that the people are against it, or, if he is for it, he is bold to assert that the people are for it; but I do not think that men who assume so much know anything more about the wishes of the people than I do. The only way I have of knowing what the people want is to make up my mind as to what is best for the country, feeling confident the people will approve if I am not mistaken. It is said that the people do not want this legislation, and that if we should stay here for an extra session in order to pass it our action would result in party disaster. One thing is sure beyond dispute, that the commercial interests of the country have been and are desperately embarrassed for want of shipping facilities. The cotton growers of Arkansas, Mississippi, and North Carolina, for example, have suffered enormously; is not that so? The amount of their losses can not be accurately estimated, but we know that they have been enormous. Likewise, thousands engaged in other industrial activities and productions have suffered and are suffering from the same cause. We know that; and, in view of that, if we should stay here a little beyond the 4th of March for the purpose of trying to aid and help the people who are in distress by striving to create better facilities to relieve them and thus lessen measurably, at least, their accumulating losses, would they say, "Anathema! Cursed be ye"? Do men anathematize those who are striving to render them an honest, useful, and much-needed service? And do they most praise those who would run away without trying to help when help is sorely needed? Would you expect the people to desert us for suffering great personal discomfort by staying at our posts in their service, and go over to those who would do nothing, saying, "Blessed be the men who obstruct great measures of relief intended for their Benefit"? I have no fear of that. I have too great faith in the intelligence and honesty of my countrymen to believe that.

Mr. President, I want to make an appeal, if I may, to these Democrats who have deserted the party to come back to us. Consort no longer with the enemy, but return to the shelter of your mother's wing and dwell within the old party fold. I see sitting right before me the junior Senator from Kentucky [Mr. CAMDEN]. It is well known that this distinguished Senator is regarded as perhaps the most opulent and in many ways the most fortunate man in Kentucky. When he came here there were some doubting Thomases who whispered now and then a fear that if a sharply drawn issue should come between great vested interests and the people, the Senator from Kentucky would not be overactive against the interests.

Mr. CAMDEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the junior Senator from Kentucky?

Mr. STONE. I do.

Mr. CAMDEN. I should like to ask where the Senator heard those whispers.

Mr. STONE. Oh, in the cloakroom and elsewhere.

Mr. CAMDEN. I should like to know who said it.

Mr. STONE. Well, I will not tell the Senator that. I denied what I heard, for I could not believe it.

Mr. CAMDEN. I am very much obliged to the Senator.

Mr. STONE. I said that it was not possible that a man of his pedigree and environment——

Mr. CAMDEN. Mr. President, may I interrupt the Senator again?

The PRESIDING OFFICER. Does the Senator from Missouri further yield to the junior Senator from Kentucky?

Mr. STONE. Yes.

Mr. CAMDEN. I never attended any of these conferences, and——

The PRESIDING OFFICER. The junior Senator from Kentucky is out of order until he secures recognition. Does the Senator from Missouri yield to the junior Senator from Kentucky?

Mr. CAMDEN. I beg the pardon of the Chair, but he granted it.

Mr. STONE. Oh, that is all right.

The PRESIDING OFFICER. The Chair wants to know.

Mr. STONE. I yield to the Senator from Kentucky for a question.

Mr. CAMDEN. I will reply now that I never attended a conference, and if the Senator from Missouri was there he might have known it.

Mr. STONE. Never attended a conference? What is the significance of that? Does the Senator contend that because he did not meet in conference with his party associates—that because he was absent from a meeting—he is absolved from the obligations that rest upon a loyal party man? A distinguished Senator, speaking of the matter to which I referred a moment ago, when I was combating the fears some gentlemen had, asked me this question, "Did you ever see the effect of casting a stone into a covey of English sparrows?" I had not. He said, "Well, try it, wound one, let him cry out, and see how the whole tribe of pugnacious, feathered gamin will come fluttering to the rescue." Still I stood out against his apprehension and sought to reassure him. I want the Senator to prove me right. He lives in old Kentucky, the State of my birth; and he lives in one of the most beautiful of the blue-grass counties, surrounded by as fine people as can be found on earth. No better men and women ever felt the rays of heaven's softest sun fall upon them than those who inhabit old Woodford County. I did not believe it possible that this great Kentuckian, so highly honored by this splendid Commonwealth, bearing a commission signed by that old veteran, Gov. James B. McCreary, would come here and help Republicans break his party in two. I want the Senator to justify me and show that he is not of that kind.

Mr. President, I had not seen a real smile on the Republican side for two years until this thing occurred, and then, on every face over there I saw not only a smile but a broad grin of grim satisfaction. For heaven's sake, I appeal to the Senator from Kentucky and to all of them to quit this bad association and get back into line with his and their own party friends. I want my Kentucky friend to go home and say to his great constituency, "I did not forget. Nothing could drive me from the straight path. I have kept the faith and stood by all the pledges, express or implied, I made when you honored me with your commission."

I might, and I do, make the same appeal to all of you. It may fall on dull ears, but I make the appeal from the bottom of my heart. I would be willing not only to forgive and forget, but to pour upon your heads blessed waters, drawn from the very altar of Democracy, to rebaptize you in the faith.

Mr. President, we have heard a great deal on that side of late about what the President said about teamwork. The President was right. Without teamwork we can accomplish nothing. And I want to say right here that I prefer the leadership of Woodrow Wilson to that of ELIHU ROOT, HENRY CABOT LODGE, THEODORE BURTON, WILLIAM EDGAR BORAH, JACOB H. GALLINGER, or that of any recreant alleged Democrat who goes about with a murderous dagger in his sleeve. [Laughter in the galleries.]

The PRESIDING OFFICER. The Senator from Missouri will kindly suspend. Under the rules of the Senate manifestations of approval or disapproval in the galleries are not permitted. The occupants of the galleries will please refrain from making any expression.

Mr. STONE. And I prefer honest association with the Democratic Party to any illicit association with Republicans. Of course every man can take his choice, but I indicate my preference, and I am not meaning to be offensive to you gentlemen on the Republican side. I just do not think you know any better. Possibly you do the best you can, but your best is very poor.

Why, how are we going to accomplish anything, Democrats, if we do not have teamwork? Remember we represent the majority. The people of the United States have imposed upon us the great responsibility and duty of government, of designing and enacting laws, and of establishing and enforcing public policies. I heard the senior Senator from Mississippi [Mr. WILLIAMS] say some time ago, I thought inaptly at that moment, what I may be about to say inaptly now—that it has been charged, as I think without good reason, but charged over and again, that the Democratic Party, after all, and at its best, is little more than a mob; that it is incapable of governing wisely. Of course I do not believe that; but this performance here, beginning on Monday and still going on, furnishes you gentlemen over there with an argument at least, even if not a convincing one, to support your contention. Senators, we can not do anything without teamwork.

Mr. President, I am not surprised that Republicans should assail the President. I am only surprised that Democrats should contribute to these assaults, directly or indirectly.

Mr. President, nothing so stirs the gall or upsets the nerve equilibrium of the average Republican politician as the name of Woodrow Wilson. It is not surprising that this should be so, for the burnt child dreads the fire, and the galled jade winces. Their backs are still raw from the well-deserved drubbing Wilson gave them in 1912, and they still smart from the salt rubbed on the old sores last November.

I once heard an anecdote which aptly illustrates the mental attitude or state of mind of the average heavy-weight Republican who bears about with him the burden of a great ambition, covertly contriving some sort of apparatus designed to attract electrical currents at the next Republican convention. It is told that upon one occasion a party of Americans visiting England were taken to a graveyard and there shown a rudely carved image of George Washington. Asked why this cartoon in stone had been erected in such a place, the guide answered that it was put there to frighten grave robbers and trespassers. Quick as a shot came this answer: "It is a most excellent conceit, for nothing could be imagined better calculated to scare the stuffing out of a Britisher than the sight of George Washington." So, Mr. President, for like reasons, if there be anything that can surely fetch a biting frost to nip the rose of expectancy blushing on the cheeks of Republican Senators, if there be anything more than another that harrows up their souls, freezes their blood, and makes their "knotted and combined locks to part, and each particular hair to stand on end like quills upon the fretful porcupine," it is the name of Woodrow Wilson.

Why be surprised, therefore, that Wilson should be hated, feared, and execrated? Why be surprised, whenever the President fires a shot, to hear an answering cry of rage, a chorus of snarls and deep-mouthed baying?

The Senator from Utah [Mr. SMOOT] informed the Senate, pretendedly as from personal knowledge, that the next House would not pass this bill, and because of that the Democrats of the Senate are now solicitous and urgent to hasten its passage at this session. I wonder if this lithe young Senator from Utah is really in cahoots with gentlemen who are to occupy seats in the House during the next Congress, as he seems to be in cahoots with Senators who now occupy seats in this Chamber? Is he a leader or in the confidence of bolters in futuri as well as of bolters in præsenti? He must be a marvelous man to run not only two parties, but both Houses.

The Senator from Arkansas said that the people of his State are not interested in this bill. Not interested in facilities for the conveyance of their products to the waiting markets of the world? Not interested in making provision to meet the immediate emergency upon the country? Not interested in making a provision for the future that would render a repetition of existing conditions impossible? I have a better opinion of the people of Arkansas, of their intelligence and patriotism, than their senior Senator seems to have.

Mr. President, let us look for a moment a little closely at the conditions, old and new, out of which this proposed legislation has grown. For half a century the American merchant marine has been decaying until now there are practically no American ships engaged in over-seas transportation. At the outbreak of the Civil War in 1861 the merchant marine of the United States was second only to that of Great Britain, and substantially equal to that. This great achievement in maritime development was due in chief to wise constructive governmental policies inaugurated under Democratic auspices. The growth of our sea power became one of the marvels of that period of history. Naturally the war not only retarded development, but the whole industry was stagnated and depressed. But the people expected that this important business would revive after hostilities had closed—an expectation doomed to disappointment. There was no revival; instead the mildew of decay gathered ever thicker and faster. No matter the cause. I will not consume the precious time of the Senate in discussing the cause or causes. That would do no good. For explanation it is sufficient to say that the Republican Party was in power. Republicans saw this great industry, so important to our people and to our national life, withering year by year. Primarily responsible for it, they have not known how to stop it. Their very environment made them helpless. It was during the period of Republican rule that the power of monopoly and special interests rose to its height and dominated the legislative and administrative policies of the Government. In promoting various special interests, the merchant marine as a whole was sacrificed. For several decades the Republican Party, although for the most part ascendant, has been lamenting the destruction of our maritime business, vainly groping in darkness, and awaiting, as it were, a miraculous revelation of some means of rehabilitation. The revelation did not materialize, and in consequence the Republican Party stands convicted of utter incapacity through its own agencies of dealing with the subject. They are to be pitied as well as blamed for this impotency. They could not move out on bold, intelligent, practical lines without crossing beyond the boundary which pampered and arrogant special interests, long fostered, forbade them to cross. I will not trace the pages that make up this sad chapter in our history. Year after year we have stood more and more in need of ships, and year after year our commerce has suffered more and more for the lack of them. Because of incapacity or hampering environment, the Republican Party has not been able to afford any substantial measure of relief. And so conditions grew worse and worse down to this day. Then came this great war in Europe to accentuate the fatal folly of the old Republican policy of doing nothing. At last the country is aroused. The embarrassments and tremendous losses which our people are suffering because of a woeful shortage in transportation facilities, have made the national need of an American merchant fleet a burning question before the people. A great Democratic President and a great Democratic Congress, responding to the public need, have undertaken the task of doing something sure enough. We have begun work to relieve the immediate distress that has fallen upon us, and at the same time to lay the foundation for a permanent restoration of the merchant marine. This is the first time in nearly two generations that any definite plan has been attempted on a large scale to rehabilitate our maritime interests. The Democratic Party is striving to accomplish a great constructive work in this direction. What are you Republicans doing? And what are your allies doing? Are you or they coming forward in a spirit of enlightened patriotism to help accomplish this work? Pitiful to say, you are not. Scarcely a word of counsel or encouragement comes from that side of the Chamber. Instead we find you banding together confessedly for the sole purpose of blocking all progress in the work we have undertaken.

The sinister monopolistic interests to which their party is chained forbid Republicans to extend a helping hand in any legislative work which might by any possibility interfere with valuable privileges and monopolies long enjoyed. These monopolies are quick to scent danger from afar and quick to take alarm. The Shipping Trust and its allied interests are not confined alone to this country or to any country. No pent-up Utica contracts their power. It is world-wide. To-day they see, or think they see, a storm rising which threatens the unchecked supremacy of their monopoly, and, forgetting foreign wars and rumors of war, they fix their alert eyes on our horizon to watch for the gathering of a cloud. They have launched a propaganda which has few parallels in cold, calculating cupidity and mendacity to thwart any effort made by the Government to restore our merchant marine on a scale of sufficient magnitude to endanger their grip on the commerce of the world. They are invoking every energy at their command to influence public opinion and to put obstacles in the way of any relief to transportation. There are parliamentary reasons why I should not say that Republican Senators are encouraging and aiding this propaganda. But I can say that what they are doing is just as effective in that direction as if it were intended for that purpose. Take the speech made on Saturday by the senior Senator from Massachusetts [Mr. LODGE] as an example. He warned the country that the purchase of belligerent ships would precipitate grave

international complications and "start this Nation on the highway to war." He assumes that the sole purpose of this bill is to open a way for the purchase of such ships—as if we would be obliged to buy them. After conjuring this ghost to 'fright the souls of his adversaries, he proceeded to project a broad intimation that German shipping interests were behind the bill. He based that statement on an assertion that some agent of the Hamburg-American Line had been in Washington last week. He does not vouchsafe the name or official position of this agent, nor does he tell us what business he had in Washington or whom he saw, but leaves it to be vaguely inferred that the object of this visitation had to do with this shipping bill. I observe that this lugubrious prophecy of possible war and this insinuating reference to some agent of a German shipping company are about the only parts of the Senator's speech which a certain class of newspapers deemed of sufficient importance to exploit. Of course the sole object of this insinuation was to offset, if possible, the known fact that the American-British shipping combine is moving heaven and earth to defeat this measure. Is it not amazing to what expedients even big men may resort to fool and cheat the people?

Mr. President, we are trying to do something. Our opponents are trying to obstruct progress and prevent us from accomplishing anything. As I close I wish to ask this question: Do Republican Senators imagine that the people can be fooled about the purpose of this ridiculous performance we have been witnessing here from day to day? Do they imagine the people do not understand the purpose it is intended to serve? You have battled against the bill from every standpoint, economic and international. The Senator from New York [Mr. ROOT], who is always overcast with a somber radiance which many impressionable and credulous people mistake for a heavenly halo, was put forward as one ordained to speak with authority, to warn the people of the dangers we are about to encounter by violating the laws of nations. He was later demolished by the rude blast the junior Senator from Montana blew—only I still fear that his untimely proforeign utterances may hurt our people when they come to deal with foreign Governments.

Mr. President, at this point I will refer briefly in passing to a report widely circulated a few days since to the effect that Sir Edward Grey, the British Foreign Secretary, had informed our State Department that the purchase of German ships for any purpose by this Government would be regarded as an unneutral act. On Sunday morning the Washington Post had this to say:

> It was stated positively at the State Department, as well as at the British Embassy, that no communication, official or otherwise, on the subject had been received from Sir Edward.

It must be that this denial is true, although some publications still avouch the story. The shipping trusts of the United States and Great Britain, so clearly associated in interest and ownership, are tremendously aroused by this bill, and, being whipped from point to point, it is natural that they should seek to excite among the people a vague fear of some dread consequence; but it is inconceivable that the British Secretary for Foreign Affairs would permit himself to be so overreached by commercial interests, however urgent or powerful, as to make such a diplomatic representation to this Government as that reported, which could have no other immediate purpose than to influence legislation pending before the Senate of the United States. After this bill becomes a law we will have reached a point where diplomatic exchanges may be had, provided the corporation it is proposed to create should desire to purchase a belligerent ship; but for a foreign power to intimate an objection, much less to register a protest, at this time would be both premature and offensive. For one, I would resent such an impertinent interference with all my strength. Mr. President, I had as well declare now as later, that so far as I am concerned I would not permit Germany to dictate what we may sell nor permit England to dictate what we may buy, so long as we ourselves remain within the pale of international law and right. In our domestic policies we should receive no suggestion from abroad. Upon these questions we should be governed alone by our own judgment.

I do not like speeches that would sound better in the British Parliament or the German Reichstag than in the American Congress. I prefer to believe that we are big enough to uphold our rights without asking leave of anybody whose interests might be subserved by unduly circumscribing rights and privileges we are undoubtedly entitled to.

Mr. President, there are other things I desired to say, but I see I am trespassing too long on the good nature of the Senate. I must close with much unsaid. In this emergency confronting us, what is the duty of Democrats? What should we do? For myself, I repeat what I have said at another time—fight on, carrying trench by trench until we can storm the citadel. This is a fight, clean-cut and unmistakable, between the Republican Party and the Democratic Party, between what these parties respectively represent, between long-fostered special interests and the great industrial masses of the people. I shall stand steadfast and resolute by the Democracy. How can any Democratic Senator hesitate or halt? Reflect that in this supreme test of party principle, prowess, and strength, weakness of faith or heart may destroy us. Whatever others may do, I shall stand by my flag. I shall stand by my flag because it is the flag of the old Democratic Party and represents what is best in the economic and political life of the Nation. If the party falls and dies by the hands of men it has trusted and honored, I can stand by the shrouded corpse with a clean conscience. No man can say accusingly to me, "Through this rent was thrust the dagger of an envious Casca." No man shall lift the shroud and point accusingly to some deadly wound and say to me, "And thou, too, Senator." I will stand on the outer rim among the silent mourners, comforted by the reflection that my hands are unstained by a single drop of Democratic blood. In this spirit I am in this fight.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. The Senator from Colorado.

Mr. THOMAS. Mr. President, no concealment either of the facts or the object of the pending filibuster has been made or attempted. When this bill was introduced and an effort was made to give it a leading place upon the calendar for immediate consideration, objections to it upon the other side were so voiced as to carry the conviction that it would be opposed to any extent which parliamentary procedure under the Senate rules would justify. As a result, Mr. President, the past two weeks and more have been devoted, for the most part, not to a logical and bona fide discussion of the merits or demerits of the measure, but to a contest of verbosity between Senators on the other side of the Chamber intent upon consuming the precious hours yet remaining to the Sixty-third Congress, and thus forcing the failure of the bill.

In view, Mr. President, of these developments, it may be that this purpose will have been accomplished and make the present passage of this measure impossible or extend its so-called consideration to so late an hour in the session as to make an extra session absolutely necessary; but the measure will sooner or later become a law.

Mr. President, in one respect, much as I shall personally and as a Democrat deplore the temporary defeat of this measure, if defeated it is to be, I am constrained to believe that this filibuster may in some respects be useful as an object lesson to the country. Perhaps an object lesson may not at the present time be amiss, because, Mr. President, it has been assumed by some that recent radical changes in the method of selecting Members of this great body had done away with the bases of those abuses for which the Senate of the United States has long been notorious. The election of its Members by the people as a substitute for their choice by legislatures was a great advance and reformation. Many have thought that it was so great and so radical that all had been done which was necessary to enable the Senate to become a representative body in the true sense of the word instead of an asylum for privilege, which it has long been; but we have merely captured an outpost.

Mr. President, this body, long known as the citadel of the vested interests of the country, is now demonstrating that the change of method of selection of its Members is but one of many steps to be taken before the desired end shall have been accomplished. I am therefore of the opinion that the prominence of this measure, thus making prominent the methods which have been resorted to for its defeat, will focus public attention upon our methods of procedure which make filibustering possible, upon those so-called rules of practice which enable half a dozen men in the enjoyment of fairly good health to become an insurmountable obstacle between the governmental machinery of the Nation upon the one hand and the people upon the other, thus defeating its policy and making needed reforms impossible.

The new method, therefore, of choosing Members of this body, important as the change has been, necessary as it was, and accomplished only after years of persistent opposition by those who believed in the essential necessity of the ancient plan, leaves us, notwithstanding our independence of legislative bodies for our commissions, almost as helpless before the compact organizations of vested interests, entrenched in places of advantage, as we were before. Without a change of our rules, Mr. President, the Senate of the United States will continue to be bound and shackled, the business of the country will continue to be dependent upon the will of a small minority, the

voice of the majority will be as silent and its efforts as ineffectual as though no selective reformation had been accomplished. We are still an army without weapons, exposed to fire from entrenchments.

We perceive, Mr. President, therefore, that, beyond and above a change in the old method of choosing Members of this body and underlying its foundations, is a system of procedure based upon precedents defining, enlarging, contracting, and contradicting rules which were originally designed to promote the transaction and facilitation of business, but practically construed for its prevention, for strangling beneficial but undesirable measures for restricting or defeating legislation which, in the evolutionary processes of a people's growth, are wholly essential to their well-being and prosperity, but which, being hostile to existing and prevailing conditions and inimical to privilege in some or all of its manifold aspects and which have been the offspring to previous legislation, is undesirable to it.

Now, Mr. President, could anything, in addition to the spectacle to which the country has been treated by the recent declamatory performances of certain Members of this body be necessary to demonstrate the proposition that until a radical change in the rules of the Senate can be effected, until the time shall come when some restriction be placed upon the time to be consumed in the consideration of any measure however important, until a decent limitation can be placed upon present methods of discussion and upon the time to be devoted to the consideration of any proposition, we shall continue to be at the mercy of the minority, whether that minority be Republican or Democratic; that the will of the people as expressed in majorities can be thwarted by a handful of Senators and representative government, now on the defensive, shall become a subject of popular contempt?

I have been a Member of this body, Mr. President, for but two years—not long enough, perhaps, to have formed mature, correct judgment on many things which have meanwhile taken place here. All of them may need revision—perhaps all of them are erroneous—but one of the impressions which I have received is that some very good men in this body are far more concerned about the sanctity of our rules than about desirable measures which are sacrificed by their machinery; that some good men are more concerned about precedents, however illogical they may be, than they are about the purposes for which this body was organized and which it should carry into effect with as little ceremony as possible. This is not the only body, Mr. President, of which this criticism can be made; this is not the only body, either, which has designed a machinery of action so complicated in its character, so evidently designed to prevent instead of to promote action as to require radical and immediate reformation. And it is not the only one to be relegated to the dust heap of the past if it fails to heed the demands of an aroused public opinion.

For my part, Mr. President, I am old-fashioned enough to have very little respect for any system of procedure apparently designed to defeat the will and evade the commands of the people. I have only contempt for any rules of procedure or decisions construing them which, either separately or collectively, are apparently designed to prevent the enactment of the public will into legislation as that will has been declared at the polls. [A pause.]

Oh, Mr. President, if Senators want to hold a caucus, I will suspend. Everybody seems to be caucusing now, notwithstanding that the name seems to be so offensive to some of my associates across the aisle. I have seen and have attended caucuses and conferences and combinations—I will not say conspiracies, for that would be unparliamentary—consisting sometimes of three—and it is said, "Where two or three are gathered together in My name, there am I in the midst of them"—and sometimes 30, and sometimes more, busily engaged in something—I know not what—both inside and outside of the Chamber, during the past fortnight, but for the most part, Mr. President, designed to block or defeat the vastly important legislation now pending before this body.

I know, Mr. President, that age is always pleaded in defense of the existence of every abuse. Anything which can command antiquity as an excuse for its existence appeals most solemnly to the reverential mind, which needs nothing beyond it in justification for its existence or as a defense against its destruction; but the world must move on; the standpatter is an impossibility. Even he is carried along, reluctantly, unconsciously, perhaps, but he is nevertheless carried along by the tides of time and the march of progress. Age may, but need not, be the cogent reason for any established custom. Taken alone, however, the thing dependent upon it should be placed upon the defensive and made, by assuming the burden of proof, to vindicate its continuance.

Mr. President, how do we proceed here? A bill comes up upon which the great parties of the country are divided, either fundamentally or because some partisan advantage may be gained by successful opposition. A measure may be introduced and reported from a committee which aims at the destruction of some interest or some evil too apparent in its existence and its operation to justify open defense, but which, nevertheless, finds its advocates in opposition. All that is necessary, all at least that seems to be necessary here, is to secure either the opposition or the advocacy of half a dozen stalwart Senators, men of endurance, men possessed of a vocabulary full of sound and fury, but meaningless, which can be utilized to consume time and exhaust patience. We enter upon a contest, then, of physical endurance, of which the pending filibuster is a graphic illustration.

Day hath succeeded unto day and night after night has passed in a test of endurance, each side watching the other and alert to take advantage of any parliamentary situation, with the filibusterers always having the advantage. Their course is known; it is planned, and as each oracular Senator completes his exhaustive and exhausting discourse upon everything in general and nothing in particular and files out of the Chamber, his place is taken by an associate, inspired with the double ambition of defeating the measure under consideration and talking longer and saying less than his associates. We have, therefore, a contest of physical endurance and vocal competition, as just exemplified by the speeches of the Senator from Utah [Mr. SMOOT] and the Senator from Michigan [Mr. SMITH].

The Senator from Utah, Mr. President, took the floor about half past 10 o'clock last Friday night, and after a discourse with the unoffending furniture of the Chamber and the Presiding Officer as his auditors yielded the floor to his colleague. He exhausted about 11 hours and 30 minutes of time. The Senator from Michigan took the floor about half past 3 o'clock on Saturday, and after holding it up to the hour of 11 o'clock and 15 minutes yielded for an executive session. He came into the Senate Chamber on Monday morning and resumed his discourse—I presume I may be justified in so naming it—yielding the floor at the hour of 4 o'clock in the afternoon for the purpose of a motion.

It has been impossible for me, Mr. President, as one of the timekeepers of this sonorous contest, to determine up to this good hour which of these Senators is entitled to the palm for verbosity; but in view of the fact that the Senator from Michigan yielded the floor apparently with the determination of again resuming it, I presume that as an impartial judge I should postpone a decision until the contest is over. But the Senator from Utah is ahead as a continuous performer.

We are told, Mr. President—the truth of which I do not know—that 10 other Senators upon the other side of this Chamber are loaded to the guards with books, newspaper clippings, quotations from the Bible, Shakespeare, last year's almanac, the principles of aviation, of submarines, of culture, and other subjects equally pertinent to the measure under discussion, to the end that they, or some of them, may establish the records for long-distance talking and at the same time use up the remainder of this session of Congress, thus preventing the accomplishment of anything whatever.

Mr. President, if I have overstated the occurrences of the past few days, or if I have erroneously foretold the intentions of the next few days, I hope I may be at this time corrected. If my assertion that the purpose of this so-called discussion is not bona fide, but to consume time, and thus wear out the majority, I am open to correction; but if, on the other hand, what I have asserted is true, I ask what sort of a spectacle this Senate, which claims to be the greatest deliberative body in the world, the most advanced and dignified legislative chamber anywhere, presents to the American people? Are we here, Mr. President—were we sent here to consume time in idle and vapid talk miscalled discussion, to the end that the session may miscarry and its time exhausted, or is it expected that we shall attend to the business of the country and reach conclusions, even though unfavorable, upon all measures, or upon as many of them as possible, which are now on the calendar?

The Senator from New York [Mr. ROOT], in opening his recent speech, complained about the lack of discussion of the merits of this measure. He complained of the absence of Senators from the floor, and particularly upon the Democratic side. He criticized the Senator from Missouri [Mr. STONE] for his assertion that the Democrats had the votes with which to carry this measure, and drew from that statement the conclusion that we did not care to argue it; that we were not interested in its bona fide and earnest discussion, but that by brute strength we proposed to put the bill through.

Mr. President, I have endeavored to be present during as much of this discussion as possible; and, without being at all invidious, without mentioning specific instances, I want to say that, in my opinion, but three real speeches directed to the subject matter of this bill, considering its real aspects and examining its real purposes, have been delivered on the other side. If more than that number of arguments against this measure or some of its provisions have been made in this discussion, they have been made at a time when, unfortunately, I was not able to be present in the Chamber.

How, Mr. President, shall I describe the others? Is it any wonder that even Senators occupying seats on the other side refrained, except occasionally, from appearing upon the floor to listen even for a few moments to so-called debate? They disappeared either in the cloakroom or elsewhere, until reluctantly summoned back to their seats by a roll call. Why, Mr. President, Senators have not even tried to be entertaining in their discussions. If we are to be criticized for failure to remain upon the floor and listen to their speeches, the Senators delivering them should at least instruct or interest or amuse us; but up to date I have been unable to discover either of these characteristics in any of the filibustering speeches, pure and unadulterated, which have been delivered upon this floor.

The distinguished Senator from Utah [Mr. SMOOT], whose intellectual genius measures up to that of any of his colleagues, when delivering orations, we will say, at Arlington on Decoration Day, lays all the gorgeous fruits and flowers of his tropical imagination before a rapt and attentive audience. He lifts them to empyrean heights, rapt with emotion and patriotism, by eloquent and rounded periods flowing freely from his eloquent lips. Here he simply sits upon the ground and beats the unoffending air with his wings.

He spreads before other audiences the rich and abundant harvest of his many experiences, clothed in all the beauty and attraction of oratory and of metaphor, leaving for us only the chaff and the husks that are sifted from the wholesome grain. Can we be expected to retain our seats under these circumstances, even under the soporific influence of a long and tedious discourse reaching after midnight and delivered in a sing-song monotone that reminds one of a cross between the style of Billy Sunday and that of Macaulay's "Praise God Barebones." We want something interesting, Mr. President, from the filibusterer if he expects us to listen to him.

Besides we know the purpose. I care not how great an argument a man may make, if the purpose behind is known to be insincere, to be something other than that which it pretends to be; if, instead of speaking to a measure, a Senator is talking against time; if, instead of sincerely desiring to enlighten his associates, he is merely indulging in what is miscalled a duty, to the end that legislation he does not desire may thus be gotten rid of, why should we sit and listen to him? I am surprised, Mr. President, that even the Presiding Officer, the officials of the Senate, and the doorkeepers did not in self-defense, during these long and tedious outpourings, also take refuge in the marble room or elsewhere, anywhere to escape the suffering thus inflicted.

Mr. President, possibly the result for which we have been given this sorry spectacle has been obtained. The hurry and scurry of day before yesterday afternoon indicated that such was the fact. The Senator from Michigan [Mr. SMITH] was speaking; he had been listening to himself for a long time. Suddenly he yielded. He had yielded many times before, but only that a question might be asked, expressing the tragic fear that to yield for anything else would be to yield the floor, but he yielded readily to the Senator from Arkansas [Mr. CLARKE], when the Democrats on this side of the Chamber discovered the proceedings to be finally of sufficient interest to give due heed and attention to their duties upon the floor.

I remarked, as was said by the Senator from Missouri [Mr. STONE], instantly I entered the Chamber that for the first time during these sessions practically every Republican Senator was in his seat. One or two were absent from the city, and one was brought, as I have been informed, from a sick room, as rapidly as a machine could bring him from his quarters, and appeared for the first time during the consideration of this measure. Was that accident or the result, Mr. President, of a purpose previously arrived at through conference with Democratic Senators?

Mr. WILLIAMS. Of caucus.

Mr. THOMAS. Oh, I will not say "caucus," because my friends upon the other side are extremely sensitive about caucuses, while "conferences" are perfectly respectable in polite Republican circles. No; I will not say, Mr. President, that the events which began with the motion of the Senator from Arkansas were the result of a caucus, but of many hours of conference, of negotiation, which Democrats would properly call a caucus. Why the entire force of the minority upon the floor? Why the lack of notice to Democratic Senators, many of whom were away from the Capitol and who hurried hitherward as rapidly as they could? There was no coincidence here, Mr. President.

Now we know what is behind it all; we think we do. Ostensibly it is to postpone this measure for the present session. The reasons actuating the insurgents upon this side I know not; I do not feel qualified to pass judgment upon them; I have my own opinion. But I know, if I can judge from what has fallen from the lips of Senators on the other side, that they feel that if this bill can be recommitted, it will be killed, and that it will be impossible to pass it through both Houses of the next Congress; that if the bill can be temporarily shunted into committee, it will not reappear upon this floor prior to the 4th of March, and that the narrower Democratic majority in the other House in the next Congress will make it easier to permanently defeat it than would be the case if it were sent there by the Senate at this time. Whether my Democratic friends were cajoled or deceived into the arrangement or not, I warn them that if they persist, Mr. President, they are contributing to the possible success of a well-matured plan to deprive the people of the benefit of this much-needed legislation.

A small majority, Mr. President, is easier to overcome by the many influences which are always active in defeating important legislation than a very large one; and so our friends are intent on keeping this bill here at this session, because they feel that the victory will be theirs at the other end of the Capitol at the next session. I do not believe it, but I do not think it wise to make such an experiment. That is the coming event, Mr. President, which seems to be casting its shadows before.

I presume that if I were a member of the Republican Party I would be as aggressive, as active, and as filibustering as any Senator on that side of the Chamber. If I were a member of that party, my views would be the views of its membership, and therefore I would see in this measure many things which are repulsive to Republicanism, but which are attractive to the party of the people. And I shall now call attention to some of them.

Now, my friends of the Republican side, heart to heart, what is the real objection of the most of you to this bill? It is its Government-ownership feature. Some of you so say; some of you indicate it, and all of you know it. You see in this measure the extension of Government agency to a great avenue of transportation, and you know, morally, or at least you fear, that the experiment will be successful; and that being successful, it will be successively applied to all the lines of transportation and of communication, on the land as well as on the sea. That is your prime objection to it, and you know it. You realize that it will also be the entering wedge for the overthrow of that terrific and far-reaching monopoly known as the Coastwise Shipping Trust, which has levied its toll upon the millions of producers and consumers of this country ever since we had a Government, and which, with its twin interest upon the ocean, is strong enough to come here and defeat the passage of a measure which the condition of the country instantly and imperiously demands, because it will end the hugely profitable robbery now going on in the way of ocean freight rates; and it grieves me to think that seven distinguished Senators upon this side of the Chamber seem to be willing to aid you in your strangle hold upon the Nation's throat that this trust may continue to pick the pockets of the people.

Mr. President, Government ownership with me has been a plant of slow growth. I am not fully committed to it, but I am getting nearer and nearer to it every day; and I am driven in that direction by just such spectacles as have been presented to the country in the opposition to this bill. Public ownership has no terrors for me; for, whether perfect or not, if we must have monopoly, which seems unpreventable, let it be the monopoly of the Government instead of the monopoly of a comparatively few.

Transportation is a matter of public concern. Our lines of transportation are the arteries of commerce and communication; without them a nation like ours could not exist; but it is all in private hands, manipulated in private interests, with the result of almost inconceivable fortunes in the hands of its managers and financiers; while the railroad systems are clamoring at the doors of the Interstate Commerce Commission for leave to charge higher rates to the end that they may not go into bankruptcy; and on the ocean, where the laws of no one nation can be made effective, a far-reaching combination, international in its scope and character, from which no relief can ever come except it come through a measure of this sort. Come it will, not now, perhaps, not next year, perhaps; but come it will, for there will be an end to this condition, and the end

will, I trust, come more quickly by reason of conduct such as has characterized this Chamber for three long weeks. The present emergency is a great one, but does not appeal to the judgment or the wisdom of the opponents of this measure. No other relief is in sight. Defeat this and you mark another milestone upon the highway to Government ownership.

Mr. President, another objection Republicans have to this bill is that it will forever lay the ghost of subsidies, so near and so dear to our hearts. Our friends would like to see this Government put its hands into the Treasury and hand over millions annually to private companies as a reward for building vessels and operating them. This is in line with their darling doctrine of protection. I know of no easier way of making money and no surer way of making the restoration of our merchant marine absolutely impossible, but there is no question that one of the great controlling influences operating to defeat this measure is the certain doom which it carries to the subsidy plans of the Republican Party.

It was recently intimated to me by a Senator that if this measure could be amended so that the Government would not operate any of these vessels, but lease them to different shipping companies, the filibuster would end.

In other words, if we would cut the heart out of the measure and build ships for the Shipping Trust to lease under corporations that it would create and operate for that purpose, we might be permitted to pass it. Of course this was not stated by authority, but was simply as an opinion; but I believe to-day that if such an amendment were offered upon the floor of this body and accepted by the majority it would result in the speedy enactment of the measure. And what sort of a measure would we then have? One which would bring no relief; one which would simply expand the opportunities and facilities of the existing Shipping Trust and make relief to the producers of the land more remote than ever.

Mr. President, I am not mistaken about the real objections to this measure. I come from an inland State, which has no shore line and no ships, but which is interested, as all the people of this country are, in the common weal. I have a right to speak upon things maritime. Yet I was struck a few days ago by an argument used in the case of Gibbons against Ogden, by one of the great lawyers of that day, to support the contention that his clients were entitled to the exclusive use of the waters of the State of New York in the operation of their steamships. They used this argument then in support of the same view entertained, and of which our present conditions are the outgrowth:

> Mr. Thomas Addis Emmett, in behalf of Mr. Robert Fulton, in his argument in 1824 in the case of Gibbons v. Ogden made this prophecy: "The 13 original States were a band of brothers, who suffered, fought, bled, and triumphed together. They might, perhaps, have safely confided each his separate interest to the general weal; but if ever the day should come when representatives from beyond the Rocky Mountains shall sit in the Capitol, if ever a numerous inland delegation shall wield the exclusive power of making regulations for our foreign commerce, without community of interest or knowledge of our local circumstances, the Union will not stand. It can not stand. It can not be the ordinance of God or nature that it should stand."

We were then warned in those days by the defenders of privilege that if the Union extended its boundaries so far to the westward as to include the Rocky Mountains, resulting in an inland delegation to Congress, which had the presumption to legislate concerning matters of marine or of navigation, it was in the ordinance of God that the Union itself should not stand. Fortunately the argument did not prevail with the Supreme Court of the United States, but it was quite as forcible for privilege then as the arguments against this measure are to-day. An inland delegation from the Rocky Mountains is here; it has been here for many years; it is divided upon this momentous question. But no ordinance of God has dissolved the Union, and no catastrophe save that which loosens maritime privilege from its foundations will disturb the Nation when Uncle Sam takes the helm and navigates a commerce which private capital disdains.

Mr. President, I heard a great deal upon the subject of international law during this discussion. I have attempted to inform myself to some extent upon some of its principles. The most cogent argument made against this bill from the standpoint of international law was that of the Senator from New York [Mr. ROOT]; yet, when submitted to the pitiless logic of the Senator from the Rocky Mountain inland State of Montana [Mr. WALSH], its indefensible premises disappeared, and the argument resting upon it collapsed. I am not surprised that there is so much fear—and I use the word deliberately—in the breasts of my colleagues upon the other side of this Chamber that the enactment of this measure will result in international complications, and that the Government will be involved in war, because it so easily conceals the real motives demanding its defeat.

Why, Mr. President, the same Senators, or many of them, entertaining such views, have been loudly clamorous against the administration, and bitter in their criticisms, because the President has avoided taking any step, as far as he could, that might lead to war with Mexico. Do Senators feel that they can defy Mexico, and are they at the same time afraid of countries which are engaged to-day in the deadly grapple of conflict?

Mr. President, if this measure passes, as pass it will in time, and if it is administered in accordance with its provisions, as it will be, and it thereby brings to the transportation interests and needs of this country the relief that is so sorely needed, and war results or difficulties arise with other nations, it will be simply because, regardless of the principles of international law and of right, they provoked it. If we are to be deterred from taking the essential step which the needs of the people of this country demand lest Great Britain and her allies shall place some new construction upon the principles of international law, or assume to make captures upon the high seas without reference to precedents which she herself has established, the fault will not be ours.

We know that such a thing, while it may occur, is most improbable. The nations of the Old World whose fates are trembling in the balance may be pardoned if, in the exercise of the great law of national self-preservation, they should make mistakes or take chances here and there, as men do in similar emergencies; but to contend that either of them will, as a settled policy, interfere with or offend this Government simply because it is a shareholder in a private corporation created for the purpose of relieving an unnatural and unprecedented situation, is to create men of straw and then to demolish them.

Mr. President, a few months ago I referred to the obstacles this bill has thus far encountered in this Chamber—the obstacles of obstruction. I also said that in my view of the situation the pending filibuster would be beneficial; that it will serve to focus public sentiment upon the ancient rules of this body, the construction of which has made them a bulwark in the defense of existing unwise and injurious legislation, as well as against the passage of bills which, like this, are so sorely demanded. I do not know, but I do not believe the people of this country will regard us with patience or due consideration much longer if this method of procedure is continued. I know it is old, and whenever anyone criticizes the system—for system it is—it is always defended in part by reference to its uses in the past in great national exigencies, and that is advanced as a reason why it should not be disturbed.

Republican Senators never fail to remind Democratic Senators that the force bill, a bill originating on that side of the Chamber, and commanding the almost unbroken support of every member of the Republican Party, was sought to be placed upon the statute books in opposition to the Democratic minority, and they now say that they rejoice that their effort was defeated. So do I; but, Mr. President, I firmly believe that if that measure had been successful and had been crystallized into national legislation, the public opinion of the country not only would have made it ineffectual but it would have disappeared from the statute books at the next session of Congress. I do not care how great the national emergency may be; if public sentiment demands a given policy overwhelmingly the people ought to have it, and they will get it, under our institutions, sooner or later. If, on the other hand, legislation which offends the public conscience, which assails public opinion, as the force bill undoubtedly did, should have been successful, the party behind it and the legislation itself would alike have disappeared under the storm of indignation and obloquy that they would have provoked. But, Mr. President, because in one or two instances the right of unlimited debate in this body has produced good consequences, that it should be permitted to continue at this late day, and to persist for the future, in the face of so much accumulating public business, is to my mind inconceivable.

Why, Mr. President, the proposed legislation which has come to the Congress of the United States during the last 25 years, and which is constantly increasing, represented as it is by thousands of bills in both Houses, needs the prompt attention of the Congress of the United States under rules which will permit its swift and intelligent consideration. Take the present instance: Here are 14 great supply bills which must be passed between now and March 4; in any case before the 1st day of July. The rural credits bill, the possible reconsideration of the immigration bill, the land bills, and scores of other proposed and needed laws are all held up and blocked by the highwayman proceedings of the filibuster. If we could put every work-

ing day of every year to the transaction of the public business at this and the other end of the Capitol, it would be impossible for us to get rid of it all. If Congress were in perpetual session, the vast extent of its jurisdiction consequent upon extended governmental activities makes the present system of rules not only incongruous but impossible. Day after day is wasted in what is called discussion, at a cost to the people of over a thousand dollars an hour for a working day of six hours, while all these important measures are held up and die of strangulation; yet it is declared that this method of proceeding must be continued, because forsooth, our Republican friends may again come into power, and may again try to pass a force bill, in which event it will be necessary to invoke the system, to the end that such an effort may not be accomplished.

Mr. President, one of the greatest men this country ever produced was Thomas B. Reed, of Maine. He was great in many ways and in many things, but the greatest of all his accomplishments was his complete revolution of the rules of procedure of the House of Representatives. He there found a condition that could be well termed one of legislative anarchy, and had had much experience with its attempted operation through many years of previous service. He had the courage and the genius to confront that situation, and, despite bitter opposition and personal abuse proceeding from every quarter, he established a system of rules which makes it possible to do business in that body, and which its bitterest opponents were obliged to adopt; and I believe I can say with perfect truth that unless some such dominant character appears here very soon and performs for this body a similar service the people will take the subject in hand and attend to the case themselves. In other words, a revolution in our methods of procedure must come, or perhaps the Senate will go; and if it is to be merely an obstructive institution it ought to go, for progress can not lag behind a cumbrous chariot drawn by legislative oxen old and blind and halt and feeble going in all directions except the right one, or not going at all. The multitude of interests demanding our attention, the intelligent consideration of public affairs, the insistent demand of great emergencies such as necessarily arise from the present war conditions are all clamoring against this antediluvian system whose only merit is that it is the last remaining shelter of privilege in America.

The House of Lords, Mr. President, and we are sometimes called the American House of Lords, the Millionaire Club, as the Senator from Georgia [Mr. SMITH] suggests, meaning, of course, millionaires like him and myself—the House of Lords for many years was a similar obstruction in Great Britain. It utilized the mere power of inertia to prevent legislation demanded by the voters of England to protect privilege in all its hideous intricacies against the needs and demands of the workmen and workwomen of the country. It became an anachronism in the nineteenth century, but nevertheless an obstructive deadweight on the neck of British legislation and progress. It took a good while to overcome it. The mills of the gods ground slowly, but they ground exceedingly fine. Where is the House of Lords to-day, which failing to heed the public demand remained deaf to the signs of progress and evolution everywhere? It can now place its veto twice upon legislation, and that is all. Enacted once more it becomes law through the mandate of the House of Commons fresh from the people.

Mr. President, it is a noticeable fact that the two-House method of legislation survives very largely in the United States, and survives in form merely almost everywhere else. So we had, in my judgment, better conform to modern requirements, do away with the present system, and place a limitation upon debate, to the end that we may get somewhere, to the end that while what is perfunctorily called debate is going on combinations can not be made behind our backs for the defeat of legislation, to the end that the necessity may blow over and those enjoying the benefits of monopoly may not be disturbed in their continuance.

Now, Mr. President, I am neither a prophet nor the son of a prophet, but I venture the prediction that only three or four more filibusters, characterized by long periods of physical endurance and vapid vocal offerings of hours' duration at great expense to the people, will produce a reaction, is producing reaction that will sweep our rules away if we do not do it ourselves.

Many Senators upon both sides of this Chamber opposed the popular election of Senators for a good many years. They called it revolutionary. They declared that the ancient method of procedure was essential to the recognition of the States and of their rights. But a great party harried the opposition a little too long, and they went out of power at the time the change became effectual.

I know, Mr. President, a good many men upon this side of the Chamber, as there are many men upon the other side of the Chamber, do not agree with me regarding the rules. I am aware of the fact that the present system has its earnest and sincere advocates here, as it has its earnest and sincere advocates over there, but I am also aware that many Senators occupying seats on the other side of the Chamber agree with me and are ready to join with those of us here who so believe in making the Senate of the United States a modern, up-to-date legislative body, free from the barnacles that so cumber its hull as to impede its legislative progress.

Mr. CLARKE of Arkansas. Mr. President, if the Senator from Colorado will allow me, I would like to relate a historical fact.

Mr. THOMAS. I have no doubt the Senator refers to the defeat of the force bill.

Mr. CLARKE of Arkansas. No, sir; not to the defeat of the force bill. I was the only Democrat who cast a vote for the vital measure to which the Senator refers at the time when and in the only form in which it could be passed. I stood alone then in nominal defiance of every Democratic Senator on this side of the Chamber, and I thus had the historic opportunity of writing into the Constitution of the United States the provision the Senator is now so justly eulogizing, and I did so in defiance of the clamor and criticism of those who sat with me on this side. I shall always insist that my independence of dictation on that occasion added that vital measure of national legislative freedom to our system of modern reforms 20 years earlier than it could have been secured by the plan I resisted and the larger number who supported it.

Mr. THOMAS. I am glad to know this, Mr. President. I want to say to the Senator, when I said there were Senators upon this side of the Chamber who believe as I do concerning the rules of the Senate, I had no particular Senator in view. I know that there is a strong division of sentiment here upon the subject just as there is a strong division of sentiment over there; but the very fact that opinions upon this subject do not arise along party lines is the most hopeful feature of the situation, and encourages me to believe that the time is soon coming when opponents of changes will be forced to consider it in earnest whether they would or not.

As at present constituted the Senate has assumed all the proportions of a vocal nuisance—I was about to say a vocal machine of national dimensions. Who reads our profuse offerings to the literature of the day? If some revivalist were to tell me unless I joined the church my future punishment would consist in being condemned to read the CONGRESSIONAL RECORD throughout eternity, I would join the church before night. It contains some things, some speeches, some documents that are of inestimable value and greatly instructive; but take it page after page, and 50 per cent of it is devoted to the discussion of precedents, rules, constructions, and other matters of detail, and all is published at an enormous expense. It is too much for human patience.

Mr. President, I have spoken longer than I intended. I did not intend to take up any time upon this subject or upon the pending measure, preferring to listen as best I could and get to a vote as soon as our friends upon the other side would graciously permit us to do so. But in view of what seems to me to be one of the logical consequences of the filibuster—and there is no other word in the English vocabulary that expresses the idea so directly and clearly—I felt impelled to take the occasion to express some views with regard to our methods of procedure.

Mr. President, no man deplores existing Democratic differences more greatly than I. No man has, perhaps, in a limited way had more experience with party dissensions and with their consequences. We all know, because our experiences teach us, that the surest of all ways to destroy a great political organization is to introduce dissension in its ranks or in the ranks of its leaders to destroy or weaken that unity of purpose which is at once the cause and the object of party organization. We can meet the enemy with united front; if we go down then, we can go down with a cheer and reorganize and come back again. However, if our own is the hand that strikes the blow there may be recovery, but the probabilities are against it. A family difference is the most serious of all differences because of the difficulty of future reconciliation. A political family difference is more serious than that, since it necessarily breeds misunderstandings, suspicions, and resentments, followed frequently by charges and countercharges, by criminations and recriminations, which result in making the rift so great and so far-reaching as to be fatal.

Mr. President, it is because of the fact that this is a party measure, made so under our rules of procedure, made so because it was necessary to secure its passage, that the refusal of

seven members of the party to recognize our party action becomes so serious, for the loss of seven members, we having charge of the government of this country until this administration shall have ended, reduces us to a minority and delivers us, metaphorically speaking, into the hands of the Philistines, who may do with us as they see fit.

Keen are our pangs, but keener far to feel,
We nurs'd the pinion that impell'd the steel.

Mr. President, the Democratic Party was never exiled except through the acts of its own members. The Democratic Party was never retired from power except at the hands and by the conduct of those following its flag and wearing its uniform. In all the history of this Nation, and the Democratic Party was born with the Nation, its defeats have been due to the conduct, the lack of cohesion, the differences and quarrels of members of its own organization. This is a historic fact. I can not recall a single exception.

The Democratic Party has been called back to power. It will stay there, Mr. President, so long as its leaders and its followers are united. It will be exiled when that union ends; and the smile of satisfaction which the Senator from Missouri [Mr. STONE] observed upon the genial faces of Senators upon the other side had for its inspiration the belief that this difference forecast the beginning of the end. They know, Mr. President—for the leaders of the Republican Party are the best politicians in the world—they know that if the phalanx on this side of the Chamber can be broken they can, perhaps, make a drive that will reach to Paris. They also know if they can submarine us, no matter how great our battleship, it will be sunk to the bottom by the wound that is inflicted.

Mr. WARREN. Mr. President——

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Wyoming?

Mr. THOMAS. I do.

The VICE PRESIDENT. The Senator from Wyoming.

Mr. WARREN. The Senator has alluded to the so-called filibuster of 24 years ago on the force bill, and the Senator is making some prophesies as to what may happen to parties. Does the Senator remember that that filibuster was broken precisely by similar occurrences as have taken place so far in this so-called filibuster? Then, as now, seven Members of the ruling party finally voted with the other side and displaced the force bill, and following that the Republican Party, that had been in the majority and had undertaken to force complete party solidarity and support of an unpopular measure, went to the wall and the Democrats elected a President and a majority in Congress.

Mr. THOMAS. Then the Senator agrees with me in my conclusion.

Mr. President, I do recall that one of my predecessors from Colorado led the revolt, or a revolt, but I do not recall whether he was alone, against the force bill; but I am glad the Senator reminded me of the fact, because the Republican Senators can now use that incident as a precedent not only for filibustering but to justify their capture of seven votes from this side.

Mr. WARREN. I was about to finish. The idea is this, that when party solidarity is carried so far that men can no longer endure it and vote with the other party, do they vote right if according to their conscience, or do they vote wrong? If right, then they did right in the force bill. The country, I think, as the Senator stated, has accepted that conclusion as a proper one, and both parties in the country have thought it was better it was settled that way.

I will ask the Senator if he recalls any other so-called filibuster since that time——

Mr. THOMAS. Oh, yes.

Mr. WARREN. Which, when finished, whatever way finished, by the failure of the dominant party or by the passage of the bill, the country has not afterwards indorsed the action which had taken place through the filibuster, or rather its results?

Mr. THOMAS. Mr. President, I do not know whether or not the country has indorsed the results of filibusters at all times. I recall the last great filibuster, to which my memory goes, which was the filibuster against the passage of the bill for the repeal of the purchasing clause of the Sherman Act. The filibuster in that case was carried on by members of both the Republican and the Democratic Parties, a sectional rather than a party filibuster.

Mr. WARREN. What about the later filibuster against the river and harbor bill of last session? What has the country done about that?

Mr. THOMAS. Well, Mr. President, so far as that filibuster is concerned, I will get to it in a moment. I do not believe that the country as a whole indorsed although they accepted the result of the filibuster in 1893. I know that in our section of the country the results of the filibuster were, and still are, thought to have been disappointing and disastrous.

Now, I will come to the last filibuster, to which the Senator from Wyoming has referred—the recent filibuster against the river and harbor bill, which resulted in its defeat. I concede, so far as my acquaintance with the bill goes, that its defeat was a good thing, but, in my judgment, the enactment into legislation of such measures, where they are as outrageous as the Senator from Ohio [Mr. BURTON] declared that one to be, should be defeated in some other way, or else they be allowed to become laws, and the people will judge. I also fully concede that a filibuster, like everything else, has its uses. It may be used, and is sometimes used, for good as well as for pernicious purposes; for desirable as well as for undesirable ends. But it is a survival and a detriment.

Mr. WARREN. And the Senator recalls that it is seldom used, except in extreme cases?

Mr. THOMAS. Oh, Mr. President, its use in a modified way is very frequent. It can be used against every measure, as the Senator well knows; but I am obliged to the Senator for calling my attention to the fact, if I understood him correctly, that his party went out of power shortly after their failure to pass the force bill and because of their attempt to do so. I commend that statement to the Senators on the other side of the Chamber who are about to repeat the performance to which he has referred.

Mr. WARREN. But, Mr. President, I did not state that that result was the cause of our defeat. I was simply reciting history.

Mr. THOMAS. Well, Mr. President, I do not want to misquote the Senator from Wyoming. He knows that. And if I made the statement too broad, of course I will gladly stand corrected; but whether it was the cause or not of his party's defeat, an after event of that legislative situation was the defeat of the Republican Party. We are now confronted with a parallel condition, Senators—a filibuster against a great party measure to become successful by the vote of seven recalcitrant Democratic United States Senators. If coming events, then, cast their shadows before, then may not impending events cast the same shadow now? With that warning before you, with that example fresh in your memories, let me implore you, before taking the last final step, to reflect that the results of your action to ourselves may be the same as were the results to the Republican Party 24 years ago.

Mr. WARREN. Will the Senator permit me to interrupt him?

Mr. THOMAS. Certainly.

Mr. WARREN. The effect will doubtless be now as then. It was not the outcome, but it was the fact of the Republican Party undertaking to force upon an unwilling Nation legislation not acceptable that caused its defeat. It is now the same thing. The Democratic Party is undertaking to force legislation that the country is not willing to accept, and the result may be the same.

Mr. THOMAS. Oh, Mr. President, I think the Senator from Wyoming rather drifts to that conclusion by reason of the analogy which I have drawn between that incident and the present situation. There is about as much resemblance between the force bill and its purposes and the shipping bill and its purposes as there is physically between the Senator from Wyoming and myself.

Mr. WARREN. But the mode of party-caucus procedure here at the Senate was almost identical.

Mr. THOMAS. Oh, it is the mode of filibustering procedure, Mr. President, that I am criticizing. I am not going into the history of the force bill; it is fresh in all our minds; we know what its purpose was. It was virtually to enslave a free people through the political power of national legislation, and to impose upon them a social and political condition so utterly unnatural and intolerable as to excite the horror of most of the people then and of all the people now living.

But here, Mr. President, what is the situation? A great war has produced the very condition prophesied by the Republican Party in 1900 when, in their platform declaring for a merchant marine, they charged that the occurrence of a great European war would demonstrate the extremity of our condition for the lack of it. Of course I do not use the exact language of the declaration, but I think I express the idea. That war has come. It has found us without a merchant marine; it has produced the identical conditions which that platform declaration outlined 15 years ago.

The owners of the few bottoms remaining for our commerce have raised their rates—and that is human nature—they have raised their rates of transportation to the clouds. Millions of

dollars worth of goods are awaiting transportation and clamoring for it in vain. The great exigency, the great emergency, the great necessity consequent upon those conditions are here. Private capital will not come to the rescue; private capital declares it can not come to the rescue. The Government is insuring their cargoes and their vessels; the Government has taken off the restrictions of the navigation laws, to the end that foreign vessels may register here and do business; but capital, instead of investing, is waiting for subsidies. In the meantime, however, the commerce of the world, and ours in particular, is suffering. The people themselves—of the sufferings of whom we hear so much, and which are so greatly exaggerated by politicians, are largely due to this intolerable condition; yet the filibuster is invoked at this hour of the public extremity, and when the governing party of the Nation, having upon its shoulders the duty of relieving the situation, is endeavoring to do so, parallels are sought to be drawn in justification of the present filibuster with the filibuster against the force bill of a few years ago.

Mr. WEEKS. Mr. President——

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Massachusetts?

Mr. THOMAS. I yield.

Mr. WEEKS. I have concluded, from the comments which the Senator from Colorado has been making, that he does not approve of a filibuster.

Mr. THOMAS. I do not, unless the time limited by the rules that ought to govern a legislative body of modern times be used for filibustering to the extent to which the limitation goes.

Mr. WEEKS. Mr. President, there is now a motion before the Senate, and I suggest to the Senator from Colorado that he give us a chance to vote on that motion now.

Mr. THOMAS. Oh, yes; the Senator has the votes to defeat the bill if he can poll them soon, and the conclusion is, Mr. President, that I am filibustering. [Laughter.] I acknowledge the imputation, but I do not defend the practice. [Laughter.]

Mr. President, Tom Johnson, some years ago in the House of Representatives, was making a speech in behalf of the Wilson bill.

Mr. SMITH of Michigan. What?

Mr. THOMAS. The Wilson bill; yes, the Wilson bill. And I am reminded that nearly every speech made by the Senator from Michigan in this Chamber that I have heard gives an account of Wilson riding on Bryan's shoulders in the House after the passage of that bill. It is a sad, sad fact, because the Senator always metaphorically sheds tears over the picture which he draws for the delectation of a suffering Senate. But I was going to say that in the course of his discussion of that measure Tom Johnson was taunted with the fact that he had made a fortune under the provisions of the tariff law, and he said he had; and he said further, "I propose, if I can, to make another, but I will not defend its infamies."

Yes, Mr. President, unlike some Senators upon the other side, I acknowledge that I am filibustering, and I am doing so because you have done it so long that it becomes necessary to do a little filibustering on this side. [Laughter.] I shall not make any pretense, Mr. President, to the contrary. I am not going to talk as long as the Senator from Michigan for the reason that I am not able, physically or mentally, to do so. The Senator's capacity for repeating the same thing a dozen times in order to consume the hours is beyond mine.

Mr. LIPPITT. Mr. President——

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Rhode Island?

Mr. THOMAS. I yield; certainly.

Mr. LIPPITT. The Senator has been kind enough to tell us how long he was not going to talk. Would he be willing to take the other side of the dilemma and tell us how long he is going to filibuster, so that we may arrange our plans accordingly? A number of Senators would be very grateful if they knew exactly what was going on.

Mr. THOMAS. Mr. President, I shall not gratify the Senator. If he had come to me three or four days ago and made that proposition, so that we might have acquired some knowledge of his party affairs, I should have been the last to refuse to reciprocate now; but under the circumstances I do not think I am under any moral, physical, or mental obligation to comply.

Mr. LIPPITT. Mr. President, if I may be allowed again——

Mr. THOMAS. Certainly.

Mr. LIPPITT. I thought it was very distinctly understood on this side how long we were going to talk; that we were going to talk as long as was necessary by legitimate means to defeat this bill.

Mr. THOMAS. Oh, yes, Mr. President.

Mr. LIPPITT. Do I understand the Senator is going to adopt a similar course?

Mr. THOMAS. But you did not tell me what was going on behind our backs nor just how soon we might expect a vote. I knew last Monday, when the Senator came rushing in from the cloakroom with his smiling countenance all ablaze with expectation, that, to use the language of the street, there had been "something doing"; but, Mr. President, I am not going to talk much longer. If that is any consolation to my friends upon the other side, they are welcome to it; indeed, I do not know but that I have got to the end of my string, anyhow.

To be perfectly frank, Mr. President, when I was interrupted by the Senator from Wyoming I had about concluded; but I thank him very much for having called my attention to some historical facts which I had forgotten, and which I have endeavored to use to the best of my ability on this occasion.

Mr. President, I have not, in the filibustering spirit, at least, offered to the Senate the comments that I have made upon its present methods of procedure. I have felt, and still feel, that the next great reform which is essential to the welfare of the country and the good of the Senate is the reformation of its rules and the placing of substantial limitation upon indiscriminate discussion.

I believe that while filibusters have been used for good purposes and have been used for bad purposes, they should not be used at all, except in so far as limitations upon debate may justify. I have believed, and still believe, that the temptation to use the power is too great to be resisted in many instances when it should not be resorted to at all. I believe that such is the general impression of the outside world, and I believe that the impression is well justified; that it is growing; and that it will express itself in no uncertain way in the near future, if we ourselves do not heed the handwriting upon the wall and introduce some system less antiquated in its character and more adaptable to the needs of the country.

Mr. CAMDEN and Mr. FLETCHER addressed the Chair.

The VICE PRESIDENT. The Senator from Kentucky.

Mr. THOMAS. Mr. President——

Mr. CAMDEN. I beg pardon. I thought the Senator had finished.

Mr. THOMAS. I have not yielded the floor.

Mr. FLETCHER. The Senator from Kentucky has been recognized.

Mr. THOMAS. I will yield to the Senator from Florida for a question.

Mr. FLETCHER. I have no question to ask.

Mr. THOMAS. Then I yield the floor.

The VICE PRESIDENT. The Senator from Kentucky.

Mr. CAMDEN. Mr. President, I intend to express my views on this measure at a later date, but, since the Senator from Missouri did me the honor of selecting me as the special target of attack, I feel that a brief reply is in order.

The Senator made two accusations against me, one that I am opulent; the other that I do not bestir myself when the vested interests are opposed by the great mass of the people. Touching the first charge, I am glad to be able to say that the great law of compensation works between the Senator and me, for he is opulent in tact, in successful leadership, in winning ways, and in magnificence of private character. I mention compensation at this time, along with mention of the vested interests, because both terms are well understood by the Senator and with him, some whisper, have been interrelated.

As regards my being sluggish in the public interest, I contentedly leave that to my neighbors and friends.

The Senator said much about the secrecy of alleged negotiations here leading up to the vote of Monday last. Surely a denunciation of secrecy comes with peculiar grace from him, who is known the world over as "Gumshoe Bill," a name testifying to frank and bold work in the public interest at Jefferson City, Mo., and Washington, D. C.

Not having the Senator's opulence of ready speech, I have taken the pains to prepare these few remarks.

Mr. STONE. Mr. President——

The VICE PRESIDENT. The Senator from Missouri.

Mr. WHITE. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Alabama?

Mr. STONE. For a moment.

Mr. WHITE. I only wish to present a telegram, Mr. President.

Mr. STONE. I have no objection. I do not wish to lose the floor.

Mr. WHITE. This is a telegram containing a joint resolution from the Legislature of the State of Alabama, now in session.

It is dated Montgomery, Ala., February 3, 1915, and reads as follows:

MONTGOMERY, ALA., *February 3, 1915.*

Hon. FRANK S. WHITE, *Washington, D. C.:*

I am directed by the senate to transmit to you the following joint resolution this day adopted by the senate and concurred in by the house of representatives, to wit, senate joint resolution 57, by Mr. Lusk:

"*Be it resolved by the senate (the house of representatives concurring),* That the Senators and Representatives of Alabama in the Congress of the United States are hereby memorialized and requested to do all within their power to secure the immediate passage of the administration bill to secure ships for transportation of American products to the markets of the world. Our cotton is the greatest sufferer from want of transportation. We urge prompt action by our Senators and Representatives."

J. A. KYLE, *Secretary.*

Mr. LIPPITT. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Rhode Island?

Mr. STONE. I do.

Mr. LIPPITT. With the permission of the Senator from Missouri, I simply wish to ask the Senator from Alabama what is the description of that bill? What was the bill to which he referred?

Mr. WHITE. It is the bill now pending before the Senate.

Mr. LIPPITT. I mean the bill referred to in the telegram.

Mr. WHITE. It is the administration bill.

Mr. LIPPITT. Oh, the administration bill?

Mr. WHITE. The Democratic administration bill, backed by the President, Hon. Woodrow Wilson. I do not suppose the Senator has any doubt about the bill.

Mr. LIPPITT. No; I only wanted not to have any doubt about the description of it

Mr. STONE. Mr. President——

Mr. WHITE. Why, of course not. I thought——

The VICE PRESIDENT. The Senator from Missouri is not yielding.

Mr. STONE. I move that the Senate proceed to the consideration of executive business.

Mr. HARDWICK. Mr. President, I hope the Senator will withhold that motion for just a moment. I desire to give notice that to-morrow morning, following the routine morning business, I shall address the Senate on the pending motion of the Senator from Arkansas.

Mr. FLETCHER. Mr. President, will the Senator withhold the motion one moment?

Mr. STONE. I will.

Mr. FLETCHER. I ask to have inserted in the RECORD a copy of a telegram sent from C. H. Huston, chairman, dated Chattanooga, Tenn., to the Secretary of the Treasury; also a short letter referring to the bill and containing a very short article from the Motor Age of January 28 with reference to shipments to South America; also an editorial from the Washington Post of February 1.

Mr. GALLINGER. What is the request?

Mr. FLETCHER. The last request was as to an editorial in the Washington Post of February 1.

Mr. GALLINGER. No; what did the Senator ask?

Mr. FLETCHER. To have it inserted in the RECORD; that is all.

Mr. GALLINGER. Why, Mr. President, I have a basketful of letters and communications of various kinds in my committee room, and I have not thought of lumbering up the RECORD with them; but I never object to anything the Senator from Florida asks. If other Senators do not object, I will not; but we will have a pretty bulky RECORD to-morrow if we are going to put in all the communications that come to us.

Mr. FLETCHER. I will say to the Senator that this is very brief; and in connection with the editorial in the Washington Post I might mention that the office boy of the Washington Post seems to be very active and undoubtedly very capable.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

[Telegram.]

CHATTANOOGA, TENN., *January 28, 1915.*

Hon. WILLIAM G. MCADOO, *Washington, D. C.:*

Presidents of business men's club, manufacturers' association, jobbers' association, clearing house, and chamber of commerce direct me to express our appreciation of your efforts in behalf of the shipping bill. It is vital to all business interests of the South, and extremely so to our numerous manufacturers doing an export business. Your Chicago speech and appeal to Congress sounds the keynote.

C. H. HUSTON, *Chairman.*

—

FLORALA, ALA., *February 1, 1915.*

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

SIR: Anent the arguments set forth by certain Republican Senators, saying that we have all the shipping facilities needed to South America, as well as elsewhere, I beg to hand you page from Motor Age dated January 28, in which you will note the article marked, showing that automobile purchased by Mr. Frederic J. Stimpson, newly appointed ambassador to the Argentine Republic, was shipped to South America "via London."

Would think this was sufficient argument to show that space, regular lines, etc., to South America are noticeable by their absence?

Very truly,

R. A. FRENCH

—

[From the Motor Age of January 28, 1915.]

AMERICAN FLAGS PROTECT CAR.

Manager Albion L. Danforth, of the Boston Cadillac agency, had his troubles last week when he began plans to ship to South America an eight-cylinder car ordered by Frederic J. Stimpson, newly appointed ambassador to the Argentine Republic. The car had to go by way of London, and Mr. Danforth was forced to get United States Government seals from Secretary of State William J. Bryan to paste on the crate. On all four sides of the crate a reproduction of the American flag has been pasted, together with other indications that it is the property of an American official, and so not subject to seizure.

—

[From the Washington Post of February 1, 1915.]

THE UNITED STATES NEEDS ITS OWN MERCHANT MARINE.

The delay in providing this country with its own merchant marine is a serious injury to the people of the United States.

If the pending measure can be improved by amendments, the leaders of the Democratic Party should be willing to accept the same.

The Republican Party is entitled to the thanks of the country for constructive work upon many matters in the past, but it has a record as to merchant-marine negligence, if not worse, that brings it neither honor nor credit.

It is only earning condemnation if it adheres to a policy of legislative obstruction to the providing of a national merchant marine now.

The agriculturists need the service of such a marine; the manufacturers and the merchants require it; the transportation land lines will be benefited by it; the industrial workers of the country are now being embarrassed by the lack of these additional vessels.

The voters of the United States are asking now why did not the Republican Party establish such marine during the years of its full political power.

Can the Republican leaders of the Senate tell the people the reason?

Will the Progressive Senators tell the people of the United States why the Republican Party failed to carry out its repeated promises and pledges?

The people of the United States, regardless of party affiliations, desire the establishment of this merchant marine.

The business interests of all the people demand it.

No party that stands against it as obstructionists but stands as an active ally of foreign and domestic shipping combines, and by such obstruction is injuring the people of the United States.

The people in every State of the Union are asking why the Republican Party is refusing to aid in the establishing of this national necessity, indignant at being kept as vassals to foreign shipping combines.

The business men of the Nation see foreign markets captured by a foreign commercial competitor while the Republican Party stands as the obstacle to providing the means for our own merchants and manufacturers to place their products in those markets.

The Post knows it voices public sentiment when it advocates the placing of the United States commercial, industrial, agricultural, and financial interests above those of any other nation.

Obstructionists to this merchant-marine creation are standing in the way of the interests of our people.

The Republican Party will face a revolt by the patriotic members of its own organization if its representatives in Congress persist in doing the work that aids our commercial competitors or allied shipping combines, either at home or abroad.

Every day makes it clearer that this country can not be secure in its foreign trade while dependent on foreign vessels for ocean transportation.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Colorado?

Mr. STONE. I yield.

Mr. THOMAS. I have the advance sheets of an article 8 pages in length, entitled "The transfer of merchant vessels during war, including comments upon Senator ROOT's recent speech in the Senate," by Hon. Archibald R. Watson, corporation counsel of the city of New York from 1910 to 1914, and bearing directly upon the international subject of the Senator's discourse. I ask to have it inserted in the RECORD.

Mr. GALLINGER. Mr. President, did I understand the Senator to say that it contains criticisms or comments on the speech of a Senator delivered in this Chamber?

Mr. THOMAS. I said so, but they are of a very proper kind. There is nothing at all in it that is of a personal nature. It is a very high-class article.

Mr. GALLINGER. I think that is a very extraordinary request—to put in the RECORD comments of outside parties on speeches delivered in this Chamber.

Mr. THOMAS. Why, Mr. President, it is practically a reply to a very important speech here.

Mr. ROOT. Mr. President, I hope the Senator will not object to it.

Mr. THOMAS. I have no doubt the Senator from New York has had a copy of it.

Mr. ROOT. I have not had a copy of it, but I hope there will be no objection.

Mr. THOMAS. If there were the slightest thing of a personal character in it, I would not think of presenting it.

Mr. SMOOT. Mr. President——

The VICE PRESIDENT. The Senator from Utah.

Mr. SMOOT. I will ask the Senator if he will not have the article referred to the Committee on Printing, so that if it contains anything objectionable that fact may be ascertained?

Mr. THOMAS. Why, certainly; if the Senator does not want to take my word about it, I am perfectly willing to take that course, but I assure him——

Mr. SMOOT. Upon the word of the Senator, I shall make no objection.

Mr. THOMAS. I assure the Senator that there is nothing objectionable in it. I am perfectly willing to submit it to the Senator from Utah.

Mr. GALLINGER. In view of the fact that the Senator from New York makes the suggestion, I shall not object.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. THOMAS. Mr. President, perhaps I should not have used the word "criticism" when asking the privilege of inserting the document in the RECORD. I did not intend to use it in any offensive sense whatever.

The matter referred to is as follows:

THE TRANSFER OF MERCHANT VESSELS DURING WAR, INCLUDING COMMENTS UPON SENATOR ROOT'S RECENT SPEECH IN THE SENATE.

[By Hon. Archibald R. Watson, corporation counsel of the city of New York, 1910–1914.]

The Hon. ELIHU ROOT, New York's senior Senator, eminent lawyer and publicist, late Secretary of War and Secretary of State, is undoubtedly one of the most able, brilliant, and forceful men which the public life of this generation has seen. But when our distinguished friend undertakes to maintain the view which he has recently expressed concerning the purchase of a merchant vessel owned by a citizen or subject of a nation at war by a citizen of the United States, he is brought into conflict with so formidable an array of authorities that even Senator ROOT will have to give ground and ask for quarter. We might, if we wished, go back to Chief Justice Marshall's time, when, in the year 1800, the schooner *Charming Betsy* was seized by Capt. Murray, commander of the U. S. frigate *Constellation*, and carried into Martinique as prize for alleged violation of the nonintercourse law between the United States and France and her dependencies. It was in the course of his opinion in this case that the learned Chief Justice first enunciated the views with respect to the rights of neutrals to engage in commerce, referred to in Prof. Moore's Digest of International Law, volume 7, page 415.

But more recently—though still nearly half a century ago—we may turn to another case, decided by the United States Supreme Court, involving the capture of the steamship *Georgia*, which had been a ship of war in the service of the Southern Confederacy, and as such had preyed extensively upon the commerce of the United States. Finding herself in English waters, and to escape the U. S. steam frigates *Kearsage*, *Niagara*, and *Sacramento*, cruising off the coast of France and in the English Channel, the *Georgia* suddenly entered the port of Liverpool, with her armament and complement of officers and crew. She was there dismantled, refitted as a merchantman, and sold to one Edward Bates, a citizen of Liverpool and subject of Great Britain. Bates, after refitting the vessel, chartered her to the Portuguese Government for a voyage to Lisbon and thence to the Portuguese ports on the coast of Africa, and it was while on her voyage to Lisbon, "in a peaceable manner," that the vessel was captured by the *Niagara*, Commodore Craven commanding. (The Georgia *v.* United States, 7 Wall. 32.) This case is important, significant, and even conclusive of what was the rule at that time, because calling attention in the clearest manner to the distinction between the sale of a war vessel or a vessel which had previously been armed and the sale of a merchant ship. And it was here declared by Mr. Justice Samuel Nelson, for the unanimous court, that while the *Georgia* was liable to capture as having been previously a ship of war a different rule was recognized by the highest authorities everywhere as applying to the sale of merchant ships.

"Such has been the understanding of the profession and of text writers both in England and in this country," said Mr. Justice Nelson, "and as still higher evidence of the rule in England, it has since been recognized as settled law by the judicial committee of Her Majesty's privy council. In the recent learned and most valuable commentaries of Mr. Phillimore, now Sir Robert Phillimore, judge of the high court of admiralty of England, on international law, he observes, after stating the principles that govern the sale of enemies' ships during war to neutrals: 'But the right of purchase by neutrals extends only to merchant ships of enemies for the purchase of ships of war belonging to enemies is held invalid.' And Mr. T. Pemberton Leigh, in delivering judgment of the judicial committee and lords of the privy council, in the case of the *Baltica*, observes: 'A neutral, while war is imminent, or after it has commenced, is at liberty to purchase either goods or ships (not being ships of war) from either belligerent, and the purchase is valid, whether the subject of it be lying in a neutral port or in an enemy's port.' Mr. Justice Story lays down the same distinction in his Notes on the Principles and Practice of Prize Courts, page 63, Pratt's London edition—a work that has been selected by the British Government for the use of its naval officers as the best code of instruction in the prize law. (11 Moore, P. C., 185.) The same principle is found in Wildman on International Rights in Time of War, a valuable English work, published in 1850, and in a more recent work, Hosack on the Rights of British and Neutral Commerce, published in London in 1854."

Every Attorney General of the United States and every Secretary of State for more than half a century past, before whom the question has come, has appeared to agree upon the proposition as stated by Attorney General Cushing in 1854, when it was said:

"A citizen of the United States may purchase a ship of a belligerent power at home or abroad in a belligerent port or on the high seas, provided the purchase be made bona fide and the property be passed absolutely and without reserve, and the ship so purchased becomes entitled to bear the flag and receive the protection of the United States." (Vol. 6, Opinions Attorney General, 638.)

Two years later the Hon. William M. Evarts, who was Attorney General before he became Secretary of State, in a letter to Mr. Christiancy, minister to Peru, stated, amongst other things, that:

"The right of Americans to buy foreign-built vessels and to carry on commerce with them is clear and undoubted * * *. As a consequence an adjunct of this right, that of flying the American flag, can not be prohibited. If circumstances justify on the part of the consular officers an opinion that the sale is honest, and that the vessel has really become the property of a citizen of the United States, she may properly fly the flag of the owner's country as an indication of such ownership and as an emblem of the owner's nationality."

Still later, in the case of the *Benito Estenger* (177 U. S., 568), Chief Justice Fuller said:

"Transfer of vessels flagrante bello was originally held invalid, but the rule has been modified and is thus given by Mr. Hall, who, stating that in France their sale is forbidden and they are declared to be prize in all cases in which they have been transferred by neutrals after the buyers could have knowledge of the outbreak of war, says: 'In England and the United States the right to purchase vessels is in principle admitted, they being in themselves legitimate objects of trade as fully as any other kind of merchandise, but the practice of fraud being great the circumstances attending a sale are severely scrutinized and the transfer is not held to be good if it is subjected to any condition or tacit understanding by which the vendor keeps an interest in the vessel or its profits, control over it, and power of revocation or a right to its restoration at the conclusion of war.'"

To the same effect are the observations of Sir William Scott in the *Seeh Geschwistern* (4 C. Rob., 100); the *Jenny* (4 C. Rob., 31); the *Omnibus* (6 C. Rob., 71); also observations of Judge Cadwalader, of the eastern district of Pennsylvania, in the *Island Belle*, Federal cases No. 7, 107. Other authorities to the same purport are Oppenheim's "International law" and Halleck's "International law," volume 2, page 93.

Of course it is required that the sale of a belligerent ship to a neutral shall, to be valid, be in good faith; that the title of the former owner shall be absolutely divested; that the vessel shall not remain in any respect subject to the control or management of the enemy; that there shall be no reversionary interest in the ship, and nothing which continues the interest of the former owner in or to the vessel. All of these considerations go to the validity of the transfer. In some instances, no doubt, the amount of the purchase price would be weighed as bearing upon the regularity of the sale. But given a valid transfer and passing for the moment the international naval conference of 1908–9 it seems that there should be no question, especially so far as Great Britain is concerned, upon which any international complication could reasonably be expected to arise.

It has been said that France has never recognized the validity of the transfer of a merchant vessel flagrante bello. It is true that in 1778 France promulgated a regulation to the effect that "enemy-built vessels can not be made neutral by a sale to a neutral after hostilities break out." (See 2 De Pistoye et Duverdy, Prises Maritime 1, 503.) But again, as far back as 1856, Mr. Marcy, then Secretary of State, in a letter to Mr. Mason, then minister to France, wrote:

"However long may be the period during which this doctrine has formed part of the municipal code of France it is manifestly not in harmony with her maritime policy, and it is confidently believed by this Government that France will not assert it, not only against the practice of other nations, but against the authority of her most enlightened writers on public law.

"The principle, therefore, that the neutral has a perfect right to purchase the merchant vessels of the belligerents has been maintained by England, by Russia, and by the United States, and it is inconsistent with these historical facts to say that the contrary doctrine avowed by France has had the sanction of the chief maritime nations or that 'it forms a part of the whole doctrine of maritime law.'"

Opposed to the French view, continued Mr. Marcy, "is the doctrine of the European publicists, and it is especially sustained by Hautefeuille, whose authority will, I doubt not, be recognized by the Emperor's Government. He (Hautefeuille) says: 'It is impossible to recognize such a right as that claimed by the regulation of France.'"

The Russian prize regulations, prior to the international naval conference, as given by Prof. Moore (vol. 7, p. 424), are as follows:

"Merchant vessels acquired from a hostile power or its subjects by persons of neutral nationality are acknowledged to be hostile vessels unless it is proven that the acquisition must be considered, according to the laws of the nation to whom the purchasers belong, as having actually taken place before the purchasers received news of the declaration of war or that the vessels acquired in the manner mentioned, although after the receipt of such news were acquired quite conscientiously and not for the purpose of covering hostile property."

That is to say, the Russian view has been in full accord with that of Great Britain and the United States, that the validity of such transactions as referred to depends upon good faith and "conscientiousness."

We come now to the international naval conference held at London from December 4, 1908, to January 6, 1909, participated in by representatives of Germany, Austria, France, Great Britain, Italy, Japan, Spain, the Netherlands, Russia, and the United States. Senator ROOT, in his recent speech in the Senate, had much to say about this London conference, but little or nothing to say concerning the long-established and recognized position of the United States, Great Britain, and, apparently, Russia previous to this conference, which never, as a convention or treaty, became binding or in any way obligatory upon any of the nations participating in it. In fact, it is very doubtful if the terms themselves of the tentative "declarations" clearly sustain Senator ROOT'S view. But of this more later.

"The reason why the declaration of London is subject to consideration, although we are not bound by it"—

Said Senator ROOT recently in the Senate—

"is that England, France, and Russia have adopted it, with some modifications not touching this subject, as their law for the present conflict."

That is to say, though the London conference was held some six or seven years ago, and though nothing was done in approval of it until the breaking out of the present European war, with such alignment of forces as to give Great Britain, France, and Russia control of the sea, these powers now, no doubt, wish to extend their right in respect of the capture of merchant ships; while the United States, consistent in one view for a century, has, alike with Great Britain, during all of this time maintained the right of neutrals to engage in commerce with belligerents, subject to certain clearly defined restrictions, and

has included in that right the right of our citizens in good faith to purchase merchant vessels for neutral use from the citizens or subjects of nations at war. Having declared this principle just and reasonable in itself, having affirmed and reaffirmed it through generations, there seems to be much in favor of the view that the United States should not now recede from this position, but should stoutly maintain it should occasion arise.

But what were the conclusions arrived at by the delegates to the London conference concerning "transfer to a neutral flag"?

"First. It was resolved that the transfer of a belligerent vessel to a neutral flag before the beginning of hostilities was valid, unless proved to have been made to evade the consequences to which an enemy ship, as such, is exposed (art. 55).

"Second. If the transfer was effected more than 30 days before the opening of hostilities, it would be deemed valid, if unconditional and complete, even though made in order to evade the consequences of war (art. 55).

"Third. Where the transfer was after the outbreak of hostilities it would be deemed void unless shown not to have been made 'in order to evade the consequences to which an enemy vessel, as such, is exposed.'"

Article 56 continues the same subject:

"There, however, is an absolute presumption that the transfer is void: (1) If the transfer has been made during a voyage or in a blockaded port; (2) if the right to repurchase or recover the vessel is reserved to the vendor; (3) if the requirements of the municipal law covering the right to fly the flag under which the vessel is sailing have not been fulfilled."

Now, in the case of an enemy vessel safe in the haven of a neutral port, what are "the consequences to which an enemy vessel, as such, is exposed"? Can it reasonably be said, taking a concrete example, that a German steamer now lying at her dock in Hoboken, is "exposed" to capture by the British? Undoubtedly such a vessel would be "exposed" to capture if, "as such,"—that is, if as "an enemy vessel"—she attempted to navigate the high seas. But as a neutral vessel, flying the Stars and Stripes, she is not an enemy vessel, and consequently not liable to capture as such, nor does the declaration of London, as we understand it, so provide. Nor, if this be true, can it be said that a valid, unconditional, and complete sale of such a vessel, then proceeding to engage in neutral commerce, was made to "evade" the consequences to which an "enemy vessel, as such, is exposed."

In assuming a position which would bind the honor and retard the prosperity of our Nation by the merely tentative discussions between the delegates to the London conference, Senator ROOT seeks to interpret the provision in question as meaning that any transfer of a belligerent ship to a neutral flag would be deemed invalid if it could be shown that in all probability no transfer would have been made but for the outbreak of war. It would have been very simple and easy to state the proposition this way, had such been the intention of the delegates. And the fact that this idea would have been so easy to express, and that it was not expressed, certainly detracts from the weight of Senator ROOT's conclusion that such was the unexpressed intention. Instead, what the delegates did say, as we have seen, was only that there was an absolute presumption of invalidity if the transfer was made in transitu, or in a blockaded port, or if the right to repurchase was reserved, or if the requirements of the municipal law governing the transaction had not been fulfilled. Nothing is here said about a conclusive presumption of invalidity where the vessel is in a neutral port, there quite as safe from capture by the enemy as if there was no such thing as war in the world.

Furthermore, the concurrence by our delegates in the declaration of London was not understood at the time, nor has it been regarded since, until Senator ROOT spoke, as involving a surrender of the century-old position of the United States upon this important subject. In this connection we may point to the article "War" in the Cyclopedia of Law and Procedure (vol. 40, p. 296), by George Grafton Wilson, author of a Handbook on International Law, professor of international law in Harvard University, lecturer on international law in Brown University and in the United States Naval War College. Under the heading "Transfer of vessels by belligerents in anticipation of or during war" (p. 355), Prof. Wilson states:

"The continental practice has been in the direction of regarding sales of belligerent merchant vessels to neutrals in anticipation of or during war as invalid; but in England and the United States, while the presumption has been against the validity of such transfers, they have been upheld where a bona fide sale for a valuable consideration has been shown. Where, after the alleged transfer, the former owner retains an interest in the ship or it remains under the same management and in the same course of trade as before, the presumption against the bona fide character of the transfer is conclusive. Nor can a valid transfer be made of an enemy vessel in an enemy jurisdiction, nor of an enemy vessel or goods in transitu, nor of a public vessel belonging to a belligerent nation. An attempt has now been made to regulate the whole subject by the incorporation into the declaration of London of a set of rules substantially similar to those stated above."

That is to say, Prof. Wilson, who quotes and considers the provisions of the declaration of London, regards such declarations "as substantially similar" to the preexisting rule long maintained by the United States.

And finally, even though the terms of the declaration of London be regarded as in conflict with the previous rule so long recognized and adhered to by the United States and Great Britain, the status of the conclusions of this conference, so far as this Government is concerned, was very clearly stated in the recent letter of the Secretary of State to Senator STONE, of Missouri, chairman of the Senate Committee on Foreign Relations. "This Government," wrote the Secretary of State, "is not now interested in the adoption of the declaration of London by the belligerents"; and, further, that the United States would insist that, without regard to the declaration of London, "the rights of the United States and its citizens during the war shall be governed by existing international rules."

In conclusion, the matter narrows down to this. Shall this Nation—its commerce paralyzed by a European war, for which it is in no wise to blame, its citizens suffering prodigious losses annually by reason of the disturbed conditions abroad—deny to its citizens the long-existing right to purchase in good faith ships of former belligerent registry, to carry American goods, now congesting our warehouses and accumulating on our wharves, to the empty marts of Europe, where our products are so sorely needed and can be so advantageously sold? May not our citizens be permitted to recoup or avoid a little of the enormous aggregate of their inevitable loss in this peaceable and proper way? Many must at this time hold the view that such a sacrifice of its rights and interests on the part of the Government of the United States would be unreasonable and unjust, and should not now be expected or required.

Mr. WILLIAMS. Mr. President, in view of the fact that a great deal has been said about the southern people not being interested in this bill and the farmers not being interested, I wish to read and have inserted in the RECORD as a part of my remarks the following cut out of to-day's Washington Evening Star:

FAVOR SHIP-PURCHASE AND RURAL-CREDIT BILLS—REPRESENTATIVES OF FARM ORGANIZATIONS VOICE INDORSEMENT DURING CALL ON PRESIDENT WILSON.

Indorsement of the ship-purchase bill and the rural-credits legislation was given to President Wilson to-day by representatives of the National Grange, the National Dairy Association—

These are both northern associations—

the Farmers' Alliance—

This is a southern farmers' association—

and the National Rural Credits League, who called at the White House with Representative SMALL, of North Carolina.

Claiming to represent all of the farmers of the country, Oliver Wilson, of Illinois; William T. Creasy, of Pennsylvania; and S. H. Hobbs, of North Carolina, told the President that they favored his plans for a shipping bill and that they believed rural-credits legislation should be passed during the present session of Congress. They said that action on both questions was vital to the farmers.

The National Rural Credits League was formed here yesterday to urge action on the subject by Congress. The directors elected were J. A. McSparren, of Pennsylvania; D. M. Blankenship, of Virginia; Western Starr, of Maryland; William T. Creasy, of Pennsylvania; and S. H. Hobbs, of North Carolina.

This shows that the farmers are waking up to the vital importance of this bill. They have been slow to see it, but they are awake now.

In view of the fact that the junior Senator from Massachusetts [Mr. WEEKS] and the senior Senator from Massachusetts [Mr. LODGE] and one or two other Senators upon that side have said that this bill was standing like a cloud over the shipbuilding interests of the country and was discouraging the building of ships, I wish to insert as a part of my remarks from the same evening paper, just cut out from the news columns of it, an article entitled:

Boom in shipbuilding at the American yards. Contracts at big prices largely the result of the European war.

The article shows that 70,000 tons of ship construction are now going on at Newport News, and tells what is going on at the Maryland yard and at various other yards in the country.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

BOOM IN SHIPBUILDING AT THE AMERICAN YARDS—CONTRACTS AT BIG PRICES LARGELY THE RESULT OF THE EUROPEAN WAR.

There is an unprecedented boom in shipbuilding in the shipyards of the United States. The shipyards of the Atlantic seaboard for many months had so little to do that they scrambled and cut prices to get the smallest order, but to-day every one of the big plants is so busy that the smaller plants are getting the overflow and are also crowded with work.

Bargain prices in new ships prevailed during the slack period; now a new craft to sail the deep is costing big money. The American shipyards lost out in competition with foreign shipyards in other days; to-day the American yards are getting work at their own prices because of the lack of foreign facilities.

This story of prosperity in the shipyards of the United States is brought from Newport News by Capt. C. A. McAllister, chief engineer of the Coast Guard, who was recently there to inspect the two Coast Guard cutters building at the Newport News Dry Dock and Shipbuilding plant. That plant has enough work on hand to keep 4,500 men busy for two years, and is likely to refuse additional construction work as beyond the capacity of the plant.

TOTAL OF 70,000 TONS.

Prior to December 1 the shipyard at Newport News did not take a single construction order. To-day, including two battleships and two Coast Guard cutters, it is building 70,000 tons dead-weight of new ships.

Cramps' shipyard is signing up contracts to crowd it with work. The Maryland Steel Co. yard at Sparrows Point, the New York Shipbuilding Co. at Camden, and the Fall River plant are all doing capacity work. Although orders for repairs are necessary to keep busy certain facilities of the plant, a great part of repair work is being abandoned to smaller plants; the bigger plants were taking every bit of it they could get only a brief time ago.

Among ships building at Newport News are two big oil tankers for the Standard Oil Co., each 15,000 tons dead-weight. These steel vessels were to have been constructed in German yards, but the German concern, unable to construct them, abandoned the contract to American competitors. This is only one of many foreign contracts for construction that have been abandoned, with American yards profiting.

OTHER VESSELS UNDER CONSTRUCTION.

Two other big vessels being constructed at the Newport News yards are a 10,000-ton dead-weight steel freighter for the Luckenbach Co., and a 10,000-ton dead-weight freighter for the New York & Porto Rico Steamship Co.

All foreign yards have been turned over to war-construction work. In Great Britain every yard is busy building warships, and the workmen wear buttons on which are inscribed the legend "I am serving the Empire in the building of ships." The same conditions prevail in Germany and France where the larger yards are situated.

Mr. WILLIAMS. That does not look much like a "cloud." No "discouragement" because of "anticipated Government competition."

Mr. President, in view of the fact that the senior Senator from Massachusetts [Mr. LODGE] and the senior Senator from New York [Mr. ROOT] were both "appalled," to use the language of the senior Senator from New York, with the idea of the war that might await us with Great Britain if we purchased German ships, I have cut out of the Star this evening this article, headed:

Justifies Wilson's stand on ship-purchase bill—British paper—

It is the London News, which is a celebrated Liberal paper, in sympathy with the administration there—

British paper declares United States merchant marine might prove valuable to England.

And it goes on to tell why, reenforcing just what I said the other day, to the effect that in my opinion there will not be any opposition from the British Government or the French Government to the purchase of German ships. I ask that that article may be inserted in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

JUSTIFIES WILSON'S STAND ON SHIP-PURCHASE BILL—BRITISH PAPER DECLARES UNITED STATES MERCHANT MARINE MIGHT PROVE VALUABLE TO ENGLAND.

LONDON, *February 3.*

Raids by German submarines on British commerce might make a United States merchant marine valuable to Great Britain as a means of supplying food, in the opinion of the Daily News, which prints an editorial this morning justifying President Wilson's attitude on the ship-purchase bill now before Congress.

The paper says this "unprecedented development of state socialism" is the only means whereby the United States can recover its place in the world of shipping. The editorial sets forth that in the present war the submarine has become a serious menace to England's food supply, and in any future war will dominate her position, unless in the meantime science should discover some effective means of defense.

"Should it then threaten our shipping with destruction and ourselves with starvation," says the Daily News, "it will not be an unimportant fact that a great neutral country, possessing a mercantile marine of its own, can send its ships into our ports unmolested and unafraid."

EXECUTIVE SESSION.

Mr. STONE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened, and (at 6 o'clock p. m.) the Senate adjourned until to-morrow, Thursday, February 4, 1915, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate February 3, 1915.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

William H. Hornibrook, of Albany, Oreg., to be envoy extraordinary and minister plenipotentiary of the United States of America to Siam, vice Fred W. Carpenter, resigned.

RECEIVER OF PUBLIC MONEYS.

Matthias N. Fegtly, of Jordan Valley, Oreg., to be receiver of public moneys at Vale, Oreg., vice Henry G. Guild. Term expired and resigned. This nomination is in lieu of the one sent to the Senate January 18, 1915, and confirmed January 22, in which Mr. Fegtly's first name was stated as Martin.

POSTMASTERS.

ALABAMA.

M. W. Camper to be postmaster at Florence, Ala., in place of Charles W. Moore. Incumbent's commission expired February 2, 1915.

OKLAHOMA.

James G. Lyons to be postmaster at Okmulgee, Okla., in place of W. S. Bell. Incumbent's commission expired January 10, 1915.

Walter J. Stevens to be postmaster at Lexington, Okla., in place of A. M. Myers. Incumbent's commission expires February 14, 1915.

OREGON.

W. R. Hamer to be postmaster at Newport, Oreg., in place of Oliver P. Shoemaker. Incumbent's commission expired January 10, 1915.

John T. McGuire to be postmaster at North Bend, Oreg., in place of Elmer F. Russell. Incumbent's commission expired January 16, 1915.

PENNSYLVANIA.

William T. Benner to be postmaster at Saxton, Pa., in place of Luther P. Ross. Incumbent's commission expired January 21, 1915.

E. R. Benson to be postmatser at Mount Jewett, Pa., in place of O. S. Gagahan. Incumbent's commission expired January 16, 1915.

Daniel R. Dunkel to be postmaster at Hamburg, Pa., in place of Abel M. Byers. Incumbent's commission expires February 16, 1915.

John J. Durkin to be postmaster at Scranton, Pa., in place of John E. Barrett. Incumbent's commission expired January 10, 1915.

Allen S. Garman to be postmaster at Tyrone, Pa., in place of H. B. Calderwood. Incumbent's commission expired January 21, 1915.

Jerome A. Hartman to be postmaster at Phoenixville, Pa., in place of J. Wersler Thomson. Incumbent's commission expired January 10, 1915.

William A. Irwin to be postmaster at Downingtown, Pa., in place of Joseph B. Means. Incumbent's commission expired December 13, 1914.

George E. Hipps to be postmaster at Carrolltown, Pa., in place of Frank N. Donahue. Incumbent's commission expired January 10, 1915.

Harry K. McCulloch to be postmaster at Freeport, Pa., in place of Robert B. Thompson. Incumbent's commission expired January 10, 1915.

Norman D. Matson to be postmaster at Brookville, Pa., in place of Joseph B. Means. Incumbent's commission expired December 13, 1914.

David M. Means to be postmaster at New Wilmington, Pa., in place of S. W. Price. Incumbent's commission expired May 6, 1914.

George D. Schoenly to be postmaster at Boyertown, Pa., in place of William W. Wren. Incumbent's commission expires February 14, 1915.

Irwin Simpson to be postmaster at Punxsutawney, Pa., in place of Harry G. Teagarden. Incumbent's commission expired December 13, 1914.

SOUTH CAROLINA.

James A. Clardy to be postmaster at Laurens, S. C., in place of Charles H. Hicks. Incumbent's commission expires February 14, 1915.

John W. Geraty to be postmaster at Yonges Island, S. C., in place of John W. Geraty. Incumbent's commission expired January 13, 1915.

Bernard B. James to be postmaster at Union, S. C., in place of Laurens G. Young. Incumbent's commission expired December 13, 1914.

TENNESSEE.

Fred P. Darwin to be postmaster at Dayton, Tenn., in place of Noah J. Tallent. Incumbent's commission expires February 16, 1915.

Joseph W. Nichols to be postmaster at Trenton, Tenn., in place of John T. Hale. Incumbent's commission expires February 15, 1915.

George W. Phebus, jr., to be postmaster at Union City, Tenn., in place of Allen D. Keller. Incumbent's commission expired December 1, 1914.

VIRGINIA.

George W. Sheppard to be postmaster at Glenallen, Va., in place of Franklin Stearns. Incumbent's commission expired February 1, 1915.

CONFIRMATIONS.

Executive nominations confirmed by the Senate February 3, 1915.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Robert Emmett Jeffery to be envoy extraordinary and minister plenipotentiary to Uruguay.

POSTMASTERS.

ILLINOIS.

Robert C. Baird, Coulterville.
Thomas E. Davis, Mulberry Grove.
William F. Filbert, Watertown.
George B. Gray, Sesser.
J. E. Herman, Mounds.
James K. Hopkins, Princeton.
Ludwig A. Karcher, Dahlgren.
J. J. Lloyd, Fairfield.
John T. Scott, Saybrook.
Louis A. Slykas, Westville.
Charles L. Stephenson, St. Francisville.
Samuel M. Stewart, Metropolis.
Mahala E. Trainer, Blue Mound.
B. L. Washburn, Carterville.

IOWA.

John O'Rourke, Red Oak.

KANSAS.

Henry Block, Syracuse.
G. S. Hoss, jr., Cherryvale.

MICHIGAN.

James Fraser, Webberville.
William H. Vau Consant, St. Johns.

MINNESOTA.

J. E. Bauvette, Hallock.
J. J. Daly, Frazee.
M. W. Jensen, McIntosh.
Sophus A. Nebel, Braham.
William H. Nevin, Ivanhoe.
Alvin A. Ogren, New London.
O. P. Oseth, Oslo.
C. J. Schendel, Campbell.
Nels J. Thysell, Hawley.
Frank E. Wilder, Spring Valley.

NEW YORK.

James R. Mapes, Canaseraga.
James R. Mayne, Heuvelton.

OHIO.

Samuel R. Coates, Maynard.
Grover C. Naragon, Amsterdam.
Nelson C. Petrie, Rock Creek.
Robert T. Spratt, Malvern.

RHODE ISLAND.

Francis Fagan, Pascoag.
J. Elmer Thewlis, Wakefield.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *February 3, 1915.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou, to whom our hearts are as an open book, cleanse us, we beseech Thee, from all sinful and selfish desires, that the pages written in the transactions of this day may be free from blots and stains of which we should be ashamed; that with a conscience void of offense toward Thee, our Father, and our fellow men, we may ask Thy blessing upon all we have done, assured of Thy favor, in Christ Jesus our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

EXTENSION OF REMARKS.

Mr. MURRAY. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. MURRAY. I ask unanimous consent to extend my remarks in the RECORD on the subject of Cabinet officers coming before the Congress.

The SPEAKER. On the subject of what?

Mr. MURRAY. On the subject of Cabinet officers coming before Congress.

The SPEAKER. The gentleman from Oklahoma asks leave to extend his remarks in the RECORD about Cabinet officers. Is there objection? [After a pause.] The Chair hears none.

Mr. BARTHOLDT. Mr. Speaker, I wish to submit a request for unanimous consent. I ask unanimous consent to print in the RECORD a speech delivered by the gentleman from Pennsylvania [Mr. PORTER] on the subject of American neutrality.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend in the CONGRESSIONAL RECORD as part of his own remarks a speech made by the gentleman from Pennsylvania [Mr. PORTER] on the subject of neutrality. Is there objection? [After a pause.] The Chair hears none.

ORDER OF BUSINESS.

Mr. CULLOP. Mr. Speaker, when the House adjourned on last Calendar Wednesday, the bill H. R. 2496 had been called up, and I now inquire if it is not the unfinished business for to-day, this being Calendar Wednesday? The matter for decision was pending at the time the House adjourned. I will read the RECORD to the Chair, showing the status at adjournment.

The SPEAKER. What page is the gentleman going to read from?

Mr. CULLOP. Page 2431, on January 27, the following proceedings took place:

Mr. CULLOP. Mr. Speaker, I call up, by authority of the Committee on Interstate and Foreign Commerce, the bill H. R. 2496, House Calendar No. 194.

Mr. MANN. What bill is that?

Mr. CULLOP. For uniform classification of freights.

Mr. MANN. Mr. Speaker, I make the point of order that there is no quorum present.

Mr. STEVENS of Minnesota. Mr. Speaker, I reserve the right to object to that.

The SPEAKER. The gentleman from Minnesota reserves the right to object to what?

Mr. STEVENS of Minnesota. To object on the ground that there is no quorum present.

The SPEAKER. The gentleman raises the point of no quorum, and so does the gentleman from Illinois [Mr. MANN]. Evidently there is no quorum present.

Mr. CULLOP. Mr. Speaker, the bill having been called up, will it have the right of way on next Wednesday?

The SPEAKER. It would.

Mr. MANN. The Speaker had better think about that before ruling on it.

Mr. ADAMSON. I do not know whether any other brother has anything to offer, and I will move to adjourn.

Mr. MCKELLAR. Mr. Speaker, will the gentleman withhold his motion?

The SPEAKER. For what purpose does the gentleman from Tennessee rise?

Mr. MCKELLAR. To ask unanimous consent to extend my remarks in the RECORD on this matter.

Mr. MANN. Impossible.

The SPEAKER. The gentleman can not do it after the point of no quorum is raised until that point is settled.

Mr. CULLOP. Mr. Speaker, I understand the Chair has ruled this bill will be in order next Wednesday as unfinished business.

The SPEAKER. The Chair does not believe that suggestion to the Chair is correct. The bill has not been reported. The gentleman has to call up the bill affirmatively——

The rest of the proceedings are not so material. The Speaker declined to make a ruling at that time, and I now call it up under the conditions of the RECORD—H. R. 2496, a bill for the uniform classification of freights.

Mr. MANN. Mr. Speaker, I make the point of order the gentleman can not call up the bill from the committee, as that committee has been called two days in succession. I would like to remind the Speaker that the RECORD is not the Journal. The Journal's proceedings of last Wednesday have been approved. The Journal does not show that the gentleman called up the bill and the Journal is conclusive upon the House, having been approved. The Journal shows that as soon as the bill which had been under consideration had passed I made the point of no quorum, and thereupon the House, on the motion of the gentleman from Georgia, adjourned. That is the Journal, and that is conclusive upon the House.

Mr. CULLOP. Well, I think every one present will remember if that is the showing of the Journal it is not correct, but the RECORD here is correct, and that the proceedings took place then as found here in the RECORD on page 2431, so I ask now that the bill be considered because of the fact that the bill had been called up, but had not been reported; but it was before the House for report by the Clerk when the point of no quorum was made, and hence has the right of way as the first thing to-day.

The SPEAKER. The history of the transaction is very brief. The gentleman from Indiana rose and said he called the bill up, and the Chair directed the Clerk to report it; but before the Clerk could get started or even find the bill two gentlemen raised the point of no quorum, one raising the point and the other reserving it. The bill never was before the House. At first the Chair, not having paid exact attention to what was done about it, said he thought it would be in order to-day. The Chair having stated that the bill in question would be in order to-day as unfinished business, on the suggestion of the gentleman from Illinois [Mr. MANN] the Chair held the decision under advisement, and upon reflection came to this conclusion about it: That the bill never was before the House; that if the Clerk had read the title or got started, then it would have come up to-day, but inasmuch as it never got started that committee has had two days and is not entitled to any more under the circumstances, and the Clerk will call the next committee.

Mr. CULLOP. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Indiana rise?

Mr. CULLOP. To make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CULLOP. If I understand the ruling of the Chair correctly, it was that as the bill had not been reported by the Chair it was not now the unfinished business of to-day.

The SPEAKER. That is correct.

Mr. CULLOP. I would like to make a further inquiry. Does the Chair further hold that the Committee on Interstate and Foreign Commerce having had two Calendar Wednesdays under the rule for Calendar Wednesday it can not have business before the House to-day?

The SPEAKER. Yes.

Mr. CULLOP. Then this bill could not be called up?

The SPEAKER. No. It has been ruled, both by Speaker Cannon and the present occupant of the chair, that to start on a bill at the close of the second day, if it gets started, then it

comes up as the unfinished business on the next Calendar Wednesday; but this never got started.

Mr. MANN. If it will be any consolation to my friend from Indiana, I will state that I got caught the same way once.

Mr. CULLOP. Well, I am not responsible for being caught; the gentleman was responsible——

Mr. MANN. I was not responsible then; somebody else was.

Mr. CULLOP (continuing). Because the gentleman raised the point of no quorum; and this act on his part prevents its consideration to-day, which I very much regret.

POSTPONEMENT OF SALE OF FUR-SEAL SKINS.

The SPEAKER. The Clerk will call the next committee.

Mr. ALEXANDER (when the Committee on the Merchant Marine and Fisheries was called). Mr. Speaker, I desire to call up House joint resolution 391 by instruction of the committee.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Joint resolution (H. J. Res. 391) authorizing the Secretary of Commerce to postpone the sale of fur-seal skins now in the possession of the Government until such time as in his discretion he may deem such sale advisable.

Resolved, etc., That the Secretary of Commerce be, and he hereby is, authorized to postpone the sale of all skins now in possession of the Government, taken from seals killed on the Pribilof Islands for food purposes, under section 11 of the act of August 24, 1912, until such time as, in his discretion, he shall deem advisable; and the proceeds of such sale shall be covered into the Treasury of the United States.

Mr. ALEXANDER. Mr. Speaker, section 11 of an act to give effect to the convention between the Governments of the United States, Great Britain, Japan, and Russia for the preservation and protection of the fur seals and sea otter which frequent the waters of the north Pacific Ocean, concluded at Washington July 7, 1911, and which was passed August 24, 1912, provides in section 11:

That from and after the approval of this act all killing of fur seals on the Pribilof Islands, or anywhere within the jurisdiction of the United States in Alaska, shall be suspended for a period of five years, and shall be, and is hereby, declared to be unlawful; and all punishments and penalties heretofore enacted for the illegal killing of fur seals shall be applicable and inflicted upon offenders under this section: *Provided*, That this prohibition shall not apply to the annual killing on the Pribilof Islands of such male seals as are needed to supply food, clothing, and boatskins for the natives on the islands, as is provided for in article 11 of said convention; the skins of all seals so used for food shall be preserved and annually sold by the Government, and proceeds of such annual sales shall be covered into the Treasury of the United States.

Heretofore the sales have taken place annually.

In the fur trade it has long been the custom to sell at auction. This has always been the practice of the Government. Until last year all of the sealskins of the United States Government have been sold in London, England. On December 16, 1913, the first sale of Government sealskins was held at St. Louis, Mo. Many foreign buyers were present as bidders at this sale. The prices obtained were about 5 per cent higher than for similar skins at the London sales a short time before. The compensation for storage, handling, advertising, and selling the sealskins last year was 1 per cent lower than had previously been paid to the English dealers.

The foreign buyers who attended the sale of 1913 were nearly all from European countries now at war. At the present time there is no prospect of securing the attendance of such foreign buyers, and if the sale were to take place now or in the near future, competition would be materially reduced and prices would be affected to such an extent as to materially injure the interests of the Government.

The number of sealskins sold last year was 1,896; they brought $54,579. It was subsequently found that the number of seals authorized to be killed for food for the natives on the Pribilof Islands was insufficient, hence the number has been increased for the present year. The total number of skins now in possession of the Government is 3,284.

This department is advised that these skins can, with the proper care, be retained for many months without deterioration and with very little expense. At the present time it is quite impossible to determine when the interests of the Government will require the sale to be held. Under these unusual conditions it is deemed advisable to give authority to the Secretary of Commerce to use his discretion in fixing the date of the sale. It is very important that action should be taken as soon as possible.

This simply involves a business proposition. The department has been advised by the solicitor that under the law these sales must take place annually unless this discretion is vested in the Secretary of Commerce. I may say that a similar resolution, or one in identically the same terms, passed the Senate and was referred to the Committee on Foreign Affairs. The Assistant Secretary of Commerce brought the pending joint resolution to me. I introduced it in the House, and it was referred to the Committee on the Merchant Marine and Fisheries. When I learned that Senate joint resolution 214, covering the same subject matter, passed the Senate, I traced it and found it had been referred to the Committee on Foreign Affairs. I have conferred with Mr. FLOOD of Virginia, the chairman of that committee, and he is quite willing that the Committee on Foreign Affairs may be discharged from the consideration of the Senate resolution and that the Senate resolution may be substituted for the House resolution and passed, which would dispose of this question.

Mr. GOULDEN. Will the gentleman from Missouri yield?

Mr. ALEXANDER. Yes.

Mr. GOULDEN. I would like to ask him what is the estimated value of the skins which would be affected by the passage of this resolution for 1914? I notice the year previous it was $54,579. I notice that the department report 3,284 skins are held now by the Government.

Mr. ALEXANDER. There were 1,896 skins sold, and they brought $54,579.

Mr. GOULDEN. I take it that that was for 1913?

Mr. ALEXANDER. Yes.

Mr. GOULDEN. And this is the resolution that covers those for 1914?

Mr. ALEXANDER. Yes.

Mr. GOULDEN. Do you have any idea whether the value is greater or less than it was in 1913?

Mr. ALEXANDER. If they were sold now, they would not bring as much money. Those sold in 1913 in St. Louis brought more money and the sale was more advantageous to the Government than previous sales made in London.

Mr. GOULDEN. Under existing conditions I think it is an excellent proposition to postpone the sale, and will support the resolution.

Mr. MOORE. Will the gentleman yield?

Mr. ALEXANDER. Yes.

Mr. MOORE. These skins will eventually go into the hands of the consumers in the United States, and why should not those consumers have the advantage of the price? Why should we wait for foreign buyers?

Mr. ALEXANDER. The wish of the department is to get a fair price for these skins, because we are at a large expense in the administration of the seal industry on the Pribilof Islands, and we would prefer that those who wear sealskin coats would pay a higher price for them.

Mr. MOORE. As a matter of fact, would not the purchaser of the skins in the United States have to pay more for them by reason of the postponement of this sale?

Mr. ALEXANDER. It is to be hoped that he will, because we want more money for them.

Mr. MOORE. Then the resolution would not be in the interest of the American consumer?

Mr. ALEXANDER. Well, I have no plea to make for those who wear sealskin coats.

Mr. MOORE. I have not been able to buy a sealskin yet. I think the price ought to be brought down so that men who merely earn congressional salaries may have a chance to wear one once in a while.

Mr. ALEXANDER. I have no such ambition myself.

Mr. MANN. Mr. Speaker, will the gentleman yield to me for a question?

Mr. ALEXANDER. Yes.

Mr. MANN. I understand these skins always had been sold in London until 1913, when for the first time they were sold in St. Louis, and that the sale at St. Louis was very satisfactory?

Mr. ALEXANDER. It was; and it is our purpose, if possible, to transfer these sales permanently from London to this country; and not only the sales but the dressing of the skins.

Mr. MANN. What are the reasons now for the Government speculating in these skins? On the supposition that they would sell here at some future time at a higher price than they would sell now?

Mr. ALEXANDER. The only reason I know is that given by the Department of Commerce. It is regarded purely as a business proposition, because if they were sold at this time they would be sold at a much reduced price. Of course the cost of administration and care of the fur-seal herd and of the people of the Pribilof Islands involves this Government in a very large expense. I presume the intent is to reimburse the Government as far as possible for those expenses.

Mr. MANN. That applies, of course, to any sale. Why does the department believe they can get a better price by not selling now than by selling now? The people who buy these skins know just as much about it as the department does. Why would they not be just as willing to pay for the sealskins now what

they are worth as they would be if the Government waited for 2 or 5 or 10 years? That would be a matter of speculation on the part of the Government.

Mr. ALEXANDER. This vests discretion in the department. The department may conclude that it can best sell them now.

Mr. MANN. It is a declaration on the part of Congress that the Government ought to speculate in sealskins and hold them until it gets a better price instead of selling now.

Mr. ALEXANDER. This is a matter of business. The Government ought to get as good a price as it can.

Mr. MANN. I know; but what are the reasons for the supposition that they will sell better in a year or two years from now, when they will have a larger quantity to sell, than they would sell now, when there is some demand for them?

Mr. ALEXANDER. Well, this is one of the conditions growing out of the war in Europe. A great many of those who have been bidders for seal skins heretofore were Europeans, are not here, and would not be here to bid at this time. Of course, if this war in Europe should continue for any considerable length of time and the conditions should not change, I do not know of any reason why the sales should not be made.

Mr. MANN. Of course, until the sale is advertised the people will not be here to bid. How does the department know they will not be here to bid?

Mr. ALEXANDER. The firm in St. Louis that has been acting as the agent of the Government, I expect, is the best informed on the conditions of the fur trade of any firm in the United States; and Mr. Sweet, the Assistant Secretary of Commerce, visited St. Louis and conferred with that firm, and his opinion, no doubt, was made up largely from the opinion obtained from them.

Mr. MANN. I apprehend that that firm is not locking its doors and putting all its furs away for a year or two before it will sell any of them. I imagine they might want the Government to speculate upon holding sealskins, but I dare say they will not speculate with what they have. The market price is fixed, of course, by the supply and demand. People outside are just as apt to bid what they are worth now as if we should let the Government hold them and gave them an opportunity to bid a year from now. I can not see the point in the Government speculating upon what the value of sealskins or other property will be a year from now, when there will be a larger quantity to be sold.

Mr. LLOYD. Mr. Speaker, will my colleague yield?

Mr. ALEXANDER. Certainly.

Mr. LLOYD. Mr. Speaker, is it not true that the principal market for these sealskins has been in Europe, and has not that been true for a number of years past? And is it not true that the market for fur-seal skins in Europe is now very greatly interfered with, and the demand for sealskins is not what it was before the beginning of this European war?

Mr. MANN. Well, I think the gentleman is slightly mistaken as to the ultimate market. More sealskins are purchased in the United States by Americans than are purchased in any place in the world. Of course, they are taken over to Europe to be dyed; I understand that.

Mr. LLOYD. More fur-seal skins from the Pribilof Islands have been sold in Europe than in the United States.

Mr. MANN. They are taken to Europe to be dyed.

Mr. LLOYD. The fur-seal skins used in the United States, as a rule, are not the ones taken from the Pribilof Islands. They are from an inferior species of seal.

Mr. MANN. The gentleman is mistaken. I remember I bought one some years ago, but they went out of fashion, and I held it for a time, until I could see if it would get in fashion, and I am waiting until I get money enough to buy another. Of course, if they go out of fashion, they will not bring as high a price, unless you get them in fashion again. I notice the number of seals killed is nearly 75 per cent more this year than before. The excuse is given that they need to kill more for food. Are they getting around the law forbidding the killing of seals for skins in that manner?

Mr. ALEXANDER. I think not. I do not think they killed any more than were necessary for food purposes.

Mr. SIMS. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. Certainly.

Mr. SIMS. As I have had occasion to notice in the press, the gentleman from Illinois [Mr. MANN] very freely predicts that we shall have a Republican President and administration two years from now [applause on the Republican side], and with them a return to full prosperity and the full ability of the people of the country to buy anything at any price they want. Now, if he believes what he says about that, is not that a good reason, from his standpoint, for putting off the sale of these skins until the expected good times arrive?

Mr. MANN. Well, that would be the only sensible reason for holding them. [Applause on the Republican side.]

Mr. ALEXANDER. Well, if that is a prophecy, I believe we had better sell them now. [Applause on the Democratic side.]

Mr. MARTIN. Mr. Speaker, will the gentleman yield me five minutes in opposition to this bill?

Mr. ALEXANDER. I will yield to the gentleman five minutes.

The SPEAKER. The gentleman from South Dakota is recognized for five minutes.

Mr. MARTIN. Mr. Speaker, on first consideration certainly this proposition does not strike one with entire favor. As far as the record discloses, the only sales held in the United States of these sealskins resulted in better prices than the department had been obtaining for what they had been sending to Europe. It strikes me as rather an un-American idea that in this important seal industry, which the Government is protecting and preserving, the only product we have to sell should be shipped over to London to find an entirely foreign market.

Mr. GORDON. Will the gentleman yield?

Mr. MARTIN. Certainly.

Mr. GORDON. Do you think there was any good and sufficient reason for the cotton growers to hold their cotton last fall, when it was selling for only 6 cents a pound?

Mr. MARTIN. I apprehend so; but I think that is quite foreign to this inquiry.

Mr. GORDON. I was not in favor of the Government buying it. The gentleman from Illinois was; but I was not.

Mr. MANN. I beg the gentleman's pardon. I was not in favor of it, and I am glad the gentleman was not.

Mr. GORDON. Did you not say that if the Republicans were in power they would give relief to the cotton growers?

Mr. MANN. Yes; but I did not say the Government would buy the cotton and hold it.

Mr. GORDON. That was the only relief they were asking for.

Mr. MARTIN. I should like to answer this suggestion. In the first place, even if what was suggested by the gentleman from Ohio were true, that would have been no excuse for the Government's going into the cotton business and speculating on cotton futures.

Mr. GORDON. I agree with the gentleman.

Mr. MARTIN. So that it is not apropos to this inquiry. I say it strikes me as quite un-American that it has been the policy of this department heretofore to take the product of the American seal fisheries abroad to seek a market there; and the fact that it was a mistake has been demonstrated in the only sale they ever have had in this country, the last sale, which was held at St. Louis, at which the sealskins brought a higher price and at a smaller expense than ever before.

Mr. GORDON. Would you favor the Government selling them abroad if they could get a better price there than they could here at home?

Mr. MARTIN. I would not say that. I say that an American product of this character had better be put up for sale in the usual way at public auction; and unless there is a very good reason shown to the contrary, I believe they could be sold here just as advantageously as abroad. It is just as easy for foreign buyers to come to America for this product as it is for Americans to go abroad and compete in London at a foreign sale of American products.

Mr. FLOOD of Virginia. Does the gentleman understand that this bill proposes to require these sealskins to be sold abroad?

Mr. MARTIN. No; I do not; but I do understand that the suggestion is made not to sell them at the present time because of conditions abroad.

Mr. FLOOD of Virginia. The fact is that under the present administration they have changed the place of sale from London to St. Louis, and the only object of this bill is to postpone the sale so that foreign buyers may come to St. Louis and buy these sealskins.

Mr. MOORE. The gentleman from Ohio referred to the cotton question. Is not the real difference on that question this: That whereas there were 15,000,000 bales of cotton, sufficient to clothe the entire world, there are only 3,284 sealskins, or not nearly sufficient to give sealskin coats to all the ladies in Washington?

Mr. MARTIN. I think the suggestion of the gentleman from Illinois [Mr. MANN] is very pertinent—that we have nothing before us to indicate an improved market by holding these skins. There is no suggestion in the report of an appreciating market. Indeed, it would appear that the department has not made any sufficient examination of this question to know whether the market is liable to go down or to go up in the

future. The comment on this subject by the Assistant Secretary is—

At the present time it is quite impossible to determine when the interests of the Government will require the sale to be held.

Now, considering the general conditions in Europe, which are having a tendency to impoverish the people who have heretofore been purchasers of these sealskins in foreign markets, it is quite possible that to hold these skins for a longer continuation of this war, with the supply increasing in our own hands and with the next year's product coming in—to hold these sealskins for a year—may logically be expected to reduce the price the Government will probably receive for them when the sale does take place. I think it would be much better and much more American to proceed as the statute directs with this sale. Certainly no great loss will come to the Government thereby.

Mr. MADDEN. Will the gentleman from Missouri yield me a couple of minutes?

Mr. ALEXANDER. I yield to the gentleman from Illinois two minutes.

Mr. MADDEN. Mr. Speaker, the recommendation of the committee to pass this resolution brings before us a very curious situation. Over at the other end of the Capitol we have a filibuster in progress on account of the attempt of the administration to buy ships, to reduce the earning power of the ships that are already owned by American citizens. A little while ago the Congress passed the Clayton bill, to prevent the people of the United States engaged in industrial enterprises from charging prices that would yield them a profit. This is beautiful in its inconsistency. I do not believe there is any justification for the enactment of such a resolution as this under the circumstances which have gone before. Everything that Congress has done within the last two years has tended to reduce the possibility of any American citizen making a living. The majority of this Congress have particularly placed the stamp of their disapproval on any attempt on the part of any man in America having anything for sale to get such a price as would yield him a profit; and now it is proposed that the Government shall become a storage house for 3,280 sealskins until the time comes when the American people will be compelled to pay a higher price, and thereby the Government reap more profit, because it wants to enter into the field of speculation in the sale of sealskins. [Applause on the Republican side.]

Mr. HARRISON. Will the gentleman from Missouri yield to me?

Mr. ALEXANDER. I yield to the gentleman from Mississippi five minutes.

Mr. HARRISON. Mr. Speaker, this is not a question of the Government speculating in sealskins or trying to obtain a high profit from sealskins. It is a question of the Government trying to obtain a fair and reasonable price for the sealskins that it owns which come from the Pribilof Islands. There are no speculative features about it. There ought not to be any politics in it. What is the situation? Prior to 1912 the seals in the Pribilof Islands were killed in any way without respect to their sex or the seasons. Consequently the herd diminished to a very large extent and there was a great amount of sealskins that were put upon the market. At that time and up until last year there had been but one sealskin market in the world, and that was London. It was said in the hearings before the Foreign Affairs Committee that there were two firms, I believe, that knew the process of preparing these sealskins so that they could be utilized into fur coats and otherwise; but since the enactment of the law in 1912 that the killing of any seals in the Pribilof Islands, except for necessary use of the natives, they have obtained very few sealskins, and these now proposed to be taken off the market are the ones they have, which is a small amount. It is true that at St. Louis last year they obtained a fair price for the sealskins, 5 per cent increase over what they had received in London the year before; but the report shows that the foreign buyers were there, that the London firms had representatives there, and that those firms who knew how to prepare the sealskins paid the price for them. I submit that under the present condition of affairs in this country brought on by the European war, when the people are unable to pay a reasonable price for these luxuries, that they ought not to be placed on the market to be sacrificed. They have been in the habit in England and in foreign countries of using sealskin coats more than in this country, and it looks to me as though it would be in the interest of economy and would show on our part good common sense if the Government would withhold from the market the sale of these sealskins at this time in order that at some future time we can sell them for a reasonable and fair price and not for the purpose, as the gentlemen on that side say, to speculate and to get from the American people some fictitious and high price.

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs be discharged from further consideration of Senate joint resolution 214, a resolution identical in language with the one now pending, and that the same be considered now in lieu of the House joint resolution 391.

The SPEAKER. The gentleman from Missouri asks unanimous consent to discharge the Committee on Foreign Affairs from further consideration of Senate joint resolution 214 and substitute the same for House joint resolution 391, the two being identical. Is there objection?

Mr. MOORE. Mr. Speaker, reserving the right to object, I would like the gentleman from Missouri to state whether the resolution referred to the Committee on Foreign Affairs is also a fur-seal resolution?

Mr. ALEXANDER. It is identical with the one that we are now considering.

Mr. MOORE. Then there is something of conflict in the matter of the reference of the resolution?

Mr. ALEXANDER. The Senate resolution was referred to the Committee on Foreign Affairs. I introduced the resolution now pending, and it was referred to the Committee on the Merchant Marine and Fisheries.

Mr. MOORE. There is now a fur-seal resolution before the Committee on Ways and Means. I was wondering how we are going to keep track of these different resolutions.

Mr. FLOOD of Virginia. Mr. Speaker, it seems to me that the Committee on Foreign Affairs ought to have jurisdiction of all of this legislation, because it grows out of treaties between this country, England, and Japan. Most of the legislation has been referred to the Committee on Foreign Affairs. All important legislation recently has been reported by that committee. This resolution introduced by the gentleman from Missouri was referred to the Committee on the Merchant Marine and Fisheries, but when it came from the Senate a similar resolution, identical in language, it was referred to the Committee on Foreign Affairs.

Mr. MOORE. I should be very glad to see the question settled. I am giving the House information that the Ways and Means Committee is considering fur-seal legislation at the present time.

Mr. FLOOD of Virginia. But that is a different bill.

Mr. MOORE. Presumably upon the ground that it is a revenue measure. Here are three fur-seal bills or resolutions coming from three different committees.

Mr. FLOOD of Virginia. As I understand it, the bill before the Committee on Ways and Means has reference to transferring some sealskins from the Department of Commerce to the Department of Justice, and the reference was a mistake.

Mr. MOORE. Mr. Speaker, the Committee on Foreign Affairs surrendered its jurisdiction over this resolution, as I understand it.

Mr. FLOOD of Virginia. Yes; but not to affect its jurisdiction in the future. This is a good opportunity to get this resolution through, and the Committee on Foreign Affairs is very glad to see the gentleman from Missouri get it through.

The SPEAKER. Is there objection?

Mr. MANN. I object.

Mr. ALEXANDER. Mr. Speaker, I move the previous question on the House joint resolution.

The SPEAKER. The question is on ordering the previous question on House joint resolution 391.

The previous question was ordered.

The SPEAKER. The question now is on the engrossment and third reading of the House joint resolution.

The House joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on passing the House joint resolution.

The question was taken; and on a division (demanded by Mr. ALEXANDER) there were—ayes 46, noes 23.

So the joint resolution was passed.

On motion of Mr. ALEXANDER, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

PROVISIONAL CERTIFICATES OF REGISTRY OF VESSELS ABROAD.

Mr. ALEXANDER. Mr. Speaker, I desire to call up the bill H. R. 18686.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 18686) to provide for provisional certificates of registry of vessels abroad, and for other purposes.

Be it enacted, etc., That consular officers of the United States and the collector of customs of Manila, P. I., are hereby authorized to issue

provisional certificates of registry to vessels abroad which have been purchased by citizens of the United States, including corporations, as defined in section 4132, Revised Statutes, as amended by the Panama Canal act and the act of August 18, 1914.

(a) Such a provisional certificate shall entitle the vessel to the privileges of a vessel of the United States in trade with foreign countries or with the Philippine Islands and the islands of Guam and Tutuila until the expiration of 6 months from its date or until 10 days after the vessel's arrival at a port of the United States, whichever first happens, and no longer. On arrival at a port of the United States the vessel shall become subject to the laws relating to officers, inspection, and measurement, as amended by the act of August 18, 1914.

(b) The Secretary of Commerce shall prescribe the conditions in accordance with which such provisional certificates shall be issued and the manner in which they shall be surrendered in exchange for certificates of registry at ports of the United States.

(c) The form of such certificate shall be prescribed by the Commissioner of Navigation and shall include the name of the ship and of the master, time and place of purchase and names of purchasers, and the best particulars respecting her tonnage, build, description, and inspection or survey which the consular officer is able to obtain.

(d) Copies of such provisional certificates shall be forwarded as soon as practicable by the issuing officer to the Commissioner of Navigation.

SEC. 2. That section 4165 of the Revised Statutes and section 10 of the act of March 3, 1897, entitled "An act to amend the laws relating to navigation," are hereby repealed.

SEC. 3. That this act shall take effect 60 days after the date of its passage.

Mr. ALEXANDER. Mr. Speaker, I yield such time as he may wish to the gentleman from Virginia [Mr. SAUNDERS].

Mr. SAUNDERS. Mr. Speaker, this bill requires really but very little explanation. The purpose of the bill is stated in the title, which proclaims it to be a bill to provide for provisional certificates of registry of vessels abroad, and for certain other necessary features that attach to and concern the issue of those certificates. The precise situation which requires this legislation is this: Should an American citizen purchase a ship abroad to-day and desire to bring that ship into a port of the United States, where alone he can secure complete registry under our act of August, 1914, he would be confronted with the following situation: As soon as his vessel arrived at a port in this country, not having received theretofore and not having been able to receive theretofore, any complete registry, he would be compelled to pay certain penalties under our existing laws. These penalties once paid he would enter the port, apply for registry, secure the same, and then make application to have the penalties refunded.

As a matter of course, there is no reason why penalties should be imposed that thereafter as a matter of course would be remitted. The purpose of this bill is to allow certain consular officers abroad, upon such a state of facts as are predicated in this bill, to issue provisional certificate of registry. The American purchaser could then bring his ship home and be entitled to enter an American port. Once in this port, he could secure a complete registry. This is the entire situation, and I take it there will be no opposition whatever to the passage of this legislation. There is one amendment, however, that will be proposed on the part of the committee.

Mr. MANN. I did not hear what the gentleman said about an amendment.

Mr. SAUNDERS. I said that an amendment would be proposed on the part of the committee.

Mr. MANN. Will the gentleman yield for a question?

Mr. SAUNDERS. Certainly.

Mr. MANN. Now, the act of August last—how long does that remain in force as to the registration of vessels?

Mr. SAUNDERS. How long does the act of August remain in force with respect to the registration of vessels?

Mr. MANN. Yes.

Mr. SAUNDERS. I understand that there is no limitation in that respect.

Mr. MANN. I was under the impression that a vessel had to be registered under that act within a certain length of time.

Mr. SAUNDERS. I do not recall such a provision.

Mr. MANN. I may be incorrect about that.

Mr. ALEXANDER. There is no limitation, I will say to the gentleman from Illinois.

Mr. MANN. The limitation was merely upon the power of the President to suspend certain provisions of the navigation laws.

Mr. ALEXANDER. The President was authorized to suspend the provisions of the law in reference to captains and watch officers.

Mr. MANN. I take it that paragraph (c), where it says "the form of such certificate," that that refers to the provisional certificate and not to the certificate of registration?

Mr. SAUNDERS. Yes; that relates to the provisional certificate.

Mr. MANN. I suggest that the gentleman insert the word "provisional," because just before that it refers to the certificate of registration.

Mr. SAUNDERS. There is no reason whatever why the word "provisional" should not be inserted

Mr. MANN. So it will show it is the provisional certificate and not the regular certificate.

Mr. SAUNDERS. There is no reason why that should not be done.

Mr. MANN. And the preceding paragraph just above it refers to certificates of registration at ports of the United States.

Mr. SAUNDERS. If the gentleman from Illinois will offer his amendment there will be no objection on this side.

Mr. ALEXANDER. I will suggest that amendment, if it is agreeable to the gentleman.

Mr. MANN. The gentleman can offer it.

Mr. MARTIN. Will the gentleman yield for a question?

Mr. SAUNDERS. Yes.

Mr. MARTIN. What method is pursued now in case an American citizen buys a ship in a foreign port?

Mr. SAUNDERS. He is given certain papers, which, in effect, allow the very thing to be done that is contemplated by this statute, but the papers given are not styled a provisional certificate. This act provides for such a certificate, and makes our practice in this respect conform to the practices of other nationalities with relation to ships that seek to come in under their flags.

Mr. MARTIN. As I take it from the report, some certificates are now given by our consular officers under those circumstances?

Mr. SAUNDERS. Yes; and this certificate is intended to supersede the papers now issued, and furnish an authoritative and uniform method of procedure for the future.

Mr. ALEXANDER. I will say to the gentleman from South Dakota [Mr. MARTIN] that from the foundation of the Government if an American citizen bought a ship abroad he could go before the American consul and have a bill of sale made out and executed, and the consul would issue him a certificate to the effect that that vessel was a vessel belonging to an American citizen and it was entitled to fly the American flag, and with that certificate on board that vessel would be entitled to the protection of this Government wherever it might go. That, however, was not a certificate of registration or a provisional certificate of registration. That vessel was not permitted to come into the home port with passengers or cargo under heavy penalties; and we have another bill following this, to repeal certain other provisions of law which are a limitation upon the entry of an American-owned ship when brought into ports of the United States.

Mr. MARTIN. In case this bill in its present form should pass, would the Government here in Washington have advisory power over the certificate of the consular agent that would enable the Government to correct any mistakes or misapprehensions upon the part of the consular agent in issuing that preliminary certificate?

Mr. ALEXANDER. Oh, yes; if this bill becomes a law, of course there will be furnished specific directions and forms to be followed in every case, and he would report to the Department of Commerce and his acts would be subject to supervisory control by the department.

Mr. SAUNDERS. That is carried in paragraph (c), on page 2.

Mr. MANN. That is carried in paragraph (a), lines 5 to 8, on page 2. If it comes to the United States it becomes subject to the laws of the United States.

Mr. SAUNDERS. Paragraph (a) carries what will be the effect of the certificate. I was referring to the form in which it would be carried.

Mr. MARTIN. I think it would be covered by lines 5 to 8, on page 2, but it occurs to me that it ought to be settled without any question that the work of a consular agent is only preliminary in such a matter, inasmuch as the whole matter might be undone in a particular case by the authorities here.

Mr. SAUNDERS. That is the purpose of the bill, and I have no doubt it sufficiently carries that thought.

Mr. STAFFORD. Will my friend explain the purpose of section 2 in providing for the repeal of section 4165 of the Revised Statutes, and also section 10 of the act of March 3, 1897? I notice in the Revised Statutes before me that section 4165 provides for reregistry of an American vessel with American registry which has been captured or condemned as a result of war.

Mr. SAUNDERS. The answer to that will be found in a document which is referred to in the report, and which the chairman of the committee happens to have in his hand and will read from.

Mr. ALEXANDER. Now, section 2 of the bill provides that section 4165 of the Revised Statutes and section 10 of the act of March 3, 1897, entitled "An act to amend the laws relating to navigation" are hereby repealed.

I will read:

SEC. 10. That section 4165 of the Revised Statutes be, and is hereby, amended to read as follows:

"SEC. 4165. A vessel registered pursuant to law, which by sale has become the property of a foreigner, shall be entitled to a new register upon afterwards becoming American property, unless it has been enlarged or undergone change in build outside of the United States."

This provision was made obsolete by the act of August 18, 1914, the ship-registry act.

Now, section 2 repeals that section, because the act of August 18, 1914, known as the ship-registry act, provides that foreign-built ships may be admitted to American registry. There is no reason why an American-built ship, if it should be sold to a foreigner and should again seek admission to American registry, should be precluded by the fact that she had undergone some alterations or changes.

Mr. MANN. Will the gentleman yield further? This bill provides that the provisional certificate shall act so as to give an American status to a vessel for six months unless it sooner comes into a port of the United States. Suppose it does not come into a port of the United States at all, and a provisional certificate runs, but at the end of six months when the vessel is engaged in foreign trade under the American flag, what is there to prevent the vessel owner going to another consul and getting a new provisional certificate?

Mr. ALEXANDER. I assume that our consular agents are informed from time to time of the issuance of these provisional certificates and registries.

Mr. MANN. I think it is a violent presumption to suppose that a consular officer at some place would know all the provisional certificates that might have been issued at some other place, even if he had been informed. But suppose he knew it? The bill specifically provides that he shall grant a provisional certificate. Ought there not to be something in here that will limit the matter so that one vessel can only get one provisional certificate?

Mr. ALEXANDER. The question in the committee was whether or not if the vessel failed to enter a home port within a year the consul should have power to issue a second provisional certificate, but the committee were of the opinion that if the vessel did not return to the home port within the time the second certificate should not be issued. And reports must be made by our consuls of the issuance of these certificates immediately after they are issued, and if another consul, without knowledge of the fact that a certificate had been issued and the time had expired, should improvidently issue a second certificate, I presume the department would revoke it as soon as it had knowledge of that fact.

Mr. MANN. The bill authorizes the issuance of such a certificate. Ought not the bill to limit it to one provisional certificate to any one vessel?

Mr. ALEXANDER. My judgment is that the bill does that. The question was raised in the committee that it did, and I recall that a member of the committee suggested that express authority for the issuance of a second certificate should be provided, but that did not seem to be the judgment of the committee.

Mr. MANN. The committee did not want to give the authority to issue a second certificate, but I think the bill does give that authority.

Mr. ALEXANDER. The committee did not think so, and his notion was that it should. The committee did not concur in that view.

Mr. MARTIN. I think, if the gentleman will permit, that there can be no reasonable doubt but that the suggestion of the gentleman from Illinois [Mr. MANN] is correct. Here is general authority given to issue these consular certificates, and there is no suggestion made that but one certificate shall be issued to any one vessel; and I believe the gentleman would find on general interpretation and practice that this registration could go on indefinitely and the vessel do business under the American flag without having a complete American registry, but just having a provisional certificate. It seems to me it would be wise to make it clear in paragraph 1 of the bill that but one provisional certificate of registry can be issued to one vessel.

Mr. ALEXANDER. No such case as that has ever arisen. The law of Great Britain provides for the issuance of a provisional certificate, good for six months. Other European Governments, although I do not recall which ones, but I think France and Germany are among them, may issue provisional certificates for a period of 12 months; but no such case has ever arisen, so far as I know, where a second certificate was issued, and I do not think in the administration of the act that it could be done. And, as I said, if a consul should improvidently issue the second certificate, it would be revoked as soon as the department received notice to that effect; and it is his duty to notify the department immediately of the issuance of a certificate.

Mr. MANN. Can I ask another question? Is Manila considered a port of the United States? Suppose a foreign vessel engaged in trade in the Philippine Islands gets a provisional certificate. Does it have to come to a port of continental United States, or can it get a permanent certificate while it is remaining in trade in the Philippine Islands or in trading between the Philippine Islands and China and Japan?

Mr. ALEXANDER. Of course I would not be able to answer the question intelligently as to just what our relations with the Philippine Islands are in that regard. Guam and Tutuila have been regarded as foreign—that is, not included in our coastwise laws—but I think, generally speaking, they are ports of the United States, and the Philippine Islands are in the same relation, inasmuch as they are under the control and jurisdiction of the United States.

Mr. MANN. Well, the gentleman can readily see that a vessel engaged in the Philippine Islands or in trade between the Philippine Islands and China or Japan—a vessel of small size—might be purchased by American citizens, and they might desire to remain in that trade.

Mr. ALEXANDER. And it would result in very great inconvenience.

Mr. MANN. And they could not do so unless you issued additional certificates, unless the vessel came to a port of the United States, or unless Manila is considered as a port of the United States.

Mr. ALEXANDER. And it would result in very great inconvenience?

Mr. MANN. Yes.

Mr. ALEXANDER. Mr. Speaker, I move to amend lines 3 and 4 of page 1.

The SPEAKER. The Clerk will report the amendment offered by the gentleman from Missouri [Mr. ALEXANDER].

The Clerk read as follows:

Amendment offered by Mr. ALEXANDER:

Page 1, lines 3 and 4, strike out the words "the collector of customs, Manila, P. I." and insert in lieu thereof the words "such other persons as may from time to time be designated by the President for the purpose."

Mr. ALEXANDER. The purpose of this amendment, Mr. Speaker, is this: The attention of the Commissioner of Navigation was called to the fact that we might not have a consular agent in these different ports to whom application might be made for the issuance of this provisional certificate, and hence a broader power should be given; and hence the amendment that would provide that a "consular officer of the United States and such other persons as may from time to time be designated by the President for that purpose are hereby authorized to issue the certificate of registry." I think on the island of Guam we do not have a consular agent, but we have an executive officer there—a naval officer in charge—and it is intended to give the President the power to designate an officer where we have no consular officer.

Mr. MOORE. Mr. Speaker, I would like to speak to the amendment.

The SPEAKER. Does the gentleman from Missouri [Mr. ALEXANDER] yield to the gentleman from Pennsylvania?

Mr. MOORE. I would like to have three or four minutes.

Mr. ALEXANDER. I yield to the gentleman four minutes.

Mr. MOORE. Make it five minutes.

Mr. ALEXANDER. Very well.

The SPEAKER. The gentleman from Pennsylvania [Mr. MOORE] is recognized for five minutes.

Mr. MOORE. It is clear to me, Mr. Speaker, that this bill is not without elements of danger, giving to the consular officer, as it does, a great deal of discretion in the matter of determining the ownership of the vessel. There is much interest just now in the matter of American ownership of foreign bottoms because of the European war. The State Department has before it two or three cases at the present time. The *Dacia* case is very well known to the gentleman from Missouri.

A new case has arisen in the last two or three days which develops a possible risk in what might result from the issue by consular officers of certificates that would practically settle the question of American ownership of vessels built in foreign countries. The case that has arisen in the last few days concerns a foreign-built vessel purchased by an American oil company, and this bill contemplates the purchase of foreign vessels by "corporations" as well as by individuals.

I read from the Philadelphia Public Ledger of this morning:

Though the vessel flew the Roumanian flag, she has never engaged in the Roumanian trade, and was formerly owned by a German company, capitalized for $30,000,000 by German, Austrian, and Roumanian

financiers. She was sold to the Union Petroleum Steamship Co. for $600,000.

I quote that statement for the purpose of suggesting that if that vessel had been purchased at Manila, and the collector of the port, to whom the power is delegated here, had given a provisional certificate, he would have taken on himself a very great deal of authority with regard to the possible consequences of purchasing a ship that might involve this Nation's neutrality. The reference to this case of the ship flying the Roumanian flag, purchased by Americans, continues in this wise:

The name of the German corporation which built and owned the *Steaua Romana* is the Steaua Romana Aktien-Gesellschaft fuer Petroleum-Industrie (Steaua Romana Joint Stock Co. for the Petroleum Industry). The president is Arthur von Gwinner, a leading German financier, a member of the upper house of the Prussian Diet and a personal friend of the Kaiser.

That is the origin of the ship. I read further:

The president of the Union Petroleum Steamship Co. is A. C. Woodman, of Philadelphia, who is also vice president and treasurer of the Union Petroleum Co. Mr. Woodman said to-night that the vessel was purchased with American capital by himself and two other Americans at Bremen.

The presumption is that if Mr. Woodman's statement is correct he had a right to purchase this foreign ship, and would have had a right to receive a provisional certificate if it had been purchased at some such port as Manila or any other port where the consular officer would act. The report in regard to this matter concludes:

It has been suggested that if this steamship is to continue in trade with Germany she not only raises the question whether a former German-owned ship may transfer her flag and continue in the same trade, as in the *Dacia* case—

With which the gentleman from Missouri is familiar—

but also the question as to whether the real money interests involved in the transaction are to be considered.

Now, the gentleman may be assured that no question of neutrality is involved in the consideration of this bill, and yet it would seem that if a ship, like the one just referred to, had been purchased abroad by an individual or corporation, a petroleum company or a cotton concern, or the United States Steel Corporation, it might have obtained a certificate from a consular officer who, without being in very immediate contact with his superiors in Washington, would determine the question of the validity of the purchase or the sale.

The SPEAKER. The time of the gentleman from Pennsylvania has expired.

Mr. BUTLER rose.

Mr. ALEXANDER. Mr. Speaker, I would like to answer the question of the gentleman from Pennsylvania [Mr. MOORE] first. I wish to call attention to the fact that from the foundation of the Government certificates have been issued by our consular agents to the owners of vessels purchased by citizens of the United States; that is, foreign-built vessels.

Now, the earliest and clearest expression of this right, and of the distinction between vessels built at home and those built abroad when owned by American citizens, is found in an opinion of Thomas Jefferson, Secretary of State, May 3, 1793:

The persons and property of our citizens are entitled to the protection of our Government in all places where they may lawfully go. No laws forbid a merchant to buy, own, and use a foreign-built vessel. She is, then, his lawful property and entitled to the protection of his Nation whenever he is lawfully using her.

The laws, indeed, for the encouragement of shipbuilding, have given to home-built vessels the exclusive privilege of being registered and paying lighter duties. To this privilege, therefore, the foreign-built vessel, though owned at home, does not pretend. But the laws have not said that they withdraw their protection from the foreign-built vessel. To this protection, then, she retains her title, notwithstanding the preference given to the home-built vessel as to duties. It would be hard indeed, because the law has given one valuable right to home-built vessels, to infer that it has taken away all rights from those foreign built.

Mr. MOORE. Will the gentleman tell us at what time that statement was made?

Mr. ALEXANDER. While Mr. Jefferson was Secretary of State.

Mr. MOORE. This is a statement of Thomas Jefferson?

Mr. ALEXANDER. Yes.

Mr. MOORE. Of course the gentleman knows that there was a very wide difference of opinion as to foreign and domestic commerce between Mr. Jefferson and Alexander Hamilton and the Federalists.

Mr. ALEXANDER. We are talking about conditions as they existed, not theories.

Mr. MOORE. But foreign-built ships coming in to compete with American-built ships is a very serious condition.

Mr. KENT. Will the gentleman yield?

Mr. ALEXANDER. Let me answer the question of the gentleman from Pennsylvania first. The consular regulations affecting a foreign vessel transferred abroad to a citizen of the United States provide:

341. Right to acquire property in foreign ships: The right of citizens of the United States to acquire property in foreign ships has been held to be a natural right, independent of statutory law, and such property is as much entitled to protection by the United States as any other property of a citizen of the United States.

* * * * * * *

343. Record of bill of sale, certificate, etc.: In view of existing regulations, and to enable the owners of a vessel so situated to protect their rights, if molested or questioned by a consular officer, though forbidden by law to grant any marine document or certificate of ownership, may lawfully make record of the bill of sale in his office, authenticate its execution, and deliver to the purchaser a certificate to that effect certifying, also, that the owner is a citizen of the United States. Before granting such a certificate the consular officer will require tonnage of the vessel to be duly ascertained in pursuance of law and insert the same in the description of the vessel in his certificate. (Form No. 35.) These facts thus authenticated, if the transfer is in good faith, entitle the vessel to protection as the lawful property of a citizen of the United States; and the authentication of the bill of sale and of citizenship will be prima facie proof of such good faith.

344. Consul's responsibility: The authority of a consular officer to authenticate the transfer of a foreign vessel is wide in its effects and imposes great responsibility in making him, in the first instance at least, the sole judge of the good faith of the transaction. The question of the honesty and good faith of such a sale rises into the gravest importance in the event of a war between two or more powers in which the Government of the United States is a neutral. In such a war experience justifies the expectation that the citizens or subjects of one or more of the belligerents will seek to protect their shipping by transfer to a neutral flag. In some instances this may honestly be done, but the sales of the vessels of belligerents in appreciation of or in time of war are always and properly liable to suspicion, and they justify the strictest inquiry on the part of the belligerent, who may thereby have been defrauded of his right to capture the enemy's property. The acceptance of the pretended ownership of a vessel under these circumstances may be very profitable, and the temptation to abuse his trust in such a case to which a consular officer is subjected may be too great for persons of ordinary integrity, discernment, and firmness to withstand. Instances are not wanting in which citizens of the United States who were wholly incapable from their previous well-known condition and pursuits of making such a purchase have appeared as owners under sales of this character and have sought for them the protection of the Government.

345. Careful investigation enjoined: It is the duty of a consular officer to use all available means, especially during the existence of a war to which this Government is not a party, to satisfy himself that this sale of a vessel is made in good faith, and without a fraudulent intent. A considerable discretion and responsibility rests upon him in the determination of the good faith of such transactions. It is not to be concluded that all such sales, even in time of peace, are honest and free from collusion or fraud. It is the duty of the consular officer to notice all circumstances that throw doubt on the good faith of the transaction or point to its fictitious character, and, if he is satisfied in this respect, to refuse to grant his certificate. On the other hand, he is not permitted to regard the mere fact of the sale of a vessel to a citizen of the United States as any evidence of fraud. The presumption must be otherwise, and, in the absence of any indication of dishonesty, a sale in the regular way, with the usual business formalities, is to be regarded as made in good faith.

346. Certificate, when to be issued: When a consular officer shall have satisfied himself, after the investigation with which he is charged, that the sale of a vessel is not fictitious, and is made in good faith, and that the purchaser is a citizen of the United States, it is his duty, when requested, to record the bill of sale in the consulate, and to deliver the original to the purchaser, with his certificate annexed thereto, according to Form No. 35. A copy of the bill of sale, together with any other papers belonging to the transfer, and of the consular certificate should be sent without delay to the Department of State, with a report of the facts and circumstances of the transaction.

347. Right to fly the flag: The privilege of carrying the flag of the United States is under the regulation of Congress, and it may have been the intention of that body that it should be used only by a regularly documented vessel. No such intention, however, is found in any statute. * * *

348. Disabilities of foreign-built vessels: It should be understood that foreign-built vessels not registered, enrolled, or licensed under the laws of the United States, although wholly owned by citizens thereof, can not legally import goods, wares, or merchandise from foreign ports and are not allowed in the coasting trade. (R. S., sec. 2497, 4311.)

349. Forfeiture and tonnage dues: On arrival from a foreign port undocumented foreign-built vessels, if laden with goods, wares, or merchandise, may, with their cargoes, be subject to forfeiture. (R. S., sec. 2497. See tariff act of 1894, sec. 15.) If in ballast only, or with passengers without cargo, they will be subject to a discriminating tonnage duty. (R. S., sec. 4219; 19 Stat. L., 250.) When in foreign ports they are also subject to tonnage and other consular fees, from which regularly documented vessels are exempt. For instructions respecting the shipment and discharge and relief of seamen on vessels of this character, and the collection of extra wages, consular officers are referred to the several articles on these subjects.

Now, these consular regulations have been in force, you might say, from the beginning, but since we now admit foreign-built ships to American registry this act is intended to do no more than to issue the provisional certificate of registry until the vessel can come into the home port.

Mr. KENT. I should like to ask the gentleman a question.

Mr. ALEXANDER. I yield to the gentleman.

Mr. KENT. Does this bring up the question of the purchase of ships that may belong to belligerents?

Mr. ALEXANDER. Not at all. It does not affect that question at all.

Mr. BUTLER. What was the gentleman's question? I did not hear it.

Mr. KENT. I asked the question whether this proposition brings up the right of an American to buy a belligerent's ship and thereupon hanging the American flag on it. The gentleman said it did not.

Mr. BUTLER. Mr. Speaker, if the gentleman from Missouri will permit me, I had it in my mind to ask just such a question as the gentleman from California [Mr. KENT] has asked. I understand that when this certificate is issued the vessel will have all the privileges and security given it that an American vessel could have. Do we not run some risk in permitting all these different consular agents to issue these provisional certificates and put these ships under the American flag? Do we not run an additional risk that we should not now run? And let me ask the gentleman, why should we at this time pass a provision of this kind which adds to the dangers with which, it seems to me, we are already surrounded? Am I too apprehensive?

Mr. ALEXANDER. I think so. We are simply making the law harmonize with the act of August 18, 1914, the ship-registry act.

Mr. BUTLER. I voted against the act of last August because I was afraid it would lead us into trouble, such as we are liable to now have with the *Dacia*. This is a continuation of the effect of the law of August 18.

Mr. ALEXANDER. This is simply to make the existing law harmonize with the act of August 18, 1914. We have a companion bill to this that I will call up next. At present, even although an American citizen buys a foreign-built ship, he can not bring it into an American port except under penalties, and the companion bill to this one will remove those penalties. A request came to us from the Department of Commerce to make the law harmonize with the provisions of that act.

Mr. BUTLER. I understand that the Secretary of Commerce shall prescribe the conditions governing the purchase of these ships, and that the consuls will be expected to recognize the conditions prescribed by the Secretary of Commerce, but I doubt very much whether it is wise, in view of the dangers that confront us and are round about us, to pass this bill at present. I do not intend to minimize the worthiness of our consuls, but we do not always know what their abilities are, and this gives them the privilige of putting a foreign-built ship under the protection of the American flag, thereby increasing the risks that we already have.

Mr. ALEXANDER. Mr. Speaker, I will say to the gentleman they have had that privilege for more than a hundred years, and they could do it whether this bill is passed or not.

Mr. BUTLER. Then there is no reason why we should pass the bill?

Mr. ALEXANDER. It does not enlarge our liability in that respect at all.

Mr. KENT. Is it not a further recognition of the right to fly the American flag on a ship that may possibly cover belligerent origin?

Mr. ALEXANDER. It is; but I think we are putting this under greater safeguards.

Mr. BUTLER. If I could see it, I would cheerfully vote for the gentleman's bill.

Mr. MOORE. Mr. Speaker, will the gentleman permit me to make this statement of fact to him? There are certain German vessels now interned in the Delaware River. They have been lying there at anchor since the outbreak of hostilities. They could not be purchased by American citizens without a question of neutrality arising in this country. Are we not taking a very great risk in permitting consuls to determine the right of Americans in foreign countries to purchase under the circumstances?

Mr. ALEXANDER. I think not. These provisional certificates are not conclusive evidence of the good faith of the transfer.

Mr. MOORE. Are we not conferring upon the consul a privilege and a discretion which we do not accord to our own officers in the United States at the present time?

Mr. ALEXANDER. I think not. I think we throw further safeguards about it, in my judgment.

Mr. BUTLER. Mr. Speaker, I do not want to vote against the bill, if I can get my mind clear. I am not inquiring to get into the RECORD or to be factious. I want my mind to be at ease, because I am one of the few Members of this House, perhaps, who proposes not to vote for anything that will complicate us with a belligerent. I would rather this Government would purchase the material we are now sending abroad and store it, if by purchasing it we could save ourselves from foreign complications. The gentleman has stated in his report that our policy with reference to foreign-built ships has radically changed. Does this increase in any way the authority heretofore given to these consular agents?

Mr. ALEXANDER. It does authorize them to issue a provisional certificate of registry.

Mr. BUTLER. The gentleman says that the consul had the authority to do that heretofore?

Mr. ALEXANDER. No; he could not issue a certificate of registry heretofore.

Mr. BUTLER. I thought not, from the report; but I must have misunderstood the gentleman's statement.

Mr. ALEXANDER. The radical change in our navigation laws is this: Until the Panama Canal act was passed providing that foreign-built ships not more than 5 years old could be admitted to American registry no foreign-built ship could be admitted to American registry. The act of August 18, 1914, does no more than to remove the limitation of 5 years in the Panama Canal act, and permits foreign-built ships without reference to age to be admitted to American registry, and gives the President of the United States power to suspend the provisions of law with reference to the masters and watch officers of the vessels for certain stated periods. That is the whole of that act. But we are confronted with this condition: An American citizen may buy a foreign-built ship abroad and put it under the American flag. There is no provision made by law for the issuance of a provisional certificate of registry until he can get that vessel home, and when he gets home he is confronted by tonnage and light dues and tariff taxes, if the vessel contains a cargo, thus penalizing him if he brings that vessel into an American port. These two bills are intended to bring existing statutes in harmony with the act of August 18 in those regards.

Mr. BUTLER. Mr. Speaker, if the gentleman will permit a little further. If, then, an American citizen or an American corporation should purchase a ship in Germany or in France or in England, an American consul in one of those countries will be authorized to issue a provisional certificate which will put that ship immediately under the control and protection and safeguard of the American Nation.

Mr. ALEXANDER. Very well; and now an American citizen can buy one of those ships and go before an American consul, produce his certificate of sale, and if on investigation the consul is of opinion that the purchase is in good faith, the consul will certify to that fact and issue him a certificate, and the owner of that vessel can float the American flag, and will be under the protection of our Government.

Mr. BUTLER. Therefore it does not give the consul any greater authority than he already has had.

Mr. ALEXANDER. It does, because it goes further and authorizes him to issue a provisional certificate of registry.

Mr. BUTLER. Then the ship would have to-day, before this law is passed, just as much protection from the American Government as it would have after this bill is passed.

Mr. ALEXANDER. Simply because it belongs to a citizen of the United States, and affords that protection our Government undertakes to give to every citizen of the United States or to the property of a citizen of the United States.

Mr. BUTLER. I wish I could see the reason for the passage of this bill.

Mr. SAUNDERS. In no essential particular does it increase the protection of the individual or give him an opportunity to imperil the Government beyond the present practice.

Mr. ALEXANDER. Mr. Speaker, I ask for a vote on the amendment.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. ALEXANDER. Mr. Speaker, I move to amend, on page 2, line 14, by inserting between the words "such" and "certificate" the word "provisional."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 14, after the word "such," insert the word "provisional."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ALEXANDER. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and on a division (demanded by Mr. MOORE) there were—ayes 35, noes 6.

So the bill was passed.

On motion of Mr. ALEXANDER, a motion to reconsider the vote by which the bill was passed was laid on the table.

TO REPEAL PENALTIES ON FOREIGN-BUILT VESSELS OWNED BY AMERICANS.

Mr. ALEXANDER. Mr. Speaker, I desire to call up the bill (H. R. 18685) to repeal penalties on foreign-built vessels owned by Americans.

The SPEAKER. This bill is on the Union Calendar.

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that this bill may be considered in the House as in the Committee of the Whole House on the state of the Union.

Mr. MANN. Mr. Speaker, I object.

The SPEAKER. The House automatically resolves itself into the Committee of the Whole House on the state of the Union for the consideration of this bill, and the gentleman from Missouri [Mr. BORLAND] will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 18685, with Mr. BORLAND in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 18685, which the Clerk will report.

The Clerk read as follows:

H. R. 18685. A bill to repeal penalties on foreign-built vessels owned by Americans.

Mr. SAUNDERS. Mr. Chairman, I ask unanimous consent that the first reading of the bill may be dispensed with.

Mr. MOORE. Mr. Chairman, I object.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. SIMS having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed with amendments bills of the following titles, in which the concurrence of the House of Representatives was requested:

H. R. 19545. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain widows and dependent children of soldiers and sailors of said war; and

H. R. 20562. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain widows and dependent children of soldiers and sailors of said war.

The messafe also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 6980. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain widows and dependent relatives of such soldiers and sailors;

S. 7212. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors;

S. 7213. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain widows and dependent relatives of such soldiers and sailors;

S. 7402. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain widows and dependent relatives of such soldiers and sailors; and

S. 6981. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors.

The message also announced that the Vice President had appointed Mr. PAGE and Mr. LANE members of the joint select committee on the part of the Senate, as provided for in the act of February 16, 1889, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments" for the disposition of useless papers in the Department of Labor.

The message also announced that the Vice President had appointed Mr. PAGE and Mr. LANE members of the joint select committee on the part of the Senate, as provided for in the act of February 16, 1889, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments" for the disposition of useless papers in the Department of the Interior.

The message also announced that the Vice President had appointed Mr. PAGE and Mr. LANE members of the joint select committee on the part of the Senate, as provided for in the act of February 16, 1889, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments" for the disposition of useless papers in the Treasury Department.

The message also announced that the President had approved and signed bills of the following titles:

On January 25, 1915:

S. 4012. An act to increase the limit of cost of the United States public building at Great Junction, Colo.; and

S. 6309. An act to establish the Rocky Mountain National Park in the State of Colorado, and for other purposes.

On January 28, 1915:

S. 2337. An act to create the Coast Guard by combining therein the existing Life-Saving Service and Revenue-Cutter Service.

TO REPEAL PENALTIES ON FOREIGN-BUILT VESSELS OWNED BY AMERICANS.

The committee resumed its session.

The Clerk read as follows:

Be it enacted, etc., That so much of sections 4219 and 4225 of the Revised Statutes as imposes tonnage duties of 50 cents per ton and light money of 50 cents per ton on a vessel owned by citizens of the United States but not a vessel of the United States; so much of section 4J, subsection 1, of the act of October 3, 1913, entitled "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," as imposes a discriminating duty of 10 per cent ad valorem on all goods, wares, or merchandise imported in a vessel owned by citizens of the United States but not a vessel of the United States; and so much of section 4J, subsection 2, of the act aforesaid as provides for the forfeiture of any vessel owned by citizens of the United States but not a vessel of the United States, together with her cargo, tackle, apparel, and furniture, are hereby repealed. Any such tonnage duties, light money, or discriminating duties collected since the passage of the act of August 18, 1914, shall be refunded, and any such forfeitures incurred are hereby remitted.

SEC. 2. That this act shall take effect immediately.

Mr. SAUNDERS. Mr. Chairman, I can state the purpose of this bill very briefly, indeed in even less time than was required for the bill just passed. This bill is a companion measure to that bill, and is a corollary to the act of August, 1914.

Mr. MOORE. Will the gentleman yield?

Mr. SAUNDERS. Certainly.

Mr. MOORE. Does this repeal a provision of the so-called Underwood tariff law?

Mr. SAUNDERS. It simply repeals the imposition of certain duties that were heretofore laid on ships bought abroad, and sought to be introduced into the foreign trade under the American flag.

Mr. MOORE. But the bill proposes to repeal a section of the tariff act known as the Underwood tariff law.

Mr. SAUNDERS. What section does the gentleman refer to?

Mr. MOORE. That is the reason I objected to dispensing with the first reading, as I wanted to see what this is.

Mr. SAUNDERS. Does the gentleman refer to line 10?

Mr. MOORE. Well, there is a repealer here of a section of the act—I read it hurriedly—of subsection of the act of October 3, 1913, which I understand to be the Underwood tariff law.

Mr. SAUNDERS. The imposition of a discriminating duty of 10 per cent ad valorem.

Mr. MOORE. Yes; that is what I refer to.

Mr. SAUNDERS. Yes.

Mr. MOORE. Then the Committee on Merchant Marine and Fisheries brings in a bill to repeal the tariff law we passed, reported by the Committee on Ways and Means, which is now known as the Underwood tariff law. Is not that an unusual procedure?

Mr. SAUNDERS. Why, no. This act is a penalty-repealing act. Hence the inclusion of the repeal of the cognate penalties in the Underwood bill is perfectly proper.

Mr. MOORE. The act having come from the Committee on Ways and Means, would it not have been proper, under the procedure of the House, to have had the repealing clause referred to that committee?

Mr. SAUNDERS. No, I do not think that would be necessary. This particular repeal is cognate to the other penalty repeals.

Mr. MOORE. Well, I will be very glad to hear the gentleman.

Mr. SAUNDERS. As I said this act is really a corollary to the act of August, 1914. Our laws for many years have contained a provision imposing a 50-cent tonnage tax, and what is known as a light duty, amounting to another 50 cents a ton, the aggregate being $1 a ton. The purpose of these penalties was to make it impossible for an American ship bought abroad by American capital, to enter an American port, and participate in our foreign trade under the flag of the United States. It was hoped that the imposition of these penalties, would deter American capital from buying ships abroad and promote shipbuilding in American yards.

However the act was utterly impotent to accomplish the end contemplated, and the prohibitive cost of ships built in American yards, has made it impossible for American capital using American ships to enter the field of foreign trade. The House will recall that in August last we passed the statute under which American capitalists buying ships abroad can register the same under the American flag, and enter American ports so as to participate in the foreign trade of this country.

Since that law was enacted a great many ships heretofore flying foreign flags but owned by American capital, have registered under the same, and now fly the American flag. Hence our policy which imposed these penalties has been changed, it is altogether proper that the law imposing penalties should be repealed. It is no longer intended that these penalties should be collected. Hence the propriety of the repeal of the statute that imposes them.

Mr. MOORE. Mr. Chairman, I have not had much time to look into this matter. Personally I believe in protecting all men who build ships in this country and in giving to them the preference over foreign labor.

Mr. SAUNDERS. May I say to my friend in that connection that all that is gone now when we passed the act of August, 1914. This does not do anything more than to remove the penalties which are no longer imposed, but they hang over the vessels while on the law books and they ought to be formally put out of the way, as they are no longer operative.

Mr. MOORE. I understood that from the gentleman's statement, but I also understood that in this indirect way the Committee on Merchant Marine and Fisheries, in pursuance of its policy of rehabilitating the American merchant marine, is taking a step which is in the nature of a repealer of part of a tariff act passed by the Democratic Party in this House. Here is a tariff-law provision which our friends upon the other side propose to amend by way of the Committee on Merchant Marine and Fisheries—the 10 per cent discriminating-duty clause of the Underwood tariff law. Evidently it is to be taken down in order that the policy set up by the Committee on Merchant Marine and Fisheries may be followed out.

I said in the beginning I believe in encouraging industries in the United States. That includes the employment of American labor. Here is a provision to encourage shipbuilding in foreign countries, and to give an opportunity for the employment of labor in foreign lands to work off their surplus energy upon the people of the United States.

Now, I understand that the Committee on the Merchant Marine and Fisheries——

Mr. ALEXANDER. Will the gentleman yield?

Mr. MOORE. Yes.

Mr. ALEXANDER. I believe the gentleman voted against the immigration bill?

Mr. MOORE. I did.

Mr. ALEXANDER. I voted for it.

Mr. MOORE. And I think I was right in voting against the immigration bill. That was a question of literacy. In voting for American ships I am voting to keep out foreign conditions that would prejudice the labor that enters the United States. There is a vast difference between admitting the blood and bone and sinew that comes from a foreign country and seeks American wage conditions and admitting the product of that foreign bone and sinew that works at home under foreign conditions.

Mr. ALEXANDER. Then, if I understand the gentleman, it is not possible by a large immigration of foreigners to this country to create a congestion in the labor market and lower the price of labor, but it is possible by bringing in foreign-made goods to cheapen the price of goods at home? I think the same rule will apply in both cases.

Mr. MOORE. We will have that question up for full discussion to-morrow.

Mr. McKENZIE. Will the gentleman yield?

Mr. MOORE. Yes.

Mr. McKENZIE. I would like to ask the gentleman from Pennsylvania whether or not the regulation requiring ships registered under the American flag should be applied in America and also the regulation that they must employ Americans on those vessels have had anything to do with driving the American merchant marine from the sea? What is the cause of the decline?

Mr. MOORE. The gentleman's question may be answered by a reference to the shipyards on the Delaware River. During Republican times they have 5,000 men employed in one yard, supporting 25,000 people, and 5,000 employed in another yard, supporting another 25,000 people. Then the tariff and the Democratic merchant-marine policy proposes that we shall buy ships abroad, ships made by labor under foreign conditions and which receives one-quarter or one-half the price paid to the wage earners on the Delaware. The result is evident. I am for maintaining workmen in America at the American standard of wages, and while I have an interest in the general welfare of mankind, I do not believe that the United States is yet capable of alleviating all the distress that prevails in every country.

The gentleman from Missouri [Mr. ALEXANDER], who a moment or two ago questioned me upon the matter of immigration, has just pressed through the House a bill which proposes to enlarge the opportunity of speculative Americans and owners of yachts to buy the product of cheap labor, without special conditions and without regard to the welfare of the labor of the United States. Large corporations—not the individual American citizens referred to in the bill, but large corporations mentioned in the bill, and men some of whom are now organizing companies for the purpose of profiting upon the wretchedness and necessities of the people abroad, may buy foreign ships cheap and at the foreign labor price. The bill allows that, and at the instance of the consular officers the American flag may be placed over them, irrespective of American workmen or the risk of violating our neutrality with foreign nations. They can engage in trade between other countries and with us at the expense of the working people of the United States and American citizens in general.

While some of our own Members are in doubt upon this question, I plead for a restoration of the American merchant marine upon the basis of the employment of American talent and skill in drafting the plans and the employment of American mechanics and laborers in fabricating and constructing the materials. At the present time it would aid in obtaining a happy and free circulation of money in the United States for the benefit of our own people, who, being involved in no war, are being afflicted by a Democratic tariff law, which it is now proposed by this subterfuge to in part repeal. Due to this law, there is now a lack of employment that leads to distress and poverty, wretchedness and suicide, in all the large cities of this land. Go upon the banks of the Delaware, go into all the large cities to-day, and witness the results of the Democratic tariff law put into effect October 3, 1913. Time and again we have suggested the repeal of certain sections of this law, knowing the wretchedness it would bring upon the great masses of the working people. Time and again it has been suggested that there might be some remedy; but our friends upon the other side have stood like adamant—greater "standpatters" than any former Republicans whom they denounced—insistent upon the maintenance of their policies and blinded to the consequences.

Mr. ALEXANDER. Will the gentleman yield?

Mr. MOORE. Yes.

Mr. ALEXANDER. I was the author of the provision in the Panama Canal act permitting foreign-built ships with American registry to enter into foreign trade. That bill was passed under a former administration and signed by President Taft, then President of the United States. The act of August, 1914, was passed in this House under suspension of the rules, and this legislation was proposed by the United States Chamber of Commerce and a few Representatives from the State of New York. On the 5th of January I was in Boston and discussed the ship-purchase bill before the Boston Chamber of Commerce, and my distinguished friend and former colleague in this House, Mr. J. Sloat Fassett, was present. I believe he is regarded as a high priest of protection, and has been in favor of ship subsidy. And in his address there he gave his express approval to the purchase of foreign-built ships and their admission to American registry for the foreign trade. So that the gentleman from Pennsylvania, I am afraid, is in a class by himself on this question.

Mr. MOORE. The gentleman from Missouri is an excellent lawyer. We all recognize his ability in the determination of intricate legal questions that come before him, but the gentleman from Missouri has not yet learned the lesson of the factory, the mill, and the workshop.

Mr. ALEXANDER. Will the gentleman yield just there?

Mr. MOORE. Yes.

Mr. ALEXANDER. I have been told by representatives of Cramps, and of the New York Shipbuilding Co., and the Newport News Co. that they have more work on hand at this juncture than they have had for a number of years past—not only battleships but commercial ships. The yards are full.

Mr. HUMPHREY of Washington. Mr. Chairman, will the gentleman yield?

Mr. MOORE. Does the gentleman know that I have a protest from Cramps in my possession now against the passage of much of this legislation that the gentleman is bringing into the House? And I have many others.

Mr. ALEXANDER. Oh, I think the gentleman may have a protest against a certain bill, but not——

Mr. MOORE. I have many protests——

Mr. ALEXANDER. But not against this.

Mr. HUMPHREY of Washington. Mr. Chairman, will the gentleman yield?

Mr. MOORE. Yes; I yield.

The CHAIRMAN. The gentleman from Washington is recognized.

Mr. HUMPHREY of Washington. I want to say that I am somewhat surprised at the statements made by the gentleman from Missouri about the Newport News shipbuilding yard. I happened to be down there last week, and I did not find——

Mr. ALEXANDER. I was not down there, but I had a statement last week concerning the company.

Mr. HUMPHREY of Washington. I was also down there last week.

Mr. ALEXANDER. I asked the gentleman who gave me information about that company if the ship-purchase bill should pass and the Government should want to contract with the Newport News Shipbuilding Co. to build ships for the foreign trade what would be the probable cost per ton. I reminded him of the fact that the cost abroad had increased from 30 to 35 per cent since the war began in Europe, according to my information, and I wanted to know if they could build ships at 860 per ton. That would be $25 per ton in excess of the normal price of a tramp ship in Europe. He said, "We could not now, because we have plenty of work."

Mr. HUMPHREY of Washington. Well, if the gentleman will yield just a moment——

Mr. MOORE. Certainly.

Mr. ALEXANDER. I do not know. The gentleman is always contending for calamity.

Mr. HUMPHREY of Washington. The gentleman always has reason for fearing calamity when there is a Democratic administration. [Applause on the Republican side.]

Mr. ALEXANDER. No; the gentleman is a calamity howler. I have been an optimist all my life, and I hope I shall never become a calamity howler.

Mr. MANN. But the gentleman from Missouri is a calamity producer. [Laughter on the Republican side.]

Mr. ALEXANDER. Oh, no. People who indulge in calamity howling always get the worst of it. But that is apart from the merits of this bill.

Mr. MOORE. Mr. Chairman, I know how earnest the gentleman from Missouri [Mr. ALEXANDER] is, and I think I am not mistaken in paying him this tribute: That no committee chairman of his party has done more, since the blight of Democracy overcame this country, to formulate plans to help his party establish something in the nature of a policy. He has been able and alert, but he has been mistaken. He has traveled over this country and he has gone to Europe; he has informed himself widely and largely on questions that pertain to this committee. But he does not have behind him the sentiments of the men, either in business or in the workshops, who work for a living in the United States when he encourages American citizens whose money originates in the United States to send it out of the United States into foreign countries to buy the products of foreign labor, to come back and compete with the labor of the United States. That is the vital mistake the gentleman is making.

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield right at that point?

Mr. MOORE. Yes.

Mr. ALEXANDER. I do not care to prolong this discussion, but I want to puncture an error right there. Prior to the enactment of the Panama Canal law providing for the admission of foreign-built ships to American registry, and the amended act of August, 1914, we were not building any ships for the foreign trade. This is a fact. We were not building ships for the foreign trade, and hence by the admission of foreign-built ships to American registry we have not prejudiced American trade. I have not committed myself to the admission of foreign-built ships to the coastwise trade. We are talking about the foreign trade.

Mr. MOORE. Yes; and the gentleman a moment ago referred to the Panama Canal, and referred to one or two acts of Congress that bore upon this with a view to answering what I said as to the protection of our labor. The Panama Canal was opened as the result of Republican activity. It was to be free to the people of the United States who were struggling under the burden of heavy transportation rates. It was to have been an entering wedge from the East to the West for the commerce of the people of the United States. It was also to have been our medium of encouraging the trade of the world. The Democratic platform at Baltimore, the platform on which the present President of the United States was elected, provided that this understanding of the Republican Party should be lived up to and fulfilled, and that there should be no tolls charged to the vessels of the United States of the coastwise trade passing through the Panama Canal. It was not the gentleman's committee that brought in the bill to put on the tolls that we proposed to keep off, but it was the gentleman's party that brought in the bill, and the gentleman supported that bill, which prevented the people of the United States on the east coast from passing freely through their own canal to do business with the people of the west coast. Likewise it prevented the people of the western coast from passing freely through their own canal to do business with the people on the eastern coast and the interior. It was the Democratic Party, in violation of its own platform, that raised the barriers and erected a tariff wall against the people; barriers not against a foreign power, not against the other countries of the world, but barriers against American citizens who had built the canal and paid for it with their own money. The expenses incident to the construction of that canal were a draft upon the pockets of our business men and taxpayers generally throughout the United States. They were also a charge upon the wages of men who worked in the shops. They had to pay that bill, and they expected to obtain more labor and more business in consequence of the expenditure. This you denied them. They expected, moreover, a reduction of freight rates and in the cost of living. But they were deceived. The boon was denied to them by the gentleman's own party. The gentleman's citation of the Panama Canal act in this connection is therefore unfortunate.

But what I was referring to in relation to this bill was the tendency, by virtue of the activity of the Committee on the Merchant Marine and Fisheries, to encourage everybody on the other side of the water to do business for us, to labor for us, and to discourage us from doing anything for them or for ourselves. To-day we are seeking foreign materials to go into the very ships that are built in our shipyards. To-day even our Government itself, under the new policy of Government ownership that has been entered upon during this Democratic administration, proposes to utilize this cheap labor of Europe, not here, where it may attain the American standard, but at its home in Europe. It would beat down the prices and the wages of the men who produce in this country. Here mills are closed and workmen are upon the streets. Only yesterday up in Phoenixville a man, brought to the verge of starvation, carrying the few shirts that he and his wife were undertaking to make to obtain bread for their children, fell dead because he had not the sustenance of life. Over yonder in the Kensington mill district in my own city, right close by these shipyards which you would depopulate by this foreign-ship policy, and for which you are apologizing by the repeal of a part of this 10 per cent discriminating clause of the Underwood tariff law, one poor woman, who has dedicated her life to the welfare of the unfortunate, has taken to her bed because of scenes of poverty and distress which she and her companions have not the power to alleviate. There is no work in many of the American workshops and no work in some of the American shipyards, except for the manufacture of Government vessels or the manufacture of munitions of war for unfortunate people to slaughter each other in other lands. Oh, the temporary prosperity of which the gentleman from Missouri [Mr. ALEXANDER] speaks, whether it be in the shipyards or elsewhere, is the prosperity that arises from the misfortunes of the conflicting nations of Europe. A man says, "Yes; my mill is running full; running day and night."

"What are you making in your mill?"

"I am making bandages for the wounded in the armies of Europe."

Great Scott! are we boasting of this kind of prosperity? Are we proud of the fact that a mill is running somewhere to make bandages for the men who are shooting bullets into one another?

Another man says, "Over yonder at Baltimore I am running full, and the lights are burning until the early hours of the morning."

"What are you doing?"

"I am making canvas tents for Mexico or the armies on the other side of the water."

A glorious prospect this is for America. Up in Massachusetts some one tells us, "Yes; we are busy. Over in Haverhill we have a mill running all the time, three shifts a day."

"What are you making?"

"Shoes for the armies."

Mr. GARDNER. Will the gentleman yield?

Mr. MOORE. I yield to the gentleman. I knew I would get a rise from the gentleman on this subject.

Mr. GARDNER. Haverhill is in my district, and I have not heard of any such thing there.

Mr. MOORE. Of course not; I transfer the illustration to Lowell or some other shoe town.

Mr. HUMPHREY of Washington. I received a letter yesterday from a gentleman who had been investigating the conditions of the various industries in Massachusetts, and he told me there were 500,000 idle men in that State now.

Mr. MOORE. Does the gentleman from Massachusetts [Mr. GARDNER] rise to that statement?

Mr. GARDNER. I have about 1,000 letters from constituents wanting me to help them to get jobs.

Mr. MOORE. Do you think you can get your constituents jobs in the foreign shipyards that are building the ships that American speculators are purchasing for the purpose of carrying munitions of war? Of course not. If the gentleman answers, he would answer in the negative.

Mr. TREADWAY. Does it appear that this prosperity in Massachusetts is shown by the fact that special bills have been put through our legislature at the request of the Democratic governor within the last few days, whereby money can be appropriated out of the public treasury in order to put the unemployed at work?

Mr. MOORE. I understand that to be the fact. It is greatly to the credit of Gov. Walsh, the Democratic governor of Massachusetts, that he has taken this timely step; and I think it is very creditable to that former Member of this House, who is now mayor of Boston, Mr. Curley, that for six months before the outbreak of European hostilities he was formulating societies, he was applying to the municipal body, he was urging the citizens to raise funds to help the men who were knocking at factory doors for work, and who are actually threatened with starvation in the patriotic old town of Boston. These efforts have not been confined to Republicans. Democrats in authority have some heart, and the Democrats in national authority to-day apparently have just enough heart to yield a little bit from the standpatism that has held them in leash on their Underwood tariff bill, which the Merchant Marine and Fisheries Committee comes in to adjust with respect to the 10 per cent discriminating clause.

Mr. ALEXANDER. Will the gentleman yield?

Mr. MOORE. I yield.

Mr. ALEXANDER. There are a number of other bills reported from the committee, in which Members of the House, including the Members from Massachusetts, are interested. Can we not reach a limit to the general debate, in order that we may then consider this bill under the five-minute rule?

Mr. MOORE. I will be very frank with the gentleman. I entered upon this discourse because of the evident desire of the chairman to press these bills through to-day. If the gentleman will recall, the gentleman from Virginia started to debate this bill before it was read. I do not know whether he intended it or not. There was no opportunity on this side of the House to read the bill. And there was very little discussion of the other bill relating to consular certificates. The time was yielded only by the courtesy of the gentleman from Missouri.

Mr. ALEXANDER. I yielded all the time that anybody wanted.

Mr. MOORE. I say it was yielded wholly by the courtesy of the gentleman from Missouri.

Mr. ALEXANDER. Another gentleman has indicated a wish to speak 10 or 15 minutes. I think this discussion ought to be limited to a reasonable length.

Mr. MOORE. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has 28 minutes remaining.

Mr. MOORE. Would it be satisfactory to the gentleman from Missouri [Mr. ALEXANDER] and facilitate his business if I yield now 20 minutes to the gentleman from Washington [Mr. HUMPHREY]?

Mr. ALEXANDER. Mr. Chairman, I ask unanimous consent that general debate on this bill be concluded in 30 minutes.

Mr. MANN. Mr. Chairman, reserving the right to object, what is the next bill the gentleman proposes to call up?

Mr. ALEXANDER. It is the appointment of additional inspectors, H. R. 20282. The next bill after that will be the one providing for the appointment of assistant steamboat inspectors.

Mr. GARDNER. Which one is the gentleman going to call up first?

Mr. ALEXANDER. H. R. 20282. We have one supervising inspector on the Pacific coast now, and they claim they ought to have more. Of course, we have some fish-hatchery bills, but I do not know whether we will get to them or not. The longer this debate continues the less the hope.

Mr. MOORE. Mr. Chairman, I want to assure the gentleman from Missouri that I regard this as a very important bill, as I regarded the bill just passed. It seemed to me something ought to be said upon it. Some gentlemen are now ready to discuss it, and while I desire to retain my time——

Mr. ALEXANDER. Then, Mr. Chairman, I ask unanimous consent that debate on this bill close in 30 minutes, if that is agreeable to the gentleman from Pennsylvania.

Mr. MANN. How much time has the gentleman from Pennsylvania?

Mr. MOORE. Twenty-eight minutes.

Mr. ALEXANDER. And of course 20 minutes of that time, if he cares to, he can yield now to the gentleman from Washington.

Mr. MANN. Does the gentleman from Missouri desire some time?

Mr. ALEXANDER. I would like to have six or seven minutes.

Mr. MANN. The gentleman could get that very easily under the five-minute rule.

Mr. ALEXANDER. Yes.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that general debate on this bill close in 30 minutes. Is there objection?

There was no objection.

Mr. MOORE. Mr. Chairman, I yield 20 minutes to the gentleman from Washington [Mr. HUMPHREY].

Mr. HUMPHREY of Washington. Mr. Chairman, I doubt if I shall occupy the 20 minutes, but inasmuch as this is the first attempt that has been made to amend the Underwood tariff law, so far as I know, I think that it is an opportune time to submit a few remarks in regard to the effect of that tariff law as it affects my country locally. It so happens that I have here in my hand a dispatch received this morning from the president of the largest lime manufactory in my State. Several weeks ago, perhaps something like three months ago, the Department of Commerce sent a man to Washington to investigate the condition of the lime industry. That report has been on file here in Washington City for several weeks. No one knows what the report was or what action the department is going to take upon it. Mr. McMillan says in this dispatch:

What hope on lime? Conditions serious here.

When I was home at the last election Mr. McMillan and other gentlemen who were interested in the lime industry came to see me and pointed out conditions that exist there to-day. In order to send a barrel of lime over into British Columbia the American manufacturer must pay 19 cents per barrel. The British Columbia manufacturer in order to send his lime into the United States pays 3 cents per barrel. The natural conditions in the two countries are practically the same. All of the labor employed in British Columbia in the lime industry is Chinese, every bit of it. All of the labor employed in the United States in the lime industry is American.

As I stated upon the floor of this House a short time ago, a large lime plant was started over on Vancouver Island. The representatives of that industry came to the American manufacturers and said, "Unless you pay us a tribute of so much a barrel, we will go into the American market and destroy it and drive you out of business." The American manufacturer refused to be blackmailed. The British Columbia manufacturers have kept their word. The American manufacturers are here now appealing to Congress and to the department, asking for relief. You can come in here with a bill to give relief to foreign ships or any other American industry, but you must not attempt to relieve the lime industry. Another rather striking coincidence. Not over two hours ago one of the leading Democrats in the State of Washington—Mr. E. F. Blaine—called me up over the telephone and wanted to know if it were possible to get the Underwood tariff law amended in regard to fish—I hope I may have for a moment the attention of the distinguished gentleman from Alabama [Mr. UNDERWOOD], whom I see in the Chamber. This leading Democrat from Seattle, Mr. E. F. Blaine, stated to me that unless they could get the tariff changed in regard to fish, the fish industry of the Pacific coast was threatened with destruction, and he asked me what I thought the chances were. I said, "None." I said, "You may just as well ask a Democrat to turn over the Capitol Building as to ask him to amend the Underwood tariff law."

Mr. Chairman, Mr. Blaine said that the Canadian Government pays one-third of the express rates upon fresh fish caught by their fishermen and sent into the markets of the United States. I said that I was aware of that fact, and he said also that the Government of Canada had established great cold-storge plants at Prince Rupert, costing many millions of dollars, where are stored the catch of the fishermen of Canada until it can be shipped. I said I knew that that was true. I presented all of those facts to the Ways and Means Committee. I told them that free fish meant the destruction of the fishing industry.

The only reply I received was that our people would get cheaper fish, a fact that is not true. The price of fish has not been reduced, the Government is losing revenue, and the fishing industry of the Pacific coast is upon the verge of destruction. Will the Democratic Party do anything to relieve it? Certainly not. They will repeal the provision of that law that relates to duties on goods carried in American bottoms, at the request of foreign shipping interests, but they will not do anything to relieve the tariff situation of the people of that country. The same condition exists with regard to shingles as to lime and fish.

I want just for a moment to pay some attention to this particular provision in the bill. I understand that the argument is made that they want to repeal this provision because it is in conflict with the treaties that we have with the various nations of the world. That argument was made when it was offered upon the floor of the House, but what effect did it have? Gentlemen on that side of the House were absolutely certain they knew all about it, and they would not even listen to arguments. The real reason why they want to repeal this law is not because it is in conflict with the treaties, but because it is an absolute absurdity. There never was a more ridiculous, absurd proposition argued before the American people than this one written into the tariff law.

When it was under consideration I called the attention of the gentleman from Alabama to the fact that it was ridiculous, that it was absurd, that it would not produce revenue enough to run canoes between here and South America. But what was the use of arguing? It is no use to argue with the Democratic Party upon any proposition in regard to this merchant-marine legislation as long as they are wrong, and they have always been wrong upon it. And here, now, we have the admission of it when they come in and ask that this last proposition of theirs be repealed.

Now, my distinguished friend from Missouri, Judge ALEXANDER, has referred to the provisions of the Panama Canal act admitting foreign vessels to register. I voted for that. I did it, and I said so at the time, because it would demonstrate it was of no value whatever. It passed, and not a single, solitary vessel has ever come under the American flag as a result of it. That was the end of our free-ship argument.

Mr. ALEXANDER. If the gentleman will permit, I think the gentleman's statement is too broad. Under the amended act, which removed the five-year limitation, a hundred and forty-odd vessels have been admitted to American register, which represents a tonnage of 450,000 tons, so it has not been a failure.

Mr. HUMPHREY of Washington. Oh, yes, it has been a failure, a complete failure. I was just going to refer to what the gentleman mentions. Then the next act that we passed was this act to which the gentleman from Missouri referred, admitting foreign ships to American register as an emergency matter. I think I have a list of those ships in my possession, and if the gentleman desires I will put them in the RECORD.

Mr. ALEXANDER. I have no objection.

Mr. HUMPHREY of Washington. But practically every one of those vessels belongs to the Steel Trust, the Standard Oil Co., or the United Fruit Co.

Mr. MOORE. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. MOORE. Can the gentleman tell us anything about the Government insurance company that was to take care of the cargoes of those vessels?

Mr. HUMPHREY of Washington. No; I do not know.

Mr. MOORE. Does the gentleman know whose cargoes have been insured up to date?

Mr. HUMPHREY of Washington. No; but you take these vessels that our Democratic friends boast of, the 140 ships that came in under the flag as a result of emergency legislation, not a single additional ton of American freight has been carried on that account; not one. Not a single additional voyage has been made from any American port to a foreign port; not one. These vessels are simply running in the same trade they ran before. You take the United Fruit Co.'s vessels. They run from the same ports, and they are carrying the same cargo. It has not in any way benefited our commerce. It has benefited the United Fruit Co., because they were afraid that if they went upon the high seas under the British flag they might run across a German war vessel. It has benefited these great companies and trusts that the Democratic Party has denounced so vigorously, but it has not benefited anyone else. Then, I want to ask my distinguished friend from Missouri—for he is my friend, and I know I am his—if he wants to repeal this law because it is in violation of treaties, what is he going to do with the seamen's bill? That law went through here, and it was pointed out that that bill violated every treaty upon our statute books; but you could not then get it really discussed. It went through with only half a dozen votes against it.

Now, we not only violated every treaty, but we told every other nation of the world how they shall run their merchant marine. Having made a dismal failure of our own, we now set ourselves up as a teacher of all the other nations of the world and tell them what to do. I am glad of one thing, that after having been denounced and attacked by distinguished gentlemen upon that side of the House because I opposed the so-called seamen's bill, which would not benefit any American seaman, that having been denounced by them for several years because of my attitude upon that bill, at last I have had a very distinguished recruit to join me. It is my understanding now, if you can believe the statements in the newspapers, that the President of the United States has placed himself on record as against the seamen's bill. Now, if you are coming in here and asking us to repeal laws because they are in violation of the treaties, what are you going to do with the seamen's bill when it comes back from conference, which not only violates all of our treaties but imposes conditions upon all other nations, to which I have called the attention of this House before. It tells the foreign nations that send their ships into our ports how they shall pay their crews, how old their sailors shall be, what their qualifications must be, what language they must speak, and it holds out a specific inducement for them to desert, and it compels the foreign ship to pay them half their wages in order that they may desert. Under the conditions imposed by that bill, that if there is ever an attempt to enforce them, then I make this prediction now, and I say it measuring my words as I go, that if we enact that seamen's bill and attempt to enforce it that we will have war on the Pacific in less than 90 days after we attempt it. Yet with all these facts before us, no man on that side of the House stood up and talked about violation of treaties. What is the reason? You become greatly excited now over the violation of a provision in statutes that amount to nothing; you come in here and ask that it be repealed; and yet when a bill goes through this House that no one denies violates every treaty upon our statute books and is filled with danger to the country, I failed to hear a single voice on that side of the Chamber raised in protest, and I doubt if any protest will be made when it returns to us again, if it ever does.

I do not care to consume any more of my time.

Mr. MOORE. Mr. Chairman, I yield back the balance of my time.

The Clerk read as follows:

Be it enacted, etc., That so much of sections 4219 and 4225 of the Revised Statutes as imposes tonnage duties of 50 cents per ton and light money of 50 cents per ton on a vessel owned by citizens of the United States but not a vessel of the United States; so much of section 4 J, subsection 1, of the act of October 3, 1913, entitled "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," as imposes a discriminating duty of 10 per cent ad valorem on all goods, wares, or merchandise imported in a vessel owned by citizens of the United States but not a vessel of the United States; and so much of section 4 J, subsection 2, of the act aforesaid as provides for the forfeiture of any vessel owned by citizens of the United States but not a vessel of the United States, together with her cargo, tackle, apparel, and furniture, are hereby repealed. Any such tonnage duties, light money, or discriminating duties collected since the passage of the act of August 18, 1914, shall be refunded, and any such forfeitures incurred are hereby remitted.

Mr. ALEXANDER. Mr. Chairman, I move to strike out the last word just to make an explanation. I had a copy of the hearings here, but some one has carried it off——

Mr. MANN. I have a copy of the hearings if the gentleman desires it.

Mr. ALEXANDER (continuing). Which would be of service to me in making the explanation, which I handed to Mr. UNDERWOOD, and I think he carried it off.

Mr. MANN. I will loan the gentleman my copy.

Mr. ALEXANDER. The provisions of existing law which this bill undertakes to repeal have been on the statute books for a great many years—I would not undertake to say how long. Part of them have been a part of each tariff bill and are in the Underwood tariff law; that is, not all, but in part, so far as the duties are concerned.

It should be understood that foreign-built vessels not registered, enrolled, or licensed under the laws of the United States, although wholly owned by citizens thereof, can not legally import goods, wares, or merchandise from foreign ports, and are not allowed in the coasting trade.

That is a provision of the Revised Statutes, sections 2497 and 4311.

Another provision is to this effect:

On arrival from a foreign port undocumented foreign-built vessels, if laden with goods, wares, or merchandise, may, with their cargoes, be subject to a forfeiture.

That is section 2497 of the Revised Statutes, to which I have referred.

If in ballast only, or with passengers without cargo, they will be subject to a discriminating tonnage duty.

That is section 4219 of the Revised Statutes (19 Stat. L., 250).

When in foreign ports they are also subject to tonnage and other consular fees, from which regularly documented vessels are exempt.

Now, the tariff law, Schedule J, subsection 2, provides:

That no goods, wares, or merchandise, unless in cases provided for by treaty, shall be imported into the United States from any foreign port or place, except in vessels of the United States, or in such foreign vessels as truly and wholly belong to the citizens or subjects of that country of which the goods are the growth, production, or manufacture, or from which such goods, wares, or merchandise can only be, or most usually are, first shipped for transportation. All goods, wares, or merchandise imported contrary to this section, and the vessel wherein the same shall be imported, together with her cargo, tackle, apparel, and furniture, shall be forfeited to the United States; and such goods, wares, or merchandise, ship or vessel, and cargo shall be liable to be seized, prosecuted, and condemned in like manner, and under the same regulations, restrictions, and provisions as have been heretofore established for the recovery, collection, distribution, and remission of forfeitures to the United States by the several revenue laws.

Now, after the passage of the Panama Canal act and the act of August 18, 1914, we had this anomalous condition. While the law provides that an American citizen may purchase a foreign-built ship, he may not bring it into an American port except under the penalties provided by the laws which we seek to repeal here and to which I have called attention.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ALEXANDER. Mr. Chairman, I ask unanimous consent for three minutes additional.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent for three minutes more. Is there objection? [After a pause.] The Chair hears none.

Mr. ALEXANDER. Now, the law gives the Secretary of Commerce power to remit these penalties; and, of course, we seek simply to repeal the provisions of law which impose them rather than put him to the duty of remitting the penalties. That is all there is to it.

Mr. MANN. Mr. Chairman, I wanted to ask the gentleman a question, if I might, in reference to section 4219 of the Revised Statutes. I notice that that is quoted in the hearings before the committee. Does the gentleman know whether that section has been amended in recent years?

Mr. ALEXANDER. I will tell the gentleman in a moment.

Mr. MANN. Because it is not correctly quoted in the hearings as it appears in the Revised Statutes. It leaves out a very material part of the section. I do not know whether that has been stricken out by an amendment of that section of the Revised Statutes or not, although with some examination I was not able to find that there had been an amendment.

Mr. ALEXANDER. It is not correctly quoted in the hearings. I have the section before me here.

Mr. MANN. Do you say it is not correctly quoted?

Mr. ALEXANDER. It is my impression it is not.

Mr. MANN. This provision as printed in the Revised Statutes is not in the section as quoted in the hearings:

In addition to the tonnage duty above imposed there shall be paid a tax at the rate of 30 cents a ton on vessels which shall be entered at any customhouse within the United States from any foreign port or place.

I do not know whether that provision is still in force or whether, if it be still in force, this act would affect it; and I am afraid the committee does not.

Now, one of the provisions of this bill also is to repeal so much of section 4225 of the Revised Statutes as imposes 50 cents a ton light money on vessels owned by citizens of the United States, but not a vessel of the United States. Section 4225, which it is proposed to repeal in that respect, provides:

A duty of 50 cents per ton, to be denominated "light money," shall be levied and collected on all vessels not of the United States, which may enter the ports of the United States—

And so forth. And the next section of the Revised Statutes provides:

The preceding section shall not be deemed to operate upon unregistered vessels, owned by citizens of the United States, and carrying a sea letter, or other regular document, issued from a customhouse of the United States, proving the vessel to be American property. Upon the entry of every such vessel from any foreign port, if the same shall be at the port at which the owner or any of the part owners reside, such owner or part owners shall make oath that the sea letter or other regular document possessed by such vessel contains the name or names of all the persons who are then the owners of the vessel; or if any part of such vessel has been sold or transferred since the date of such sea letter or document, that such is the case, and that no foreign subject or citizen has, to the best of his knowledge and belief, any share, by way of trust, confidence, or otherwise, in such vessel.

Now, that clearly excludes from the payment of light money the vessel built in a foreign country which has been purchased by American citizens and which has obtained one of these consular certificates, or provisional certificates. I can not see the necessity of repealing that provision, because it is inoperative, notwithstanding the statement made by Mr. Chamberlain to your committee.

Mr. ALEXANDER. The bill provides that only so much of the statutes shall be repealed as shall impose a light duty on these foreign-built ships. But it may be that the gentleman's construction is right; but that is the view the department takes of it, and that is the view Mr. Chamberlain expressed to the committee.

Mr. MANN. Well, if this section of the Revised Statutes is incorrectly furnished to the committee—and I do not say that it is, although it is different from the print of it in the Revised Statutes and in the hearings—no insinuation was made by Mr. Chamberlain that it had been amended, what I wanted to inquire was whether we would have to pay the 30 cents a ton on the foreign vessels built or whether they would escape that, while American vessels coming from a foreign port would still have to pay it. I am not sure that Mr. Chamberlain knew.

Mr. ALEXANDER. I do not think an American vessel would have to pay. A foreign vessel might, belonging to a nation that we had no treaty with, but we have treaties with the maritime nations.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 2. That this act shall take effect immediately.

Mr. ALEXANDER. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the recommendation that it pass.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. BORLAND, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill (H. R. 18685) to repeal penalties on foreign-built vessels owned by Americans, had directed him to report the same back to the House with the recommendation that it do pass.

Mr. ALEXANDER. Mr. Speaker, I move the previous question on the bill to final passage.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ALEXANDER, a motion to reconsider the vote whereby the bill was passed was laid on the table.

ADDITIONAL SUPERVISING INSPECTORS, STEAMBOAT-INSPECTION SERVICE.

Mr. ALEXANDER. Mr. Speaker, I desire to call up the bill H. R. 20282.

The SPEAKER. The Clerk will report it.

The Clerk read the title of the bill, as follows:

A bill (H. R. 20282) to provide for the appointment of 11 supervising inspectors, Steamboat-Inspection Service, in lieu of 10.

Mr. MANN. Mr. Speaker, this bill is on the Union Calendar.

The SPEAKER. Yes; this bill is on the Union Calendar.

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

Mr. MANN. I will object to that. The House automatically goes into Committee of the Whole House on the state of the Union.

The SPEAKER. Yes. The House automatically goes into Committee of the Whole House on the state of the Union, and the gentleman from Missouri [Mr. LLOYD] will please take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 20282, with Mr. LLOYD in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 20282, which the Clerk will report.

The Clerk read as follows:

Be it enacted, etc., That section 4404, Revised Statutes of the United States, be, and the same is hereby, amended so as to read as follows:

"SEC. 4404. There shall be 11 supervising inspectors, who shall be appointed by the President, by and with the advice and consent of the Senate. Each of them shall be selected for his knowledge, skill, and practical experience in the uses of steam for navigation, and shall be a competent judge of the character and qualities of steam vessels and of all parts of the machinery employed in steaming. Each supervising inspector shall be entitled to a salary of $3,000 a year, and his actual and reasonable traveling expenses incurred in the performance of his duties, together with his actual and reasonable expenses for transportation of instruments, which shall be certified and sworn to under such instructions as shall be given by the Secretary of Commerce."

SEC. 2. That section 4405, Revised Statutes of the United States, be, and the same is hereby, amended by striking out the following words: "The supervising inspector of the district embracing the Pacific coast shall not be under obligation to attend the meetings of the board oftener than once in two years; but when he does not attend such meeting he shall make his communications thereto, in the way of a report, in such manner as the board shall prescribe."

Mr. ALEXANDER. Mr. Chairman, this bill provides for the employment of an additional supervising inspector in the Steamboat-Inspection Service. We now have 10. We now have a Supervising Inspector General, 10 supervising inspectors, boards of supervising inspectors, boards of local inspectors, and then assistant inspectors.

Mr. Hoover, of the Steamboat-Inspection Service, who appeared before the committee, stated that the reason they asked for this legislation is that they do not now believe that one supervising inspector can properly supervise a district as large as the first district. That is the district on the Pacific coast. The first district consists of the local inspection districts of San Francisco, Los Angeles, Portland, Seattle, Juneau, St. Michael, and Honolulu.

Now, the approximate coast line from California to Nome is about 3,000 miles, and, in addition, there is the Yukon River, of 800 miles, or a total of 3,800 miles. It is the first district. Honolulu is approximately 2,000 miles from San Francisco. For that one district, which had in the last fiscal year a total of 1,166 steamers inspected, with a tonnage of 1,896,000 tons, they had one supervising inspector.

As compared with that, of course, the other districts are more amply provided for. On the Atlantic side they have four supervising-inspection districts—the third, the fifth, the eighth, and the tenth. On the Pacific they have one supervising-inspection district. It simply means, so Mr. Hoover said, that one supervising inspector can not give his attention to all that territory as it should be covered, and it was to meet this condition that the committee has reported this bill favorably to the House. A district comprising in extent 3,800 miles, and including southern California, Alaska, and the Hawaiian Islands, contains too much territory to be supervised by one inspector.

The second section of the bill simply repeals that provision of the law which provides that the supervising inspector shall not be under obligation to attend the meetings of the board oftener than once in two years. The Board of Supervising Inspectors is now in session in Washington. Of course it was because of the distance to be traveled and the expense involved that this provision was inserted. The second section of the bill repeals that provision and makes it necessary for the supervising inspector to attend the meetings of the board as all other supervising inspectors are required to do.

Now, Mr. Chairman, does the gentleman from Illinois [Mr. MANN] desire to speak?

The CHAIRMAN. Does the gentleman from Missouri [Mr. ALEXANDER] yield?

Mr. MANN. He reserved the balance of his time, I take it.

Mr. ALEXANDER. I yield such time as the gentleman from Illinois desires.

Mr. MANN. I would rather take the floor in my own right.

Mr. ALEXANDER. All right. I have made the only explanation I care to make, Mr. Chairman.

Mr. MANN. Mr. Chairman, the other two bills we have just passed from the Committee on the Merchant Marine and Fisheries gave us the satisfaction, in the report accompanying them, of receiving the advice to get the hearings and read them, and the only way to get the hearings or the report was by sending a special messenger over to the committee room with a request to the Committee on the Merchant Marine and Fisheries for those hearings and report; and now, in order that the House may be fully enlightened on the subject of this bill, I send to the Clerk's desk and ask the Clerk to read in my own time the full report of the committee on this bill. I ask the attention of the committee while this report is being read, because it will not detain them long.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Mr. HARDY, from the Committee on the Merchant Marine and Fisheries, submitted the following report:

The Committee on the Merchant Marine and Fisheries, to whom was referred the bill (H. R. 20282) to provide for the appointment of 11 supervising inspectors, Steamboat-Inspection Service, in lieu of 10, having considered the bill, report it to the House with the recommendation that it do pass.

Mr. MANN. That is a very enlightening report; and in order that we may obtain real enlightenment now I will yield 30 minutes to the gentleman from Massachusetts [Mr. GARDNER], and further time if he desires.

Mr. ALEXANDER. Will the gentleman permit this explanation? As far as the two preceding bills are concerned, I think the gentleman will agree that the reports were quite full. I admit that this report and the one on the succeeding bill are very brief.

Mr. MANN. The other reports were not very full, and in both cases, instead of giving the information contained in the hearings, referred us to the hearings to read them, a very unsatisfactory way of examining reports.

Mr. ALEXANDER. I am not apologizing for them.

The CHAIRMAN. How much time does the gentleman from Illinois yield to the gentleman from Massachusetts?

Mr. MANN. Thirty minutes, to begin with.

Mr. GARDNER. Mr. Chairman, the immigration bill is coming up to-morrow and the question of passing it over the President's veto will be decided. I expect to have control of a certain amount of the time allotted for debate; but I do not wish to take up more than my share. Therefore I am going to say to-day what I should prefer to say to-morrow.

Mr. ALEXANDER. Will the gentleman yield?

Mr. GARDNER. Yes.

Mr. ALEXANDER. I will say that this is the first time in this Congress that the Committee on the Merchant Marine and Fisheries have had the floor, and I think the gentleman will have some regard for the rights of the committee and not occupy too much time.

Mr. MANN. If the gentleman will yield, this is not the first time the Committee on the Merchant Marine and Fisheries has been called in this Congress by a long shot.

Mr. ALEXANDER. The first time it was called was at the beginning of the Congress.

Mr. MANN. This is the first time it has been ready.

Mr. ALEXANDER. And it has never been called since that first time until to-day.

Mr. MANN. The committee calls have gone around two or three times, if not more, as the record will show.

Mr. GARDNER. As a matter of fact, how many bills have you got?

Mr. ALEXANDER. We have quite a number of them, including one for a fish hatchery in Massachusetts.

Mr. GARDNER. Oh, you can not tempt me with that. It is not in my district. [Laughter.] I am willing to be reasonable about it if the gentleman is.

Mr. ALEXANDER. We have more bills than we can get through to-day, I will tell the gentleman.

Mr. MANN. A good many more than ought to pass.

Mr. ALEXANDER. We can keep the House busy, all right, to-day and next Wednesday.

THE IMMIGRATION BILL VETO—THE ISSUE SQUARELY PRESENTED.

Mr. GARDNER. The President is entirely correct when he says in his veto message that the object of the literacy test in the immigration bill is restriction, not selection. The President believes that every able-bodied person not of questionable character ought to be admitted to this country. Now, without doubt, that is our historic policy. I am sorry the issue has been evaded for so many years. The question is whether or not we are going to abandon that historic policy. I believe that we ought to abandon it. I squarely differ with the President on a square issue, so far as his message permits the framing of an issue.

We restrictionists believe that altogether too many able-bodied persons are coming into this country, whether their characters are good, bad, or indifferent. We believe that immigrants are coming too fast to be assimilated, and we believe that the low wages which they are willing to accept are a menace to our high standard of living. Therefore we declare that the time has come for Congress to abandon the historic policy of letting in every able-bodied person whose character is not questionable, and in lieu of that policy we believe that we ought to adopt the policy of substantially cutting down the number of immigrants, even if in so doing we are forced to exclude many persons who might prove to be desirable citizens.

The efforts of those who desire this reduction in immigration have for the most part been centered on the attempt to enact a law which provides that every immigrant must at least know how to read in some language or other, probably, of course, in his own tongue. That requirement is commonly called the "literacy test," and a bill embodying that test has five times passed the Senate of the United States and has four times passed the House of Representatives of the United States, and three times it has encountered a veto. We are now face to face with President Wilson's veto, and I do not want to befog the issue by a discussion of details. I want to meet the issue

squarely from the point of view of whether or not we are going to restrict immigration for the sake of reducing the number of immigrants. If you believe that the country needs and ought to receive every able-bodied man or woman who comes here, provided they do not come here under contract, and provided they are of unquestioned moral character, then you will be doing your duty if you support the President's veto. If, on the other hand, you believe, as we restrictionists do, that too many immigrants are coming here every year, then I shall have no difficulty in persuading you to vote to pass the bill over the President's veto, even though you may not think that the literacy test is the best way to accomplish the restriction which you seek, and even though you think that some better test might well be devised.

Mr. MOORE. Will the gentleman yield?

Mr. GARDNER. Yes.

Mr. MOORE. The gentleman and I have an honest difference of opinion upon this question, but in view of his statement of the attitude of the restrictionists may I inquire whether he has given thought to the advisability of introducing a bill that would fix a numerical restriction rather than a mental restriction?

Mr. GARDNER. Yes; I have given some thought to every scheme which has been proposed. I am coming in a little while to the general question of other plans of restriction.

THE LITERACY TEST.

Now, it is estimated that the literacy test will reduce the number of immigrants by about 300,000 every year.

The test, I am afraid, will bear heavily on the Sicilians and on the Lithuanians. It will be hard on those people, I admit, for it will exclude 40 to 45 per cent of those who come here from Lithuania, from Sicily, and from southern Italy. It will hardly touch the Scandinavian or the German or the Canadian or the Englishman or the Scotchman or the Irishman. Practically every adult in those nations can read and write. It might touch a few of the old folks from those countries, but we have provided a clause by which elderly people can enter whether they themselves can read or not, so long as a single member of their family is able to do so. No man in his senses would claim that the literacy test is an ideal contrivance for restricting immigration. Everyone knows that such a provision of law will admit many bad men, and will exclude many honest men. The question is whether the literacy test will exclude more undesirables and admit more desirables than other restrictive methods which have been proposed.

WHY THE LITERACY TEST WAS SELECTED.

A dozen years ago about every restrictionist, so far as I could observe, favored a different plan for restricting immigration. A great many people who said that they were restrictionists, but who at heart were not restrictionists, always seemed to favor some method of restriction which was not before the country for consideration. Over and over again Members declared on the floor of this House that they were in favor of restriction, but that the literacy test was not the way to restrict; that the head tax was not the way to restrict; that the money-in-the-pocket test was not the way to restrict; that this, that, and the other was not the way to restrict.

The consequence was that the restrictionists were obliged to get together to see which form of restriction appealed most strongly to the greatest number. Soon it became apparent that of all the plans proposed the literacy test could command the most support. Along in 1907 Congress provided for the appointment of a commission to travel abroad and look into this question and report on the best method of restriction, if it should be found that restriction was desirable. That commission was composed of nine men—three Senators, three Members of the House, and three distinguished outsiders. Of these three outsiders Prof. Jenks, of Cornell, was one, and Dr. Neill, of the United States Bureau of Labor, was another. Both Prof. Jenks and Dr. Neill have said that when they became members of that commission they did not believe that the literacy test was the proper one by which to restrict immigration. Both of them, after they had investigated the whole question, entirely changed their opinions. When that commission of nine men reported, they reported unanimously that immigration ought to be restricted, and eight out of the nine gave it as their opinion that the best and most immediate way to restrict would be by means of the literacy test. In face of that report no man who really is in favor of restriction ought to hesitate a moment about voting for the literacy test, because evidently that test commands the greatest amount of confidence and the greatest amount of support. Suggestions as to other tests—and it is seldom that a month passes without some new proposal for restriction being brought to our attention—are apt to be merely ingenious contrivances invented by our foes for the purpose of diverting our energy from its object, which ought primarily to be the enactment of this literacy test which the Immigration Commission has decided is the best form for restriction to take.

That the literacy test is an ideal method of restriction nobody contends, but surely we must admit that if it excludes 300,000 aliens who can not read, it is better than if it excluded 300,000 aliens who can read. To argue that 300,000 individuals who are able to read are not better material for citizenship than 300,000 illiterates is to impeach our whole public-school system. However, the commission recommended the literacy test not as a selective measure, but rather as a means of curtailing the congested oversupply of unskilled labor. The superiority, if any, of the individual immigrant under this system was regarded as a fortunate incidental advantage. For many years I have listened in this House to the argument that the anarchist and the gunman and the procurer can read, while many an honest, horny-handed laborer does not possess that accomplishment. I freely admit the fact. It is true. It is also true that many a straight man can be found in a gambling house and many a crook can be found at church. Yet, for all that I should not recommend the passage of any legislation based on the supposition that the frequenters of gambling houses are more desirable citizens than are the churchgoers.

DISTRIBUTION.

Every year at certain seasons when we hear of the demand for farm labor, gentlemen on this floor pull long faces and solemnly express the opinion that a proper distribution of immigration would solve the whole problem. I venture to predict that until the employing farmer can offer the farm laborer a steady job, we never shall be free from this cry as to the shortage of farm labor. There are just two seasons of the year when the farmer is short of farm labor. One of these seasons comes at seeding time and the other when the harvest is gathered.

For nearly eight years we have had on the statute books a law providing for a bureau intended to facilitate the distribution of immigrants, but the bureau has not amounted to much. South Carolina has actually tried the experiment of importing and distributing immigrants, but the State found that the immigrants would not stay distributed.

The commissioner of labor and agriculture of the State of South Carolina, in compliance with the law of that State, chartered a vessel known as the *Wittekind*, and in her he imported some 700 or 800 people, largely Belgians, to work in South Carolina. I asked the Belgian minister three or four years later how many of the *Wittekind* immigrants he thought were still in South Carolina. He said, so far as he knew, not one. I asked him how many of them were still in the United States. He said that he had no means of knowing, but that they had been applying to him in great numbers to get them back to Belgium. I have asked many a South Carolinian as to the result of that experiment, and invariably the answer is that of those seven hundred and odd men brought out and deliberately distributed in South Carolina, practically none remained in the State.

TWO MEN LOOKING FOR ONE JOB.

If I were to tell my manufacturing friends in Massachusetts that competition does not lower prices, they would think I had gone crazy, and they would probably judge that the time had come to get another Congressman. Yet those very same men will turn around and tell me that unrestricted immigration has no effect on wages in the textile industries. Perhaps they may be right; but if so, labor is the only commodity in the wide, wide world whose price is not reduced by competition. To be sure, in flush times the effect of immigration may only be to keep wages from rising as fast as they otherwise might. When two jobs are looking for one man, no amount of immigration will lower wages; but times are no longer flush now, and it is no longer true that two jobs are looking for one man, as used to be the case. The fact is nowadays that two men are looking for one job, and they are not finding it, either. Now, do not pretend to me that our colossal immigration has nothing to do with this surplus of labor and the number of unemployed.

Mr. STAFFORD. Will the gentleman yield?

Mr. GARDNER. Certainly.

Mr. STAFFORD. How does the gentleman explain that in the face of the existing industrial depression resulting in the unemployment of large numbers in our industrial centers, that there is no decrease in the wages of labor?

Mr. GARDNER. Well, that may be true, as yet, of skilled labor; but I doubt whether unskilled wages are holding up.

Mr. STAFFORD. How does the gentleman explain the conflict with the economic theory of supply and demand that, even without the demand for labor, the price of labor has not gone down, but it has been maintained in these times of depression?

Mr. GARDNER. The amount of employment has gone down.
Mr. STAFFORD. But wages have not gone down. The gentleman's statement is inconsistent.
Mr. GARDNER. Oh, I think not.
Mr. STAFFORD. Wages have not gone down in a single employment in my city.
Mr. GARDNER. Of course I can not say as to that.

THE STEAMSHIPS PAID THE BILL.

Now, Mr. Chairman, I do not very often go into the muckraking business, but I think that the evidence published last Saturday by the American Federation of Labor is pretty conclusive of the fact that the steamship companies for years have financed the fight against the restriction of immigration. I admit that the evidence presented might not be sufficient to convict anybody in court; but, after reading the documents, if there were any way of deciding the question, I should be ready to bet two to one that the steamship companies supplied the funds with which the National Liberal Immigration League carried on its work. There are certain points which stick up like sore thumbs in the evidence which was published last Saturday by the American Federation of Labor. In the first place, one of the exhibits was a rough draft of a letter to Andrew Carnegie, which had come into the hands of the Federation. In that letter this passage appears:

Up till recently we were receiving from a steamship line (name) $15,000 per annum, which, however, scarcely covered our running expenses—

And so forth.

Consider this letter in connection with the financial statements of the National Liberal Immigration League which were included in the exhibits. For instance, here is the league's balance sheet for November 20, 1911, and likewise its balance sheet for April 10, 1907. In the balance sheet of April 10, 1907, I notice this item:

By cash received, $15,000.

Where did that cash come from? I wonder why its source was not specified. It seems a singularly round amount to receive from enthusiastic supporters of the league's policies.

The CHAIRMAN. The time of the gentleman has expired.
Mr. MANN. I yield the gentleman 10 minutes more.

THE GERMAN AND THE FRENCH LETTERS.

Mr. GARDNER. In the league's balance sheet of November 20, 1911, statement of income and liabilities July 1, 1910, to November 20, 1911, I find under the heading "Receipts" the following entry: "Paris, $15,000," and I notice in this same account that the league had far exceeded its income and was in debt to the tune of $6,167.14. Observe the date of this financial statement, November 20, 1911. On December 15, 1911, less than a month later, the secretary of the Liberal Immigration League sent a cablegram to Director Storm, Hamburg-Amerika Line, Hamburg, Germany. This cablegram or a copy of it came into the hands of the American Federation of Labor. It is signed "Behar," and that is the name of the secretary of the National Liberal Immigration League. Remember that the financial statement of November 20, 1911, showed that the league had received $15,000 from "Paris," and that the deficit was something over $6,000. Now, mark this cablegram sent December 15, 1911, some four weeks later:

Director STORM,
Hamburg-Amerika Line, Hamburg, Germany:

We owe over $7,000 in salaries, rent, printing, etc. Unless we pay immediately we will be sued and put in bankruptcy with disagreeable consequences for all concerned.

BEHAR.

That message is confirmed by a letter from Mr. Behar to Mr. Storm, director of the Hamburg-Amerika Line, in which Mr. Behar quotes the cablegram and says that he has been talking to Emil L. Boas, the resident director and general manager of the Hamburg-Amerika Line, and that the cablegram was sent at Mr. Boas's suggestion. Furthermore, among the exhibits appears some correspondence between Mr. Behar and Messrs. Japhot & Saget, Compagnie Generale Transatlantique, Rue Auber, Paris, France. I admit that there is nothing in the letter from Mr. Behar or in the answer from the Paris firm which shows that any money was actually given by the French steamship company to Mr. Behar. Yet in the latter's letter appears this significant sentence:

I shall be very glad to receive your contribution as soon as possible—

And so forth.

I assert that the correspondence of the secretary of the National Liberal Immigration League with the French line and the Hamburg line shows a friendly understanding between those various parties—I will take back that word "understanding"—a friendly acquaintance between those companies and Mr. Behar, the secretary of the league which has been fighting immigration restriction. Unless such a friendly acquaintance did as a matter of fact exist I can imagine Mr. Adolph Storm's puzzled surprise when the cablegram signed "Behar" was placed on his desk in far-off Hamburg.

Mr. MANN. I yield five minutes to the gentleman from California [Mr. J. R. KNOWLAND].

Mr. J. R. KNOWLAND. Mr. Chairman, I trust in the general debate which has been indulged in that the committee will not lose sight of the bill now pending before the committee. This bill is of particular importance to the shipping interests of the Pacific coast.

It provides for an additional supervising inspector for the Steamboat-Inspection Service, this inspector to be located on the Pacific coast. At the present time, as the chairman has stated, we have but one supervising inspector for that entire territory. On the Atlantic coast they have four supervising inspectors, so that the necessity for this additional inspector on the Pacific coast, covering territory from San Diego to Alaska and including Hawaii, is apparent and should appeal to every Member of the House.

Section 2 of the bill seeks to repeal that section of the present law which provides that—

The supervising inspector of the district embracing the Pacific coast shall not be under obligation to attend the meetings of the board oftener than once in two years; but when he does not attend such meeting he shall make his communications thereto, in the way of a report, in such manner as the board shall prescribe.

The two inspectors from the Pacific coast provided for in this bill will be entitled to attend the annual meetings held in Washington. With the many problems likely to arise following the opening of the Panama Canal and with the large increase of shipping on the Pacific coast, it is indeed important that the inspectors from that section attend these annual meetings.

In view of the fact that the Committee on the Merchant Marine and Fisheries occupies the floor to-day it would seem appropriate for me to quote certain extracts from a speech delivered before this House on April 25, 1906, by a former distinguished chairman of that committee. I refer to the Hon. Charles H. Grosvenor, of Ohio, for many years a Member of this body. His speech was a plea for an American merchant marine. The paragraph I shall quote now seems prophetic. Comment is unnecessary. This is the paragraph:

Suppose we had a war to-day, or suppose we had no war to-day, but that England and France had, or that France and Germany had, or that Germany and England had; or suppose even the minor nations of Europe had war with each other; what would become of the commerce of the United States? Ninety per cent of it is being carried in foreign ships, not alone in English ships, not alone in French ships, but in German and Italian and directly in Japanese as well as in Norwegian, Swedish, and Danish. Suppose any of these nations now were involved in war, what would become of our commerce? If we had ships of our own, we could carry our commerce under our own flag and defy the nations that were at war to interfere with us. How long would it be, Mr. Chairman, until these contending forces would enforce the laws of war and seize the merchant ships that were carrying our commerce and drive that enormous commerce that we are so proud of off of the face of the seas? So no great commercial nation can maintain her supremacy in commerce if she does not carry her commerce under her own flag and protect it by her own power and in her own ships.

Mr. MANN. Mr. Chairman, I yield five minutes to the gentleman from Wisconsin [Mr. STAFFORD].

Mr. STAFFORD. Mr. Chairman, when the gentleman from Illinois was criticizing the brevity of this report, I was surprised that he had overlooked, as I think the chairman of the committee has, one of the main purposes to be attained by the bill under consideration. I recall that when the prior bills were under consideration he had access to the sections of the Revised Statutes which those bills sought to change, and here we have this bill without any reference whatsoever in the report to such change; but the bare reading of the statute shows that one great abuse that has been indulged in in times gone is to be obviated by the elimination of the provision of 10 cents a mile to these inspectors for travel allowance when engaged in their official business. I wish the same committee, or the Committee on the Judiciary, would go still further and repeal this archaic piece of legislation, which gives to every official a fixed stipend of so much a mile, far in excess of their traveling expenses, and adopt it generally for all such cases, so that they would be limited, as we have limited it in the Postal Service, and as it has been limited in this service, to the actual traveling expenses incurred by the officials.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That section 4404, Revised Statutes of the United States, be, and the same is hereby, amended so as to read as follows:

"SEC. 4404. There shall be 11 supervising inspectors, who shall be appointed by the President, by and with the advice and consent of the Senate. Each of them shall be selected for his knowledge, skill, and

practical experience in the uses of steam for navigation, and shall be a competent judge of the character and qualities of steam vessels and of all parts of the machinery employed in steaming. Each supervising inspector shall be entitled to a salary of $3,000 a year, and his actual and reasonable traveling expenses incurred in the performance of his duties, together with his actual and reasonable expenses for transportation of instruments, which shall be certified and sworn to under such instructions as shall be given by the Secretary of Commerce."

Mr. MANN. Mr. Chairman, I move to strike out the last word. May I ask the gentleman from Missouri whether there has been any calculation as to how much this will increase the expenses of the Government?

Mr. ALEXANDER. The salary of this inspector is $3,000 a year—that is, the additional inspector—and his reasonable traveling expenses in attending the meeting of the board here in Washington.

Mr. MANN. I take it that is not the only increase. He maintains an office and has an office force.

Mr. ALEXANDER. I am unable to say just what the additional expense will be.

Mr. MANN. It seems to me it is a very good time and a very wise time to make a calculation in every case where we propose to increase the expenses of the Government.

Mr. ALEXANDER. That is always true, I think.

Mr. MANN. Well, but the gentleman has not followed it in this case.

Mr. ALEXANDER. We felt that the emergency was great enough to justify the expense.

Mr. MANN. Well, the people have gotten along very well for years.

Mr. STAFFORD. I move to strike out the last two words in order to ask a question.

Mr. MANN. I thought I had the floor.

Mr. STAFFORD. I thought the gentleman had yielded the floor. I beg his pardon.

Mr. MANN. Usually, every proposition we have looks meritorious when it is a little one. This looks meritorious to me. A few days ago the free money in the Treasury was $60,000,000. That was a decrease in the course of a few months of $125,000,000. This morning the free money in the Treasury was $54,000,000, a decrease in the last few days of $6,000,000; and the decrease yesterday, I believe, was over $1,000,000. But surely here is a new office—and the gentlemen seem to pay no attention to the fact that the money in the Treasury is getting low, and, as far as I have been informed, and I have some information on the subject, the President has not yet been able to get anybody in this body to propose an increase in taxes, though he appreciates the fact, if my information is correct, and I think it is, that we will be very much in need of increased taxes if we keep on making these expenditures.

Mr. ALEXANDER. Mr. Chairman, I renew my motion that the committee do now rise.

Mr. STAFFORD. The bill has not been read for amendment yet. The second section has not been read.

Mr. ALEXANDER. I beg the gentleman's pardon. Let the second section be read.

Mr. STAFFORD. I am willing to have the next section read.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 2. That section 4405, Revised Statutes of the United States, be, and the same is hereby, amended by striking out the following words:

"The supervising inspector of the district embracing the Pacific coast shall not be under obligation to attend the meetings of the board oftener than once in two years; but when he does not attend such meeting he shall make his communications thereto, in the way of a report, in such manner as the board shall prescribe."

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] moves to strike out the last word.

Mr. STAFFORD. Mr. Chairman, I regard this measure as one where real economy can be obtained. I think that the saving that will result in cutting off the "graft," if I may use that word, of 10 cents a mile for traveling expenses and limiting them to their actual expenses, when we all know that it does not cost these days for any person to travel, no matter in what State, 10 cents a mile, will result in a decided saving of expense to the Government.

Mr. PETERSON. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. I yield to my friend from Indiana.

Mr. PETERSON. Would it not be better economy to cut down the mileage of one and leave only that one? That would be true economy.

Mr. STAFFORD. Which one?

Mr. PETERSON. The new one.

Mr. STAFFORD. There are 10 inspectors. The gentleman will realize the necessity of having them assemble here once a year and holding conferences as to the needs of navigation. At least they should assemble at some time to hold conferences with their superiors.

Mr. PETERSON. Would it not be better to leave the number you have now and reduce the mileage instead of increasing the number? Would not that be true economy?

Mr. STAFFORD. That is not my position. I rose to inquire of the gentleman in charge of the bill whether the department had been asked what economy would be obtained by reducing the amount of mileage.

Mr. ALEXANDER. The committee has not asked that question, but if those people on the coast are properly located there will be a saving in the cost of travel. The coast line is 3,800 miles long.

Mr. STAFFORD. That saving will extend to all the inspectors if they come here, because the 10 cents allowance would be eliminated entirely.

Mr. ALEXANDER. The bill provides for the actual expenses.

Mr. STAFFORD. Mr. Chairman, I withdraw my pro forma amendment and move to strike out the word "of," in line 14, and substitute the word "for."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin.

The Clerk read as follows:

Strike out the word "of," in line 14, and substitute the word "for."

Mr. STAFFORD. I do not know whether the attention of the chairman has been called to the fact that in the original draft of the statute the word was "for" instead of "of." While "of" is the more grammatical term, I suppose if we are going to revise it we should carry the same language.

Mr. MARTIN. In the original draft it is "for"?

Mr. STAFFORD. Yes.

Mr. MARTIN. Of course it all goes out in this amendment.

Mr. STAFFORD. If we are describing it at all, we should describe it in the phraseology of the statute, not the phraseology as it should read.

Mr. ALEXANDER. I have no objection to that.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. MANN. Mr. Chairman, the section which provides for actual and reasonable expenses, traveling expenses, and so forth, is the preceding section, and is not involved in this section. The law provides that these inspectors shall meet in Washington once a year. That is not necessary at all. Half the time it is entirely superfluous. Then it contains the provision that the inspector for the Pacific coast shall not be under obligation to come to Washington but once in two years, although if he does not come he shall make a report in such manner as the board shall prescribe.

Now, the bill adds to the number of the inspectors on the Pacific coast, or is intended to. It provides two instead of one. There is no reason on earth why these two gentlemen should come to Washington every year and have a nice little junketing trip at the expense of the Government. Under the terms of the law one of them could be here every year anyhow. When there are two there, the law need only provide that either one would be under obligation to come more than once in two years, although if the department had any reason for it the department could order him to come. Now, why should we provide an additional inspector for the Pacific coast and at the same time make it obligatory upon those two men to neglect their duties at home and take a nice little junketing trip across the continent to Washington?

There is no new information laid before these inspectors every year. We all know it. Occasionally something comes up. If the whole board did not meet but once in five years, it would probably be an advantage to the Government and to the shipping interests. But certainly there is no reason for requiring each of two inspectors to travel from the Pacific coast across the continent to Washington. The other inspectors do not have very far to come, and there is no very considerable expense incurred in bringing them here. But those two inspectors have a long way to come, and there is a good deal of expense incurred in bringing them here. If one of them comes one year, he can tell the conditions on the Pacific coast, and the other can come the next year, and he can tell the conditions on the Pacific coast; and if the department wants both of them to come at the same time, let both of them come at the same time any year that the department needs them.

There is no occasion for repealing the law which now leaves it at the option of the department to let one of these men stay there one year out of two and attend to his work out there.

Mr. ALEXANDER. Mr. Chairman, I want to say, with reference to the motion made by the gentleman from Illinois [Mr. MANN], that the Board of Supervising Inspectors is in session now. They continue in session for one month to six weeks and sometimes longer. They have many duties, and the regulations that are formulated by the Board of Supervising Inspectors are of vast importance to the shipping interests, and in the course of the year many matters come up for consideration to which it is necessary for them to give most careful attention.

If the seamen's bill should become a law, there are many provisions of it that would require regulations by the Department of Commerce, and they will be formulated by the Board of Supervising Inspectors. I do not think the board comes to Washington for a junket, and in view of the fact that the shipping interests on the Pacific coast are becoming larger and more important every year, I do not know any reason why the inspectors from the Pacific coast should not be here if it is important for the inspectors from the Atlantic and the Gulf coasts and the Great Lakes to be here. The Pacific coast should be represented.

Mr. J. R. KNOWLAND. As it now stands, four inspectors come to Washington from the Atlantic coast and will continue to come. Ought the Pacific coast to be discriminated against because we happen to be a long distance away? The same argument, carried to its logical conclusion, would say that because of the large mileage there should not be as many Members of Congress from California.

Mr. ALEXANDER. I do not think the question of expense should be the controlling question. I ask for a vote on the amendment.

The question being taken, the Chairman announced that the noes appeared to have it.

Mr. MANN. I ask for a division, to see whether anybody is in favor of economy.

The committee divided; and there were—ayes 11, noes 32.

Accordingly the amendment was rejected.

Mr. MANN. That is not a very large number.

Mr. ALEXANDER. Mr. Chairman, I move that the committee do now rise and report the bill to the House with a favorable recommendation.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. LLOYD, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 20282) to provide for the appointment of 11 supervising inspectors, Steamboat-Inspection Service, in lieu of 10, and had directed him to report the same back with an amendment, and with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time.

The SPEAKER. The question is on the passage of the bill.

The question being taken, on a division (demanded by Mr. MANN) there were—ayes 21, noes 8.

Mr. MANN. I ask for the yeas and nays.

The SPEAKER. The gentleman from Illinois demands the yeas and nays. Those favoring the yeas and nays will rise and stand until counted. [After counting.] Six in the affirmative.

Mr. MANN. The other side, Mr. Speaker.

The SPEAKER (after counting). Forty-seven in the negative.

Mr. MANN. That makes 53 altogether.

The SPEAKER. Fifty-three.

Mr. MANN. A large number.

The SPEAKER. Six Members, not a sufficient number, second the demand. The yeas and nays are refused, and the bill is passed.

On motion of Mr. ALEXANDER, a motion to reconsider the last vote was laid on the table.

ASSISTANT INSPECTORS, STEAMBOAT-INSPECTION SERVICE.

Mr. ALEXANDER. Mr. Speaker, I call up the bill (H. R. 20281) to provide for the appointment of certain assistant inspectors, Steamboat-Inspection Service, at ports where they are actually performing duty, but to which they are at present detailed.

The SPEAKER. This bill is on the Union Calendar.

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Missouri asks unanimous consent to consider this bill in the House as in Committee of the Whole.

Mr. MANN. I think I shall have to object.

The SPEAKER. The gentleman from Illinois objects, and the House automatically——

Mr. ALEXANDER. I ask unanimous consent that the general debate on this bill in Committee of the Whole be limited to 15 minutes.

The SPEAKER. The gentleman from Missouri asks unanimous consent that the general debate on this bill be limited to 15 minutes. Is there objection?

Mr. MANN. I object.

Mr. ALEXANDER. I renew the request to make it 30 minutes.

The SPEAKER. The gentleman asks unanimous consent to limit the debate to 30 minutes. Is there objection?

Mr. MANN. I object.

The SPEAKER. The gentleman from Illinois objects, and the House automatically resolves itself into the Committee of the Whole House on the state of the Union, with the gentleman from New York [Mr. GOLDFOGLE] in the chair.

The CHAIRMAN. The Clerk will read the bill.

The bill was read, as follows:

Be it enacted, etc., That the eighth paragraph of section 4414, Revised Statutes of the United States, be, and the same is hereby, amended so as to read as follows:

"And, in addition, the Secretary of Commerce may appoint, in districts or ports where the exigencies of the service require, assistant inspectors at a salary, for the port of New York, of $2,000 a year each; for the port of New Orleans, La.; the districts of Philadelphia, Pa.; Baltimore, Md.; the port of Boston, Mass.; and the district of San Francisco, Cal., at $1,800 per year each, and for all other districts and ports at a salary not exceeding $1,600 a year each; and he may appoint a clerk to any such board at a compensation not exceeding $1,500 a year to each person so appointed. Every inspector provided for in this or the preceding sections of this title shall be paid his actual and reasonable traveling expenses incurred in the performance of his duties, together with his actual and reasonable expenses for transportation of instruments, which shall be certified and sworn to under such instructions as shall be given by the Secretary of Commerce."

Mr. ALEXANDER. Mr. Chairman, this bill provides for the appointment of certain assistant inspectors. The purpose of the bill, as I understand it, is to enable the department to appoint assistant inspectors at ports where their services are needed. Under the existing law these inspectors can only be appointed at ports where 225 or more vessels are inspected in a year. The department is thus compelled to appoint the assistants at the ports where more than 225 vessels are inspected, although their services may be needed at another port. For instance, under existing law the assistant inspectors may be appointed at Milwaukee and detailed to serve at Chicago. This bill does not provide for any increased expenditure, but under it, if additional assistant inspectors are needed at the port of Chicago or elsewhere, they may be appointed at the port of Chicago. I say it does not involve any additional expense. It simply vests in the department the power to appoint the inspectors at the port where their services may be needed, although less than 225 vessels a year are inspected at that port. The provision for their pay, of course, must be made under existing law, and authorized by the Committee on Appropriations, and if the department in its estimate would include one or more assistant inspectors, it would be compelled to go before the committee and make a showing that the services of these inspectors are necessary. I think I have given the gist of the bill.

Mr. STAFFORD. Do I understand that the salaries of these assistant inspectors at the present time are those stated in the bill under consideration?

Mr. ALEXANDER. Yes. We do not affect the salaries or compensation in any way.

Mr. STAFFORD. I notice that in the section of the statute that this seeks to amend the salary is $1,600 for all places other than the district of New York. Perhaps that has been changed since. I am inquiring for information.

Mr. ALEXANDER. Mr. Hoover, from the Steamboat-Inspection Service, who appeared before the committee, gave their present compensation. That has been fixed in the appropriation bills.

Mr. STAFFORD. Here you prescribe a salary of $1,800 for numerous places and $1,600 for others.

Mr. ALEXANDER. We do not change the existing law, but the appropriation bills have from time to time limited the amount, and he stated that the pay is $1,500.

Mr. STAFFORD. Fifteen hundred dollars for the clerks, or for the assistant inspectors?

Mr. ALEXANDER. For the clerks. I inadvertently said assistant inspectors.

Mr. STAFFORD. Under the existing law the salaries of assistant inspectors outside of New York, according to the sec-

tion of the statute I have before me, are $1,600, whereas here you prescribe salaries of $1,800 for numerous districts. Perhaps it may have been changed in the legislative bill by appropriation law; but, as far as the statute is concerned, there are the salaries.

Mr. ALEXANDER. I may be in error about that. I will read what he says:

Mr. HARDY. However, I see you leave out of this bill, as it is proposed here, one city that was named in the former section, and that is Chicago.

Mr. HOOVER. I can explain that in this way: There had been in Chicago assistant inspectors receiving $1,800 who were appointed at that place. When the number of steamers fell below 225, Chicago lost its assistant inspectors, and they could only be detailed there. They were appointed at Milwaukee, where there were 225 steamers inspected, and detailed to Chicago. Those men got $1,600, and the present inspectors at Chicago get $1,600. If you should say the assistant inspector at Chicago should get $1,800, you would have two men there getting $1,800, and two who do the same work that these men at Cleveland and Buffalo do who get $1,600.

Mr. HARDY. Then you suggest to leave that as it is?

Mr. HOOVER. Yes. Take, for instance, the matter of pay of assistant inspectors, to show how unbusinesslike we are now, in the spring we detail two Cleveland, Ohio, men, who are getting $2,000 a year, to work side by side with two men getting $1,600 a year. Those $1,600 men are just as competent and do just as much work. I have not raised that question with regard to standardizing salaries except to show the condition as to the pay of assistant inspectors.

Mr. HARDY. "And he (the Secretary of Commerce) may appoint a clerk to any such board." That is the first time a board has been mentioned in this bill.

Mr. HOOVER. Yes; and the question, I judge, that you have in mind, Judge Hardy, is, Why is this particular question of clerks to boards, or that particular feature, covered by this section that speaks of assistant inspectors?

Mr. HARDY. Yes; and why is it not necessary in this bill, to make it intelligible, to explain what board you mean?

Mr. GREENE. You say, "such board." That would cover a board already provided for.

Mr. HARDY. You are referring here to a board. You do not say anything about a board until you get to the expression "such board."

Mr. STAFFORD. But I understand from the reading of that testimony that it is the purpose to raise the salaries so as to equalize them, so that officials from other districts detailed outside of their districts shall receive the same pay as inspectors detailed from another place. The whole argument is for equalization of salaries.

Mr. ALEXANDER. It is desirable to make the pay of assistant inspectors uniform for the same service.

Mr. STAFFORD. It is not uniform even by this bill. By this bill you provide different salaries. For instance, at New York it remains at $2,000, while at New Orleans, Philadelphia, Baltimore, Boston, and San Francisco, it is increased from $1,600 to $1,800. The case instanced by the gentleman who testified would still exist, because if a man at Cleveland, receiving $2,000, were detailed to Chicago, where they are receiving only $1,800, the inequality would still prevail. Then, again, I would like to inquire what the salaries of the clerks to these respective inspectors are at the present time. According to the statute law they are receiving $1,200, and under this bill $1,500.

Mr. ALEXANDER. Here is what Mr. Hoover has to say about that:

Mr. HOOVER. Yes. That has all been changed from time to time by the appropriation bills. For many years it was $1,600. About four years ago the Appropriations Committee changed that and made it $1,400, and the effect of that was that we had to reduce the pay of several men and to rearrange our salaries. Then it was gotten back to $1,500, but Congress did not allow for that increase of a couple of hundred dollars extra to keep from reducing several men, and it has remained at $1,500 ever since.

Mr. STAFFORD. So by this bill we are merely reenacting appropriation law, so far as the salary of the clerks is concerned?

Mr. ALEXANDER. We are not interfering with existing law. If the department asked for additional inspectors, the Appropriations Committee would control the number by the appropriation bill.

Mr. STAFFORD. Not the salary.

Mr. ALEXANDER. The number.

Mr. STAFFORD. We will fix the salary here.

Mr. ALEXANDER. Yes; as now provided by law.

Mr. MARTIN. Mr. Chairman, it seems to me that the Committee on the Merchant Marine have adopted for much of the business we are called upon to consider to-day a very unsatisfactory method. The report in this case contains absolutely no information. It contains simply a recommendation that the bill be passed. It proposes to amend the statutes of the United States, and no Member of this House can tell anything about what the changes will be in the statute if the bill is passed without getting a copy of the Revised Statutes and checking up what changes would be made. The gentleman from Wisconsin [Mr. STAFFORD] in his effort to do that is now told by the chairman of the committee that so far as the salaries are concerned the salaries enumerated in the statute are not the ones that are being allowed now. It all illustrates how unsatisfactory it is to endeavor to get any real light on the question before the committee by examination of the data that the Committee on the Merchant Marine and Fisheries has placed at the disposal of the House. I would like to ask the chairman what the real purpose of this proposed legislation is?

Mr. ALEXANDER. The chairman did not write the report. The bill is to authorize the appointment of additional inspectors at the ports where they are needed, without reference to whether those ports inspect 225 vessels each year.

Mr. MARTIN. Then the real purpose of the bill is to increase the number of inspectors and give a larger authorization in that particular than the existing law now allows?

Mr. ALEXANDER. The way it is done now is: They are appointed at ports, for instance, like Milwaukee, where more than 225 vessels are inspected in a year, and then detailed to those other ports. The department wants authorization to appoint them where they are needed, although there might not be 225 vessels inspected at those ports in the course of a year. For instance, as I understand it, the assistant inspectors are detailed from Milwaukee and Cleveland to other ports along the Great Lakes.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. MARTIN. Yes.

Mr. MANN. The law as it now stands, so far as the Revised Statutes are concerned, which it is proposed to amend, does not do what the gentleman from Missouri says, as will be apparent from reading it. This is the language of the Revised Statutes:

And, in addition, the Secretary of the Treasury may appoint in such districts where their services are actually required assistant inspectors at a salary—

And so forth.

We authorize the appointment of assistant inspectors now under existing law just as much as this language in the bill does, which reads:

And, in addition, the Secretary of Commerce may appoint in districts or ports where the exigencies of the service require assistant inspectors at a salary—

And so forth.

Both the law and the bill simply authorize the appointment of assistant inspectors where the Secretary thinks they are required. There is no change.

Mr. MARTIN. Mr. Chairman, I have examined the statute, and, of course, I appreciate the force of the interpretation the gentleman from Illinois [Mr. MANN] gives, but I think it is susceptible of another interpretation. The statute says, after enumerating in section 4414 various ports at which these inspectors may be appointed, in the eighth paragraph:

And, in addition, the Secretary of the Treasury may appoint in such district.

There is a comma right after the word "districts," which perhaps would indicate from the punctuation that the use of the language "such districts" refers to the districts immediately enumerated previously, and I presume that has been the interpretation of the department if they have asked for a change, because the chairman has just now very frankly stated that in order to appoint these inspectors to serve in other districts from the ones enumerated in the statute, section 4414, the custom apparently has been to appoint them to one of these specified districts named in the statute, and then detail them for service somewhere else. And I think probably the interpretation of the statute in that respect, considering the punctuation, may be a correct one.

But, at all events, the purpose is to facilitate the appointment of these inspectors. Can the chairman of the committee inform us how many additional inspectors or assistant inspectors this would place into the service beyond those who are now considered to be authorized by law?

Mr. ALEXANDER. It authorized the appointment of additional assistant inspectors as they are needed, but, as I say, before they could be appointed the appointment would have to go to the Committee on Appropriations and the necessity of the appointment would have to be made clear.

Mr. MARTIN. Then if we pass this bill in its present form there would be no limitation as to the number of these assistant inspectors who could be appointed other than in the discretion of the Secretary of Commerce?

Mr. ALEXANDER. There is none in the existing law if they are appointed a certain way.

Mr. MARTIN. To serve at a certain place. Here they may be appointed to serve indefinitely at any port.

Mr. ALEXANDER. It was brought to the attention of the committee that while their services are not needed at a certain port with less than 225 vessels to be inspected, they are needed

at some other point, and they are allowed for that port, and the understanding is that they can be utilized at other ports. I will read what the supervisor has to say. I wish to say that until I saw the report made by a member of the committee, who had this in charge, I did not know he had not given the information to which the House is entitled.

Mr. MARTIN. I take it for granted, the chairman will agree that the House ought to have in the report of the committee sufficient data to know what changes would be made in the Revised Statutes.

Mr. ALEXANDER. I was very much disappointed to find it was not in the report. Here is what the supervisor says:

Mr. HOOVER. The reasons are these: First, I should say that after July 1, 1905, boards of local inspectors were paid fixed salaries. Up to that time they had been paid according to the number of steamers inspected, and we believed that that placed a premium upon defective and inefficient inspection by limiting the man's salary to the number of steamers that he inspected. Hence, their salaries were fixed. Now, at the time that was done—and that law was effective July 1, 1905—these words in section 4414 in regard to appointing the assistant inspectors at districts where there were 225 steamers or upward to be inspected annually were not also mentioned, but it was the understanding of the department from that time on that the number of steamers that were inspected in a district did not have any effect whatsoever upon the salaries. Therefore there remained from that time to the present day these assistant inspectors who were appointed at certain of these ports and detailed to certain other ports. Now, the effect is that to-day some of these ports where assistant inspectors have been appointed have fallen below the 225 steamer limit, where assistant inspectors are to be appointed, you understand, and appreciating that it is not a fair basis, simply the number of steamers that are inspected in the district, to base the number of men who shall be employed there, we want to get away from that and have this amendment made which should have been made back in 1905. It has been our understanding from that time on that we proceeded correctly in having these assistant inspectors at the place where they were appointed, even though that number of steamers had fallen below 225. I may say that in the last year we have gone over these statutes trying to bring them up to date wherever we found them defective, and in our efforts to do that we found this place here. We first discovered it—or we did not discover it, but thought of it carefully—when we were getting up the last estimates, and it occurred to me we ought to have that corrected and do directly that which we have been doing indirectly; that is to say, if there happen to be ports where the exigencies of the service require assistant inspectors of course we can actually appoint them, but we can not actually appoint them until you gentlemen appropriate so we will have money to pay them.

Mr. MARTIN. Mr. Chairman, so far as we have information now upon the subject, it would appear that this bill would amount to an increase in the compensation for some inspectors. We have no information that shows what changes, if any, have been made in the Revised Statutes since this originally was passed; and of course this bill proposes to amend the original section in the statutes. If no further changes have been made, the result of the bill, if passed, would be to leave the salaries of the assistant inspectors in the port of New York at $2,000, where the statute places it. Then, at New Orleans, Philadelphia, Baltimore, Boston, and San Francisco, to increase their salaries from $1,600 to $1,800 a year, and it would have the effect, so far as the clerkship is concerned, of increasing the clerk's compensation from $1,200 to $1,500.

Mr. STAFFORD. Will the gentleman yield?

Mr. MARTIN. I will.

Mr. STAFFORD. I may enlighten the gentleman and the committee somewhat by calling attention to the item providing the appropriation for this branch of the service in the last legislative, executive, and judicial appropriation act. There we find the salaries carried in that bill are the same as are carried in the bill under consideration. For instance, we find the following:

Steamboat inspectors: * * * Assistant inspectors, as authorized by act of April 9, 1906, for the following ports: New York, 27, at $2,000 each; New Orleans, 4, at $1,800 each; Baltimore, 6, at $1,800 each; Boston, 6, at $1,800 each; Philadelphia, 8, at $1,800 each; San Francisco, 8, at $1,800 each; Buffalo, 4, at $1,600 each; Milwaukee, 8, at $1,600 each; Norfolk, 4, at $1,600 each; Seattle, 8, at $1,600 each.

So the gentleman will see that the salaries stated in the bill under consideration at the places named are as stated in the appropriation bill, and that at all other places, some of which are enumerated here, no higher than $1,600 is carried in the legislative bill.

Mr. MARTIN. Has the gentleman found the items for appropriations for these clerks in the legislative bill?

Mr. STAFFORD. Yes; that is also included right here, and is as follows:

Clerk hire, service at large: For compensation, not exceeding $1,500 a year to each person, of clerks to boards of steamboat inspectors, to be appointed by the Secretary of Commerce in accordance with the provisions of section 4414, Revised Statutes, the act of April 9, 1906.

Mr. MARTIN. Apparently, then, these salaries have been already increased above the provisions of section 4414 by appropriations?

Mr. STAFFORD. By appropriation law.

Mr. MARTIN. The only changes, then, made in the statutes so far as it would appear would be to make it clear that these assistant inspectors may be appointed to other ports than the ones enumerated by the section, and furthermore the additional change that instead of being compensated for traveling expenses by mileage at 10 cents per mile by this bill they will be compensated their actual traveling expenses.

Mr. STAFFORD. Yes; and there is——

Mr. MANN. The law was changed some time ago, and they do not get 10 cents a mile now. They get their actual expenses. That is all they get under the law.

Mr. STAFFORD. Yes; a change recently made, which we have just discovered.

Mr. MANN. A change which I discovered some time ago and which the gentleman from Wisconsin has finally discovered after he made a very eloquent speech on the subject without knowing what the facts were.

Mr. STAFFORD. I am surprised the gentleman from Illinois did not correct me until now, when he discovered it himself.

Mr. MANN. I do not attempt to correct all the errors of the gentleman from Wisconsin at the time, because it would not give him time on the floor to discuss matters himself.

Mr. STAFFORD. I never knew the gentleman to fail to do so when I was in error.

Mr. MANN. I have followed the discussion of this bill, and I can not yet understand what the purpose is. The law now provides fully for the appointment at Chicago and elsewhere of these assistant inspectors that the gentleman has enumerated. I understood the gentleman to say that they appointed assistant inspectors at New York and then sent them to Chicago. May I ask whether that was a correct understanding on my part?

Mr. ALEXANDER. Did the gentleman ask me?

Mr. MANN. The gentleman or anyone else who knows.

Mr. ALEXANDER. I do not recall having made any such statement myself, and I thought the gentleman referred to some one else.

Mr. MANN. I thought in the conversation between the two gentlemen that statement was made; it may not have been the gentleman.

Mr. MARTIN. I think no reference was made to Chicago beyond it was stated by the chairman, if I understand it, that under the present law they would appoint a certain man to a particular port named and then assign him to duty elsewhere.

Mr. STAFFORD. If the gentleman will permit me to state, Chicago was not able to qualify to have an assistant inspector, because they are required to inspect 225 vessels at a place, and Chicago did not have that number, and so they had to come to Milwaukee to get an assistant inspector who would be detailed to Chicago for temporary duty.

Mr. MANN. I do not even take the trouble to correct another erroneous statement of the gentleman from Wisconsin [Mr. STAFFORD], because it is safe to say that it is erroneous.

Mr. ALEXANDER. The provision of the existing law is this: Section 4414 of the Revised Statutes provides:

There shall be in each of the following collection districts, namely, the districts of Philadelphia, Pa.; San Francisco, Cal.—

And naming other ports—

One inspector of hulls and one inspector of boilers.

And in addition the Secretary of Commerce and Labor may appoint, in districts and ports where there are 225 steamers and upward to be inspected annually, assistant inspectors.

Mr. MANN. Where does that law come from?

Mr. ALEXANDER. In section 4414 of the Revised Statutes.

Mr. MANN. That is not in section 4414 of the Revised Statutes.

Mr. ALEXANDER. It is. The section was amended on March 3, 1905, on April 9, 1906, and May 28, 1908—section 9. And that is the limitation that is undertaken to be removed—the limitation that assistant inspectors shall not be appointed except in ports where they inspect 225 vessels and upward annually.

Mr. MANN. Why should they be appointed?

Mr. ALEXANDER. They shall be appointed where they are needed. Mr. Hoover says there are not 225 vessels inspected annually at Chicago, but yet there is a great need for assistant inspectors there.

Mr. MANN. There is not if there are no more vessels. In Chicago they collect taxes on vessels coming to Chicago. Chicago-owned vessels go to Milwaukee as their own city——

Mr. STAFFORD. Will the gentleman permit an interrogation?

Mr. MANN. No. The gentleman will make another erroneous statement.

Mr. ALEXANDER. I presume they do not all go to Milwaukee. They go to other ports as well. As Mr. Hoover said, when the act was amended in 1905 they overlooked that limitation, and it has resulted in inconvenience.

Mr. MANN. They have two or three inspectors at Chicago and have had for a long time who reported for the Chicago district. They are quite competent, so far as I have heard, to attend to the work in Chicago. May I ask the gentleman what is the provision of the statute putting that limitation in? Where is that to be found?

Mr. ALEXANDER. I have the navigation laws of 1911, section 4414 of the Revised Statutes, as amended by the subsequent acts, as I said before, and it is in the second clause of that section. That is the existing law.

Mr. MANN. I assume that that may be correct, although I am not at all sure that that edition is correct. It is not an official copy. Why do they not tell where the amendment is, where the Revised Statute is amended? You propose to amend a section of the Revised Statutes which you say has been amended four or five or six times by referring to the original statute.

Mr. ALEXANDER. They have simply collected the navigation laws for convenience.

Mr. MANN. I am not criticizing that, but far from it. It is a matter of convenience.

Now, I understood some one to say awhile ago that they appointed an inspector at New York and transferred him to Chicago or some of these other places. They are appointed at New York at a salary of $2,000 a year, are they not? If they were appointed for Chicago, they would be appointed at a salary of $1,600; and I guess that is the reason they are so appointed and transferred. That is the only reason I have seen yet for the passage of this bill.

Mr. ALEXANDER. Well, I gave the explanation made by Mr. Hoover. It is very clear to my mind.

Mr. MANN. May I ask, with all due deference, who Mr. Hoover is?

Mr. ALEXANDER. He is the chief clerk in the office of the inspector general, and a very competent man. He has been there for many years.

Mr. MANN. Very well.

The CHAIRMAN. The Clerk will report the bill for amendment.

The bill was read in full.

Mr. MANN. Mr. Chairman, I move to strike out the last word. The bill provides that every inspector shall be paid his actual and reasonable traveling expenses incurred in the performance of his duties, and so forth. The law now in force provides that these employees shall be allowed—

Only their actual necessary traveling expenses while traveling on official business assigned them by competent authority.

The language of the existing law reads very good to me. It was only inserted in the law a short time ago, after deliberate judgment by Congress. May I ask my friend from Missouri why the department seeks to change the language of the law in reference to traveling expenses, and apparently make it a little more liberal? Is that designedly done?

Mr. ALEXANDER. I did not understand there was any change made at all in the existing law. In fact, Mr. Hoover assured us that no change had been made in the salaries or the compensation of the inspectors.

Mr. MANN. Of course it is very difficult to tell. I have no criticisms to make of the gentleman from Missouri [Mr. ALEXANDER] or anybody else. The gentleman from Missouri is one of the most efficient Members of this House, and unfortunately he has to take charge of a bill, which he brings up this afternoon, probably without having expected that he would have charge of it. The report contains no information.

Mr. ALEXANDER. I will say that my colleague from Texas [Mr. HARDY] was detained at home by illness.

Mr. MANN. He is away for a good reason undoubtedly. The report contains no information, and the gentleman in charge of the bill does the best that he can, but there is a good deal of information that he does not have and that the rest of us do not have. I suggested to somebody over here awhile ago that probably the best way to pass a bill in the House was to have as complete ignorance concerning it as possible, so that you would have nothing on which to base opposition.

Mr. ALEXANDER. Mr. Chairman, I move that the committee do now rise and report the bill to the House with a favorable recommendation.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. GOLDFOGLE, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 20281) to provide for the appointment of certain assistant inspectors, Steamboat-Inspection Service, at ports where they are actually performing duty, but to which they are at present detailed, had directed him to report the same back to the House with the recommendation that it do pass.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ALEXANDER, a motion to reconsider the vote whereby the bill was passed was laid on the table.

CERTIFICATES OF INSPECTION OF STEAM VESSELS.

Mr. ALEXANDER. Mr. Speaker, I call up the bill (H. R. 20107) to amend sections 4421, 4422, 4423, 4424, and 4498 of the Revised Statutes of the United States, and section 12 of the act of May 28, 1908, relating to certificates of inspection of steam vessels.

The SPEAKER. The Clerk will report it.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 4421 of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows:

"SEC. 4421. When the inspection of a steam vessel is completed and the inspectors approve the vessel and her equipment throughout, they shall make and subscribe a certificate, which certificate shall be verified by the oaths of the inspectors signing it, before the chief officer of the customs of the district or any other person competent by law to administer oaths. Such certificate shall be delivered to the master or owner of the vessel to which it relates, and one copy thereof shall be kept on file in the inspectors' office and one copy shall be delivered to the collector or other chief officer of the customs of the district in which such inspection has been made, who shall keep the same on file in his office. If the inspectors refuse to grant a certificate of approval, they shall make a statement in writing and sign the same, giving the reasons for their disapproval. Upon such inspection and approval the inspectors shall also make and subscribe a temporary certificate, which shall set forth substantially the fact of such inspection and approval, and shall deliver the same to the master or owner of the vessel and shall keep a copy thereof on file in their office. The said temporary certificate shall be carried and exposed by vessels in the same manner as is provided in section 4423 for the regular certificate, and the form thereof and the period during which it is to be in force shall be as prescribed by the board of supervising inspectors, or the executive committee thereof, as provided in section 4405. And such temporary certificate, during such period and prior to the delivery to the master or owner of the regular certificate, shall take the place of and be a substitute for the regular certificate of inspection, as required by this section and by section 4426, and for the purposes of said sections. Such temporary certificate shall also be subject to revocation in the manner and under the conditions provided in section 4453. No vessel required to be inspected under the provisions of this title shall be navigated without having on board an unexpired regular certificate of inspection or such temporary certificate: *Provided, however,* That any such vessel operated upon a regularly established line from a port of the United States to a port of a foreign country not contiguous to the United States whose certificate of inspection expires at sea or while said vessel is in a foreign port or a port of the Philippine Islands or Hawaii may lawfully complete her voyage without the regular certificate of inspection or the temporary certificate required by this section, and no liability for penalties imposed by this title for want of such certificate shall be incurred until her voyage shall have been completed: *Provided,* That said voyage shall be so completed within 30 days after the expiration of said certificate or temporary certificate: *Provided further,* That no such vessel whose certificate of inspection shall expire within 15 days of the date of her sailing shall proceed upon her voyage to such port of a foreign country not contiguous to the United States without first having procured a new certificate of inspection or the temporary certificate required by this section."

SEC. 2. That section 4422 of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows:

"SEC. 4422. Upon the application of any master or owner of any steam vessel employed in the carriage of passengers, for a license to carry gunpowder, the local inspectors shall examine such vessel, and if they find that she is provided with a chest or safe composed of metal, or entirely lined and sheathed therewith, or if the vessel has one or more compartments thoroughly lined and sheathed with metal, at a secure distance from any fire, they may grant a certificate to that effect, authorizing such vessel to carry as freight within such chest, safes, or compartments, the article of gunpowder, which certificate shall be kept conspicuously posted on board such vessel."

SEC. 3. That section 4423 of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows:

"SEC. 4423. The original certificate of inspection delivered to the master or owner of a steam vessel shall be placed by such master or owner in a conspicuous place in the vessel where it will be most likely to be observed by passengers and others, and there kept at all times, framed under glass, as evidence of the authority thereby conferred: *Provided, however,* That where it is not practicable to so expose said certificate, it shall be carried in the vessel in such manner as shall be prescribed by the regulations established by the board of supervising inspectors with the approval of the Secretary of Commerce."

SEC. 4. That section 4424 of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows:

"SEC. 4424. Whenever any passenger is received on board any steam vessel not having an unexpired certificate of approval or an unexpired temporary certificate of approval placed and kept as required by this title, or whenever any passenger steam vessel receives or carries any gunpowder on board, not having a certificate authorizing the same, placed and kept as required, or shall carry any gunpowder at a place or in a manner not authorized by such certificate, such steam vessel shall be liable to a penalty of $100 for each offense."

SEC. 5. That section 4498 of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows:

"SEC. 4498. A register, enrollment, or license shall not be granted, or other papers be issued by any collector or other chief officer of customs to any vessel subject by law to inspection under this title until all the provisions of this title applicable to such vessel have been fully complied with and until the copy of the certificate of inspection required by this title for such vessel has been filed with said collector or other chief officer of customs."

SEC. 6. That section 12 of the act entitled "An act to amend the laws relating to navigation, and for other purposes," approved May 28, 1908, be, and the same is hereby, amended so as to read as follows:

"SEC. 12. That a register, enrollment, or license shall not be issued or renewed by any collector or other officer of customs to any such barge unless at the time of issue or renewal such barge has in force the certificate of inspection prescribed by section 10 and on board the equipment prescribed by section 11."

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ALEXANDER, a motion to reconsider the vote whereby the bill was passed was laid on the table.

INVESTIGATION OF PREDACEOUS FISHES AND AQUATIC ANIMALS.

Mr. ALEXANDER. Mr. Speaker, I desire to call up the bill (H. R. 16477) to conduct investigations and experiments for ameliorating the damage wrought to the fisheries by predaceous fishes and aquatic animals.

The SPEAKER. Will the gentleman give the calendar number?

Mr. ALEXANDER. It is Union Calendar No. 245. I ask unanimous consent, Mr. Speaker, that the bill be considered in the House as in Committee of the Whole. I will say that this is the last bill I expect to call up this afternoon.

The SPEAKER. The Clerk will report it by title.

The Clerk read as follows:

A bill (H. R. 16477) to conduct investigations and experiments for ameliorating the damage wrought to the fisheries by predaceous fishes and aquatic animals.

Mr. ALEXANDER. Mr. Speaker, inasmuch as this bill is on the Union Calendar, I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Missouri [Mr. ALEXANDER] asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Commissioner of Fisheries be, and he is hereby, authorized and directed to conduct investigations and experiments for the purpose of ameliorating the damage wrought to the fisheries by dogfish and other predaceous fishes and aquatic animals.

SEC. 2. That the said investigations and experiments shall be such as to develop the best and cheapest means of taking such fishes and aquatic animals, of utilizing them for economic purposes, especially for food, and to establish fisheries and markets for them; and for these purposes the Commissioner of Fisheries is authorized to employ such persons as may be necessary, and to catch, buy, or otherwise obtain, and to sell at cost or less or distribute gratuitously such quantities of the said aquatic products as may be necessary for tests or demonstrations of their qualities or the establishment of a demand among prospective consumers: *Provided*, That the proceeds of any such sales shall be accounted for and covered into the Treasury as miscellaneous receipts.

SEC. 3. That the Commissioner of Fisheries, through the Secretary of Commerce, shall submit in his annual estimates of appropriations for the Bureau of Fisheries an estimate of the sum of money necessary to give effect to this act.

The SPEAKER. The Clerk will read the bill for amendment.

The Clerk read as follows:

SEC. 2. That the said investigations and experiments shall be such as to develop the best and cheapest means of taking such fishes and aquatic animals, of utilizing them for economic purposes, especially for food, and to establish fisheries and markets for them; and for these purposes the Commissioner of Fisheries is authorized to employ such persons as may be necessary, and to catch, buy, or otherwise obtain, and to sell at cost or less or distribute gratuitously such quantities of the said aquatic products as may be necessary for tests or demonstrations of their qualities or the establishment of a demand among prospective consumers: *Provided*, That the proceeds of any such sales shall be accounted for and covered into the Treasury as miscellaneous receipts.

Mr. MANN. Mr. Speaker, I move to strike out section 2. This bill is being read for amendment.

The SPEAKER. That is so. The gentleman from Illinois [Mr. MANN] moves to strike out section 2.

Mr. MANN. Mr. Speaker, the first part of this bill provides for an investigation of dogfish and other predaceous fishes and aquatic animals. That is all right. This section, which I think has not met with very much approval, even from the committee which reported it, authorizes the Department of Commerce to go into the business of buying, selling, or giving away fish. I think the gentleman will realize that whether it ought to be in the law or not there is no possibility of the bill being enacted into law at this session of Congress with that section in it—"to catch, buy, or otherwise obtain, and to sell at cost or less or distribute gratuitously such quantities of the said aquatic products as may be necessary for tests," and so forth. We can not undertake that.

Mr. ALEXANDER. Mr. Speaker, I yield to the gentleman from Maine [Mr. HINDS], the author of the bill.

Mr. HINDS. I do not object to that going out, if that will save the bill.

Mr. MANN. There would be no chance for the bill with that in it.

The SPEAKER. The question is on agreeing to the amendment of the gentleman from Illinois, to strike out section 2.

The amendment was agreed to.

The SPEAKER. The Clerk will read.

The Clerk read as follows:

SEC. 3. That the Commissioner of Fisheries, through the Secretary of Commerce, shall submit in his annual estimates of appropriations for the Bureau of Fisheries an estimate of the sum of money necessary to give effect to this act.

With a committee amendment as follows:

Amend by adding, after the word "act," on page 2, line 16, the words "*Provided*, That the said sum shall not exceed $15,000 in any fiscal year."

Mr. MANN. Mr. Speaker, I move to amend the committee amendment by striking out "$15,000" and inserting "$5,000."

The SPEAKER. The gentleman from Illinois [Mr. MANN] moves to amend the committee amendment by striking out "$15,000" and inserting "$5,000." The question is on agreeing to that amendment.

The amendment was agreed to.

The SPEAKER. The question is on agreeing to the committee amendment as amended.

The committee amendment as amended was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ALEXANDER, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. MANN. Mr. Speaker, I make the point of order that there is no quorum present.

Mr. ALEXANDER. Mr. Speaker, will the gentleman withhold that?

Mr. MANN. I will withhold it.

Mr. ALEXANDER. I will say that I shall move to adjourn soon.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 655. An act authorizing the Secretary of the Interior to survey the lands of the abandoned Fort Assiniboine Military Reservation and open the same to settlement.

PENSIONS.

Mr. RUSSELL. Mr. Speaker, I ask unanimous consent to disagree to the Senate amendments to two omnibus pension bills, H. R. 19545 and H. R. 20562, and to ask for a conference.

The SPEAKER. The gentleman from Missouri asks unanimous consent to disagree to the Senate amendments——

Mr. MANN. To take these bills from the Speaker's table.

Mr. RUSSELL. They are on the Speaker's table.

The SPEAKER. The gentleman asks unanimous consent to take from the Speaker's table H. R. 19545 and H. R. 20562, disagree to the Senate amendments, and ask for a conference. Is there objection?

There was no objection; and the Speaker appointed as conferees on the part of the House Mr. SHERWOOD, Mr. ADAIR, and Mr. LANGHAM.

ADJOURNMENT.

Mr. ALEXANDER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

Accordingly (at 4 o'clock and 54 minutes p. m.) the House adjourned until Thursday, February 4, 1915, at 11 o'clock a. m.

EXECUTIVE COMMUNICATION.

Under clause 2 of Rule XXIV, a letter from the Secretary of War, transmitting a letter from the Acting Chief of Engineers, United States Army, submitting, in accordance with the provisions of section 4 of the rivers and harbors act, June 25, 1910 (36 Stat., 676), certain claims against the United States, which have been adjusted and settled by the Chief of Engineers and approved by the Secretary of War (H. Doc. No. 1557), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. FLOYD of Arkansas, from the Committee on the Judiciary, to which was referred the bill (H. R. 18086) to amend section 71 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 4, 1911, reported the same without amendment, accompanied by a report (No. 1346), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (H. R. 20814) to place Candler and Evans Counties, Ga., in the eastern division of the southern district of Georgia, reported the same with amendment, accompanied by a report (No. 1347), which said bill and report were referred to the House Calendar.

Mr. GARD, from the Committee on the Judiciary, to which was referred the bill (H. R. 19907) to incorporate the Boy Scouts of America, and for other purposes, reported the same with amendment, accompanied by a report (No. 1362), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 17122) for the relief of John Burrows, reported the same with amendment, accompanied by a report (No. 1348), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 691) for the relief of Simon M. Preston, reported the same without amendment, accompanied by a report (No. 1360), which said bill and report were referred to the Private Calendar.

Mr. PRICE, from the Committee on Claims, to which was referred the bill (H. R. 18197) for the relief of Arthur W. Fowler, reported the same with amendment, accompanied by a report (No. 1355), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 19325) for the relief of Joseph A. Jennings, reported the same with amendment, accompanied by a report (No. 1349), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 15666) for the relief of John A. Ryan, reported the same with an amendment, accompanied by a report (No. 1350), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 17174) to pay the claim of the American Towing & Lightering Co. for damages to its tug *Buccaneer*, reported the same without amendment, accompanied by a report (No. 1352), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill H. R. 19399, reported in lieu thereof a resolution (H. Res. 720) referring to the Court of Claims the papers for the relief of Frank H. Walker and Frank E. Smith, accompanied by a report (No. 1351), which said resolution and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 13709) for the relief of Joe Davis, reported the same with an amendment, accompanied by a report (No. 1357), which said bill and report were referred to the Private Calendar.

Mr. POU, from the Committee on Claims, to which was referred the bill (S. 2589) for the relief of Peter McKay, reported the same with an amendment, accompanied by a report (No. 1359), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 20800) for the relief of Charlotte M. Johnston, reported the same without amendment, accompanied by a report (No. 1356), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 3925) for the relief of Teresa Girolami, reported the same without amendment, accompanied by a report (No. 1361), which said bill and report were referred to the Private Calendar.

Mr. EVANS, from the Committee on Claims, to which was referred the bill (H. R. 16896) for the relief of Col. Richard H. Wilson, United States Army, reported the same without amendment, accompanied by a report (No. 1353), which said bill and report were referred to the Private Calendar.

Mr. DIES, from the Committee on Claims, to which was referred the bill (H. R. 21077) for the relief of W. F. Crawford, reported the same without amendment, accompanied by a report (No. 1354), which said bill and report were referred to the Private Calendar.

ADVERSE REPORT.

Under clause 2 of Rule XIII,

Mr. PRICE, from the Committee on Claims, to which was referred the bill (H. R. 18756) for the relief of Mollie H. Pumphrey, reported the same adversely, accompanied by a report (No. 1358), which said bill and report were laid on the table.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. ADAIR (by request): A bill (H. R. 21304) to create an executive department of peace; to the Committee on Foreign Affairs.

By Mr. MADDEN: A bill (H. R. 21305) to provide for the entry under bond of exhibits of arts, sciences, and industries; to the Committee on Ways and Means.

By Mr. BUCHANAN of Illinois: Resolution (H. Res. 719) directing the Postmaster General to furnish the House of Representatives certain information; to the Committee on the Post Office and Post Roads.

By Mr. BYRNS of Tennessee: Memorial of the House of Representatives of the State of Tennessee, favoring a national highway fund; to the Committee on Roads.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DECKER: A bill (H. R. 21306) granting an increase of pension to Benjamin F. Bailey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 21307) granting an increase of pension to John K. Miller; to the Committee on Invalid Pensions.

By Mr. FESS: A bill (H. R. 21308) granting an increase of pension to Joseph M. Hunter; to the Committee on Invalid Pensions.

By Mr. HELM: A bill (H. R. 21309) granting an increase of pension to William R. Williams; to the Committee on Invalid Pensions.

By Mr. HENSLEY: A bill (H. R. 21310) granting an increase of pension to John Parker; to the Committee on Invalid Pensions.

By Mr. LONERGAN: A bill (H. R. 21311) granting a pension to Bridget Kenney; to the Committee on Pensions.

Also, a bill (H. R. 21312) granting an increase of pension to Louisa Ludwick; to the Committee on Invalid Pensions.

By Mr. MORRISON: A bill (H. R. 21313) granting a pension to Otto Day; to the Committee on Pensions.

By Mr. RUCKER: A bill (H. R. 21314) granting an increase of pension to Martha F. Sweeney; to the Committee on Invalid Pensions.

By Mr. EDMONDS: Resolution (H. Res. 720) for the relief of Frank H. Walker and Frank E. Smith; to the Committee of the Whole House.

By Mr. SHERWOOD: Resolution (H. Res. 721) authorizing the payment of $600 to Norman E. Ives; to the Committee on Accounts.

By Mr. HOWARD: Resolution (H. Res. 722) to pay $600 to Lillie M. Reesch for extra services rendered in connection with statements filed by Members of Congress; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petitions of various labor organizations of the United States, favoring passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also (by request), memorial of the executive council of the Minnesota State Federation of Labor, urging passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. ASHBROOK: Petitions of the New York State Federation of Labor; the Minnesota State Federation of Labor; the International Seamen's Union of America; the Pennsylvania State Federation of Labor; the International Brotherhood of Teamsters, Chauffeurs, Stablemen, and Helpers of America; the International Protective Association of Retail Clerks; and the Railway Employees' Department, praying for the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, protest by the Upson Nut Co., of Cleveland, Ohio, against the Alexander bill (H. R. 18666), relating to Government ownership and operation of merchant vessels; to the Committee on the Merchant Marine and Fisheries.

Also, resolutions of the German-American Alliance and the Ancient Order of Hibernians of Newark, Ohio, with a membership of 1,200, praying for legislation to prohibit the shipment of arms and munitions of war to the belligerent countries of Europe; to the Committee on Foreign Affairs.

Also, petition of Jerry Loewendick and 123 other citizens of Newark, Ohio, praying for an embargo upon all contraband of war exportations; to the Committee on Foreign Affairs.

By Mr. BAILEY: Petitions of Leonard Yeager, J. J. Hauser, Christian Benz, jr., F. W. Boldt, John Yeager, jr., Michael Nole, R. Reufbacher, Martin G. Archelman, and Martin Archelman, all of Altoona, Pa., favoring passage of House joint resolution 377, forbidding exportation of arms; to the Committee on Foreign Affairs.

Also, petition of president Chicago Branch National Association, A. C. P., protesting against jim-crow cars in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of David P. Roberts, Saxman, Cambria County, Pa., protesting against the Fitzgerald amendment to the Post Office appropriation bill relative to freedom of the press; to the Committee on the Post Office and Post Roads.

By Mr. BROWNING: Petition of New Jersey Federation of Patriotic Fraternities, Camden Branch, favoring Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. DALE: Petitions of International Seamen's Union of America and sundry organizations of workers of the United States, favoring passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. EAGAN: Petition of Nicholas Winter, of Union, N. J., favoring passage of resolution to prohibit export of war material; to the Committee on Foreign Affairs.

Also, petitions of Max Krapp and Henry Hagen, of Union Hill, N. J., favoring resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. FESS: Petition of the Fairfield quarterly meeting of the Society of Friends, representing 1,682 people, urging passage of the bill for the advancement of peace; to the Committee on the Judiciary.

By Mr. GOEKE: Petitions of J. J. Dues and other citizens of Minster, and T. J. Lankenan and others, of Ohio, favoring resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. GRAHAM of Illinois: Petitions of sundry citizens of Taylorville, Carlinville, Brighton, Nokomis, Mount Olive, and Bunker Hill, Ill., favoring resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. GRAHAM of Pennsylvania: Memorial of New York State Federation of Labor, Utica, and International Brotherhood of Paper Makers, of Albany, N. Y., favoring passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of mass meeting of citizens of New York, protesting against the literacy test in the immigration bill; to the Committee on Immigration and Naturalization.

Also, memorial of New York nonpartisan citizenship committee, relative to sustaining President Wilson in his action on the immigration bill; to the Committee on Immigration and Naturalization.

By Mr. GREENE of Vermont: Petition of Goethe Lodge, D. O. H., of the first congressional district of Vermont, favoring House joint resolution 377, relative to export of war material; to the Committee on Foreign Affairs.

By Mr. GRIEST: Petition of H. Engel Kern and others, of Columbia, Pa., and vicinity, favoring an embargo on war material; to the Committee on Foreign Affairs.

By Mr. HENSLEY: Petition of F. E. Goehring and others, of Frohna, Mo., favoring resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. KENNEDY of Rhode Island: Petition of U. S. Ring Traveler Co., of Providence, R. I., protesting against preventing sale of stamped envelopes by United States; to the Committee on the Post Office and Post Roads.

By Mr. LIEB: Petition of Rev. G. D. Gurley, August Pepmiller, J. W. Fugeray, Charles Mathews, G. W. Williams, Charles E. Merrill, Otto J. Rettek, Peter Retter, Otto J. Kuebler, H. J. Katenhauser, Edward G. Folz, O. V. Knapp, F. C. Raber, Otto A. Britzins, William Koch, Theo. Britzins, Charles Munn, V. Kriekbram, O. M. Medcalf, J. C. De Forest, W. M. Walden, M. D., John W. Barrett, Gus Keller, E. G. Harris, Arthur Seybold, all of Newburg, Ind., and Charles H. Meier, of Evansville, Ind., favoring Senate bill 6683 and House bill 19548; to the Committee on Foreign Affairs.

Also, petition of R. I. Brockett, Henry D. Stahlschmidt, Frank Miller, Walter Becker, H. F. Berg, Farmer Ruston, Freeman Moss, John G. Wimberg, P. H. Kiely, W. A. Bosse, G. W. Pfender, all of Evansville, Ind., favoring Hamill bill, H. R. 5139; to the Committee on Reform in the Civil Service.

By Mr. LOBECK: Petition of United Brotherhood of Carpenters and Joiners, Central Labor Union, International Molders' Union, firemen's organization of Omaha, and Central Labor Union of Lincoln, favoring Burnett immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of Plattdeutscher Verein and 54 citizens of Millard, Nebr.; also 23 citizens of second Nebraska congressional district, favoring legislation to prevent export of arms; to the Committee on Foreign Affairs.

By Mr. MACDONALD: Memorial of members of the Polish National Alliance, Nos. 99 and 107, of Calumet, and of the Tow Siv Piotra Polish Society, of Ironwood, Mich., protesting against the Smith-Burnett immigration bill; to the Committee on Immigration and Naturalization.

Also, petitions of William C. Kauth, F. C. Seideman, and others, of Hancock, and Henry Wachter and others, of Bagley, Daggett, Stephenson, and Ingalls, Mich., favoring an embargo on war material; to the Committee on Foreign Affairs.

By Mr. MAHAN: Petition of German-American Alliance, of Middletown, Conn., favoring passage of resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. MOORE: Resolutions and letters from the Stockton (Cal.) Merchants' Association; Salida (Colo.) Commercial Club; Fort Scott (Kans.) Industrial Association; Merchants' Association of Snohomish County, Wash.; Osakis (Minn.) Commercial Club; Commercial Club of Benson, Minn.; Curtis (Nebr.) Commercial Club; Ardmore (Okla.) Chamber of Commerce; and Baraboo (Wis.) Commercial Association, all urging the passage of House bill 5308, providing for a tax on all persons, corporations, etc., engaged in the mail-order business; to the Committee on Ways and Means.

By Mr. MORIN (by request): Petitions of citizens and organizations of Pennsylvania, New York, Chicago, St. Louis, and Indianapolis, favoring Burnett immigration bill; to the Committee on Immigration and Naturalization.

Also (by request), petition of B'rith Sholem Verein of Pittsburgh, Pa., requesting that the President's veto of the immigration bill be sustained; to the Committee on Immigration and Naturalization.

Also (by request), petition of a conference of American citizens representing church, benevolent, educational, and other civil organizations, held at Washington, D. C., favoring embargo on export of arms; to the Committee on Foreign Affairs.

By Mr. MURDOCK: Petition of H. Penner and five other citizens of Whitewater, Kans., urging the passage of House bill 5308, compelling concerns selling goods to customers entirely by mail to contribute their portion of funds toward the development of the local community, the county, and State; to the Committee on Interstate and Foreign Commerce.

Also, petition of Messrs. Stanley and Krebbiel, of Elyria, Kans., favoring House bill 5308, to tax mail-order houses; to the Committee on Interstate and Foreign Commerce.

Also, petition of R. G. Barnes, of Galva, Kans., favoring House bill 5308, to tax mail-order houses; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Haldeman Mercantile Co. and four others of Inman, Kans., favoring House bill 5308, to tax mail-order houses; to the Committee on Interstate and Foreign Commerce.

Also, petition of Messrs. Riesen and Dysk and three others of Halstead, Kans., favoring House bill 5308, to tax mail-order houses; to the Committee on Interstate and Foreign Commerce.

Also, petition of Mr. Armoner and three others, of Bentley, Kans., favoring House bill 5308, to tax mail-order houses; to the Committee on Interstate and Foreign Commerce.

Also, petition of F. A. Rice and six others of Potwin, Kans., favoring House bill 5308, to tax mail-order houses; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Gouring Krehbul Mercantile Co. and 10 others, of Moundridge, Kans., favoring H. R. 5308, to tax mail-order houses; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Hanlin Sheep Mercantile Co. and 21 others, of Newton, Kans., favoring H. R. 5308, to tax mail-order houses; to the Committee on Interstate and Foreign Commerce.

Also, petition of Ira G. Wilson and 7 others, of Canton, Kans., favoring H. R. 5308, to tax mail-order houses; to the Committee on Interstate and Foreign Commerce.

Also, petition of R. C. Strahm and 17 others, of McPherson, Kans., favoring H. R. 5308, to tax mail-order houses; to the Committee on Interstate and Foreign Commerce.

By Mr. J. I. NOLAN: Communications from the railway employees' department of the American Federation of Labor, the Pennsylvania State Federation of Labor, the International Brotherhood of Teamsters and Chauffeurs of America, the Retail Clerks' International Protective Association, the International Seamen's Union of America, and the New York State Federation of Labor, all favoring the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, telegram from the San Francisco Labor Council, and communications from the International Brotherhood of Paper Makers and the Minnesota State Federation of Labor, favoring the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. RAKER: Petition of A. Lenteneker, of Chicago Park, Cal., favoring House joint resolution 377, forbidding export of arms; to the Committee on Foreign Affairs.

By Mr. SABATH: Petition of Star of Hope and other Polish societies of Chicago, Ill., protesting against the literacy test in the immigration bill; to the Committee on Immigration and Naturalization.

By Mr. SMITH of Idaho: Petition of Mrs. J. R. Fletcher and others, of Hill City, Idaho, favoring national prohibition; to the Committee on the Judiciary.

By Mr. STEENERSON: Petition of 53 citizens of Hawley, 72 citizens of Lewisville, 17 citizens of Kratka, citizens of Ottertail, Richville, and Thief River Falls, all in the State of Minnesota, favoring House joint resolution 377, forbidding export of arms; to the Committee on Foreign Affairs.

By Mr. VOLLMER: Petitions of 790 American citizens, favoring passage of resolution to prohibit export of war material; to the Committee on Foreign Affairs.

By Mr. WEAVER: Memorial of the Shawnee (Okla.) Trades and Labor Assembly, urging the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of railway employees' department of the American Federation of Labor, urging the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of the International Brotherhood of Teamsters, Chauffeurs, Stablemen, and Helpers of America, urging the Congress to pass the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of the United Brotherhood of Carpenters and Joiners, urging the passage by Congress of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

Also, memorial of the Pattern Makers' League of North America, urging the passage of the immigration bill over the President's veto; to the Committee on Immigration and Naturalization.

SENATE.

THURSDAY, *February 4, 1915.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, Thy name is above every name. Thy authority alone is supreme in all the universe. Thou art the Supreme Judge of men. There is no revoking Thy order; no appeal from Thy decree. Thou dost rule us by Thy power and Thy love. We bless Thee that Thou hast revealed unto us the infinite tenderness of Thy love; that Thou dost refine our spirits more and more; that by the gentle influence of Thy grace we are enabled more and more to know the infinite tenderness of the love of God.

Grant us this day to return love for Thy love and obedience to Thy will, that we may be in subjection to the great God of heaven to do the will of our Father which is in heaven. For Christ's sake. Amen.

ALBERT B. FALL, a Senator from the State of New Mexico, appeared in his seat to-day.

THE JOURNAL.

The Journal of yesterday's proceedings was read.

Mr. LODGE. Mr. President——

The VICE PRESIDENT. The Senator from Massachusetts.

Mr. LODGE. Mr. President, I do not want it to be supposed that I am going to make a habit of discussing the Journal. I have always felt that the reading of the Journal was a ceremony to be disposed of rapidly and dispensed with as far as possible. But "absence makes the heart grow fonder," and I am beginning to feel some attachment to a Journal which we do not get except at intervals, perhaps, of 10 days or more, when it is presented to us in a large and more or less inaccurate mass.

I do not wish to speak about this Journal of yesterday which has just been read, but in connection with the Journal of Tuesday which, by unanimous consent, went over for revision. I wish to correct an error into which I think I may have fallen myself in what I said about the Journal of Tuesday. On last Friday—I think it was last Friday, but since we have abandoned the Gregorian calendar, which is in general use among mankind, and devised a new calendar of our own, I may not be perfectly accurate—but last Friday, I think, was the occasion when we had some great movements here in the field of parliamentary law; it was my misfortune—and I regard it as a very great misfortune—that I was not present to listen during that period, for it is very interesting to see parliamentary law in the making, and that evening we not only revised a good many rules of the Senate, but we made some wholly new parliamentary law never conceived or thought of before.

I was reminded in that connection of an old story which everybody has heard. When some one said in the House of Commons to Henry Labouchere that the story he had just told was neither true nor new, he said he did not in the least object to being told that his story was not true, but he did object to being told that it was not new; he was sure it was new because he made all his stories himself. Whatever may be said of the rulings that evening, they were certainly new; and that is why I was anxious for a better revision of the Tuesday Journal.

I now refer to the most important ruling made that night—I think it was the most important—in regard to the use of the ordering of the yeas and nays as a previous question. I said on Tuesday that it was a decision of the Chair. I had taken the CONGRESSIONAL RECORD, and I had noted that on page 2587 at the bottom it said:

The PRESIDING OFFICER (Mr. JAMES in the chair).

I read it along to page 2590, where the rulings occurred in the first and second columns, and I assumed that they were made by the Senator from Kentucky [Mr. JAMES], for there was no statement that the Senator from Kentucky had left the chair. When the Senator from Georgia [Mr. SMITH] said that he thought I was mistaken in saying it was a decision, I felt sure it must be a decision, because the Senator from Kentucky never doubts or hesitates; and I was certain that he could not be accused of having made a tentative decision, which was to me a new and ingenious phrase.

I have heard it stated, though it does not appear in the RECORD, that the Senator from Virginia [Mr. SWANSON] made the ruling in question, and the Senator from Georgia, with the natural feeling we all have when we see a friend floundering in the water or trying to escape from a fire, naturally came to the defense of the Senator from Virginia, and said his decision was a "tentative" ruling.

Mr. President, this one fact illustrates the need of a revision of this Tuesday Journal. According to the RECORD, the Senator from Kentucky was in the chair; but the Senator from Georgia, who was an eyewitness, evidently considered that the Senator from Virginia was in the chair. This illustrates the confusion and certainly shows the need of a careful revision of the Journal.

Mr. SMITH of Georgia. Mr. President——

Mr. LODGE. I will yield in a moment.

Now, Mr. President, I think I was not mistaken in the impression conveyed to the Senate by these rulings. The Presiding Officer, according to the RECORD, was the Senator from Kentucky [Mr. JAMES]; according to eyewitnesses, the Senator from Virginia [Mr. SWANSON]; and I, of course, do not wish to take any sides in the contest as to who made those now celebrated rulings. I have heard that both the distinguished Senators to whom I have referred claimed the honor of making those rulings, and since then that, in a spirit of generous rivalry, they are each trying to yield to the other the honor of having made the brilliant discovery of the order of the yeas and nays

as a kind of mongrel previous question. But here is what was said:

The PRESIDING OFFICER. If the Chair is mistaken, he would be very glad to hear any Senator who dissents from the decision of the Chair; but the Chair is satisfied that no amendment to the substitute offered by the Senator from Florida is in order until the yea-and-nay vote has been taken.

Now, that has every appearance of a decision.

However, the Chair understands that the amendment offered by the Senator from New Hampshire is to perfect the original text, which would be voted on prior to the substitute offered by the Senator from Florida, under Rule XVIII, and it being the general parliamentary law that the original text must be perfected before a substitute is voted on. The ordering of the yeas and nays will prevent any amendment being offered to the substitute offered by the Senator from Florida.

Of course, that may be called a tentative decision, but it reads to me very much like a plain decision. Then he said further:

The PRESIDING OFFICER. The Chair is willing to hear any decision to the contrary, but the Chair is of opinion that if the yeas and nays have been ordered on a proposition if it is modified the yeas and nays would have been ordered on a different proposition if an amendment were made.

There is the ingenious reason for a decision which is not a decision clearly given.

If the mover of a resolution, under the rules of the Senate, can not modify it after the yeas and nays are ordered, it would seem to the Chair that any proposition upon which the yeas and nays have been ordered would be of equal dignity.

I am not going to enter into the obvious proposition that the admission of an amendment to the original bill would change the situation just as much as a perfecting amendment to the substitute. This goes to the merits of the question, and with the merits of the question I am not now concerned. Such, then, are the "tentative" rulings.

The Senate on both sides, I think, understood that the question had been determined when the Senator from Arkansas [Mr. CLARKE] on Monday—I believe I am again right in reference to the calendar day—moved to recommit the bill. The Senator from Florida [Mr. FLETCHER], in charge of the bill, who is a Senator of long service and an experienced parliamentarian, following, of course, closely the decisions that had been so recently and brilliantly made, said:

Mr. President, I make the point of order that that motion is not in order. The Senate has decided to take a vote on the pending question and the yeas and nays have been ordered. No other motion is in order until that is decided. The Senate has determined that, and I make that point of order.

So the impression on the mind of the senior Senator from Florida as to the tentative decision was the same as the impression upon my mind and, I think, upon those of all the Senators around me that the question had been determined by the Senator from Virginia.

Thereupon, as we all know, the question came to the Senate and the Senate decided that the new ruling was not correct and returned the body by their decision to the old, and, as I believe, only sound, ground, which is that ordering the yeas and nays; that is, determining the method of taking a vote when a vote is reached, is not in the nature of ordering the previous question on amendments, although not on debate, and that decision of the Senate, of course, stands until the Senate reverses it or until some one occupies the chair who has forgotten it. This Friday ruling was a very important one. It had a brief life from Friday night until Monday afternoon, but it was beautiful and pleasant in its life, and while it existed we all wondered and obeyed. Now, it has been ruthlessly disposed of by a Senate vote.

Mr. President, I call attention to these facts in order to correct my own error, if I was wrong in my opinion as to the Friday night ruling. I also call attention to it so that those who have the Journal in charge may make certain who was the Senator in the chair who made that ruling. I think we ought to know, and I wished to call attention to it before the Friday Journal is finally approved.

Mr. SMITH of Georgia. Mr. President, when the Senator from Massachusetts called attention—the Senator from Massachusetts yields?

Mr. LODGE. Certainly; I have yielded.

The VICE PRESIDENT. The Senator from Georgia.

Mr. SMITH of Georgia. When the Senator from Massachusetts called attention to the action of the Senate on Friday night last, by his consent I sought to correct him at the time and to suggest that he was in error when he supposed that the Presiding Officer on Friday last ruled that an amendment could not be entertained to a pending proposition after a call for the yeas and nays. The Senator from Massachusetts referred to the manner in which the Senator from Virginia when in the chair handled this question, and I called to his attention the fact that the Senator from Virginia in the chair did not rule on it, that he expressed a tentative opinion and refrained from ruling.

Mr. LODGE. Will the Senator allow me to ask him a question?

Mr. SMITH of Georgia. Certainly.

Mr. LODGE. Then I understand the Senator thinks that those two rulings—rulings as they seem to me—were made by the Senator from Virginia and not by the Senator from Kentucky.

Mr. SMITH of Georgia. No rulings were made by either on this subject.

Mr. LODGE. We will not dispute about terms.

Mr. SMITH of Georgia. The language referred to was by the Senator from Virginia.

Mr. LODGE. The two statements that I read were made by the Senator from Virginia, not by the Senator from Kentucky?

Mr. SMITH of Georgia. The statements were by the Senator from Virginia.

Mr. LODGE. Exactly; and then the RECORD is wrong.

Mr. SMITH of Georgia. The RECORD is wrong.

Mr. JAMES. Mr. President——

Mr. SMITH of Georgia. One moment. I do not yield for the present, if the Senator from Kentucky will allow me to finish answering the Senator from Massachusetts. The RECORD fails to show the place at which the Senator from Kentucky ceased to preside. The CONGRESSIONAL RECORD shows the Senator from Kentucky in the chair and later on shows the Senator from Kentucky on the floor raising a point of order without showing at any place in the CONGRESSIONAL RECORD when the Senator from Kentucky ceased to be in the chair and when the Senator from Virginia took the chair.

What I rose for was to emphasize the suggestion that I made to the Senator from Massachusetts when he brought this subject to the attention of the Senate before. The Senator from Virginia [Mr. SWANSON] did not rule that the amendment to the substitute was out of order upon the ground that the yeas and nays had been called for. He could not have ruled it out of order, for no amendment to the substitute was at that time presented.

Mr. LODGE. Mr. President——

Mr. SMITH of Georgia. Just one moment, please.

Mr. LODGE. Certainly.

Mr. SMITH of Georgia. The amendment offered was to the original text; and the Senator from Virginia held that, as it was to the original text, it was in order. He went on, however, and expressed tentatively his views. There was no opportunity for an appeal from the decision of the Chair, because there was no decision, there was no amendment offered on which an appeal could be based. So it in no sense takes the form of a ruling of the Chair affecting the procedure of the Senate, but is merely an expression of an opinion by the Presiding Officer upon a subject that was not before him.

Just one moment further now. A little prior to that time when the subject was up, the Senator will find, on page 2589, that the Presiding Officer said:

It is not now in order—

That is to say, to offer an amendment—

because a motion to lay on the table has been made by the Senator from Utah. It is not in order until that motion is disposed of.

That was after the call for the yeas and nays. So upon that same Friday afternoon we hear the Chair indicating clearly that after the disposition of the motion to lay on the table an amendment might be offered to the substitute, although a call for yeas and nays had been made.

Mr. President, my view was very pronounced upon this subject. I believed that an amendment could still be made; I believed that the rules specifically permitted the amendment; I believed, and I still believe, that Rule XV expressly authorized a motion to recommit until final action upon the bill; I have no doubt about that myself. Of course, as I claim the privilege of my own opinion, I concede most heartily to others their opinion. I only wish to prevent the Senator from Massachusetts [Mr. LODGE] from strengthening the authority against the right to offer an amendment after the yeas and nays were called. I wish to remove the suggestion that any ruling on Friday last was authority against the right to move to recommit after the yeas and nays were called, for there had been no formal ruling on the subject in the Senate on Friday from which an appeal was taken.

I do not desire to occupy the attention of the Senate just now, but at a little later time I may present to the Senate a short statement with reference to Rule XV and with reference to the constitutional provision and the history of the constitu-

tional provision on the yeas and nays, which to me conclusively sustains the opinion that the yeas and nays are only intended as a means of recording the vote, to furnish the status of each Senator to the public, and not to give a minority the privilege of segregating a question and preventing the majority from shaping it as they wish to shape it before they finally vote on it.

Mr. LODGE. Mr. President, before the Senator takes his seat I wish to suggest that it is hardly necessary for me to say that I agree with him absolutely in his view as to the yeas and nays and their uses, and my vote shows that. What I want to ask him is—for I am trying to learn as we go on here developing our parliamentary law——

Mr. SMITH of Georgia. I shall be glad to give the Senator from Massachusetts the benefit of any information I have.

Mr. LODGE. I want to ask the Senator this: Does the Senator hold that the Chair can not make the ruling unless he rules and opens the opportunity for appeal? Over and over again, both in the Senate and in the other House, I have seen Senators and Members of the House rise and ask the Chair if an amendment or a motion would be in order, and the Chair would say "the motion is not in order," and the motion would never be offered; there would never be an opportunity for an appeal; but the Chair would rule on the right of the Member or his request to offer the amendment. It has always been taken as a ruling.

The Senator from Georgia says that this was a tentative statement. It seems to me, on reading it pretty carefully, to be about as explicit, with the reasons, as a ruling can be made.

Mr. ROOT. Mr. President——

Mr. SMITH of Georgia. The Senator from Massachusetts asked me a question, and I suppose he wished me to answer it?

Mr. LODGE. Certainly.

Mr. SMITH of Georgia. I know that it is customary for Senators and Members of the other House and of other parliamentary bodies to rise and inquire of the Chair what the Chair's view would be on a subject, but I do not consider answers to such questions by the Chair as rulings in any way binding upon the body. I do not think the Chair could make a ruling that would be binding upon the body unless a question was submitted to him from which the right of appeal would exist. I do not think that from a tentative expression of an opinion of that kind an appeal could properly be made. I would regard it rather as the expression of an opinion by a judge on a subject that was not before him.

Mr. LODGE. My point is that the opportunity for an appeal is not necessary to constitute what the Chair declares a ruling. It can be a ruling without it. I am not saying that the Senator asked, "Would it be in order?" He asked, "Is this amendment in order?" And the Chair said, "No; it would not be in order at this time," or, "It would not be in order." I have seen that done again and again. That, in my judgment, is a ruling of the Chair.

Mr. SMITH of Georgia. I should look upon that rather as advice by the Chair to the one making the inquiry; and if I were interested in the matter, it seems to me I would rather tender my motion or tender my amendment and go through the various parliamentary stages of insisting upon my rights, unless I wanted simply to act upon the advice of the presiding officer.

Mr. LODGE. I do not think that——

Mr. SMITH of Georgia. One moment. Referring also to the expression of the Senator from Virginia, when he was in the chair, he expressly stated before he finished his remarks, as I recall them, that he did not intend to rule upon the subject; that it was not then before him; and he did not say that he would not entertain an amendment if it was offered. The Senator from Virginia, however, is now in his seat, and is better capable than am I of discussing what he said.

Mr. LODGE. Mr. President, I do not care to discuss the merits of the ruling. I am afraid I am beyond change on that. But I want to ask the Senator from Georgia one other question. Is it not true, as is shown by the statement of the Senator from Florida [Mr. FLETCHER] which I read, that he regarded the question as determined by the Senate—he used that phrase—and that is what I regard it, as determined? I mean that was the idea certainly in the Senate.

Mr. SMITH of Georgia. I was present in the Senate at the time when the expressions by the Presiding Officer were made; I knew that I differed from some of my colleagues in my opinion about the subject, and I was watching it pretty constantly, intending myself to insist upon my own view of the rule if the occasion required. With all deference to the views of my colleagues, I had such a pronounced view upon the subject that I could not yield it, and if the ruling had been made it had been my own purpose, most courteously and, of course, deferentially, to appeal from the ruling, because I regarded it as a matter of the utmost importance to preserve the permanent right of Senators to perfect measures before them and to prevent a ruling which would allow one-fifth of the Senate the opportunity to segregate a question and force it to a vote to the exclusion of the desire of four-fifths to put it in the shape in which they desired finally to vote upon it before they did vote. My views were so strong upon that subject that it was well known that I intended if necessary to appeal from any ruling to the contrary and to submit it to the Senate.

Mr. JAMES. Mr. President——

The VICE PRESIDENT. The Senator from Kentucky.

Mr. JAMES. Mr. President, there seems to be some dispute as to when I took the chair and just at what point in the proceedings I left it. I was in the chair when the yeas and nays were being called on the motion of the Senator from Connecticut [Mr. BRANDEGEE] to adjourn, as shown on page 2587. I remained in the chair until the substitute offered by the Senator from Florida [Mr. FLETCHER] was read. Then the Senator from Virginia [Mr. SWANSON] took the chair, and was in the chair when the Senator from Oklahoma [Mr. GORE] addressed the Chair, on page 2589.

I make this announcement not for the purpose of seeking to avoid any responsibility that may attach to the ruling which is now criticized. I voted to sustain the ruling of the Vice President. I think that vote was right, and I have no apology to make for it. I should gladly cast the same vote again.

Of course I recognize that as the situation has somewhat changed and the leadership has passed from this side of this body to the other side, we are in some degree now at the mercy of the alliance, but nevertheless I merely wanted to make this statement to show that if I had been in the chair I should have ruled as the Vice President of the United States did.

Mr. ROOT. Mr. President——

The VICE PRESIDENT. The Senator from New York.

Mr. ROOT. I rise not for the purpose of taking part in any discussion as to the ruling, or as to whether there was a ruling, but because other days will come, other sessions, other bills will be before the Senate, and many and many a time the best, sometimes the vital, interests of the country will depend upon the protection of due and orderly parliamentary procedure in this body.

Now, sir, we have the Journal which covers the proceedings of last Friday night before us, its approval suspended for further consideration. We have heard different Senators, whose opinions are unquestionably sincere, differing as to whether rulings were made or were not made, and we have the ascertained fact that the RECORD contains at least one serious error in carrying the impression, an erroneous impression, upon the very important fact as to who occupied the chair.

In making up the Journal it is the duty of the Journal Clerk to translate the voluminous record into a statement of his own as to what in fact was the effect of what was done, and, inasmuch as the Journal Clerk has to translate and state the effect of what was done while the Senate itself is in doubt, in dispute as to what was done, and inasmuch as the RECORD, upon which the Journal Clerk has to proceed, has in it at least one manifest error, it seems to me that if there is ever an occasion for the approval of the Journal by the Senate there is now occasion that the Senate shall know what it is doing when it passes upon the Journal. It is plain that the Senate can not pass upon the Journal upon the rapid reading which we have already had, for none of us can remember what was contained in that paper as it was read, nor can any rapid reading from the desk carry a correct idea.

I ask, sir, therefore, that that part of the Journal which relates to the proceedings of last Friday evening be printed before approval and placed in the hands of Senators, in order that they may consider the correctness of the Journal Clerk's statement of the effect of what was done. I do that, sir, in the hope, in the expectation, that when we have that paper before us Senators, all of whom desire that there shall be an accurate record and that the future proceedings of the Senate shall not be embarrassed, will be able to agree upon the correct statement.

Mr. BRANDEGEE. Mr. President, will the Senator permit a suggestion in relation to that matter before the Senator from Virginia [Mr. SWANSON] proceeds?

Mr. ROOT. Certainly.

Mr. BRANDEGEE. The Senator has asked that that portion of the Journal referred to by him be printed. Would it not be well to have it printed in the RECORD?

Mr. ROOT. That is immaterial, Mr. President. My idea was that it should be printed before approval, so that it would practically be equivalent to circulating a proof, that we may go over it, and undoubtedly we can agree upon what it ought to be. I do not care, however, where it is printed.

Mr. BRANDEGEE. Very well; I do not care to insist if the Senator does not want it that way.

Mr. ROOT. I think it would be better, sir, that it should not be printed in the RECORD until after there has been an agreement. It might be very misleading in the future.

Mr. SWANSON. Mr. President——

The VICE PRESIDENT. The Senator from Virginia.

Mr. SWANSON. Mr. President, the only mistake I see in the RECORD during the time when I was presiding is that the reporter failed to note when I returned to the chair. I had that omission corrected the next day, so far as it could be corrected, to indicate when I returned to the chair. I have not had time to read the minutes, nor did I make any correction of the record as furnished by the reporter. I desire the record to stand as it is, absolutely without change. I am willing to abide by any decision I made and by every interpretation given. The record speaks for itself, and I see no occasion for anyone on this side—and certainly not the Presiding Officer at that time—to have any agreement as to what the Journal shall indicate. Let the Journal speak for itself; let the decisions speak for themselves. There is no decision that I rendered, no ruling that I made, that I am ashamed of, that I desire to apologize for, or that I would not make again. If any decision I made was not agreeable to this body, it had the authority to appeal. It is a majority of the Senate that determines what its rules are and their just interpretation.

When the yeas and nays were ordered they were ordered in pursuance of the policies adopted by the other side. The question was propounded to me—I have not had time to read the Journal or the record as made up by the reporters—but the Senator from Michigan asked me, inasmuch as the yeas and nays were ordered, whether I considered that an amendment could be offered to the substitute. It was a parliamentary inquiry. It was not in order at the time, and I said in answer to the parliamentary inquiry that I could tell him what were the views of the Chair; that I thought that it could not be amended for the simple reason that there are two rules which provide that a mover of a resolution can not withdraw it or modify it after the yeas and nays are ordered. He can modify it before then. Why? Because of the constitutional right to vote on a question which is pending. It is the same way in connection with the preamble of a bill. My idea was that under the Constitution one-fifth of the Members had a right to be recorded on a specific proposition. If that can be withdrawn and denied, then a majority can deprive one-fifth of that right by changing it. If the yeas and nays are ordered on a specific question, and it is amended and changed, when the time comes to vote it might be an entirely different proposition from that on which the yeas and nays were ordered, and they might not desire to order them. Still they would have to vote.

That was the view I entertained. I stated specifically that it was no time to pass upon it then, but that, as a parliamentary inquiry was made by the Senator from Michigan, I felt inclined to rule that way, but would be very glad, if I should be in the chair, to hear the question discussed pro and con, as I had not reached a definite conclusion. I voted to sustain the Vice President. I am satisfied that the Vice President's decision was correct and that to change it simply means to nullify the Constitution, which gives a man the right to vote on any question that is pending. It is a specific question, and if it can be changed entirely a man can be deprived of a vote on that question.

In a decision before this body it has been decided otherwise. The Senate has decided that an amendment is in order. That is the only decision I know of that has been rendered. I should have been very glad to have rendered that decision, if it had come to me as a specific question, unless authorities could have been produced otherwise. I find a decision in the House of Representatives, by Mr. Reed, where an effort was made to withdraw an amendment, which was permissible under the rules of the House, on the ground that the mover had a right to do so. Mr. Reed said it could not be done; that a man had a constitutional right to vote on the question, the yeas and nays having been ordered.

I was not in the Chamber when any other criticisms were made of the rulings Friday night. It seems to me the entire trouble with those rulings is with the Senators on the other side. I am willing to have the country understand the proceedings that were had here that night—an effort to thwart the will of a majority in this assembly, an effort to prevent a vote, a filibuster—and, as far as I am concerned, I do not desire any change from the notes made by the Official Reporters. I am willing to let those be inserted in the Journal, which is the right thing to do.

Mr. GALLINGER. Mr. President——

The VICE PRESIDENT. The Senator from New Hampshire.

Mr. GALLINGER. I have taken no part in the discussion pertaining to this matter and will say only a word.

I confess that I was greatly astonished at some of the rulings that were made on Friday evening. I had supposed that I knew something about the rules of the Senate, having given special attention to them some time ago, and when certain rulings, or suggested rulings, were made I wondered exactly what was happening in the Senate of the United States.

On the bottom of page 2576 it will be observed that I took an appeal from the decision of the Chair on a matter different from that now under discussion. That was alluded to at least half a dozen times—perhaps oftener—in the next hour, but that appeal was never submitted to the Senate.

Mr. SWANSON. What appeal was that?

Mr. GALLINGER. The Senator will find it at the bottom of page 2576.

Mr. SWANSON. Who made the appeal?

Mr. GALLINGER. I made the appeal.

Mr. SWANSON. What was it on?

Mr. GALLINGER. It was on the point of order made by me against the ruling that the Presiding Officer could recognize any Senator, whether he had first addressed the Chair or not. I called attention to the rule that requires that the Presiding Officer shall recognize the Senator first addressing the Chair. Now, I am not criticizing——

Mr. SWANSON. If the Senator will permit me, the Senator had moved to lay a motion on the table.

Mr. GALLINGER. No; the Senator is wrong.

Mr. SWANSON. I ruled, which is proper, that under the rules recognition belongs to the Chair, and that no appeal could be made from a decision of the Chair with reference to recognition. That is included in Jefferson's Manual.

Mr. GALLINGER. Jefferson's Manual says that in the Senate the decision of the Presiding Officer is without appeal, which is a wrong statement. I am not familiar with the rule to which the Senator from Virginia alludes.

Mr. SWANSON. Does the Senator hold that an appeal can be made from recognition?

Mr. GALLINGER. That is not the point I am discussing. I took an appeal, which was recognized by the Chair, and the Senator from Kentucky [Mr. JAMES] moved to lay the appeal on the table. The question was never submitted to the Senate on the motion to lay the appeal on the table; but I am not finding fault with the Chair. There was a great deal of confusion, and I simply call attention to that fact to justify something that occurred afterwards.

I offered certain amendments to the original text. I do not say that I would have offered them to the substitute had not a tentative ruling been made that they would not be in order; but I understood that the Chair held that no amendments could be offered to the substitute, from which view I very widely differed in opinion. I did not take an appeal from that tentative ruling, if we may call it such, but I did say this at a subsequent time:

> I think I have a right to ask that the rule be read, which I now do. The rule has been understood and never departed from in 24 years, to my knowledge. If we are to have the rules revolutionized, we ought to know what they are.

I did not take an appeal, because the former appeal I had taken had not been disposed of.

I read that for the purpose of showing that I regarded some of the rulings as most extraordinary.

Mr. SWANSON. I should like to ask the Senator what rulings they were.

Mr. GALLINGER. The Senator can look them up for himself.

Mr. SWANSON. I should like to know. If they were so extraordinary, it ought to be very easy to point them out.

Mr. GALLINGER. I am not going to engage in any controversy with the Senator from Virginia, who says that he stands by the rulings he made. He knows what they were. The most important one having been reversed by the Senate, I do not think it need be discussed.

I wish simply to say, and it is all I care to say, that I looked upon the rulings as being not only extraordinary but absolutely revolutionary, and I agree with those who hold that the matter ought to be looked into very carefully, and that the Journal ought to be corrected in many particulars. I hope, Mr. President, that hereafter we will be very careful in the observance of the rules of this body, which to my knowledge have been very scrupulously observed in the past.

Mr. SWANSON. Mr. President——

The VICE PRESIDENT. The Senator from Virginia.

Mr. SWANSON. I want to say that as far as I am concerned I shall oppose any change of the Journal except as it is disclosed by the record of the Official Reporters.

Mr. WORKS. Mr. President——

The VICE PRESIDENT. The Senator from California.

Mr. WORKS. The purpose of the Journal, of course, is to record accurately what was done by the Senate, including the Presiding Officer. It can make no difference in making up the Journal whether it is satisfactory or unsatisfactory to the Senator from Virginia or any other Member of this body; and certainly the Senate would not undertake to change or modify what is said in the Journal, except to make it speak the truth. Any effort to modify the Journal in order to change any ruling that might have been made by the Senator from Virginia certainly would not be justified. My position with respect to it is that we should be careful always to see that the Journal does accurately set forth just what was done by the Senate at any and all times.

Mr. SMITH of Georgia. Mr. President——

The VICE PRESIDENT. The Senator from Georgia.

Mr. SMITH of Georgia. For several days, ever since Monday, I have desired to present the reasons which controlled me in my vote sustaining the right of a motion to recommit the shipping bill, and I have been waiting for a suitable time. Since the discussion has gone as far as it has this morning, I believe perhaps this is the best time I can find.

Before proceeding to call attention to the rule of the Senate which I think controlled this matter and the constitutional provision on the subject, I ask the attention of the Senate to the status the shipping bill would have occupied if we had adhered to the ruling that the call for the yeas and nays precluded amendment. It is known that if the Fletcher substitute must go to a vote just as it is written, it will be defeated. It is understood that if it is amended a majority of the Senate will vote for it. Now, should that one-fifth have had the right to segregate this substitute just in the language which it used, and thus preclude the majority from the privilege of perfecting the substitute and adopting it?

I go one step further. It is claimed that they had the power, not the privilege, to segregate that substitute just as it was printed, and deny to the majority of the Senate the privilege of amending it, and thereby force the Senate to vote upon a proposition when a majority of the Senate would vote against it, and yet when it is understood that with some not very important amendments a majority of the Senate will vote for it.

Why, the friends of this measure who insisted upon the proposition that the call for the yeas and nays eliminated amendment, if they had been sustained, would have been left in a position where the substitute would have been beaten; and it is the defeat of the ruling which precluded the privilege of amending the substitute after the call for the yeas and nays that still makes it possible to perfect and pass this measure.

On Friday, January 29, the Senate had under consideration the shipping bill, to which an amendment in the nature of a substitute had been offered by the Senator from Florida. On this amendment a call was made for the yeas and nays and the presiding officer announced that "evidently a sufficient number have seconded the demand."

On Monday following, while the same subject was before the Senate, a motion was made that the "pending bill and all amendments be recommitted to the Committee on Commerce."

When the motion to recommit was made the senior Senator from Florida made the following point of order:

> Mr. President, I make the point of order that that motion is not in order. The Senate has decided to take a vote on the pending question and the yeas and nays have been ordered. No other motion is in order until that motion is decided. The Senate has determined that, and I make that point of order.

The Chair sustained the point of order and an appeal was taken from the decision of the Chair, and the Senate by a vote of 46 to 37 refused to sustain the ruling of the Chair.

Rule XV, paragraph 2, of the rules of the Senate provides that "it shall be in order at any time before the passage of any bill to move a commitment."

This rule is clear. It does not state that a motion to commit can be made at any time before a call for the yeas and nays, but it declares that "at any time before the passage of a bill" the motion shall be in order. To exclude a motion to recommit at any time before the passage of the bill is to override this express rule of the Senate.

There is nothing in the language of Rule XV that permits a construction preventing a motion to commit after the yeas and nays are called for. There is nothing in any other rule of the Senate which, taken in connection with Rule XV, would justify such a construction.

On the contrary, where the rules of the Senate contemplate that the ordering of the yeas and nays shall prevent action otherwise allowed by the rules it is so expressly declared, and this is done in only two instances. Under Rule XXI it is expressly declared that a motion or resolution may not be withdrawn or modified by the mover after the ordering of the yeas and nays without leave, and Rule XXIII provides that the mover can not of his own authority withdraw a preamble to a resolution when the yeas and nays are ordered.

These are the only two instances in which, under the rules, a call for the yeas and nays interferes with what otherwise would be the procedure of the Senate, and in these two instances the effect given to the yeas and nays is expressly declared by the rule. So that we have Rule XVI authorizing the motion to recommit at any time before the final passage of the bill, and thereby declaring that it can be made and will be in order after a call for the yeas and nays.

But it is contended that paragraph 3 of section 5 of the Constitution gives the right to call for the yeas and nays and to permit the motion to recommit after the call is made would interfere with a constitutional right. The language of the Constitution reads:

> Each House shall keep a Journal of its proceedings, and from time to time publish the same, except such parts as may, in their judgment, require secrecy; and the yeas and nays of the Members of either House on any question shall, at the desire of one-fifth of those present, be entered on the Journal.

It will be observed that this paragraph of the Constitution does not say that one-fifth of those present may single out a question and force a vote upon that question without amendment and without change, but it gives to one-fifth the power to require the vote entered on the Journal.

This provision of the Constitution was not intended to give one-fifth of the Senate the power to prevent a majority from perfecting a measure by amendment or by recommitment. Such a power would enable one-fifth to defeat legislation by keeping it in an objectionable shape if originally presented in an objectionable shape, and thereby preventing the measure from being put in shape where the Senate would be willing to vote for it. It was intended solely as a guaranty that a minority might force publicity when a vote was had.

To give one-fifth the power to segregate a proposition and deprive the other four-fifths of the privilege of amending and perfecting it would be destructive of the rights of the majority of the Senate.

The practice of calling for the yeas and nays is an American practice. For the history and reason of the rule see Cushing's Law and Practices of Legislative Assemblies, sections 405 to 414, inclusive. See also Story on the Constitution, sections 840 to 842, giving the history and reason for that section of the Constitution.

Substantially this provision was a rule of the Continental Congress. That Congress held its sessions in secret. The rule, however, of the Continental Congress permitted any one Member to call for the yeas and the nays that a record vote might be had, and require the vote to be entered on the Journal and given to the public. It was not in the power of the one Member of that Congress to segregate a proposition and force a vote on it, excluding from the balance of the Congress the power of amending or of recommitting, or any other power that might be required to perfect the subject matter before a vote was actually had. It was solely intended to place within the power of any one Member the opportunity to cause publicity of a vote actually had.

The records of the Constitutional Convention show that this provision of the Constitution was first submitted in the following language:

> The House of Representatives and the Senate, when it shall be acting in a legislative capacity (each House) shall keep a Journal of its proceedings, and shall, from time to time, publish them, except such parts as, in their judgment, require secrecy; and the yeas and nays of the Members of each House, on any question, shall be entered on the Journal, at the desire of any Member. (Farrand's Records of the Federal Convention, vol. 1, p. 156. Also, see p. 166, same volume; also, p. 180, sec. 7; also, p. 568, sec. 7; also, p. 592, sec. 5, subsec. b; also, p. 653, sec. 5, par. 3.)

The records of the convention show that the object of adopting this provision was to make it possible to cause publicity of a vote, and nowhere was it suggested that one-fifth were to have the power of forcing the four-fifths to act upon a measure before that measure was perfected. The language of the Constitution, the history of the provision, and all facts connected with it negative the suggestion that it was intended to do more than that which the language shows, to require placed upon the Journal a vote, that the position of each Senator might be made public, and neither the language nor its history places this provision of the Constitution in conflict with Rule XV of the Senate.

Returning to Rule XV of the Senate, it expressly authorizes the right of recommitment at any time before the passage of a bill. It therefore authorizes the motion to recommit after the call for the yeas and the nays.

Those entertaining this view of the situation could not refrain from voting to overrule the decision of the Presiding Officer. They saved the Senate from a ruling which would permit one-fifth of the Senate who opposed a pending measure from killing it by stopping any effort to perfect——

The VICE PRESIDENT. The Senator from New York has requested——

Mr. LIPPITT. Mr. President——

The VICE PRESIDENT. The Senator from Rhode Island.

Mr. LIPPITT. Just one second before the question is put on the request of the Senator from New York. I do not want at this time to discuss at all the proceedings that occurred on Friday evening, but I do want to say to the Senate that in addition to the question which has been brought up and discussed here this morning there was also a controversy in which I was somewhat engaged and which, I think, also goes to a very vital point in regard to the interpretation of the rules. I did not at that time, as some Senators may remember, find any enthusiastic desire on the part of the Senate for me to explain my position, and I am not going to do so now; but when this matter finally comes up for consideration I shall want to say a word or two on this other point of order.

The VICE PRESIDENT. The Senator from New York has asked that the portion of the Journal which has to do with the proceedings of last Friday night be printed for the use of the Senate. Is there objection? The Chair hears none.

Mr. LIPPITT. What was the description of the matter the Senator from New York wishes to have printed? I think it should cover all of Friday night.

Mr. ROOT. It does cover Friday night.

The VICE PRESIDENT. The calendar day of Friday night.

Mr. GALLINGER. The evening session.

Mr. ROOT. Yes.

The VICE PRESIDENT. That portion of the Journal which embraces the proceedings of the Senate on Friday, the 29th of January, will be printed and laid on the desks of Senators for their examination to ascertain whether the Journal shall or shall not be approved. Without objection, it is so ordered.

If there be no objection, the Journal of yesterday's proceedings as read will be approved, subject to future corrections.

The foregoing order was reduced to writing, as follows:

Ordered, That the Secretary be, and hereby is, directed to have printed 200 copies of that portion of the Journal which embraces the proceedings of the Senate on Friday, the 29th of January, which shall be laid on the desks of Senators for their examination, to ascertain whether the Journal shall or shall not be approved.

ESTIMATE OF APPROPRIATIONS.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting a letter from the Secretary of War submitting supplemental estimates of appropriations required by the Quartermaster Corps, United States Army, for the payment of claims for personal injuries sustained by certain persons and for damages done to other property through being run down in the streets of San Antonio, Tex., by a section of Battery B, United States Artillery, from Fort Sam Houston, Tex., on April 25, 1913, $8,000, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

PUBLIC UTILITIES COMMISSION.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the chairman of the Public Utilities Commission of the District of Columbia, stating that the balance sheet for the year ended December 31, 1914, and other information required by the Public Utilities Commission of the various utilities under its jurisdiction which have been received prior to this date have been submitted to the Speaker of the House of Representatives. The communication will lie on the table and be printed in the RECORD.

The communication is as follows:

PUBLIC UTILITIES COMMISSION, DISTRICT OF COLUMBIA,
Washington, February 3, 1915.

The honorable the PRESIDENT OF THE SENATE,
Washington, D. C.

SIR: In accordance with paragraph 14 of section 8 of an act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ended June 30, 1914, and for other purposes, approved March 4, 1913, which reads as follows:

"That the accounts shall be closed annually on the 31st day of December and a balance sheet of that date promptly taken therefrom. On or before the 1st day of February following such balance sheet, together with such other information as the commission shall prescribe, verified by an owner or officer of the public utility, shall be filed with the commission and a copy thereof transmitted to Congress."

I have the honor to inform you that the balance sheets for the year ended December 31, 1914, and other information required by the Public Utilities Commission of the various utilities under its jurisdiction which have been received prior to this date have been submitted to the Speaker of the House of Representatves.

Very respectfully, C. W. KUTZ, *Chairman.*

CREDENTIALS.

Mr. OWEN. I present the credentials of Hon. THOMAS PRYOR GORE, chosen as his own successor by the electors of the State of Oklahoma for the term beginning March 4, 1915.

The VICE PRESIDENT. The credentials will be referred to the Committee on Privileges and Elections.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House disagrees to the amendments of the Senate to the bill (H. R. 19545) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. SHERWOOD, Mr. ADAIR, and Mr. LANGHAM managers at the conference on the part of the House.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H. R. 20562) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. SHERWOOD, Mr. ADAIR, and Mr. LANGHAM managers at the conference on the part of the House.

The message further announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H. R. 16477. An act to conduct investigations and experiments for ameliorating the damage wrought to the fisheries by predaceous fishes and aquatic animals;

H. R. 18685. An act to repeal penalties on foreign-built vessels owned by Americans;

H. R. 18686. An act to provide for provisional certificates of registry of vessels abroad, and for other purposes;

H. R. 20107. An act to amend sections 4421, 4422, 4423, 4424, and 4498 of the Revised Statutes of the United States, and section 12 of the act of May 28, 1908, relating to certificates of inspection of steam vessels;

H. R. 20281. An act to provide for the appointment of certain assistant inspectors, Steamboat-Inspection Service, at ports where they are actually performing duty, but to which they are at present detailed;

H. R. 20282. An act to provide for the appointment of 11 supervising inspectors, Steamboat-Inspection Service, in lieu of 10; and

H. J. Res. 391. Joint resolution authorizing the Secretary of Commerce to postpone the sale of fur-seal skins now in the possession of the Government until such time as in his discretion he may deem such sale advisable.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (S. 655) authorizing the Secretary of the Interior to survey the lands of the abandoned Fort Assiniboine Military Reservation and open the same to settlement, and it was thereupon signed by the Vice President.

PETITIONS AND MEMORIALS.

Mr. SHEPPARD. I have here three short statements from prominent members of the National Grange and the National Farmers' Union indorsing the joint resolution introduced by me to investigate certain personal rural-credit bills. I ask to have them inserted in the RECORD.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

NATIONAL HOTEL,
Washington, D. C., February 4, 1915.

Senator MORRIS SHEPPARD,
Senate Office Building, Washington, D. C.

DEAR SENATOR: On behalf of the National Grange, I wish to thank you for introducing your resolution for an investigation of a bill or bills for the establishment of a sound system of personal rural credit. It should appeal to the judgment of every thoughtful person in this country.

I am inclosing herewith copy of a resolution adopted by the legislative committee of the National Grange, of which I am ex officio chairman, indorsing your resolution.

Believing you will do all you can to secure the passage of your resolution at this session of Congress, so as to enable the American farmers to reap the benefits of the proposed legislation in the near future, and thanking you for your efforts in this direction, I am,

Yours, sincerely,

OLIVER WILSON,
Master National Grange.

WASHINGTON, *February 3, 1915.*

The legislative committee of the National Grange, composed of Oliver Wilson, master National Grange and ex officio chairman legislative committee, Peoria, Ill.; T. C. Atkeson, master West Virginia State Grange; and H. J. Patterson, president Maryland Agricultural College and past master Maryland State Grange, adopted the following resolution indorsing the resolution introduced in the Senate to-day by Senator SHEPPARD, of Texas, authorizing the Agricultural Committees to appoint a subcommittee to investigate such personal rural-credit bills which may be presented to it with sufficient authoritative backing. The resolution reads as follows:

"*Be it resolved*, That we, the members of the legislative committee of the National Grange, hereby indorse the Sheppard joint resolution authorizing the Committees on Agriculture of the Senate and House to investigate, through a subcommittee, the subject of personal rural credit in a judicial manner."

OLIVER WILSON.
T. C. ATKESON.
H. J. PATTERSON.

—

NATIONAL HOTEL,
Washington, D. C., February 4, 1915.

Senator MORRIS SHEPPARD,
Washington, D. C.

DEAR SENATOR: Your resolution for an investigation in a judicial manner of such bills for a personal rural-credit system as may be presented to a subcommittee of the Committees on Agriculture which may be presented by persons who, in the committee's opinion, have sufficient authoritative backing has my hearty approval and indorsement. My past experience as chairman of the legislative committee of the National Farmers' Union convinces me that the method of investigation proposed by your resolution is a vast improvement over the old method for a purely scientific subject like credit.

The Government has spent hundreds of thousands of dollars within the past few years investigating monetary and credit institutions and subjects; yet not one of them ever drafted a bill on this subject. So it strikes me that a further investigation of the subject is a thing of the past, and Congress should authorize an investigation of bills on the subject.

I am inclosing herewith a resolution adopted at a conference held in this city, which organized the Rural Credit League of America. I was elected a member of the executive committee of that league at that conference, and I wish to thank you for introducing your resolution, and trust you will use your best efforts, as I know you will, to secure its enactment at this session of Congress.

Yours, sincerely,
S. H. HOBBS.

Mr. OVERMAN. I present a joint resolution of the Legislature of North Carolina, which I ask may be printed in the RECORD without reading and referred to the Committee on Claims.

There being no objection, the resolution was referred to the Committee on Claims and ordered to be printed in the RECORD, as follows:

[Resolution 13.]

Joint resolution requesting our Senators and Representatives in Congress to use all reasonable effort to induce Congress to dispense with the requirement of an oath of loyalty to the Union during the late War between the States from those holding claims against the United States and wishing to prosecute them for payment.

Whereas there are now on file and pending before the Congress of the United States and before the United States Court of Claims many claims of citizens of North Carolina for supplies taken and used by the Army and Government of the United States during the late War between the States; and

Whereas these claims are just and meritorious, but our citizens can not present and prove them because they are required to make oath that they were loyal to the Union during the late War between the States: Now therefore be it

Resolved by the house of representatives (the senate concurring), That our Senators and Representatives in Congress be, and they are hereby, requested to use all reasonable effort to induce Congress to dispense with the requirement of an oath of loyalty to the Union during the late War between the States from those who have claims to present for supplies taken and used by the Army or Government of the United States during the late War between the States, and to use all reasonable effort to assist our citizens in bringing such claims before the proper tribunal for a hearing upon their merits.

SEC. 2. That our secretary of state be, and he is hereby, authorized and directed to furnish each of our Senators and Representatives in Congress a copy of this joint resolution.

SEC. 3. That this resolution shall be in force and effect from and after its ratification.

In the general assembly read three times and ratified this the 29th day of January, 1915.

E. L. DAUGHTRIDGE,
President of the Senate.
E. R. WOOTEN,
Speaker of the House of Representatives.

Examined and found correct. Inscoe, for committee.

STATE OF NORTH CAROLINA,
DEPARTMENT OF STATE,
Raleigh, February 2, 1915.

I, J. Bryan Grimes, secretary of state of the State of North Carolina, do hereby certify the foregoing and attached two sheets to be a true copy from the records of this office.

In witness whereof I have hereunto set my hand and affixed my official seal.

Done in office at Raleigh, this 2d day of February, A. D. 1915.

[SEAL.] J. BRYAN GRIMES,
Secretary of State.

Mr. GALLINGER presented the petition of Thomas O'Brien, of Berlin, N. H., praying for the passage of the immigration bill over the President's veto, which was ordered to lie on the table.

Mr. O'GORMAN. I file certain letters and telegrams and request that they may be printed in the RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

NEW YORK, *February 3, 1915.*

Hon. JAMES A. O'GORMAN,
United States Senate, Washington, D. C.:

Allow me, on behalf of this congregation, to express thanks and admiration for your courageous stand against iniquitous ship-purchase bill, which is unadulterated socialism and international folly.

E. T. HARGROVE,
Chapel of the Comforter, 10 Horatio Street.

—

BOSTON, MASS., *February 2, 1915.*

Hon. JAMES A. O'GORMAN,
United States Senate, Washington, D. C.:

As lifelong Democrats who rejoice in the several great constructive measures enacted by the present Congress we commend every legitimate effort to defeat the Alexander shipping bill. Opposition to it deserves the gratitude of the entire Nation, in every section of which it is condemned by experienced business men, regardless of party, as well as by the people at large, who earnestly desire avoidance of all possible international friction. No more effective means could be devised for completely destroying private enterprise upon which successful development of a wisely encouraged American merchant marine depends.

ROBERT M. BURNETT.
JAMES M. CURLEY.
THOMAS B. FITZPATRICK.
JEROME JONES.
GEOFFREY B. LEHY.
EDWARD F. MCSWEENEY.
JAMES J. PHELAN.
BERNARD J. ROTHWELL.
JOSEPH B. RUSSELL.
JAMES J. STORROW.
JOHN A. SULLIVAN.

—

SOUTHAMPTON, LONG ISLAND, N. Y., *February 2, 1915.*

Hon. JAMES A. O'GORMAN,
Senate Chamber, Washington, D. C.:

As one of your constituents I respectfully urge you to vote against infamous ship-purchase bill. With our undermanned Navy sunk from second place to fourth, battle practice neglected, gunnery deteriorated, and our State Department a byword and laughingstock all over the world, this is no time to play party politics by a flagrant breach of neutrality, risking national humiliation or war with England, France, Japan, and Russia.

W. SCOTT CAMERON.

—

AUGUSTA, GA., *February 2, 1915.*

Senator O'GORMAN,
Senate Chamber, Washington, D. C.:

I venture to send my hearty congratulations on what seems to me to be a patriotic and courageous stand. New York, I am convinced, is with you in opposing the present shipping bill. Regards and best wishes.

AUSTEN G. FOX.

—

NEW YORK, *February 3, 1915.*

Senator JAMES A. O'GORMAN,
Washington, D. C.:

Almost unanimous opposition here to ship-purchase bill as wrong in principle and highly dangerous in practice. Urge you to maintain your courageous attitude of opposition.

JOHN F. B. MITCHELL,
33 Pine Street, New York City.

—

YONKERS, N. Y., *February 2, 1915.*

Senator JAMES A. O'GORMAN,
Senate Chamber, Washington, D. C.:

Country owes you and Senators CLARKE of Arkansas, HARDWICK, BANKHEAD, VARDAMAN, HITCHCOCK, and CAMDEN debt of gratitude for statesmanship in opposing governmental ship-purchase bill. Gold is contraband. England rightly opposes exchange of Germany's interned and therefore useless ships for very sinews of war. Elusive hope of gaining few dollars by purchase and trade is nothing compared with becoming involved in war, or even losing friendly neutral relations with England, France, and Russia. Please show this to the others.

JAMES B. MURRAY.

—

NEW YORK, *February 3, 1915.*

Hon. JAMES A. O'GORMAN,
United States Senate, Washington, D. C.

DEAR SIR: Through you we wish to express our strong disapproval of the so-called ship-purchase bill, and hope our views relative to this matter agree with your own and those of the majority of your constituents to permit of your voting against this measure.

Yours, respectfully,
WHITALL TATUM CO.,
H. V. BRUMLEY, *Secretary.*

—

NEW YORK CITY, N. Y., *February 1, 1915.*

Senator O'GORMAN, *Washington, D. C.*

SIR: I wish to appeal to you as a citizen of your State to do all in your power to defeat this dangerous shipping bill, at present before the Senate.

I trust you realize that thoughtful opinion is distinctly against the placing upon our statute books of a bill which has been hastily thrown together, which is in nowise demanded by the people, and which may very conceivably bring us into controversy, with many friendly nations.

I am, sir,
Yours, very truly,
ALEXANDER PHILLIPS.

—

8 CLARK STREET, BROOKLYN, N. Y., *February 3, 1915.*

Hon. JAMES A. O'GORMAN,
Washington, D. C.

DEAR SIR: I can not refrain from thanking you and your six friends for the stand you have taken against the ship-purchasing bill. The entire nature of the bill is against neutrality as well as the best inter-

ests of the middling classes of this country. It is urged by a body of selfish men for personal gain, regardless of the trouble its passage would give us with other nations. Honest neutrality is our only safeguard. Should we get into trouble, what a nice opportunity for Mexico and Japan.

I am greatly surprised at the action of our President.

Again thanking you and your friends, I remain,

Sincerely, yours,

CHARLES S. S. LENNOX.

FEBRUARY 3, 1915.

Hon. J. O'GORMAN.

DEAR SIR: The stand you have taken against the shipping bill is so pleasing I can not refrain from expressing it. There is no good reason for passing such a measure.

The laws restricting the shipping companies should be changed so we can compete with foreigners. As they are to-day we can not hope ever to build a large mercantile marine. These laws have kept us for years from developing our shipping, and until corrected will continue to do so.

It does not seem as though we could take the position to which we are entitled by our people and resources without a large mercantile marine.

We also need an Army and Navy strong enough to protect us from the horrors which poor Belgium is enduring to-day.

Again expressing my satisfaction at your stand, I am, sir,

Yours, truly,

O. A. COOK,
108 West Eighty-fourth Street, New York City.

Mr. O'GORMAN presented petitions of sundry citizens of Kingston, N. Y., praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. SMITH of Michigan. I present a memorial from the Journeymen Barbers' International Union of America upon the immigration bill. I ask that it may be read.

There being no objection, the memorial was read and ordered to lie on the table, as follows:

JOURNEYMAN BARBERS' INTERNATIONAL UNION OF AMERICA,
Grand Rapids, Mich., February 2, 1915.

Hon. WILLIAM ALDEN SMITH,
United States Senate, Washington, D. C.

HONORABLE SIR: Local No. 8, Journeyman Barbers' International Union of America, of Grand Rapids, feeling that President Wilson has done all laboring men an injustice at the time he vetoed the immigration bill, H. R. 6060, we request you to use your best efforts to pass same over his veto.

Trusting you will give this your earnest consideration and awaiting a reply stating your position in this matter, we are,

Yours, respectfully,

LOCAL NO. 8,
Per A. J. KEECH, *Secretary.*

Mr. BRANDEGEE presented petitions of the German-American Alliance of Middletown and Seymour, in the State of Connecticut, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. CHAMBERLAIN presented petitions of sundry citizens of Oregon, praying for the exclusion of certain matter from the mails, which were referred to the Committee on Post Offices and Post Roads.

He also presented petitions of sundry citizens of Oregon, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. CLARK of Wyoming presented petitions of sundry citizens of Burns, Sheridan, and Leo, all in the State of Wyoming, praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which were referred to the Committee on Foreign Relations.

Mr. NORRIS presented memorials of sundry citizens of Kearney, Nebr., remonstrating against the exclusion of certain matter from the mail, which were referred to the Committee on Post Offices and Post Roads.

Mr. ROBINSON presented petitions of sundry citizens of Batesville, Ark., praying that an appropriation be made for the construction of seven locks and dams on the Upper White River, in that State, which were referred to the Committee on Commerce.

Mr. POINDEXTER presented the petition of Rev. E. W. Wilder and sundry other citizens of Granger, Wash., praying for the passage of the immigration bill over the President's veto, which was ordered to lie on the table.

He also presented a petition of Narcisse Grange, No. 301, Patrons of Husbandry, of Stevens County, Wash., praying for the Government ownership of the telephone and telegraph lines, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the Augustana Synod, Tacoma district of the Columbia Conference, of Seattle, Wash., praying for the enactment of legislation to prohibit the exportation of ammunition, etc., which was referred to the Committee on Foreign Relations.

REPORTS OF COMMITTEES.

Mr. CHAMBERLAIN, from the Committee on Commerce, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

H. R. 8904. An act to authorize the establishment of a life-saving station at the mouth of the Siuslaw River, Oreg. (Rept. No. 961);

H. R. 18745. An act in relation to the location of a navigable channel of the Calumet River in Illinois (Rept. No. 960); and

H. R. 20977. An act to provide for the establishment of a life-saving station in the vicinity of Duxbury Reef, Cal. (Rept. No. 962).

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which was referred the bill (H. R. 17330) to authorize the sale and disposal of an island in the Coosa River, in the State of Alabama, asked to be discharged from its further consideration and that it be referred to the Committee on Public Lands, which was agreed to.

Mr. OWEN, from the Committee on Banking and Currency, to which was referred the bill (S. 4876) to amend section 41 of the national-bank act, being renumbered as section 5144 of the Revised Statutes of the United States, reported it without amendment and submitted a report (No. 963) thereon.

Mr. FLETCHER, from the Committee on Commerce, to which was referred the joint resolution (H. J. Res. 366) authorizing the Secretary of War to use any allotment made under the provisions of an act approved October 2, 1914, entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," for the improvement of East River and Hell Gate, N. Y., reported it without amendment and submitted a report (No. 959) thereon.

Mr. SHEPPARD, from the Committee on Commerce, to which was referred the bill (H. R. 19078) granting the consent of Congress to the Cleveland Yacht Club Co. to construct a bridge across the west arm of Rocky River, Ohio, reported it without amendment and submitted a report (No. 957) thereon.

MISSISSIPPI RIVER BRIDGE AT MEMPHIS.

Mr. SHEPPARD. From the Committee on Commerce I report back favorably without amendment the bill (H. R. 20933) extending the time for completion of the bridge across the Mississippi River at Memphis, Tenn., authorized by an act entitled "An act to authorize the Arkansas & Memphis Railway Bridge & Terminal Co. to construct, maintain, and operate a bridge across the Mississippi River at Memphis, Tenn.," approved August 23, 1912, and I submit a report (No. 956) thereon. I direct the attention of the Senator from Tennessee [Mr. SHIELDS] to the report.

Mr. SHIELDS. I ask unanimous consent for the present consideration of the bill.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ST. LOUIS RIVER BRIDGE.

Mr. SHEPPARD. I report back from the Committee on Commerce favorably without amendment the bill (S. 7535) authorizing the county of St. Louis to construct a bridge across the St. Louis River between Minnesota and Wisconsin, and I ask the attention of the Senator from Minnesota to the report.

Mr. NELSON. I ask unanimous consent for the present consideration of the bill.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. LA FOLLETTE subsequently said: Mr. President, I wish to enter a motion to reconsider the vote by which Senate bill 7535 was passed this morning. It is the bill authorizing the county of St. Louis to construct a bridge across the St. Louis River between Minnesota and Wisconsin.

The VICE PRESIDENT. The RECORD will disclose the noting of the motion.

RIVER AND HARBOR APPROPRIATIONS.

Mr. FLETCHER. By direction of the Committee on Commerce I report back favorably with amendments the bill (H. R. 20189) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors,

and for other purposes, with a brief statement attached. I ask leave to make a fuller and more formal report later.

The VICE PRESIDENT. The bill will be placed on the calendar and leave will be granted.

Mr. GALLINGER. May I ask the Senator from Florida a question, Mr. President?

The VICE PRESIDENT. The Senator from New Hampshire.

Mr. GALLINGER. Does the Senator from Florida intend to call up in the near future the bill he has just reported?

Mr. FLETCHER. As soon as we can get to it. I do not know just when that will be, but the very moment we can get to it I desire to call it up.

Mr. GALLINGER. I am very glad to know that we may perhaps have it before the Senate in the near future.

Mr. FLETCHER. I am sorry I can not be more definite.

The VICE PRESIDENT. The bill will be placed on the calendar.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HOLLIS:

A bill (S. 7554) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgages, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide a method of applying postal savings deposits to the promotion of the public welfare, and for other purposes; to the Committee on Banking and Currency.

By Mr. FLETCHER:

A bill (S. 7555) to authorize the construction of a bridge across the Suwanee River, in the State of Florida; to the Committee on Commerce.

By Mr. OVERMAN:

A bill (S. 7556) granting a pension to Delia May Prempert; to the Committee on Pensions.

By Mr. TOWNSEND:

A bill (S. 7557) for the relief of Frank J. Manning (with accompanying papers); to the Committee on Claims.

By Mr. CHAMBERLAIN:

A bill (S. 7558) for the relief of Simon Caro; to the Committee on Claims.

By Mr. JAMES:

A bill (S. 7559) granting an increase of pension to Eliza J. Wells (with accompanying papers); and

A bill (S. 7560) granting an increase of pension to Henry J. Mullins (with accompanying papers); to the Committee on Pensions.

By Mr. STEPHENSON:

A bill (S. 7561) granting an increase of pension to John McEathron (with accompanying papers); to the Committee on Pensions.

By Mr. SHERMAN:

A bill (S. 7562) granting a pension to Ellen Hammond Clark; to the Committee on Pensions.

By Mr. BURLEIGH:

A bill (S. 7563) granting an increase of pension to Frank S. Mildram; to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 7564) granting an increase of pension to John Evans (with accompanying papers); to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 7565) granting an increase of pension to Ernest Dichman (with accompanying papers); to the Committee on Pensions.

THE MERCHANT MARINE.

The VICE PRESIDENT. The Chair lays before the Senate for its second reading the bill introduced yesterday by the Senator from Oklahoma [Mr. GORE].

The bill (S. 7552) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes, was read the second time by its title.

The VICE PRESIDENT. The bill will be referred to the Committee on Commerce.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. SMITH of Arizona submitted an amendment authorizing the Secretary of Agriculture, upon such terms as he may deem proper, for periods of exceeding 20 years to permit responsible persons or associations to use and occupy suitable spaces or portions of ground in the national forest for the construction of summer homes, etc., intended to be proposed by him to the Agricultural appropriation bill (H. R. 20415), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. O'GORMAN submitted an amendment proposing to amend the act of June 25, 1910, relating to the reissuance of Treasury drafts, etc., intended to be proposed by him to the general deficiency appropriation bill, which was ordered to be printed and, with the accompanying paper, referred to the Committee on Appropriations.

RIVER AND HARBOR APPROPRIATIONS.

Mr. O'GORMAN submitted an amendment intended to be proposed by him to the river and harbor appropriation bill (H. R. 20189), which was referred to the Committee on Commerce and ordered to be printed.

THE TREASURY DEFICIT.

Mr. GALLINGER. Mr. President, I have an interesting article by United States Senator elect ROBERT F. BROUSSARD, of Louisiana, on the question, "How to wipe out the Treasury deficit." I ask, without reading, that it be inserted in the RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

HOW TO WIPE OUT THE TREASURY DEFICIT—UNITED STATES SENATOR ELECT BROUSSARD ANALYZES THE SITUATION—A FALSE CRY REGARDING "PORK-BARREL" LEGISLATION HAS BEEN RAISED TO DECEIVE THE PUBLIC—DEFICIT DUE TO MISCALCULATION BY THE FINANCIAL BRANCH OF THE ADMINISTRATION AND IS NO FAULT OF CONGRESS.

The resolution introduced by me contemplates the suspension of the free-sugar clause of the Underwood bill, which provides for free sugar after May 1, 1916. It is probable that, with the congested condition of the congressional calendars, it may not be possible to consider this resolution in this Congress.

It is fair to those upon whom rests the responsibility of reinstating a deficient Treasury, as well as to those who favor free sugar, that the efforts which I contemplate making in the next Congress should be made known to them; hence the introduction of the resolution at this time. It is my purpose to renew these efforts immediately upon the convening of the next Congress, whether in an extra or a regular session.

These efforts, if successful, will to a large extent obliterate the deficiency that confronts the United States Treasury.

We are informed that there is practically an $80,000,000 deficit, despite the enactment of a war tax in times of profound peace.

The defenders of our present financial policy have ascribed the pending $80,000,000 deficiency to what they are pleased to term "pork-barrel" appropriations by Congress.

No one cognizant of the existing situation is at all disturbed over that statement. The uninformed alone are misled by this false cry. When called upon to explain what is meant by "pork-barrel" appropriations one is referred to appropriations for the improvement of our rivers and harbors and the construction of post offices and other necessary buildings for the proper transaction of the public business.

DEFICIENCY NOT DUE TO THESE APPROPRIATIONS.

It is not true to say that this deficiency grows out of any such appropriations, because during this administration no public buildings have been provided for by Congress; and the appropriation for rivers and harbors was during the life of this Congress reduced from a normal appropriation of $50,000,000 to a $20,000,000 lump appropriation, to be used, in the discretion of the United States Engineers, in continuing projects already under way.

Even if this twenty million were charged to the legislative "pork barrel," it can not possibly account for a hole in the Treasury of eighty millions.

As a matter of fact, it can be demonstrated that this deficiency grows out of an entirely different situation, which situation precludes absolutely the use of the words "pork barrel" in connection with it.

It is not difficult to ascertain just how this deficiency occurred. In the first place, when the Underwood bill was under discussion in the House, Representative HULL, of Tennessee, was in charge of the income-tax section of that bill. I have every reason to believe that the Ways and Means Committee, and Mr. HULL in particular, sought every avenue of information for the enactment of an equitable and just income tax.

Mr. HULL, in his opening address on the floor of the House, stated that the income-tax provision as written in the Underwood bill would produce $70,000,000. Such was the estimate furnished him.

INTERNAL TAXES FALL FAR BELOW ESTIMATES.

The returns, however, of the income tax show a total receipt of $28,253,534.85, a deficiency from the estimate of Mr. HULL of nearly $42,000,000, which miscalculation accounts for more than half the pending Treasury deficit.

When the war-tax measure was reported to the House out of conference Leader UNDERWOOD made the statement to the House that the information he had was to the effect that it would yield one hundred and five millions. When it passed the Senate it was estimated to yield one hundred and seven millions. When it came out of conference he said it was presumed to yield more than ninety millions. Collections thus far made indicate this estimate far too high; in fact, the Secretary of the Treasury himself now estimates that the war tax will approximately yield fifty-four millions for the fiscal year of 1915. From the collections already made this estimate seems reasonably accurate. Therefore, taking the lowest figure for the war tax given by Mr. UNDERWOOD, that of ninety millions, and subtracting the estimate now being made by the Secretary of the Treasury, there results a deficiency of thirty-six millions in that item alone.

The revenues from these two sources are in nowise affected by the European war. If the termination of the war causes any increase in our custom receipts, this increase can not entirely make up the deficit, but Congress will have to look elsewhere for the most part to recoup the Treasury.

By adding these two deficiencies—the one resulting from the income tax and the other from the war tax—we have almost the exact amount of deficiency reported in the Treasury of the United States.

In other words, if the estimates furnished Congress as to these two revenue acts had been correct, there would now be no deficiency, as the shortage in the results from the estimates precisely equals the Treasury shortage.

Why look to extraneous things when, through erroneous calculation, these two new methods of taxation account for practically every dollar in the present deficiency?

Now, this is a statement of facts, and the war-tax measure is soon to expire, so that the fifty-four millions yield for 1915 will shortly disappear and the eighty millions deficit must, consequently, be increased by that sum in the near future.

On the 1st of May, 1916, unless my resolution shall become law, practically $52,000,000 more now derived from the sugar duty must be also added to the present deficiency.

To summarize: Should the same deficiency occur in 1916 as is pending now, there will be added to the eighty million deficiency the further deficiencies due to the expiration of the war-tax law, yielding fifty-four millions, and a still further deficiency after May, 1916, of fifty-two more millions derived from the sugar duty.

AN APPALLING SITUATION THAT MUST BE MET.

This situation is appalling. It can not be shirked; it must be met. And the question is, How are we to meet it? There are several ways in which it can be done. The simplest, but probably the most obnoxious, would be to issue bonds. Another would be to reenact the war-tax act in times of profound peace, when possibly Europe itself will be at peace, and increase that tax. Another, still, would be to readjust the income tax by decreasing the exemption and increasing the rate; or, again, to revert back to the old practice of collecting money from a duty on sugar.

And why should not the last-named course be followed? The refiners told Congress, and Congress believed the refiners, that if the duty on sugar were reduced, the consumer would receive the advantage of the reduction. On March 1, 1914, Congress reduced the then existing duty by 25 per cent, and for not a single moment from that day to this has the consumer paid as little money for his sugar as he paid before the reduction. He is now paying practically twice as much as he did before the reduction.

The American consumer and the United States Treasury both have suffered from the reduction, and the only beneficiary has been the refiner, commonly known as the Sugar Trust, which has absorbed the entire reduction and multiplied the price of sugar to the consumer.

Under the old rate, which went out on the 1st of March by virtue of the Underwood bill, the Treasury of the United States would have collected to date more than fifty-eight millions in duty instead of forty-three millions, so that the Sugar Trust has absorbed in the 10 months since the reduction was made nearly $15,000,000. At this rate, by the end of 12 months, as the result of this 25 per cent reduction, fully eighteen millions will have been absorbed by the trust and will have been lost to the Treasury.

SUGAR TRUST IS AGAIN ATTEMPTING TO DECEIVE THE PUBLIC.

All understand that the Sugar Trust is again engaged in its old practice of deceiving the public, and in this instance it asserts that the high price of sugar is due to the European war. That is not true. It is merely a subterfuge resorted to by the trust to deceive the American public while it is engaged in absorbing the tariff reduction, which it had promised the American consumer should receive.

I make this statement for the reason that at this very hour the refiners of the country are engaged on the American market in selling sugar to Europeans for consumption in Europe at a lower price than the same sugar is being sold by them on the same market to the American consumer.

The war could not lift the price of sugar in the United States, at peace with all the world, when sold to an American consumer, and not raise it equally to a European engaged in this same war. Yet this war, far from our shores, is invoked as a reason to lift sugar prices to the American consumers beyond the price charged Europeans.

To put the question squarely to Congress and the American people, I ask, Shall we indefinitely suspend all expenditures for the improvement of our rivers and harbors and the construction of necessary public buildings? And shall we reenact the war tax and increase its burdens? And shall we reduce the exemption clause of the income tax and increase the tax itself to meet this deficiency? Or shall we issue bonds in preference to all this? Or shall we, as I suggest, return to the time-honored system of collecting taxes on articles that can bear the duty, particularly when the remission of the duty does not cheapen their price to the consumer, as is the case with sugar?

Congress must soon answer these questions.

FEDERAL AID TO GOOD ROADS.

Mr. SMOOT. I ask unanimous consent that there may be printed for the use of the Senate document room 4,000 copies of the report of the Joint Committee on Federal Aid in the Construction of Post Roads.

The VICE PRESIDENT. Is there objection. The Chair hears none, and it is so ordered.

THE SENATE MANUAL.

Mr. OVERMAN. I offer a resolution, and ask unanimous consent for its present consideration.

The resolution (S. Res. 535) was read as follows:

Resolved, That the Committee on Rules be instructed to prepare a new edition of the Senate Manual, and that there be printed 4,000 copies of the same for the use of the committee, of which 250 copies shall be bound in full morocco and tagged as to contents.

The VICE PRESIDENT. The Senator from North Carolina asks unanimous consent for the present consideration of the resolution.

Mr. THOMAS. Is that designed to be published as a manual?

Mr. OVERMAN. There are only 15 copies of the Manual left. There will be a new Senate and a new Congress coming in, and a similar resolution has been passed every few years for 50 years past.

Mr. THOMAS. Mr. President, I think, as we have the misfortune of spending two-thirds of the time of the Senate in the discussion of the precedents, and they are out of date, if we issue a new edition, and the same practice prevails here, we shall have no time to attend to the business of the people. I move to lay the resolution on the table.

Mr. OVERMAN. This is not for the printing of the Book of Precedents but of the Rules and Manual brought down to date.

Mr. THOMAS. It is not the Book of Precedents?

Mr. OVERMAN. Not at all.

Mr. THOMAS. If it is nothing but the rules, without the multitudinous instances of their construction, reconstruction, and destruction, I will withdraw the motion.

Mr. ROOT. Mr. President——

The VICE PRESIDENT. The Senator from New York.

Mr. ROOT. I think the continual reprinting of copies of this Manual is a hoary old abuse. My home in New York and my home here are cumbered with copies of the Manual. There has not been any change; it is the same old volume, and I object to the present consideration of the resolution.

Mr. OVERMAN. Very well, let it go over until to-morrow, and I shall call it up.

The VICE PRESIDENT. The resolution goes over.

DIRECTORS OF REGIONAL RESERVE BANKS.

Mr. LEWIS. I submit a resolution and ask to have it read and referred to the Committee on Banking and Currency.

The resolution (S. Res. 536) was read and referred to the Committee on Banking and Currency, as follows:

Resolved, That the Secretary of the Treasury and the Federal Reserve Board of the United States shall, if not incompatible with public service, report to the United States Senate the names of the directors of the regional reserve banks which were chosen as representatives of the United States Government; and the names and business of those recommending them, and what are the positions occupied by the said members of said regional banks, and in what banks and business and corporate institutions the said members are directors; also what are the names of the directors of the regional banks selected in any other manner than by the Government, and what position as directors either of these hold in any banks, business establishments or corporations.

PURCHASE OF VESSELS.

The VICE PRESIDENT. The Chair lays before the Senate the resolution coming over from a previous day.

The SECRETARY. Senate resolution 528, submitted by Mr. BURTON on the 2d instant.

Mr. SMOOT. I ask that the resolution may go over for the day without prejudice, the Senator from Ohio being absent from the Chamber for a few moments.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the resolution goes over without prejudice.

Mr. BRANDEGEE subsequently said: I wish to call the attention of the Senator from Ohio, who has now arrived, to the fact that Senate resolution 528 has gone over by unanimous consent and to ask him whether he cares to recur to it.

Mr. BURTON. I should like to bring it up, if it is in order to do so.

The VICE PRESIDENT. It has gone over by unanimous consent, but it can be taken up.

Mr. OVERMAN. I think the Senator from Missouri [Mr. STONE] wants to be present when it comes up.

Mr. BURTON. Very well; let it go over.

COMMITTEE ON THE REVISION OF THE LAWS.

The VICE PRESIDENT. The Chair lays before the Senate the notice of an amendment to the rules coming over from a preceding day.

The Secretary read the resolution (S. Res. 534) submitted by Mr. ROBINSON, as follows:

Resolved, That there shall be a standing committee of the Senate known as the committee on revision of the laws, to be composed of five Senators elected in the same manner as the members of other standing committees, which shall have power to act jointly with the same committee of the House of Representatives, and to which shall be referred all matters relating to the revision and codification of the statutes of the United States.

Mr. OVERMAN. I move that the resolution be referred to the Committee on Rules.

The motion was agreed to.

OHIO RIVER BRIDGE.

Mr. OLIVER. I ask unanimous consent that House bill 20818, now lying on the table, be taken up and considered. A similar bill has already been reported from the Senate committee, is now on the calendar, and is ready for passage.

The VICE PRESIDENT. The Chair lays before the Senate a bill from the House of Representatives.

The bill (H. R. 20818) to authorize the Brunot Island Bridge Co. to construct, maintain, and operate a bridge across the back channel of the Ohio River, was read the first time by its title and the second time at length, as follows:

Be it enacted, etc., That the Brunot Island Bridge Co., a corporation of the State of Pennsylvania, is hereby authorized to construct, maintain, and operate a bridge, with approaches thereto, across the back channel of the Ohio River at a point suitable to the interests of navigation, from a point on the southwesterly shore of Brunot Island, near the Duquesne Light Co.'s power plant, in the twenty-seventh ward of the city of Pittsburgh, Allegheny County, Pa., to a point between Telford Street and the Ohio connecting railroad bridge on the opposite side of said back channel of the Ohio River, in the twentieth ward of the city of Pittsburgh, Allegheny County, Pa., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters, approved March 23, 1906."

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The VICE PRESIDENT. The Senator from Pennsylvania asks unanimous consent for the consideration of the bill.

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. OLIVER. I move that the bill (S. 7266) to authorize the Brunot Island Bridge Co. to construct, maintain, and operate a bridge across the back channel of the Ohio River, being a like bill and now on the calendar, be indefinitely postponed.

The motion was agreed to.

PENSIONS AND INCREASE OF PENSIONS.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 19545) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. SHIVELY. I move that the Senate insist upon its amendments, agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. SHIVELY, Mr. JOHNSON, and Mr. MCCUMBER conferees on the part of the Senate.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 20562) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. SHIVELY. I move that the Senate insist upon its amendments, agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. SHIVELY, Mr. JOHNSON, and Mr. MCCUMBER conferees on the part of the Senate.

HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred to the Committee on Commerce:

H. R. 18686. An act to provide for provisional certificates of registry of vessels abroad, and for other purposes;

H. R. 20107. An act to amend sections 4421, 4422, 4423, 4424, and 4498 of the Revised Statutes of the United States, and section 12 of the act of May 28, 1908, relating to certificates of inspection of steam vessels;

H. R. 20281. An act to provide for the appointment of certain assistant inspectors, Steamboat-Inspection Service, at ports where they are actually performing duty, but to which they are at present detailed; and

H. R. 20282. An act to provide for the appointment of 11 supervising inspectors, Steamboat-Inspection Service, in lieu of 10.

H. R. 18685. An act to repeal penalties on foreign-built vessels owned by Americans was read twice by its title and referred to the Committee on Finance.

The following bill and joint resolution were read twice by their titles and referred to the Committee on Fisheries:

H. R. 16477. An act to conduct investigations and experiments for ameliorating the damage wrought to the fisheries by predaceous fishes and aquatic animals; and

H. J. Res. 391. Joint resolution authorizing the Secretary of Commerce to postpone the sale of fur-seal skins now in the possession of the Government until such time as in his discretion he may deem such sale advisable.

REGULATION OF IMMIGRATION—VETO MESSAGE.

The VICE PRESIDENT. Morning business is closed.

Mr. REED. Mr. President——

The VICE PRESIDENT. The Senator from Missouri.

Mr. REED. Mr. President, the first veto message of the President of the United States is that of the immigration bill. It ought to command the serious attention of Congress. I am wondering whether those Senators who have hitherto preached the doctrine of absolute fidelity to the President will now break away from their allegiance and loyal support upon a proposition which the President regards as so vital that he has interposed this his first veto. I am also wondering whether Democrats will at one and the same time vote to overthrow the President and the policies of the Democratic Party as expressed in its platforms on this subject from the days of Thomas Jefferson to this blessed hour. If Senators will give me their attention, I shall undertake to illustrate both of the propositions I have advanced.

The President in a very clear and powerful veto message states his objections to the immigration bill, which may be epitomized thus:

First. The bill embodies a radical departure from the traditional and long-established policy of the country.

Second. It seeks to all but close the gates of asylum to political refugees.

Third. Literacy is not a test of character or personal fitness, but of opportunity.

I propose submitting some remarks in support of the veto of President Wilson.

I shall also undertake to reply to the arguments advanced by the proponents of the bill. I am confident that each argument can be answered and demonstration made, both of the falsity of its premise and the fallacy of its deduction.

I shall first give attention to certain of these arguments. During the course of my remarks I shall desire to submit various statistical tables, which I now ask leave to print as a part of my remarks without reading.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. REED. I now desire to call attention to the following questions:

Is the immigrant patriotic?

Does he love liberty?

Is he attached to our institutions?

The foregoing questions are answered in the affirmative by every page of our country's history.

First. Nine signers of the Declaration of Independence were born in foreign lands.

Second. Alexander Hamilton and Albert Gallatin were born in the West Indies.

Third. Several of the most distinguished officers of the Revolution were foreigners, who out of pure love of liberty came here to assist us. Without their assistance the cause of the patriots might have failed. Among these are:

Lafayette, whose story is upon the tongue of every schoolboy.

Casimer Pulaski, Polish exile and patriot, could not had it been the law of 1776 have been admitted under the terms of this infamous measure, who would have been arrested at Castle Garden because he stood charged with the crime of fighting for his country.

Pulaski distinguished himself at the Battle of Brandywine; was made brigadier general by act of Congress; raised the Pulaski Legion; successfully defended Charlestown; and yielded his life in the cause of the young Republic at the Battle of Savannah.

Thaddeus Kosciusko rendered such valiant services at Yorktown and the siege of New York that he was promoted by Washington to chief of Artillery and was rewarded with the Order of the Cincinnati, made an American citizen, and was granted a pension and estates.

Paul Jones, whose naval victories gave luster to our arms upon the sea and whose genius and fortitude did much to win our national independence, was a foreigner.

He had taken up his residence in this country but a few months when he was called to the assistance of the Colonies. He was appointed a member of the naval committee. Not only was Paul Jones of foreign birth, but he secured aid in fitting out his vessels from foreigners.

His victories thrilled and heartened every patriot of the land.

He rose to the rank of rear admiral, and in 1792 was appointed United States consul to Algiers.

The list is long and need not be recited. The statues of these great foreigners, memorials in bronze of our inextinguishable debt of gratitude stand to-day in the Capital of the Nation they helped establish.

In yonder gallery is the bust of Pulaski in marble, and no man has ever gazed upon it who has not been impressed with the nobility of character expressed in the classic features.

Heitman gives a list, which he concedes is incomplete, of 437 French officers who served with the American Army, many of whom were promoted for gallantry on the battle fields of the Revolution.

The War of the Revolution was not fought by native-born sons alone. Standing elbow to elbow with them was the immigrant of that day. He crowded into the irregular column of Washington's army, he was with him in every battle, and from the days when our banner was first unfurled on Bunker Hill until it rose in glorious triumph at Yorktown. The immigrant stood in the trenches, walked in the snows, and died in the swamps as bravely and as valiantly as the native sons of that day.

In the War of 1812 again the immigrant responded to the call of duty. He was present when the first shot was fired and he was with Jackson back of the cotton bales when the last rifle spoke defiance to the veterans of the British Army.

The immigrant was with Scott and Taylor as they marched across the plains of Mexico. He followed them with glorious heroism to the heights of Chapultepec. He stood with them in the sieges and battles and bloody days of that great conflict.

In the War of the Rebellion the immigrant again responded to the call of his adopted country. He served under the battle flags of Lee and Jackson, and he marched beneath the standards of Grant and Sherman and Sheridan. He divided his allegiance as the people of this country divided theirs, being guided by the spirit of the State and the people among whom he lived.

I want to read just a word or two that I hope will sink into the hearts of some of our Republican brethren.

Mr. SMOOT. Oh, yes; there is.

Mr. REED. I read from a work by Mr. Higginson:

> Who that recalls the war for the Union does not remember how we all, from President Lincoln downward, played upon the string of "the open doors of this Nation," its being "a home for all oppressed mankind"? How fearlessly we then appealed to the Germans, the Irish, the Swedes, the Scotch within our borders, and how well they responded. Even the green flag of Ireland, now forbidden to be displayed from our city halls, * * * was then welcomed with cheers on battle fields when it was borne to front, amid decimated regiments, under shouts of "Faugh a Ballagh"—"Clear the way."

Mr. President, did these immigrants respond in the days of the Spanish War? I saw the Fifth Missouri Regiment mustered in; I saw our immigrant citizen standing in line waiting the privilege of signing the muster roll; I saw him frequently only poorly clad. He was leaving his wife and his children but scantily provided for. In his eyes there was the battle fire that is lighted only by love of country. In that war he served as bravely as did the native born.

A few days ago I read the names of the heroic dead who gave their lives at Vera Cruz, whose blood drops, yet damp upon the banner of our country, are its latest baptismal.

Among the dead were Jews, Polacks, Irish, Bohemians, and other nationalities.

Mr. President, whence does this spirit of proscription and hate come? Why has it suddenly arisen? What new danger is at our gates? What shadow of fear has fallen upon the native-born American? It was not so at first. The fathers knew how the immigrant had fought to establish our liberties; so in 1790 they passed a statute providing for naturalization after five years. This country was proclaimed to be the land of refuge and sanctuary for the oppressed of the earth. Foreigners flocked to our shores; population doubled; the frontiers of civilization were pushed westward; the strength of the country was made secure.

But the old Federalist Party was in power. Alexander Hamilton was its dominant spirit. He distrusted all of the common people, whether they were born in this land or beneath foreign skies. He did not regard them as fit for self-government. He was naturally of an aristocratic turn; he was a born proscriptionist. He ought to be here to-day, the author of this bill. There had been no discussion; there had been no agitation; there had been no issue made; but the Federalist Party, in the pride and arrogance of its power, passed the alien and sedition law. That law increased the naturalization period from 5 to 14 years. It authorized the arrest and deportation of turbulent and dangerous aliens without trial, at the discretion of the President. It was rushed through without being submitted to the people, as this bill is rushed through without having been submitted to the people. Hamilton felt strong enough and the Federalist Party felt strong enough to put the bill through Congress. They dared not submit it to the electorate. You who father this bill are trying similarly to force it through, although no political party now living has ever dared sanction its vicious principles in its platform.

What happened when the Federalist Party perpetrated that outrage? A protest arose in every part of the Nation. Its rumblings were heard in forest and in city. It found expression in the resolutions of State legislatures and of civic societies. The Democracy, headed by Thomas Jefferson, sprang into power upon this distinct issue. The Democratic Party was cradled in the national protest against proscriptive legislation. I shall come back to that. I shall quote you Jeffersonian Democrats the words of Thomas Jefferson; I shall compel you to admit that you are repudiating the traditions of your party and the long and illustrious record made by its great men.

I desire just now, however, to proceed to another question. The President has said "literacy is not a test of character but of opportunity." That sentence ought to go down in history as the tersest statement of a great fact that has been made in many years—"literacy is not a test of character but of opportunity."

In support of the proposition to which I have just referred, I want now to compare early and later immigration. I challenge attention to facts abundantly sustaining the proposition.

In point of literacy the new immigration surpasses the old at the time of the influx of the latter.

Twenty-six per cent of the German male immigrants above 16 years of age who came to Pennsylvania in the first half of the eighteenth century could not write their names. (Barnes, p. 45.)

EARLY POPULATION ILLITERATE.

In point of fact the present immigration is more literate than were the native inhabitants of this country at the period of the Revolution.

A painstaking investigation of the degree of illiteracy among the seventeenth century Virginians shows that 46 per cent of the jurors made their marks and that 40 per cent of the men making deeds and depositions could not write their names. Seventy-five per cent of the women were illiterate. (Barnes, p. 45.)

In Suffolk County, Mass., including Boston, two volumes of published deeds were examined for the years 1653–1656 and 1681–1697, in which it was found that in each period 11 per cent of the men made their marks. Of the women, 58 per cent in the first period and 38 per cent in the second period made their marks.

Mr. President, was literacy or illiteracy a standard of character? Why, sirs, I doubt not that the men in coonskin caps who rallied at Lexington, who later made their stand at Concord near the little bridge immortalized by the lines of Emerson:

> By the rude bridge that arched the flood,
> Their flag to April's breeze unfurled,
> Here once the embattl'd farmers stood,
> And fired the shot heard round the world.

I doubt not, sir, that many of the men whose eyes that day fearlessly glittered along rifle barrels could not have read the pages of a printed book. Yet, I repeat, these men knew how to die for liberty, for they had read the pages of a larger volume, the book of nature. In forest fastness, in mountain dells, in bending skies they learned the legend, "All men are born free and equal." So, in defense of that liberty they rallied, they fought and died, immigrant and native born, literate and illiterate, side by side, that you and I and all of us might have the blessings of liberty. Yet many of these early Virginians and men of Massachusetts were illiterates.

Literacy was not then a test of character. The best test in that hour of trial was how the man at the end of the gun behaved.

Again, I call attention to the fact that literacy is not a test of character but of opportunity.

Mr. President, in 1799 an Irish colony sought to establish itself in Massachusetts. Ninety-six per cent of the whole number could write their names. After this came bitter oppression and poverty to the Irish people. The opportunity to obtain education grew constantly less; they were robbed; they were driven from their homes; they were hunted like wild beasts; they were murdered. Under such disadvantages education waned. Accordingly, the later immigrant was denounced as ignorant, unlettered, bestial; yet his lamentable condition was only the result of a lack of opportunity. Opportunity is the test. Have men had opportunity? When you answer they have not you have destroyed the value of the literacy test.

The Jew! Let us think of him for a moment. The Jew of the Middle Ages was the most learned man in all Europe. He maintained many great institutions of learning in which the ancient lore and medieval philosophy were taught. A period of merciless persecution followed and the race was forced into a condition of illiteracy and ignorance. But when the hand of the oppressor was taken from his throat even for a moment he again began establishing seminaries of learning and educating his race, and he has continued that policy wherever permitted so to do. One of his bitterest complaints against the Russian Government is that he is denied the opportunity of education.

The Italian! The Italian immigrant, particularly from the southern Provinces, is frequently illiterate; but since the establishment of an improved system of education in Italy the people are crowding into the schools and illiteracy is decreasing to a marvelous degree. Again, education is shown to be merely a matter of opportunity.

Let me digress a moment to call the attention of those who denounce the Italian to the fact that that great race never sank into barbarism. When the light of learning had faded in all the other lands of Europe, Italy still kept the torch held high in her hand. Her wonderful works of art, her marvelous poetry, her great architecture exist to-day as evidence of the fact that the Italian people have within them still the old Roman blood, the old spirit of empire. Shall Americans turn against the Italians? Why, it was the genius of an Italian blazing amidst the darkness and ignorance of the fifteenth century that disclosed the path across the Atlantic which followed by a mariner would lead to the undiscovered shores of this continent. An Italian gave America to the Old World. Ah, Mr. President, whatever others may do, let us not denounce the Italian.

The Balkan! These people are illiterate to a considerable degree, but what is their story? For hundreds of years they have battled with the "unspeakable Turk" for their very existence. They have been crucified upon crosses; they have been impaled upon stakes; their cities have been burned; their wives have been outraged; their children have been stolen; their daughters have been dragged into slavery; and so they have not had much time or opportunity to attend school. They are, nevertheless, a great race. Ah, when their battle flag at last was raised the world looked on in astonishment that the little Balkan people should dare assail the great armies of Turkey; and yet what a spectacle the world was destined to behold. It saw a race that could muster its entire population upon the field of battle—boys of 11, grandsires of 80. It saw the women driving oxcarts that carried provisions and munitions of war to the men who were fighting the battles. It saw the untrained citizens upon bloody fields battling with deathless courage and unalterable resolve. It saw them standing in trenches half filled with water, bivouacking in drifts of snow, wading through swamps; fighting, always fighting, for that liberty which every oppressed son of God upon this earth hopes and prays may yet be his. The world saw them emerge in victory, and lovers of liberty all over the earth hope and pray that the sunlight of peace and prosperity may soon smile upon that valiant race of men. A race of men that can fight so well in war can live well in peace.

Mr. President, there is a conclusive proof that literacy is but a test of opportunity, not a test of character. Here is an answer that will appeal to every candid man, to every man who has not locked the door of his mind and thrown away the key of reason. It is that as soon as these immigrants come to our shores they embrace every opportunity of education with more avidity than our native born. This, sir, is the final answer, the opportunity having been given they have seized it. The demonstration is complete that the President spoke wisely when he said, "education is a test of opportunity and not a test of character."

But, Mr. President, the argument has been advanced here that while illiteracy in former days was not a test of character it is so now, because the doors of opportunity have been opened.

Mr. President, that is a very unfortunate argument for an American citizen to make. It is a very unfortunate argument for the people of the State represented in the Senate by the Senator who uttered it upon our floor, and why? The children of immigrant population in many States, including that of the Senator who is the author of the argument, possess a higher degree of literacy than the children of the native born. This is not only the case to-day, but it has been, I regret to say, the case for many years.

In 1870 the Bureau of Education was established upon a substantial basis. The commissioner, Edmund Lee, reviewed the educational conditions from 1840 to 1870, and said this:

> Besides, our illiterate are, most of them, native born. In 1860, according to the census, there were, of our illiterate adults, but 346,893 of foreign birth, while there were 871,418 native born. These figures, of course, exclude the negro population.
>
> Thus it appears that this immense evil, our weakness and our disgrace, extends among our native population as well as among those of foreign birth; in the North as well as in the South, both in the East and in the West; in the old States and in the new, from Maine to Georgia, as well as from Maine to California.
>
> It has been also a growing evil; it has grown with the growth of the population. Indeed, from 1840 to 1850 it grew faster than the population. Not only did the gross numbers increase from 550,000 to nearly a million, but the per cent of illiterate increased from 9 per cent in 1840 to 11 per cent in 1850. So far, the facts have been given simply as they stand in the census.

The author adds:

> But it is well known to those who have investigated the subject that these are far below the truth, because many who can not read would not like to be so set down in the census.

Mr. President, shall this race of ours, with all its opportunity for education for 100 years, finding itself still less literate than the children of the foreign-born population, dare to set up a literacy test? What becomes of the argument of the Senator who stated that literacy is a test of character when it is accompanied by opportunity? For if that be true, what a sad reflection it is upon our native-born population, before whose feet the door of opportunity stands open.

Mr. President, I am coming now to a theme to which I invite the attention of Democrats. I wish there were more of them present. I especially wish the Senator from Mississippi [Mr. WILLIAMS], whose patron saint is Thomas Jefferson, might be in the Chamber. I purpose showing that the Democratic Party was born of a protest against the restrictive legislation that had been enacted by the Federalist Party; that out of the protestants against the Federalist restrictive legislation Thomas Jefferson was able to construct a triumphant Democracy. The victory then won placed our party in power for nearly 60 years.

The theme I am now discussing is—

> Shall we depart from our traditional policy and close the gates of asylum which have hitherto been open?

A pregnant sentence from the message of the President. Is the President correct when he states that this has been our traditional policy?

I answer "yes," and offer the following observations in support of it:

First. Ninety per cent of our early immigrants were refugees from the tyranny of church and state.

Second. Ninety per cent of all of our immigrants, early or late, were forced to these shores either by intolerable Governments or the unbearable physical conditions of life.

Third. The doctrine which is written largest upon the page of our national policy is that "this country, created by the oppressed of earth, shall forever remain the harbor and place of refuge for those who suffer wrong." Especially has this been the creed of the Democratic Party; and now, Democrats, those of you who are not ready to recant the ancient creed I challenge your attention to what I am about to read.

Jefferson, in his first inaugural address, said:

> Shall we refuse the unhappy fugitives from distress that hospitality which the savages of the wilderness extended to our fathers arriving in this land? Shall oppressed humanity find no asylum on this globe? * * * Might not the general character and capabilities of a citizen be safely communicated to everyone manifesting a bona fide purpose of embarking his life and fortunes permanently with us? (Jefferson's Works, vol. 3, p. 338.)

Writing to Mr. Dumoulin, in 1816, after thanking him for a copy of a treatise on naturalization, Mr. Jefferson stated:

> We can not but think alike, and I permit myself to doubt whether there is a man in the world who thinks otherwise, provided he has thought at all on the subject, has turned inwardly on himself, and ascertained whether he has not there found the same innate feeling of right to live on the outside of an artificial geographical line as he has to live within it; whether he finds there any stronger sentiment of right to use his own faculties at all than of that to use them in whatever place he can do it to the greatest promotion of his own happiness; whether he feels any obligation to die by disease or famine in one country rather than to go to another where he can live. (Jefferson's Works, vol. 19, p. 336.)

Ah! That strikes the very kernel of it all. It is the human right, the right that every human being has to seek his happiness, upon which Jefferson bottomed his immortal doctrine.

I could quote much further from this great man, but I pass on.

Democrats, I come now to the consideration of the Democratic doctrine as expressed in your platforms. I seek to sustain the statement of the President that the granting of asylum is "our traditional policy," and his further statement that you are undertaking to set it aside without having submitted it to the people of the United States or suggested to a single voter that you intended so to do. On the contrary, like the old Federalist Party, you get into power and then employ your power against the people to whom you would not dare submit the issue. The Democratic platform of 1840 is the oldest one of

which I could find a copy; but I have read you Jefferson's words, and now I ask you to listen to the platform:

DEMOCRATIC PLATFORMS.

The Democratic Party of 1840, paragraph 9, is as follows:

"*Resolved*, That the liberal principles embodied by Jefferson in the Declaration of Independence, and sanctioned in the Constitution, which makes ours the land of liberty and the asylum of the oppressed of every nation, have ever been cardinal principles in the Democratic faith, and every attempt to abridge the present privilege of becoming citizens and the owners of soil among us ought to be resisted with the same spirit which swept the alien and sedition laws from our statute books." (Hopkins Political Parties, p. 260.)

That plank, Mr. President, was readopted in 1844; it was readopted in 1848; it was readopted in 1852; it was readopted in 1856, and the following added:

Whereas since the foregoing declaration was uniformly adopted by our predecessors in national conventions an adverse political and religious test has been secretly organized by a party claiming to be exclusively American, it is proper that the American democracy should clearly define its relation thereto, and declare its determined opposition to all secret political societies, by whatever name they may be called.

Resolved, That the foundation of this Union of States having been laid in, and its prosperity, expansion, and preeminent example in free government built upon entire freedom in matters of religious concernment and no respect of person in regard to rank or place of birth, no party can justly be deemed national, constitutional, or in accordance with American principles which bases its exclusive organization upon religious opinions and accidental birthplace. And hence a political crusade in the nineteenth century and in the United States of America against Catholic and foreign born is neither justified by the past history nor the future prospects of the country, nor in unison with the spirit of toleration and enlarged freedom which peculiarly distinguishes the American system of popular government.

In 1860 the Douglas Democratic platform reaffirmed the platform of 1856.

Again in 1876 the Democratic Party, in its platform of that date, took up the immigration question, and after denouncing the policy of the Republican Congress for allowing the immigration of Mongolian people, and for stripping our fellow citizens of foreign birth and kindred race across the Atlantic of their rights to become citizens of the United States, stated as follows:

We denounce the policy which thus discards the liberty-loving German and tolerates the revival of the coolie trade in Mongolian women imported for immoral purposes, and Mongolian men held to perform servile labor contracts, and demand such modification of the treaty with the Chinese Empire and such legislation within constitutional limitations as shall prevent further importation or immigration of the Mongolian race. (Hopkins, p. 332.)

In accordance with this doctrine the United States has since adopted immigration regulations which practically excluded the Mongolian races from this country on the theory that they can not be assimilated by the Caucasian race and therefore are not desirable citizens.

In 1884 the Democrats were still of the Jeffersonian belief in regard to the rights of the foreigners in this country.

This will be shown by the following paragraph of the political platform of that date:

Asserting the equality of all men before the law, we hold that it is the duty of the Government in its dealings with the people to meet out equal and exact justice to all citizens of whatever race, color, nativity or persuasion, religious or political. (Hopkins, p. 365.)

The platform of 1884 expressly reaffirmed the entire platform of 1856, which in turn reaffirmed the platform of 1840, which in turn was but a crystallization of the declaration of Thomas Jefferson made in his first inaugural address, which in turn was but a condensation of the battle cry of the Democracy as it rallied for its first great contest.

In 1888 we reaffirmed the platform of 1884, and in 1892 we reaffirmed allegiance to the principles of the party as formulated by Jefferson and exemplified by the long and illustrious line of his successors in Democratic leadership from Madison to Cleveland. Later in the platform is this language:

We condemn and denounce any and all attempts to restrict the immigration of the industrious and worthy of foreign lands.

As late as 1896 we said this:

We reaffirm our allegiance to those great essential principles of justice and liberty upon which our institutions are founded, and which the Democratic Party has advocated from Jefferson's time to our own.

That, sir, was once more a declaration to the foreign-born citizens of this country that we did not propose to indulge in any restrictive legislation.

The platform then denounces the importation "of foreign pauper labor." The fair construction of the two clauses is that our liberal immigration policy was to be pursued, but that contract and imported labor were to be barred. (Hopkins, pp. 428–431.)

Upon the platform of 1892 Grover Cleveland was nominated and elected President. He vetoed, on March 3, 1897, an immigration act containing substantially the same literacy test found in the present bill.

He said:

A radical departure from our national policy relating to immigration is here presented. Heretofore we have welcomed all who came to us from other lands, except those whose moral or physical condition or history threatened danger to our national welfare and safety. Relying upon the jealous watchfulness of our people to prevent injury to our political and social fabric, we have encouraged those coming from foreign countries to cast their lot with us and join in the development of our vast domain, securing in return a share in the blessings of American citizenship.

A century's stupendous growth, largely due to the assimilation and thrift of millions of sturdy and patriotic adopted citizens, attests the success of this generous and free-handed policy, which, while guarding the people's interests, exacts from our immigrants only physical and moral soundness and willingness and ability to work.

A contemplation of the grand results of this policy can not fail to arouse a sentiment in its defense; for however it might have been regarded as an original proposition and viewed as an experiment, its accomplishments are such that if it is to be uprooted at this late day its disadvantages should be plainly apparent and the substitute adopted should be just and adequate, free from uncertainties, and guarded against difficult or oppressive administration.

So conclusive were the reasons given by Grover Cleveland, and so thoroughly was the question being settled, that it has not since been specifically referred to in Democratic platforms. The question of contract labor has, however, been dealt with. The doctrine expressio unis exclusio alterius applies.

No political party since Know Nothingism went to its dishonored grave has ever dared write the doctrine of proscription into its platform or go to the people upon that issue.

This bill was rushed through without its principles having been in any form submitted to the people, much as the alien and sedition laws were rushed through by the Federalist without previous notice or discussion.

The political party writing this miserable doctrine into its creed will never win an election in the United States. You can not carry a single one of the great doubtful States if you do it. It is an act of betrayal, because you have turned your backs upon your own party history from the days of Jefferson to this blessed hour, and because, having obtained office without notice, you now propose to reverse a century-old policy which you dare not submit on the hustings two years from now.

Mr. President, let me go back to the Know-Nothing Party a little bit. I am talking to some Members of the United States Senate who come nearer belonging to the Know-Nothing Party than they do to any other party, and I do not speak offensively. The term "Know-Nothing Party" was one which was applied to the so-called American Party, and I am employing it simply in that sense. What I mean to say is that, in my opinion, the doctrines of know-nothingism are so firmly graven upon the hearts and so fully exemplified in the prejudices of plenty of Senators here that the old Know-Nothing Party ought to be revived, and they ought to join it. It made its appearance in 1837 as an offshoot of the Federalist Party. I think the Republican Party was originally a kind of cross between the Know-Nothing Party and the Abolition Party, and I think the two parents were also closely related.

In 1837 some gentlemen got together and organized what they called the American Party. By the way, I never yet have seen a man about to do a mean, contemptible, and selfish thing but that he immediately grabbed the American flag and wrapped it around him and struck a patriotic attitude. When the Republican Party, in the days of its corruption and infamy, in the blackest hours of its history, was being brought to book and challenged upon the hustings, every speaker who rose to defend its infamous record came on the platform with an American flag in each hand and cried out, "Will you tear down Old Glory?" That and a bloody shirt which he kept concealed somewhere about his person, and which he frantically waved, constituted his sole stock in trade and his appeal to the people. So, of course, a party like the Know Nothing Party would seize the name "American," and here was one of their declarations. Listen! How much it sounds like the arguments of the proponents of this bill. It is a better statement of their case to-day than any one of them can make. They have not enough talent to reproduce it:

1. That Europe is industriously ridding herself of an excess population, now becoming burdensome to her; and whom does she send? Her paupers, her convicts, the ou'pouring of her almshouses and jails. Even lately has a would-be regicide been landed upon our shores by a national vessel. * * * These immigrants from Europe leave there filled with all the requisite materials to spread among our citizens immigrant radicalism and liberalism.

They have been shouting "anarchist" for mighty nigh a hundred years now.

2. That the foreigner had become the tool of the political wirepuller; that the naturalization laws had become a dead letter; that the foreign vote had become a decisive factor at election; that the foreigner, especially the Irish, was willing to obtain office and power by any means.

What was the matter with these fellows? What is the matter with some of you gentlemen? What is the matter with those

who push this bill? Are you, like the old Know Nothings, afraid that the Irish will beat you in the game of politics? Well, your fear is well founded, because the Irish, whom the old Know Nothing Party declared were the offscourings of the jails and almshouses, have, under God's free sky, blazed a path of glory and progress that but few races of men can follow. But how narrow that declaration was! It sounds like the snarl of a wild beast in the jungle of ignorance. It is selfishness indescribable when uttered by one who, having himself, or through his ancestors, escaped to a free country, now denies the same privilege to those who were left behind.

But the point I make is that this charge is as old as our country for it was made even before the days of the Know-Nothing Party. It was made when the Federalists passed the alien and sedition laws.

Now, I want to analyze these attacks upon immigrants. I want to compare the ancient attack with the present attack. Hearken to me as I try to do so.

Ancient and modern attacks upon immigration are identical. I have already nearly demonstrated that. But let me proceed.

First. The declarations of the Know Nothing Party, just quoted, are similar, only more extreme than any now proposed.

Second. The complaint that foreigners congregate in cities was made with even greater vehemence 100 years ago than at present. I have already produced the evidence of this in previous speeches, in which I quoted contemporaneous newspaper articles, the reports of civic societies, and so forth.

Third. The charge that the foreigner is overrunning this country and crowding out the native population was made over 100 years ago by Benjamin Franklin, who asserted in substance that the Germans would soon absolutely dominate the government of Pennsylvania and transform it into a German province. I have hitherto quoted from Franklin in extenso.

Fourth. The charge that the foreigner is illiterate has been made for more than 100 years.

Fifth. The charge that the foreigner pollutes our electorate is as old as the Nation.

Sixth. The charge that the foreigners herd together in great numbers in tenement districts was as true 100 years ago as it is at this hour.

Seventh. The claim that Europe is dumping her paupers and undesirables upon our shores was made by Franklin in 1753, who said of the Germans, "Those who come here are generally the most stupid of their own nation; unless the stream of importation can be turned from this to other colonies, even our Government will become precarious."

I said before, when I read this declaration of Franklin, it was the only great question upon which, to my knowledge, that wonderful philosopher was seriously mistaken. But no man is gifted with prophecy, no man is without his faults and shortcomings, and Franklin made this one great mistake. Witness the mighty Commonwealth the foreigners he denounced builded. Witness the fact that to-day no man dares stand to challenge the greatness of the race he said was pouring its undesirables into Pennsylvania and about to overthrown our civilization.

Similar charges were then, and ever since have been, brought against all other races of immigrants.

I want to challenge your thought to this.

Eighth. Prior to the Revolution various countries had established their colonies so that, to a large extent, the colonies were but an aggregation of different nationalities.

All of the foregoing complaints against foreigners were made with reference to what is now termed the early immigration, to wit: Germans, Irish, Norwegians, Welsh, Danes, and French, with the same fierceness they are now leveled against what is termed the present undesirable immigration.

The Senator from Colorado stated that in the mines of Colorado there were some 15 or 20 different languages spoken by the employees. Let me call his attention to the fact that if you had assembled in the early seventeenth century typical residents from each one of the American Colonies, you would have heard about 12 or 15 languages spoken by those representatives. This country from the first was not a country of one race but of many races.

Now, Mr. President, I take up the cry that immigrants are congested in cities. It seems to me it had some effect upon the minds of Senators. Let us stop a few moments and analyze it.

The cry has been raised since 1817.

Nearly 100 years ago the "Society for the Prevention of Pauperism in the city of New York met to devise ways and means for the transportation of able-bodied foreigners into the interior to labor upon the soil."

In 1857 the "Association for the Improvement of the Condition of the Poor, New York, declared that the Irish had an utter distaste for felling forests and turning up the prairies for themselves. They preferred to stay where another race would furnish them with food, clothing, and labor, and hence were mostly found loitering on the lines of public works, in villages, and in the worst portions of the large cities, where they competed with negroes for the most degrading employment." (Hourwich on Labor and Immigration, p. 67.)

If these alarmed gentlemen had had their way in 1819 New York City would yet have been a village. The charge brought against the Irish of that day was just as true as the charge that is being brought to-day against the present-day immigrant, and both of them are false. They said the Irish congregated in the cities and would not work on railroads, yet everyone knows that it was Irish picks and Irish shovels and Irish brawn and Irish courage that laid nearly every tie of the railroads that span this country. What we need is a committee to suppress public slanderers who get into high places.

But it is argued that the recent immigrant will not move to the farm. Now let us analyze that, not by vain mouthings and wild assertions, but in the light of the cold facts taken from the official statistics.

These gentlemen support their statements that the recent immigrant will not move to the country by an array of figures showing the rapid proportionate increase of the urban over the suburban population. From this fact the opponents of immigration deduce two conclusions:

(a) That the congested conditions of cities are due to the large influx of immigrants.

(b) That the immigrant is unwilling to live in the country.

Both of these arguments are unfounded and misleading.

First. As a country increases in age the proportion of its urban population invariably increases.

Second. This fact is especially manifested throughout our entire history, although it is admitted, notwithstanding the lamentations of the associations I have just quoted, that the so-called early immigrant went largely to the country.

I present a table showing increase of urban population in the United States since 1790:

Table showing percentage of total population living in cities from 1790 to 1910, inclusive.

[Taken from United States census of 1880, vol. 1, p. 29, and from the Census Abstract of 1910, p. 55.]

1790	3.3	1860	16.1
1800	3.9	1870	20.9
1810	4.9	1880	29.5
1820	4.9	1890	35.1
1830	6.7	1900	40.5
1840	8.5	1910	46.3
1850	12.5		

NOTE.—The urban population is in the above table to the year 1880 based upon cities of 8,000 or more inhabitants; from 1880 to 1910 they include all cities over 2,500. There should therefore be a slight increase in the earlier percentages.

But these figures do not at all demonstrate that the increase in the proportion of the urban population is due to immigration. On the contrary, an analysis of our immigration shows that from 1861 to 1870 only 17.6 per cent of the immigrant population engaged in agricultural pursuits, while from 1901 to 1910 the percentage had risen to 24.3 per cent. (Hourwich, p. 67.)

So it may truthfully be said that substantially one out of every five immigrants coming to this country settles upon the farm and tills the soil.

If the immigrants had all settled in the cities, it would necessarily have tended to decrease removal from the farms by increasing the demand for farm products. Its tendency, therefore, would have been to retain upon the farms those who were already there.

On the other hand, if there was, as there is, a large percentage of the immigrants who settle upon farms, the result would be an increase of the farm population to a greater extent than would have resulted merely from the natural increase of population.

Notwithstanding this fact, there has been an actual numerical decrease in the farm population of many of the best agricultural States in the Union.

These facts absolutely demonstrate that the reason more of the immigrants do not settle upon our farms must be identical with the reasons which sent our native population from the farms to the cities.

What are these reasons?

There are doubtless many, but two controlling facts stare us in the face.

First. Men will, invariably, go to the place where they can earn the greatest amount of money and procure the greatest advantages.

Second. Every labor-saving agricultural implement increases the ability of the farmer to dispense with employees. Accordingly, one man becomes able to cultivate a larger body of land.

In no branch of industry has the progress in labor-saving inventions been more rapid or revolutionary than agriculture.

Within the memories of men yet living, the farmer has progressed from the hand sickle to the cradle; from the cradle to the reaper; from the reaper to the self-binder. From the moleboard plow scratching the surface of the land to, in some places, traction engines drawing gang plows which turn 8 to 10 furrows at a time.

The sickle has given place to the mowing machine; the handrake to the horserake; the hoe to the cultivator; the flail to the steam thrashing machine; the saddlebag to the motor truck.

The weary tramp over dirt roads of great distances has become a memory.

The railroad now transports the farmers' goods to every part of the world. The packing house slaughters his hogs and cures his meat.

Clothing that were once woven by the tired fingers of the housewife are now created in the looms of great cities. Hence, the concentration of people in cities and a proportionate diminution of farm population.

By actual investigation it is shown that in many of the best States in the Union there has been not only a proportionate decrease, but an actual loss of farm population. I present a table showing the decrease in certain States from 1900 to 1910.

Table showing numerical and percentage decrease of rural population in certain States.

[Census Abstract, 1910, p. 57.]

	Number.	Per cent.
New Hampshire	10,108	5.4
Vermont	8,222	4.2
Ohio	28,105	1.3
Indiana	82,127	5.1
Iowa	119,869	7.2
Missouri	68,716	3.5

The above figures do not at all indicate that the States named are going backward.

I give, in simple illustration, the State of Missouri. Its rural population decreased 3.5 per cent, while its city population increased 22.3 per cent. This does not mean that the farmers of Missouri or the other States named are not prosperous. It does mean that improved farm machinery has enabled the farmers to cultivate larger bodies of land, and hence the farm population is emigrating to other States or going to the large cities.

Mr. DILLINGHAM. Mr. President——

Mr. REED. I yield to the Senator.

Mr. DILLINGHAM. Mr. President, I am very much interested in the discussion of the relative growth of the cities and the losses which have come to the rural communities during the last 10 years. While this bill was before the Senate and during the discussion the Senator from Missouri and myself held some difference of opinion in relation to the matter, and afterwards I took pains to examine the census reports to see what is the fact.

What the Senator has stated is undoubtedly true about the trend of population from the rural communities to the cities. In New England, I think, the census of 1910 shows that during the 10 preceding years our cities had increased a million in population while the country districts had decreased something like 25,000. But that increase in the city population was not altogether from the country; the larger proportion of it was from immigration. I wanted to cite right here the official figures, if the Senator will permit me to do it.

Mr. REED. I wish to ask the Senator, when he states the increase is very largely from foreign immigration, do you not raise any children of your own in the cities of the East, and does not that tend to increase the population?

Mr. DILLINGHAM. A few; but I examined the census of 1910 and I found that the per cent of immigrants in the native white and foreign white population in the 10 largest cities in the country for the decennial period from 1900 to 1910 was as follows:

In New York native whites increased 30 per cent, foreign-born whites 52.9 per cent.

In Chicago, increase of native whites 25.5 per cent, of foreign-born whites 33.4 per cent.

In Philadelphia, increase of native whites 15.5 per cent, of foreign-born whites 30.3 per cent.

Mr. REED. Mr. President, I thought the Senator rose to ask me a question, and I am willing to answer——

Mr. DILLINGHAM. I ask the Senator if he will not permit me to give the exact figures on that question, taken from the census? If the Senator objects, I will do it in my own time.

Mr. REED. Is it very long?

Mr. DILLINGHAM. No; I have taken the 10 principal cities of the United States.

Mr. REED. Very well; read it in.

Mr. DILLINGHAM. In St. Louis the increase of native whites was 20.6 per cent; of foreign-born whites, 13.3 per cent.

In Boston, increase of native whites, 17.5 per cent; of foreign-born whites, 23.5 per cent.

In Cleveland, increase of native whites, 41.7 per cent; of foreign-born whites, 57.4 per cent.

In Baltimore, increase of native whites, 9.7 per cent; of foreign-born whites, 13.4 per cent.

In Pittsburgh, increase of native whites, 16.3 per cent; of foreign-born whites, 22.3 per cent.

In Detroit, increase of native whites, 63.5 per cent; of foreign-born whites, 63 per cent.

In Buffalo, increase of native whites, 23 per cent; of foreign-born whites, 13.9 per cent.

So it appears that the increase in population among the foreign born in the largest cities of the country has been very much greater than the increase of the native born. The three exceptions are St. Louis, Detroit, and Buffalo. In the case of Detroit the difference is not appreciable. I think that explains the true situation regarding the movement of population during the last 10 years.

I thank the Senator for his courtesy.

Mr. REED. I have called attention to the statistics compiled by the Government which show that for the decades preceding this the percentage of foreign born who went into the country was about 17, and that the percentage has risen in the last decade to 24. The truth is the same law that drives the boy born on the farm to the city keeps the foreigner from going to the farm. If conditions in the city are so much better than they are on the farm that the boy born on the farm will insist on going to the city, then, of course, the conditions do not permit the man who is born in the city or immigrates to this country to go to the farm. That is all there is to it.

Whenever labor becomes better paid upon the farm than in the city, whenever prices for farm products have risen so that farming is more profitable than other occupations, the immigrants will nearly all go to the farm, just as did your ancestors and mine.

I desire to put in these figures. I was calling attention to the increased use of farm machinery. The figures are startling.

In 1850 the total amount expended for farm machinery in the United States was $151,587,638. In 1910 we expended in farm machinery $1,265,149,783. That means that machines are doing the work human hands formerly performed. In this fact we ascertain the reason foreigners stay in cities. It is because they have to live, and they have to stay where work is.

But I pass on. I desire to discuss the question of low wages. I give way to no man in my desire that wages shall be kept at a high standard in this country. It is the best method of distributing wealth that there is. If we could have a high wage everywhere, we would begin distributing the wealth where we should—down at the bottom, to many men—instead of allowing it to be concentrated at the top in the hands of a few men. I am in favor of high wages.

But how are we to obtain them? In the great world of competition labor still has to meet its own members in the bitter strife for existence, and, upon the other hand, it must contend with the cupidity, the avarice, and the cruelty of the employer. It is true that foreigners coming to this country must get work, and that if they can not get work at $2 a day they will work for a dollar and a half. They will accept the smaller wage because they must take it. But, Mr. President, is there anything alarming in that situation? That, as I shall undertake to show, is the exact complaint that has been made at every stage of our country's history against every race of men who have ever come to these shores.

It was charged against the early German, Swede, Irishman, and Scotchman, as it is now charged against the more recent immigrant.

A moment's consideration of the facts daily confronting us, a slight knowledge of human nature, and the employment of a little common sense annihilates the argument.

No human being prefers hardship to ease, hunger to plenty, poverty to wealth. The desire to improve his condition and escape from the exactions of toil is an innate faculty of the human mind.

These men, therefore, work for low wages only until they can secure a higher wage.

The immigrant who has been here for a few years invariably refuses to work for less money than the native born secure. Who any longer brings the charge against the Irishman that he cuts wages? If you think the Irish are engaged in keeping down wages in this country, try to hire one of them to work on your farm or in your factory. Try to hire an Irish girl to work in your home. If you think the Swede is any longer cutting down wages, try the same experiment with the Swede man or the Swede woman. If you claim that any of these races are really cutting down wages so that they have materially affected the general wage level of this country, then I reply you are mistaken; you will learn the effect is confined to a few spots, and the remedy for those spots is not to be found in prohibiting men from entering our country, but in proper legislation, humane treatment, and sensible advice.

Rest assured that just as soon as a foreigner obtains a sufficient amount of capital so that he dare protest his rights he will protest them. Accordingly they sometimes strike, and when they do their action is discussed as though striking by immigrants were the worst of crimes. It is all right for the American citizen to strike, but very wicked for the foreigner to imitate his adopted brother. However, if the foreigner does not strike you heap maledictions upon him, because he is too truculent and continues to work for small wages.

The fact is that the circumstance of the foreigner striking is the very best evidence that he is unwilling to work for a low wage, and that as soon as possible he will insist upon and secure a higher and a better wage. If there is violence done sometimes, I reaffirm what I said a few days ago, it is not as likely to be committed by the foreigner as it is by the native-born son, because the foreigner more fears the law.

The chief argument in favor of the literacy test is that the large influx of unlettered foreigners increases the general average of ignorance and constitutes a menace to our country.

The force of the contention is greatly weakened by the following considerations:

First. A very considerable percentage of adult immigrants never become naturalized; hence their lack of education does not affect the intellectual average of the electorate.

Second. The period of life of adult immigrants is necessarily limited. Therefore their lack of education must soon cease to be a factor.

The vital question is, Are the children of immigrants the equals of our native population in education, intelligence, and patriotism?

If the foregoing question can be answered in the affirmative, then restrictive legislation is not only unnecessary, but a serious mistake.

I present herewith statistical tables which constitute a complete answer to all of the contentions raised by the advocates of this restrictive measure.

The tables referred to are as follows:

TABLE NO. 1.—*Per cent of children 6 to 14 years of age attending school compared with the per cent of foreign-born population in each State.*

[This table confined to the white race for the year 1910. (Census Abstract, pp. 86 and 228.)]

WHITE.

States.	Per cent of foreign-born whites in 1910.	Per cent of native parentage.	Per cent where one or both parents are foreign born.	Per cent of foreign-born children.
Alabama	0.9	70.0	78.1	70.2
Arizona	22.9	80.4	72.1	61.6
Arkansas	1.1	74.7	81.2	55.8
California	21.8	87.4	88.1	82.3
Colorado	15.9	86.4	88.4	81.7
Connecticut	29.5	92.6	92.6	89.2
Delaware	8.6	83.4	83.4	75.9
Florida	4.5	72.1	76.1	63.5
Georgia	.6	74.8	84.5	76.0
Idaho	12.4	82.0	84.1	76.2
Illinois	21.3	88.2	88.0	83.8
Indiana	5.9	88.4	87.6	80.6
Iowa	12.3	90.8	90.8	82.0
Kansas	8.0	88.3	89.1	76.7
Kentucky	1.7	76.3	87.1	83.8
Louisiana	3.1	68.4	69.7	50.7
Maine	14.8	90.3	88.4	81.0
Maryland	8.0	83.3	80.0	75.5
Massachusetts	31.2	93.9	93.1	88.1
Michigan	21.2	91.3	90.6	86.8
Minnesota	26.2	88.8	89.2	86.0
Mississippi	.5	84.2	82.9	44.0
Missouri	7.0	85.5	86.7	80.7
Montana	24.4	83.5	86.0	76.1
Nebraska	14.8	90.1	90.8	85.1
Nevada	22.0	86.3	88.8	76.7
New Hampshire	22.4	92.2	91.3	85.5
New Jersey	25.9	89.6	88.7	83.8
New Mexico	6.9	76.9	75.1	56.6
New York	29.9	89.9	90.6	88.3
North Carolina	.3	75.7	84.0	64.8
North Dakota	27.1	82.7	81.5	70.0
Ohio	12.5	90.3	89.2	84.0
Oklahoma	2.4	82.2	85.5	75.8
Oregon	15.3	85.1	87.3	82.7
Pennsylvania	18.8	88.1	84.8	79.6
Rhode Island	32.8	91.2	89.0	82.4
South Carolina	.4	72.1	81.4	72.2
South Dakota	17.2	84.1	84.6	72.9
Tennessee	.8	75.2	83.6	78.9
Texas	6.2	74.3	60.3	28.4
Utah	17.0	85.4	87.9	83.5
Vermont	14.0	93.1	93.3	89.3
Virginia	1.3	73.2	80.0	71.3
Washington	21.1	85.9	86.9	83.9
West Virginia	4.7	83.0	82.9	66.1
Wisconsin	22.0	90.8	89.7	84.1
Wyoming	18.6	84.9	85.9	76.4
United States (total)	14.5	83.5	88.0	82.3

TABLE NO. 1.—*Per cent of children 6 to 14 years of age, etc.*—Continued.

WHITE—continued.

School attendance of children 6 to 14 years of age in the United States of all classes, both native and foreign born parentage and foreign born, 81.4 per cent.

Per cent of foreign-born population compared with the per cent of illiterates 10 years of age and over and the per cent of prisoners serving sentence in each State of the United States.

[This table confined to the white race for the year 1910.]

WHITE.

States.	Foreign-born whites, population (Census Abstract, 1910, p. 86).	Illiterates 10 years of age and over (Census Abstract, 1910, p. 245).	Per cent prisoners in penal institutions Jan. 1, 1910, serving sentence (Statistical Abstract, 1912, p. 75).
	Per cent.	*Per cent.*	
Alabama	0.9	22.9	0.17
Arizona	22.9	20.9	.31
Arkansas	1.1	12.6	.08
California	21.8	3.7	.18
Colorado	15.9	3.7	.15
Connecticut	29.5	6.0	.13
Delaware	8.6	8.1	.14
Florida	4.5	13.8	.24
Georgia	.6	20.7	.25

Vote on Thomas amendment modifying literacy test. (Congressional Record, p. 767.)

States.	Yeas.	Nays.	Not voting.
Alabama		White	Bankhead.
Arizona		Ashurst, Smith	
Arkansas		Robinson	Clark.
California	Perkins	Works	
Colorado	Thomas, Shafroth		
Connecticut		Brandegee, McLean	
Delaware			du Pont, Saulsbury.
Florida		Fletcher, Bryan	
Georgia		Smith, Hardwick	
Idaho	Borah		Brady.
Illinois	Lewis		Sherman.
Indiana	Kern		Shively.
Iowa		Cummins	Kenyon.
Kansas		Bristow	Thompson.
Kentucky		James	Camden.
Louisiana	Thornton, Ransdell.		
Maine			Johnson, Burleigh.
Maryland	Smith, Lee		
Massachusetts		Lodge	Weeks.
Michigan	Townsend		Smith.
Minnesota	Clapp	Nelson	
Mississippi		Vardaman, Williams.	
Missouri	Reed		Stone.[1]
Montana	Walsh, Myers		
Nebraska	Hitchcock, Norris		
Nevada	Pittman		Newlands
New Hampshire		Gallinger	Hollis.
New Jersey	Martine, Hughes		
New Mexico			Catron, Fall.
New York	O'Gorman	Root	
North Carolina		Simmons, Overman	
North Dakota		McCumber, Gronna.	
Ohio	Pomerene	Burton	
Oklahoma		Gore	Owen.
Oregon	Chamberlain, Lane		
Pennsylvania		Oliver	Penrose.
Rhode Island		Lippitt	Colt.
South Carolina		Smith	Tillman.
South Dakota		Sterling	Crawford.
Tennessee			Lea, Shields.
Texas	Culberson	Sheppard	
Utah		Smoot, Sutherland	
Vermont		Dillingham, Page	
Virginia		Swanson	Martin.
Washington		Jones, Poindexter	
West Virginia			Chilton, Goff.
Wisconsin	La Follette		Stephenson.
Wyoming			Warren, Clark.

[1] Paired for the amendment.

Table 1 shows—and I challenge the attention of some southern Senators to what I am now about to say—Table 1 shows:

1. That those States which possess the smallest percentage of foreign-born people are the strongest advocates of the bill, while many of the States having a very high percentage of foreign-born populat. n are opposed to the bill.

2. That a majority of the States advocating the literacy test are:

(a) In point of literacy below the general average of the rest of the United States.

(b) In point of literacy below the foreign-born immigrant children.

(c) The percentage of literacy among the foreign-born immigrant children is higher than the general average of the United States.

(d) The percentage of literacy of children, one or both of whose parents are foreign born, is far above the general average of the United States.

Mr. President, if I can make good those propositions I shall have destroyed the last argument of those who voted for this restrictive, un-American, and undemocratic bill.

I. THE STATES WHICH POSSESS THE SMALLEST PERCENTAGE OF FOREIGN-BORN PEOPLE ARE THE STRONGEST ADVOCATES OF THIS BILL, WHILE MANY OF THE STATES HAVING A HIGH PERCENTAGE OF FOREIGN-BORN POPULATION ARE OPPOSED TO THE BILL.

The following States have less than 2 per cent of foreign-born people:

	Per cent.
Alabama	0.9
Arkansas	1.1
Georgia	.6
Kentucky	1.7
Mississippi	.5
North Carolina	.3
South Carolina	.4
Tennessee	.8
Virginia	1.3

The following States have more than 2 and less than 5 per cent of foreign-born population:

	Per cent.
Florida	4.5
Louisiana	3.1
Oklahoma	2.4
West Virginia	4.7

It is a significant fact that all of the Senators, with the exception of Louisiana, representing the above-named States, either voted against any modification of the literacy test or failed to vote on that question.

The author of the bill is a Member of the House from Alabama, which has a foreign population of but nine-tenths of 1 per cent. The chairman of the committee of the Senate, who has been most forcibly pushing the bill, comes from South Carolina, the foreign-born population of which is only four-tenths of 1 per cent.

The following States have a large foreign-born population:

	Per cent.
New York	29.9
Minnesota	26.2
New Jersey	25.9
Montana	24.4
Wisconsin	22.0
Illinois	21.3
Michigan	21.2
Colorado	15.9
Oregon	15.3
Nebraska	14.8
Idaho	12.4

The Senators representing the above-named States, by a large majority, supported an amendment in favor of modifying the literacy test.

It is a noticeable fact that the State of Illinois, which possesses a foreign population of 21.3 per cent, is represented here by Senators of opposite political faith. Yet both of these Senators oppose the literacy test. They do so because they are intimately acquainted with the immigration problem. The great State of Illinois contains a foreign population of approximately 1,201,019.

I pause now to ask why it is that Senators coming from States where substantially no immigrant population exists, which can not have suffered from it, which can not be well acquainted with it, are so keen in their insistence upon forcing their restrictive policy upon those States which are acquainted with the problem? If this question were left to those States which are acquainted with the problem this restrictive legislation never would have been passed.

Mr. President, I next call attention to this proposition:

II. THE LITERACY OF CHILDREN OF IMMIGRANTS IS HIGHER THAN THE GENERAL AVERAGE OF THE UNITED STATES.

Table No. 1, which I present, shows the following somewhat startling facts:

A. The total percentage of foreign-born population in the United States to be 14.5 per cent.

B. The percentage of children between the ages of 6 and 14 of native white parentage who attend school to be 83.5 per cent.

C. The percentage of children of all classes between the ages of 6 and 14 who attend school to be 81.4 per cent.

D. The percentage of whites between the ages of 6 and 14 who attend school, where one or both parents are foreign born, to be 88 per cent.

E. The percentage of foreign-born white children between the ages of 6 and 14 who attend school to be 82.3 per cent.

It therefore appears that the percentage of school attendance by children, one or both of whose parents came here as an immigrant, exceeds that of the children of white natives by 4.5 per cent.

The table also shows that the school attendance among children of foreign birth exceeds the general average of school attendance for the whole country by nine-tenths of 1 per cent.

The figures just quoted demonstrate, therefore, that the degree of literacy of children of foreign birth is above the general average of the native born and also above the average of the population of the country taken as a whole.

The figures also prove beyond peradventure that the offspring of the immigrant does not remain illiterate, but that he pursues learning with an even greater avidity than our native-born children.

I advance this proposition:

III. THE STATES HAVING THE LOWEST PERCENTAGE OF IMMIGRANT POPULATION ARE LOWEST IN LITERACY.

The men who stand here to represent the States having the smallest foreign population also represent States having the lowest average of literacy of the country. The States that cry "Shut out the illiterate" are themselves the most illiterate.

I present herewith Table No. 2, which compares the degree of illiteracy among children of school age between five great States containing a very large percentage of foreign population with the degree of illiteracy among children of school age found in the five States containing the smallest percentage of foreign-born population.

The comparison is distinctly unfavorable to the States possessing the smallest percentage of foreign-born people.

The figures I now give embrace all of the white children between 6 and 14 years:

Rhode Island: Immigrant population, 32.8 per cent; school attendance, 91.2 per cent.

South Carolina: Immigrant population, four-tenths of 1 per cent; school attendance, 72.1 per cent.

Massachusetts: Immigrant population, 31.2 per cent; school attendance, 93.9 per cent.

North Carolina: Immigrant population, three-tenths of 1 per cent; school attendance, 75.7 per cent.

New York: Immigrant population, 29.9 per cent; school attendance, 89.9 per cent.

Mississippi: Immigrant population, five-tenths of 1 per cent; school attendance, 84.2 per cent.

Connecticut: Immigrant population, 29.5 per cent; school attendance, 92.6 per cent.

Georgia: Immigrant population, six-tenths of 1 per cent; school attendance, 74.8 per cent.

North Dakota: Immigrant population, 27.1 per cent; school attendance, 82.7 per cent.

Tennessee: Immigrant population, eight-tenths of 1 per cent; school attendance, 75.2 per cent.

When we include the colored population the contrast is even more unfavorable to the States possessing a small foreign population.

Note also that States containing a very low percentage of foreign population are, in the point of literacy—

(a) Far below the general average of the United States taken as a whole.

(b) Far below the general average of children of foreign birth, taking the United States as a whole.

What an astounding thing it is to find the representatives of these States, whose population in literacy is far below the average of the children of foreign birth, whose States contain but few people of foreign birth, here clamoring that the foreigner shall be excluded from this country on the ground of illiteracy!

I next assert, Mr. President, that immigration is not inimical to education.

That immigrants favor education is shown by the fact that those States where they are most numerous and potential have uniformly dealt more generously with the public schools than have those States which are completely dominated by native-born people. In support of the foregoing statement I submit Table 2:

TABLE No. 2.—*Comparative statement showing the five States which have the largest percentage of foreign born compared with the five States which have the smallest percentage of foreign born.*

LARGEST PERCENTAGE OF FOREIGN BORN.

States.	Per cent of foreign-born whites in 1910 (Census Abstract, p. 86).	Per cent of school attendance 6 to 14 years, all classes (Census Abstract, p. 228).	Per cent of school attendance 6 to 14, native white (Census Abstract, p. 228).	Per cent of school attendance 6 to 14, of whites having one or both parents foreign born (Census Abstract, p. 228).	Per cent of school attendance 6 to 14, of foreign-born whites (Census Abstract, p. 228).	Per cent of negroes 6 to 14, attending school (Census Abstract, p. 228).	Expenditures for public schools, 1879 (Statistical Abstract, 1880, p. 155).	Expenditures for public schools, 1911 (Statistical Abstract, 1912, p. 118).	Value of all property in 1904 (Statistical Abstract, 1912, p. 650).	Population in 1880 (Statistical Abstract, 1880, p. 149).	Population, 1910 (Census Abstract, 1910, p. 24).	Area in square miles (Statistical Abstract, 1912, p. 28).	Date when admitted to the Union (Statistical Abstract, 1912, p. 21)
Rhode Island	32.8	88.8	91.2	89.0	82.4	87.7	$597,000	$2,360,000	$799,000,000	276,000	542,000	1,000	1790
Massachusetts	31.2	92.9	93.9	93.1	88.1	92.0	4,994,000	22,502,000	4,956,000,000	1,783,000	3,366,000	8,000	1788
New York	29.9	90.0	89.9	90.6	88.3	87.1	10,464,000	52,328,000	14,769,000,000	5,083,000	9,113,000	47,000	1788
Connecticut	29.5	92.3	92.6	92.6	89.2	90.5	1,375,000	5,426,000	1,414,000,000	622,000	1,114,000	4,000	1788
North Dakota	27.1	80.7	82.7	81.5	70.0	.....	.....	5,184,000	735,000,000	.....	577,000	70,000	1889

SMALLEST PERCENTAGE OF FOREIGN BORN.

South Carolina	0.4	62.6	72.1	81.4	72.2	56.1	$319,000	$2,168,000	$585,000,000	995,000	1,515,000	30,000	1788
North Carolina	.3	71.7	75.7	84.0	64.8	64.0	337,000	3,140,000	842,000,000	1,400,000	2,206,000	48,000	1789
Mississippi	.5	72.2	84.2	82.9	44.0	63.7	641,000	2,726,000	688,000,000	1,131,000	1,797,000	46,000	1817
Georgia	.6	65.6	74.8	84.5	76.0	55.4	465,000	4,390,000	1,167,000,000	1,539,000	2,609,000	58,000	1788
Tennessee	.8	72.1	75.2	83.6	78.9	60.1	710,000	5,083,000	1,104,000,000	1,542,000	2,184,000	41,000	1796

I also present Table 3, which compares the amounts of money expended for public schools in the five States containing the largest percentage of foreign population with the amounts expended in States containing the smallest percentage of foreign population.

The table referred to is as follows:

TABLE No. 3.—*Money expended for public schools.*

	Population.	Expended for public schools.	Per capita expended.	Per cent foreign born.
North Carolina	2,206,000	$3,140,000	$1.42	0.3
Rhode Island	542,000	2,360,000	4.35	32.8
South Carolina	1,515,000	2,168,000	1.43	.4
Massachusetts	3,666,000	22,502,000	6.13	31.2
Mississippi	1,797,000	2,726,000	1.51	.5
New York	9,113,000	52,328,000	5.74	29.9
Georgia	2,609,000	4,390,000	2.07	.6
Connecticut	1,114,000	5,426,000	4.87	29.5
Tennessee	2,184,000	5,083,000	2.32	.8
North Dakota	577,000	5,184,000	8.98	27.1

The average amount of money expended on public schools in five States showing highest percentage of immigration per capita—— $5.96

The average amount expended in the five States showing the lowest percentage of immigration per capita—— 1.54

The above figures prove that a great influx of foreigners has not led to a policy of stinting the public schools; also, that if it be true that foreigners exercise the potential influence in politics ascribed to them, then they have well manifested that interest by liberal taxation for educational purposes. If the figures I have quoted were reversed, what a frightful deduction these proscriptionists, who are the residuary legatees of the Know Nothing Party, would draw.

Mr. WALSH. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Montana?

Mr. REED. I do.

Mr. WALSH. Is it the deduction of the Senator, accordingly, that the real reasons for pressing forward this legislation are some that have not been disclosed?

Mr. REED. That is my opinion—reasons so unpleasant that I hesitate to mention them; but I shall perhaps touch closer upon that question a little later.

Mr. O'GORMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from New York?

Mr. REED. I do.

Mr. O'GORMAN. No Member of this body has given more careful consideration to the questions involved in this legislation than the junior Senator from Missouri; and it does seem to me, if he has information which would inform his colleagues and the country as to the real motives underlying this proscriptive policy, that it is his duty to give that information here and now.

Mr. REED. Mr. President, before I conclude my remarks I think I shall be able to satisfy all of the Members of the Senate that I have dealt with this question with considerable frankness; but lest it might be later forgotten, and lest it might be thought that I am avoiding an answer, I have to say that I believe the most potential, constant, and determined force back of this restrictive legislation is that spirit of religious proscription that is as old as our country; that organizations and societies have been pushing this legislation, and that these societies raise against one of the great branches of the Christian faith the hand of proscription, if not of absolute persecution.

I desire to proceed now. I was saying that I laid down further the proposition that the increase of population and wealth in those States having the largest foreign population has

been the greatest in this country, and I should like to challenge the attention of the Senators who are present to Table 3, which I have presented.

Now, a preliminary word.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Colorado?

Mr. REED. I do.

Mr. THOMAS. If it will not interrupt the Senator, I should like to call his attention at this point to one phase of modern immigration which had much to do with the vote which I cast in favor of the measure just vetoed. It is the importation—I think that is the proper word to use—of large bodies of men into this country by great corporate interests, such as the Colorado Fuel & Iron Co. in my State, from the different nationalities of Europe, parceled out among these nationalities in somewhat regular lines of division, and employing them in their mines, so that on account of disparity of language and nationality there can be neither community of action nor concert in any social way, in consequence of which the places of American workmen are taken by that class of people, who afterwards, becoming dissatisfied with their condition, which to say the least is an undesirable one, break out into opposition and insurrection and strikes, and commit disorders for which American workmen, both native and naturalized, and who are entitled to the protection and the privileges of our laws and of our institutions, are blamed.

To give the Senator a cogent illustration of the situation which results from the possibilities of carrying out such a purpose, in 1904 there was a strike in southern Colorado. The governor of the State, at the instance of the mine owners, declared martial law; and the militia, at the behest of those in authority, loaded into box cars, without form of law or process of law, the men who were displeasing to the managers, whether they had been engaged in the strike or whether they had been merely suspected of wrongdoing or wrong purpose, and dumped them onto the plains of Kansas and New Mexico. Their places were filled by men imported directly from southeastern Europe, and the men who were imported in 1904 from that section were naturalized before they had been in the State three months and herded at the polls and voted like sheep. It was these men who in 1913 went on strike—a strike which has become historic on account of its gravity and the extent to which it reached.

I also want to emphasize the fact that when the President of the United States, responding to the call of the governor, exercised his constitutional power by taking possession of the disturbed area of the State with the troops of the United States Government, he issued a proclamation commanding all those who had arms in their hands and all who were otherwise unlawfully disposed toward the Government, to disperse and go to their homes within a certain time, and that proclamation had to be translated into 22 different languages in order that its contents might be properly understood and carried to the minds of something like five or six thousand of the men supposed to be upon strike.

I submit that that is a condition which is undesirable in any country, and one which no well-regulated immigration law would permit. It is one which has been the fruitful cause of much of the social, political, and industrial disturbance in my State, and one to which the real workingmen and citizenship of my State naturally desire to put an end, if possible.

Mr. REED. Mr. President, the remarks of the Senator from Colorado break completely in on the thread of my discourse.

Mr. THOMAS. I am very sorry I interrupted the Senator, if that is the case.

Mr. REED. That is all right, and I therefore will depart from the thread of my discourse for a moment to give them consideration.

The Senator himself introduced an amendment to this bill seeking to modify the literacy test, and I believe if that amendment had been placed upon the bill the President would not have found it necessary to interpose his veto. I supported that amendment. It was an amendment which exempted from the literacy test those who come here to escape race persecution and who come to escape political persecution; but the authors of this bill were so desirous of restricting immigration that they—I say it without meaning to be offensive—stubbornly refused to yield a single inch, and insisted upon excluding from this country those who flee here seeking refuge from the tyranny of other lands.

I make the further observation that if labor is being imported into the State of the Senator from Colorado by the Colorado Fuel & Iron Co., or any other corporation or any individual, the present Federal statutes are sufficient to punish drastically those guilty of the offense. But if the laws need strengthening in that respect I will go as far as the Senator from Colorado can go, or as any other man can go, to stop the importation of contract labor.

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

Mr. REED. Mr. President——

The VICE PRESIDENT. The Senator from Missouri has not lost the floor.

Mr. REED. Mr. President, I have repeatedly made the statement during the course of this debate which I have just made—the difficulty that in a bill which contains some good and wholesome propositions were thrust these propositions to which the President has expressly called attention, every one of which is unsound and all of which are a repudiation of the doctrines of the Democratic Party, of the teachings of Thomas Jefferson, of the principles of justice and of equity, of the very system under which civilization in this land was first established.

As for the statement of the Senator from Colorado that various languages are spoken in the Colorado mines, let me call his attention to the fact that only 20 years after the discovery of Manhattan Island it is recorded there were then 14 different languages spoken on its soil. There is nothing new about different people speaking different tongues or of the fact that people of different tongues come to this land and work at the same place.

Let me remark as I am passing, that if I know anything of the history of the strikes of Colorado, bad as was the conduct of the striker, the conduct of some of the officials, particularly the military officers, was probably a worse offense against the Constitution of the United States and the Bill of Rights of this land than was the act of any one of the strikers who ventured to raise his arm against oppression.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER (Mr. ROBINSON in the chair). Does the Senator from Missouri yield to the Senator from Colorado?

Mr. REED. I do.

Mr. THOMAS. I fully concede that one injustice was the offspring of the other. I merely wish to say that I make no point upon the disparity of language taken in itself. What I intended to emphasize was the fact that when men are brought here deliberately because they speak a different tongue and are separated lest they acquire either a common tongue or the English language, when, after they have been here for a period of 10 years, the only language which they know is the language which they brought here, and that that is the consequence of the method of oppression upon a large scale, it is a condition which to my mind is not only undesirable but appalling.

Mr. REED. Ah! But, Mr. President, I call the attention of my friend from Colorado to this, that the authors of that outrage of importation were American citizens, who thereby violated the laws of the land. I also call his attention to the fact that the cruel system of herding these people together in communities so arranged that various languages were spoken was born in the brain of some native-born corporation manager. If these people were so herded and so treated, is it any wonder they finally rose to strike? Was not that rather an evidence of their manhood and of their fitness for citizenship than proof to the contrary? And having been brought here and herded, as the Senator states, is that any excuse for the officers of a State trampling upon the Constitution and setting up a pretended condition of war, and arresting these people, confining them like cattle in prison pens without trial, and denying to them the writ of habeas corpus?

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Colorado?

Mr. REED. I do.

Mr. THOMAS. There certainly is no excuse whatever for the things which the Senator has just mentioned. My fundamental objection, and there are many, is that when these people were brought there each one of them took the bread out of the mouths of an American workman, his wife and his children, and they were turned adrift not only to seek employment elsewhere but to meet the drastic competition in lower wages consequent

upon the importation of this large body of men as their substitutes.

Mr. REED. Mr. President, importation is utterly abominable and importation is now criminal. If the authorities of Colorado, the native-born people, the educated and literate people, the learned people, permitted the laws of the United States to be trampled under foot they themselves have a responsibility for which they must answer.

As for the question of wages and driving out American workmen, I shall discuss that a little later, because it is in the course of my remarks. I propose now to go on with my demonstration.

The next point I make is that a comparison of the material progress and wealth of States having a large foreign population with States having a small foreign population shows that the former have far outrun the latter in every line of industry and attainment.

COMPARISON OF MATERIAL PROGRESS AND WEALTH.

Now, a preliminary word.

The wonderful progress of our country can be largely attributed to the liberal immigration policy hitherto pursued.

When the War of the Revolution ended, our civilization was confined to a narrow strip of land along the Atlantic coast. The population was in the neighborhood of 3,000,000.

In less than a single decade the population had doubled. It had begun pushing its way into the interior. It drove back the Indians; built cities, schoolhouses, churches, and homes.

In a few years the new Republic had more than doubled its strength, its wealth, and its power among the nations of the earth.

That policy has been pursued ever since, with the result that our land has outstripped all the nations of history.

That our progress is largely due to the generous influx of foreign blood is abundantly illustrated by the contrast existing between the progress and development of those States having the highest percentage of foreign population with the States having the lowest.

Again, I call attention to the 10 States I have just referred to:

RHODE ISLAND AND SOUTH CAROLINA.

Rhode Island and South Carolina came into the Union at substantially the same time.

South Carolina has thirty times the territory of Rhode Island and only three times the population, while the wealth of Rhode Island exceeds that of South Carolina by $214,000,000.

Rhode Island has 32.8 per cent foreign population; South Carolina has four-tenths of 1 per cent.

Contrast Rhode Island with South Carolina. You can put 30 States like Rhode Island within the territory of South Carolina, yet little Rhode Island has nearly one-third of the population of South Carolina; little Rhode Island has more wealth than South Carolina, and little Rhode Island has outrun her in progress, yet little Rhode Island has 32.8 per cent of foreign population while South Carolina has four-tenths of 1 per cent.

Mark you, I have not selected States that just suit my purpose. I have here the five States showing the highest percentage and I am contrasting them with the five States showing the lowest percentage of foreign population. The percentage of the other States intermediate will bear out the results I am now giving to a greater or less extent.

LET US CONTRAST MASSACHUSETTS AND NORTH CAROLINA.

Both States were admitted into the Union at substantially the same time.

North Carolina has six times the area of Massachusetts. Massachusetts exceeds North Carolina in population by 1,160,000, and has almost six times as much wealth, the figures being Massachusetts, $4,956,000,000; North Carolina, $842,000,000.

The foreign population of Massachusetts is 31.2 per cent; North Carolina, three-tenths of 1 per cent.

What a blessing it would have been to South Carolina if she could have had an infusion of the blood that helped build the great State of Massachusetts.

NEW YORK AND MISSISSIPPI.

The age and area of these States are substantially the same. New York has over five times the population of Mississippi and over twenty times its wealth, the exact figures being New York, $14,769,000,000; Mississippi, $688,000,000.

The foreign population of New York is 29.9 per cent; Mississippi, five-tenths of 1 per cent.

CONNECTICUT AND GEORGIA.

These two States were admitted into the Union in the same year.

Georgia has over fourteen times the area of Connecticut and nearly double the population, but falls below Connecticut in point of wealth, the exact figures being Connecticut, $1,414,000,000; Georgia, $1,167,000,000.

Connecticut has a foreign population of 29.5 per cent; Georgia, six-tenths of 1 per cent.

NORTH DAKOTA AND TENNESSEE.

North Dakota was admitted into the Union nearly 100 years after Tennessee.

North Dakota has made marvelous material advancement. Owing to her youth the population is comparatively sparse, yet with less than 25 per cent of the population of Tennessee she already has over 66 per cent of her wealth. In both population and wealth she is rapidly overtaking her elder sister.

The foreign population of North Dakota is 27.1 per cent; Tennessee, eight-tenths of 1 per cent.

The above figures absolutely demonstrate the following propositions that immigration has not:

(a) Increased the average of illiteracy.

(b) Has not injured the public schools.

(c) Has not withheld material advancement.

On the contrary, the States containing a heavy foreign population show a distinct superiority in the matter of literacy.

In material advancement they have far outstripped the States containing a small foreign population.

Under these circumstances it is a little astonishing that an attempt should be made by States with but a small percentage of foreign population to force their policy upon States with a large percentage, the representatives of many of which desire to continue a policy of liberality.

I now inquire if crime increases by immigration. This question is answered in the negative by both statistics and authority. I present Table 4.

The table referred to is as follows:

TABLE NO. 4.—*Comparing the percentage of persons confined in penal institutions in the 10 States having the largest percentage of foreign population with the percentage of persons confined in penal institutions in the 10 States having the smallest percentage of foreign population.*

States.	Percentage foreign-born white.	Percentage of prisoners under sentence in penal institutions.
Rhode Island	32.8	0.11
Massachusetts	31.2	.19
New York	29.9	.13
Connecticut	29.5	.13
North Dakota	27.1	.06
Minnesota	26.2	.07
New Jersey	25.9	.11
Montana	24.4	.25
New Hampshire	22.4	.11
Wisconsin	22	.07
Average		.125
North Carolina	0.3	.05
South Carolina	.4	.11
Mississippi	.5	.12
Georgia	.6	.26
Tennessee	.8	.11
Arkansas	1.1	.17
Virginia	1.3	.15
Kentucky	1.7	.12
Oklahoma	2.4	.10
Louisiana	3.1	.14
Average		.131

Mr. President, the table shows that the average criminality in 10 States having the largest percentage of foreign-born population is less than exists in the 10 States having the lowest percentage of foreign-born population.

Here are 20 great States placed in contrast; the 10 States that have not been polluted by foreigners at all with 10 States having a large population and also large cities, in which, it is charged, there is a congestion of population caused by immigration, and that thereby crime is bred. Yet the average criminality in the States having the highest percentage of foreign population is materially less than the average shown by the States having the lowest foreign-born population.

The Immigration Commission can not be charged, Mr. President, with a prejudice in favor of the immigrants, because it has seemed to me to appear as a special pleader against him throughout. The Immigration Commission nevertheless makes this statement:

As to whether or not immigration increases crime, there is not sufficient evidence to predicate a conclusion.

I have produced very substantial evidence from the official statistics by the comparison of the 20 States above named. The Immigration Commission has displayed animosity toward the immigrant. Its statement therefore is tantamount to an admission that the enemies of immigration have not been able to make a case.

POLITICAL REFUGEES.

The President has sharply challenged attention to the fact that this bill refuses asylum to political refugees.

In this respect the bill repudiates our national traditions as they have existed from the first. It was, as I have shown, the initial reason for much of the early immigration to our land. Our parent stock sought refuge in the forests of North America from the executioners of kings.

The doctrine was proclaimed by Jefferson that the War of 1812 was fought in the defense of the rights of immigrants.

Again, in 1853, Marin Koszta, a Hungarian refugee, was rescued from an Austrian warship by the captain of the United States sloop *St. Louis*, who backed his demands with the cannon of his vessel.

As I have said, the War of 1812 was fought in defense of the rights of our naturalized citizens. They were good enough in those days to go to war for, but in this day it is proposed to exclude them. The doctrine of protection of political refugees has been written in the creed of every political party entitled to live and that has lived.

Mr. President, we stand in the presence of the greatest war ever waged. Its termination may not be prophesied, but when it is over the map of Europe doubtless will be rewritten. Provinces, perhaps entire countries, will become the spoil of the victors. Bitter reprisals will inevitably follow.

It is humanely probable that thousands of men whose only offenses have been love of country, devotion to home and native land will be obliged to flee to escape the prison and the scaffold.

Shall we, in this hour of the world's history, reverse the policies of our Nation and deny sanctuary to those our fathers would have welcomed to their hearts and their homes? I present that question to the thoughtful and humane consideration of Senators.

Who are these immigrants who are coming with outstretched hands at the present day? Mr. President, they are our own kith and kin. Hart, in his American History, states (vol. 26, p. 42) that considerably more than one-half of the white people in the United States can not go back two generations without striking a foreigner.

It is safe to say that if they go back three generations 80 to 90 per cent of our people will strike an immigrant.

We are already a composite race. But few men born in America can truthfully say there does not mingle in their veins the blood of several European races. Yet we justly maintain that we have here developed a race superior to all of its forbearers.

DO THE IMMIGRANT RACES POSSESS THE QUALITIES OF GREATNESS?

No race produces superior men, unless the race itself contains the elements of greatness.

Measured by this standard, every European race has demonstrated not only its right to live but its capacity for the highest attainment. We are yet compelled to go to Europe for our ideals in architecture, painting, sculpture, poetry, and literature. What nation of Europe has failed to enrich the treasury of art and knowledge with the jewels of genius?

But European countries have unfortunately overburdened the great mass of their people. The common man, finding his opportunities at home too circumscribed, in answer to the longings of his soul seeks a country of freedom and equality. It is proposed by the authors of this bill to refuse him admission at our gates.

IS THE FOREIGNER CAPABLE OF CITIZENSHIP AND ACHIEVEMENT?

Shall we consider the Jew?

Seek the source of the century-old horrors he has endured and you will enter the caverns of ignorance where dwells the serpent of superstition and its pestilential offspring, persecution.

The Jew has been, and in some places still is, an outcast simply and only because he has steadfastly refused to abandon the God of his fathers.

For this, 3,000 years ago were his burdens in Egypt made greater than he could bear; for this were his cities burned, the walls of his capital razed, his temples destroyed, his altars desecrated, his people slaughtered; for this was he carried into captivity by Syrian and Babylonian despots, his land reduced to a desert sown with the bones of murdered millions. Yet, in spite of all, for fifteen hundred years the Jew clung to the horns of his altar, cherished his temple, and reverenced his God.

For fifteen centuries the world was enveloped in the night of bigotry, ignorance, and terror—a night illumined by a single torch of truth, held aloft by the hand of the Jew.

The Jew alone during all that period of terror, vice, tyranny, despair and loathsome idolatry taught the doctrine of one Supreme God. He alone followed a code of laws which embraced every principle essential to liberty, morality, and religion. His laws and his religion were to those of the other nations of the earth as a star of indescribable glory shining through the clouds of a storm-rent sky upon a sea of blood.

Then came the dawn of Christianity, but its glory fell first upon the land of the Jew. The God mother was a Jewess. The Twelve Disciples were Hebrew fishermen who spread their nets along the shores of the sea of Galilee.

From this race we get our religion, from its sacred writings our morals. It preserved the greater part of our knowledge of ancient history. The sublimest examples of sacred poetry and the tenderest expressions of exalted devotion fell from the pens of inspired Jews.

Obliterate the work of the Jew before the Christian era and you destroy the old Bible and the Ten Commandments. Strike out the work of the Jew of the Christian era and you obliterate the New Testament.

Your religion, the fundamentals of your laws, your ideas of virtue, your precepts of morality—all these you get from the Jew. From the lips of the son of a Jewess came the sublime command, "Do unto others as you would they should do unto you."

If you say some of the Jews crucified the Savior, I answer it was also Jews who followed Him to Calvary. It was a Jew who drew the nails from the cross. It was Jews who reverently bore the body to the sepulcher. It was Jews who awaited the glory of the resurrection. It was Jews to whom He appeared; with whom He walked and talked.

It was these same Jews who went into all the world teaching His word. They were beaten; they were imprisoned; they were fed to wild beasts by those they came to save. They gave their lives to the propagation of Christianity. The race has ever since been persecuted by those whom a part of the race converted.

But as civilization has progressed, as the light of reason has penetrated the night of ignorance, as man has emerged from the jungles of barbarism and approached the sun-lit plains of civilization, persecution of the Jew has lapsed or ceased. Only Russia and one or two others of the tardy nations continue the diabolic practice. Let us not become either assistants or parties to the infernal policy.

If you were to name the 10 greatest statesmen of the century, you would be compelled to include the elder Disraeli, an English Jew.

If you were to name the 10 greatest judges, you would include in the list a Jew, Rufus Daniel Isaacs, lord chief justice of England.

If you were to think of great lawyers of the century, your mind would call up the name Judah P. Benjamin, attorney general of the Confederacy, and remember him as a Jew.

If you were asked to name the foremost actress of the world, you would instantly think of Sarah Bernhardt, a French Jewess.

If you were asked to call the name of a master of music, you would remember Anton Rubenstein.

If you were to pursue your inquiry, you would find that in law, medicine, literature, science, philanthropy, art, and in business the Jew has held his own with competitors of every race.

Let me quote you the words of Joaquin Miller:

> Who taught you tender Bible tales
> Of honey lands, of milk and wine?
> Of happy, peaceful Palestine?
> Of Jordan's holy harvest vales?
> Who gave the patient Christ? I say,
> Who gave your Christian creed? Yes; yes;
> Who gave your very God to you?
> Your Jew! Your Jew! Your hated Jew!
> (Joaquin Miller in "Russia's Ingratitude.")

Shall we speak of the Polander? I have heard him referred to here in a derogatory way. Ah, before you do that, Americans, think of the two great Polacks who came here to serve in the War of the Revolution; gaze, if you will, upon the marble bust of Pulaski, to which I already have called attention, standing in yonder gallery, and remember that the blood poured from his veins to give you liberty. Is the Polack fit to hold his place in the world's progress? I have spoken of Pulaski and Kosciuszko. Let me mention Copernicus, that great astronomer who exposed the mistakes scientists had for a thousand years made,

who revolutionized the theory of the universe, whose genius blazes down the centuries as the sun at high noon upon the earth.

What lover of music has not stood entranced by the divine melodies of Chopin or sat enthralled by the Polac[illegible] Paderewski, master of the piano?

The soil that still can produce beautiful flowers will also bring forth useful grains. The sons of genius do not spring from an inferior race of men.

Shall we condemn the Italian? Ah, my friends, I have called attention to the fact that since schools have been established in his native land the Italian is rapidly gaining in education. But shall you condemn him? He alone successfully fought back the tidal wave of barbarism that engulfed Europe in the Dark Ages; he alone, although often overrun and often conquered, preserved his great libraries; he alone kept his temples of art and preserved the masterpieces of the ancients even though compelled to bury them to prevent their desecration by the barbarians. These people, sirs, still have in their veins the masterful blood of the Romans; they only lack opportunity.

If now you were to name the two foremost discoverers in the field of electricity, next to Edison you would speak of the Italian, Marconi.

Sir, at no period has Italy permitted her civilization to die. When all the world was dumb Italian poets were still singing their wondrous songs; her artists were preserving on canvas and in marble the marvelous visions of grace and beauty their souls conceived. The vulgar rich of this country seek to gain reputation for good taste by displaying in their homes the immortal works of the immortal geniuses who sprang from that race some of you would exclude from our shores.

Shall I speak of the German? Sir, he was denounced in his early immigration, but now criticism is silenced. The schoolhouse, I almost may say the schoolhouse of the world, is Germany; there music and art and culture make their homes. I pass on.

Do you denounce the Bohemian? Remember that in 1348 he established the university of Prague, at which there speedily gathered over 6,000 students. Remember that largely because of it learning was revived in Europe. Remember also that that race of men have suffered upon the battle field for liberty, and that it boasts a higher degree of literacy than the native sons of America.

Ah, shall we condemn the Greeks? Yes; they come here poor; they are shoemakers pounding at their benches, and bootblacks. I confess that as I used to look at them it seemed to me that possibly the poet was wrong when, in speaking of the Greek revolutionists many years back, he ascribed to them the spirit of Thermopylæ and Marathon. But, sir, when the Balkan War was on I stood upon the streets of my city and saw my bootblack friend transformed and transfigured. The blood mounted to his dark cheeks, the light of battle gleamed in his eyes; I saw him and his neighbors bid good-by to their wives and their children, and, almost to a man, leave their adopted homes and return to Greece to help break the chains their oppressors had riveted upon their native land. Then I knew that the spirit of Thermopylæ was alive, and then I knew a race so patriotic would make good citizens of this Republic.

So I followed the history of their war; it was a glorious story. The bootblack immigrant stood in the red line of battle and fought like the veteran of a hundred wars, and then when the war was over and Greece emerged victorious the immigrant returned to his humble occupation. But it will not be for long. Each year I see these people graduate into a better employment. Sometimes I wonder whether in genuine culture they do not surpass the average of our own people. From their homes come wonderful music. There is a song upon their lips we can not reproduce. The mystery of harmony is in their souls, and wherever you go in the humblest cottage, or the hovel, you will find, if not a marble, at least a plaster counterfeit of some great work of art. Why, sirs, they are but poor as were our ancestors, but this race must not be condemned and will not be save by the narrow or by the confused.

And now, Mr. President, a word about the immigrant. He always has looked the same. He never has been a pleasant spectacle when he arrives. His women wear no $50 bonnets; their faces are not adorned with cosmetics; their lips are not incarnadined out of a paint pot; their clothes are very cheap. Of course, they are poor and so were our ancestors. The rich do not come here; the wealthy do not crowd our shores, and those who come from the nobility we generally either have to send to jail or marry to a foolish American girl. [Laughter.]

But what of the character of these men who come? Why, sirs, I say without a single doubt or hesitation that the great common people of Europe are infinitely the superior portion of that country. If you wanted now to start an empire in the wilderness, would you rather have the immigrant as he arrives at the dock or would you choose a wife-hunting nobleman? I will take the immigrant, and I will tell you why. If you put the two men together, the noble and the immigrant, the man reared in the lap of luxury and the man who has toiled in the mill of hardship, and strip them both naked and turn them loose to fight the battle of life, the immigrant will live, while the other fellow will die. The immigrant is the better citizen, and let me tell you why. It is hardship, it is oppression, it is wrong, it is battle that develops a race of men, and nothing else can do it. Why, sirs, the knotted muscle of this immigrant contains the strength of a long line of ancestors who have also toiled. There is not a single drop of noble blood in his veins, as we use that term, yet he is the best raw material out of which to make a nation.

First, because the immigrant is always the bravest man in his community. A sponge never migrates: it is born and dies upon the same rock; but the game fish finds its way to the headwaters of every creek and river of earth.

Second. His generations-old contact with hardship and toil has given him the ability to surmount difficulties and withstand hardships.

Third. In the breast of such a man is a deathless ambition to better his state in life.

Fourth. He has that love of liberty which always glows hot in the heart of the man who has felt upon his neck the heel of the oppressor.

There is not an immigrant of the common people who comes to our shores who does not love liberty with a fervor we ourselves scarcely possess. He loves it and appreciates it because he has been denied it.

Mr. President, before we adopt this new national policy of proscription and of isolation let us consider a little the pages of history. The peoples who have prohibited or discouraged immigration have degenerated or disappeared from the face of the earth—China, Java, Hindustan, Turkey, and back of these Egypt, Persia, Media. And yet, I pause to remark, your literacy test would not keep out one Chinaman, for all can read and write, to the last one. But these races have degenerated or disappeared, and why? Because, just as no man can grow or even live without contact with his fellow men, so nations degenerate and die without the infusion of new blood and contact with other races.

The countries which have progressed most rapidly have generously opened their doors and invited foreign blood or have had it forced upon them by arms.

The invasion of the Franks awakened ancient Gaul from the lethargy of barbarism. The invasion of the Normans raised her to the first nation of Europe.

Ancient Brittany gained her early forward impulses from the example of the Roman Conqueror and the admixture of Roman blood. She took her place among the nations of the earth after Norman blood had been mixed with the Saxon.

Spain rose to the pinnacle of her greatness after the Moors conquered her cities and built the Alhambra.

Even the invasion of the Huns was, in the end, beneficial to Europe.

Germany is herself a conglomerate of many tribes and bloods.

It is the transfusion of blood, the inspiration of new ideas, the creation of higher ambitions which results from the contact and mingling of races which produce the superman.

Mr. President, our national progress illustrates this better than the history of any other nation. When I shall have called attention to it I shall yield the floor.

Our national progress has surpassed that of all the nations of history. To what shall we ascribe this wonderful achievement? Who seeks the truth will find its roots deep-seated in the fact that here is a race commingling the best bloods of all the world. Here gathered the oppressed of every land. The man whose back had felt the oppressor's blow; whose arms had borne the manacles of tyranny; who, in his heart, felt the hot flame of protest against centuries of wrong; whose soul aspired for liberty; whose eyes were strained to catch the glorious light of hope's bright star.

Beneath their ragged garments were thews of steel; within their brains the dreams of empire.

The Huguenot, the English Dissenter, the Jewish refugee, the Scotch Covenanter, the Irish Catholic, and, alike, the Irish Protestant, the Dutch and German Lutherans, the Polish patriot, the Bohemian revolutionist, the Italian peasant, flocked here by thousands to escape religious, race, or class persecution.

Some had insisted upon praying according to the dictates of their own conscience.

Some had lifted brave arms to assail the thrones of kings. They struck because they were more patriotic and courageous than were the common crowd.

They were the supermen of their countries. The bravest of the brave; the pioneers of progress; the champions of independence. They were the Bayards of civilization; the Cœur de Lions of enterprise.

When these refugees met here they mingled their ideas, traits, and blood. Each gained from the other in intellectual strength. Their offspring embraced the talents and genius of the mixed parentage.

Within one century of time the children of these oppressed and expatriated sires produced orators whose words of flame could fire a nation's blood with patriotic ardor that will last while liberty shall be a holy name; poets whose words will still be read as long as men shall love the music of our tongue; artists who could transform the dull and inexpressive canvas to a glorious harmony of color, light, and shade, and "paint the rainbow's wondrous hues and magic tints"; soldiers who could stand with Washington at Valley Forge and write the story of their patriotism in bloody footprints on the forests' winter snows; sailors who, following the intrepid Paul Jones, could lash their sinking vessel to the triumphant British man-of-war, and leaping like tigers on her bloody decks wrest victory from triumphant enemies; women who could stand within the cabin door, rifle in hand, and keep the home while the husbands served in the red line of battle at the front. We brought forth statesmen with the sublime courage to deny all the ancient tenets of government, to demolish all the idols of the past, to supplant the doctrine of the divine rights of kings with the divine doctrine of the rights of man; statesmen whose prophetic vision swept the horizon of the future, whose hands laid the foundations of the temple of liberty so broad and so secure that the countless millions to come after them could find within its ample walls a place to dwell.

In those good days the patriots still remembered their fathers were the oppressed of earth and held out arms in invitation of the brothers left behind. And they have come a mighty host and brought with them the hopes, the inspiration, the industry, the love of liberty our fathers had. Beneath their sturdy strokes the forests have been felled, the mountains tunneled, the rivers bridged, the iron bands of steel laid down that tie the Atlantic to the golden shores. Better than all natural advancement, higher than all commercial and industrial achievements, towers the great fact that we have created ideals for all the earth and made our flag the emblem of universal liberty and peace.

And now it is proposed that we shall selfishly deny to others the liberties for which our fathers longed and prayed, that we shall turn our backs upon the policy which has made of us the foremost Nation of the earth.

As well the eagle spurn the rock in which it makes its nest, the child deny its parents, or the lake refuse the offerings of the springs that keep its waters fresh and pure!

Fused in her candid light,
To one strong race all races here unite.
Tongues melt in hers; hereditary foemen
Forget their sword and slogan, kith, and clan.
'Twas glory, once, to be a Roman;
She makes it glory now to be a man.

THE MERCHANT MARINE.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 6856) to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States or of a State thereof or of the District of Columbia to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes.

Mr. HARDWICK. Mr. President——

The VICE PRESIDENT. The Senator from Georgia.

Mr. CAMDEN. Mr. President, will the Senator from Georgia yield to me?

Mr. HARDWICK. If I may have unanimous consent to do so without yielding the floor, I shall be glad to yield to the Senator from Kentucky.

Mr. CAMDEN. Mr. President, I would like to state my reasons for voting to recommit this bill. I consider it undigested, half baked, and full of fallacies, and thoroughly undemocratic in principle and theory. Already it has been amended six times by its framers.

OBJECT TO GOVERNMENT OWNERSHIP.

To my mind there are several serious objections to the enactment into law of this bill, almost any one of which would be sufficient in itself to compel me to cast my vote against it. Viewed from the standpoint of time-honored Democratic doctrine and principle, it is most alarming, objectionable, and dangerous. I feel that I do not exaggerate when I say that the policy of true Democracy will be fundamentally changed by the passage of this bill. If it becomes a law, the Democratic Party will be irrevocably committed to the theory of a paternal form of government, which, freely translated, means state socialism. This is the entering wedge for Government control of other forms of trades and industries. Personally I am far from convinced that the Democratic Party of this Nation is prepared for this great leap into the dark. And I do not feel that this country should be committed to this new and radical policy without having it thoroughly discussed before and digested by the rank and file of the party and the people and have their seal of approval or, at least, their indorsement of the undertaking before they are irrevocably committed to this doubtful governmental ownership and operation of a merchant marine.

President Wilson, in his message to Congress on January 28 vetoing the immigration bill, recently passed by both Houses, and which passed the Senate by a vote of 50 to 7 and the House by a vote of 284 to 14, said:

> If the people of this country have made up their minds to limit the number of immigrants by arbitrary tests, and so reverse the policy of all the generations of Americans that have gone before them, it is their right to do so. I am their servant, and have no license to stand in their way. But I do not believe that they have. I respectfully submit that no one can quote their mandate to that effect. Has any political party ever avowed a policy of restriction in this fundamental matter, gone to the country on it, and been commissioned to control its legislation? Does this bill rest upon the conscious and universal assent and desire of the American people? I doubt it. It is because I doubt it that I make bold to dissent from it. I am willing to abide by the verdict, but not until it has been rendered. Let the platforms of parties speak out upon this policy and the people pronounce their wish. The matter is too fundamental to be settled otherwise.

This terse and facile language of the President expresses my views of the shipping bill so much clearer and more emphatic than I could that I take pleasure in adopting and applying it to this bill. If it be true that the literacy test of the immigration bill would "so reverse the policy of all the generations of Americans that have gone before," what reversal of policy do we find in this shipping bill, which commits the people unheard, consequently without an opportunity to make up their minds or render their verdict on an undertaking so revolutionary that the business world must stand aghast? "Has any political party ever avowed a policy on this fundamental matter, gone to the country on it and been commissioned to control its legislation? Does this bill rest upon the conscious and universal assent and desire of the American people? I doubt it. It is because I doubt it that I make bold to dissent from it. I am willing to abide by the verdict, but not until it has been rendered. Let the platforms of parties speak out upon this policy and the people pronounce their wish. The matter is too fundamental to be settled offhand or in any other way." Mr. President, I am willing to be guided by the wish of the people when expressed on this great fundamental question and even surrender to the will of the majority my "clear conviction," but I am not willing to surrender that conviction and my sense of duty until the people have spoken. For these reasons I participated in none of the so-called conferences, afterwards denominated caucuses, by which it was sought to bind Democratic Senators to support this bill, which is in no sense a party-platform measure.

CONTRARY TO DEMOCRATIC PLATFORM.

I can find nothing in the platform utterances of the Democratic Party that in any way commits Democratic Senators to its support or even countenances this proposed measure, but, on the contrary, as I read the merchant-marine plank of the Democratic platform of 1912, it clearly condemns such a procedure as is here contemplated. That plank reads:

> We believe in fostering, by constitutional regulation of commerce, the growth of a merchant marine, which shall develop and strengthen the commercial ties which bind us to our sister Republics of the South, but without imposing additional burdens upon the people and without bounties or subsidies from the Public Treasury.

As I understand the purposes of this bill, it does not attempt to be in harmony with this platform declaration to regulate or to "foster by constitutional regulation of commerce the growth of a merchant marine," but, on the contrary, it proposes for the Government to jump full-fledged into the business itself and simultaneously create and conduct a merchant marine, and does it in open and flagrant violation of the platform declaration, because in doing so it is not regulation but operation; and, besides, it is manifestly imposing "additional burdens upon the people" by using forty millions of the people's money in a hazardous venture, and that, too, at a time of great public stress, when the Treasury needs every dollar to avoid further

taxation of the people. It is strikingly inconsistent that the President and certain Democratic Senators can repudiate a plank in the Baltimore platform—exemption of canal tolls—and yet when certain other Democratic Senators decline to support a measure that is not authorized by the Baltimore platform, and is un-Democratic on the face of it, they are denounced as bolters.

DOUBTFUL BUSINESS VENTURE.

This is no time for doubtful business ventures or experiments. Individuals, guided by experience, are cautious; why should the Government be otherwise? Are we true to our constituents' interests or to our oaths of office if we commit the Government to a business venture so fundamentally unsound and unwise, in which we as individuals would not embark, convinced in advance, as every business man must be, that it will be necessarily a losing investment? No country has tried Government ownership for a fundamental reason. They realize that it places the conduct of its foreign business in the realms of international affairs and complications. There is nothing in the experience of those countries which have tried, or are trying, Government ownership of railroads or other public utilities that would recommend it to us as a success. The wasteful and unbusinesslike manner in which the Government conducts its affairs, State and Nation, is of itself sufficient to discourage and to condemn such an experiment, especially at a time when our revenues have decreased to such an extent, owing to the foreign war and the shrinkage in imports. If I could, under ordinary or normal conditions of our country's existence, give my consent to try this most basic change of party principle and policy, I would certainly feel it a reckless tempting of fate if I agreed to an experiment in the world crisis that is in the balance now.

PEACE SENTIMENT—ITS POPULAR HOLD ON THE PEOPLE AND DANGER OF WORLD COMPLICATIONS.

Probably the one sentiment more than any other act of this administration that has gained the confidence and affection of the American people for the Democratic Party is the feeling that it has kept this country at peace.

Disregarding for the moment these serious objections of Government ownership, it looks to me like madness to jeopardize the peace and happiness of this Nation for an assumed and doubtful commercial advantage. I feel that if this Government engages now in the ocean carrying trade it is a certain invitation to disaster. To my mind we inevitably will be entangled in the world conflict now raging. During our Civil War we exercised the right of search of vessels of friendly nations consigned from one neutral port to another; but we confined that search only to merchant vessels of other nations and not to naval vessels. Would ships owned and operated by the United States Government in times of congested trade, but so designed in ordinary conditions to be used as auxiliaries in the Navy—would those be naval ships or not? What would be the status of a merchant marine owned and operated by the United States Government? As it stands now, according to international law merchant ships under convoy of a neutral warship are exempted from visit and search. Will the American people think it advantageous for our Government to go into trade at this time and forfeit the advantages now enjoyed by its naval vessels?

At present belligerents claim the right to search all vessels carrying the United States flag if contraband is suspected. The American people are willing to submit to seizure, search, and detention of vessels owned by private capital and to await the decision of international courts; but could or would they submit to apparent indignities offered to the United States Government in the form of one of its vessels? It is not only an unneutral act but practically a declaration of war for any Government to furnish a belligerent with supplies. Can this Government dissociate itself from that position in the eyes of the warring nations if it embarks in the carrying trade at this time? If this bill does not undertake to embark the United States Government, in its sovereign capacity, in the purchase, construction, and operation of vessels in ocean trade, then I must confess that I do not understand the English language

The analytical minds of distinguished lawyers may be able to split hairs or dissociate the Government from this undertaking by reason of the formation of the artificial person called a "corporation," but I can not. As far as the purchase or construction of the vessels is concerned, section 3 of the bill provides:

That the United States, through the shipping board and with the approval of the President, is authorized to purchase or construct vessels suitable, in the judgment of the shipping board, for the purpose of such corporation, with a view to transferring them to such corporation.

It is here unmistakably provided that the United States shall either purchase or construct suitable vessels for this corporation, and here is where our Government would take a bold chance of reversing its policy of strict neutrality to an entanglement and probable participation in this world war by the purchase of vessels owned by some one of the belligerent powers. If vessels are to be purchased, it necessarily must be vessels of this character—those which are unable to participate in commerce because interned at the outbreak of hostilities. All other vessels are too profitably engaged to be bought now at any reasonable price.

VIEWED WITH ALARM.

Is it possible that we are not to view with alarm or feel any concern if the United States, through this shipping board, purchases these vessels with the view of subsequently turning them over to this corporation, in which it must own 51 per cent of the stock, and, in fact, will own a hundred per cent? Is it an evidence of timidity to take this rational view? The very discussion of this bill and the possibility of its complications by learned lawyers on either side of this Chamber, and the opinion of eminent lawyers representing the Government, holding, as they do, so many divergent views on the right to purchase vessels of belligerents, and the presumption prevailing when they were purchased before the outbreak of hostilities and after the outbreak of hostilities, and whether or not they were purchased in good faith, whether the good faith of the vendor or the purchaser is to prevail, and whether a controversy arising between nations over such purchase is to be determined by the rules and laws of the captor country or whether the declaration of London, which has not been ratified and accepted, is to prevail.

I say if these gentlemen, so eminent and learned in their profession, disagree about these international questions, experience teaches us what we may expect, because when lawyers disagree the courts must decide. It will then not be a court of this country, but of the captor country that will have jurisdiction; then I, for one, become timid and view with deep concern the possibilities of serious complications, if not war. Why are we to take all of these chances and assume all of these risks, fraught with so much concern to the people of this country? Because we are told that there is a scarcity of vessels engaged in the ocean trade and the freight rates are high and it is believed that these conditions may be remedied in this way. I do not subscribe to this theory and do not believe for a moment that the suggested plan will prove efficacious; but, granting that it will, are we justified in taking such a hazardous step for a mere commercial advantage?

Mr. President, every day brings forth new angles, a stronger and clearer light with which to view this momentous question. New situations are revealed. The morning papers of this country are all quoting an editorial from the London Daily News of February 3, headed "President Wilson's problem." At first there was great hostility in the average British mind against this shipping bill. This editorial was written for the purpose of disabusing that idea, for what reason is here revealed. I quote the last paragraph of the article:

We do not here discuss the bearings of this matter on our interests, but there is one point we ought not to overlook, and that is that the submarine has become in this war a serious peril to our food supplies. It will dominate our position unless science discovers an effective weapon of defense. Should it threaten our shipping with destruction and ourselves with starvation it will not be an unimportant fact that a great neutral country possessing a mercantile marine of its own can send its ships into our ports unmolested and unafraid.

WARNED TO BE CAUTIOUS.

Democratic Senators, I solemnly warn you that it is madness to push this bill to embark our Government upon this perilous and uncharted business sea. Does not Britain well know that if one of this country's boats should be sunk by a floating mine—in an accidental way—we might say, then, we would be not only feeding Britain, but we would find ourselves fighting for her, which she well knows. We have seen how treaties are regarded by nations that are fighting for their existence. All international law and precedents are upset and made chaotic by this holocaust now raging. Any of the belligerents who felt that their adversaries were securing a genuine advantage and their success in the war injured or jeopardized by the entrance of this Government into the carrying trade might regard whatever understanding they may have had with us, as did the Germans the Belgian treaty—"merely a scrap of paper." They would brush aside as trivial this legal fiction of a "corporation" set up by the lawyers of this Government.

EMERGENCY MEASURE.

The promoters of this bill, which has been amended six times, tell us that it is an emergency measure, designed mainly, if not

solely, to relieve the congested condition of over-sea traffic at the present time, but they studiously avoid fixing a definite time for disposing of these purchased ships and of getting out of business.

How, then, is this emergency proposed to be met? Either interned boats owned by belligerents must be purchased with all the attendant complications or they must be built, because all other vessels are carrying their full capacity, and to purchase those already engaged in service would in nowise benefit or remedy conditions. If it is not the policy of the Government under this bill to purchase these interned vessels of the combatants, and if it be true that the rates are so excessively high, then necessarily the owners of all the vessels now engaged in the traffic must be reaping harvests so rich that none of them would care to sell at a fair valuation if the Government sought to purchase. The only course, then, left open to the Government, would be to have them built. I am informed that it would require at least 16 months for the shipbuilders to fill the order. The $40,000,000 to be invested under this plan would give our Government a merchant marine of about 80 ships ready for service, say, in about one year and a half. Under normal conditions it requires on an average of about 60 days for a ship to be loaded at the home port, make the voyage, be unloaded in the foreign port, to take on cargo, make the return voyage, to unload, to be reloaded, and ready for another voyage, one vessel thus making about six trips a year. Under present congested conditions, however, the number of trips would probably not exceed four or five, if vessels were available now. Then, if the purpose of the Government is actually to relieve this immediate congested business condition, is this not a pitiable, and, viewed solely from a practical standpoint, a futile effort? Any emergency which may now exist will have passed vessels provided either by purchase or construction.

The number of vessels which could be provided by the capital of this proposed Government corporation would furnish about 3 per cent of the total cargo tonnage of the vessels now in use. Nothing could better demonstrate the utter futility and short-sighted policy of this measure if its object is to reduce freight rates by competition. It would be like a little boy with his toy wagon attempting to unload a grain elevator.

ECONOMICALLY UNSOUND.

As a business proposition this measure can not be defended. It must be conceded—in fact, it is conceded—that as such it is a failure, and would be doomed to bankruptcy but for the backing of the Federal Treasury. So apparent is this that it is freely admitted that private capital can not be induced to take the 49 per cent of the stock, or, in fact, any part, for which it is permitted to subscribe, and the Government will be compelled to go it alone, take all the stock, furnish all the money.

If the Government corporation undertakes to purchase the vessels required by it at this time, when, owing to the war, freight rates have advanced so rapidly, the price paid must be correspondingly higher, and doubtless from 50 to 100 per cent in excess of what they could be purchased for under normal conditions, unless it is proposed to tempt fate and throw discretion to the winds and purchase interned ships owned by the warring nations. This Government-owned corporation would then begin business by investing its capital on a rising market in vessels at enhanced prices and be compelled to sell on a declining market. Having purchased these vessels at exorbitant prices, when the war is over and the law of supply and demand bring freight rates down to the ordinary level, then, if it be contemplated for this corporation to retire from business and turn its vessels over to private concerns, as the sponsors of this bill aver is the expectation, are we not sure to have a repetition in the disparity of the purchase price and selling price as was experienced with the vessels purchased by the Government during the Spanish War, with which we are all familiar, when many of such vessels sold for less than 5 per cent of the purchase price, and this deficit which this Government-owned corporation will sustain, and from which the shipper and exporter alone will benefit, will have to be supplied by the taxation of the whole people. This difference between the purchase and selling price which the Government will supply, is it anything more than a subsidy in disguise?

Am I, as a representative of the people of Kentucky, authorized to vote to tax my people to raise these millions which will only benefit the exporters? Nearly every bushel of grain and pound of cotton or farm produce is now out of the hands of the producer and in the hands of the exporter, or will be shortly. The freight is paid by the purchaser on the other side, not by the farmer.

GOVERNMENT MANAGEMENT NEVER ECONOMICAL.

It is well known—and a practical demonstration of the fact is brought to our notice every day—that Government management and operation is vastly more expensive than private management. No sensible person will for a moment contend that a corporation managed by Cabinet officers, with no especial adaptation or technical skill or knowledge in shipping, can conduct its business in competition with a company or corporation managed by men who have given a lifetime study to its mastery and are familiar with every detail of the business. Besides, Government ownership always will have more or less politics and favoritism injected which of itself will largely detract from, if not practically destroy, its efficiency.

If, then, the expense of conducting this Government-owned corporation exceeds the expense under private ownership, one of two conditions must necessarily result: Either the freight rates must be higher than private-owned and managed vessels, thus defeating the object of the bill, or the vessels must be run at a loss, and the last is evidently contemplated. This loss will have to be supplied by the Government out of the Treasury, which means ultimately out of the pockets of the people by way of taxation. Wherein, I again ask, would this differ from a subsidy?

DOCKS NEEDED.

One essential point in these calculations seems to have been completely overlooked by the framers and advocates of this bill, who seem to think that ships were all that is needed to carry cargoes, and that is terminal facilities. Terminals are as necessary to ships as to railways. Steamships can not pull up at any landing and unload their cargoes on the bank. Deep harbors, especially constructed piers and docking facilities, and huge warehouses must all be provided beforehand. These abnormal world conditions have congested and overtaxed all the harbors of Europe almost beyond imagination. The war drain upon men has depleted the ranks of stevedores and dock hands. On account of these delays it is said that it requires 11 vessels now to do the work of 5 under normal conditions. The English ports are congested largely because of the scarcity of labor; and in France they have been compelled to use the German prisoners to unload the ships and clear the quays and docks. It is not clear, as a business proposition, how a few more Government-owned vessels can relieve this situation or emergency. The Government would first be compelled to purchase, construct, or lease more terminal facilities before it can relieve existing conditions, and thus divert a large part of the capital of this corporation from the purchase of ships.

A recent editorial in the New York Times very aptly illustrates this proposition. It says:

> It is especially fatuous to provide Government shipping or private shipping with Government aid when the necessity of the case is not so much shipping as facilities for loading and unloading. To the facts on this fact as given by carriers' spokesmen on this side of the ocean may now be added incontestable evidence from the other side. Twenty-one vessels arrived in Liverpool last Thursday and not one of them was able to get a berth to discharge its cargo.
>
> It would be idle to add to such congestion by providing more ships. The trouble is not one of trade, but of war. Some ports are closed, throwing more business upon others than they could do in favorable times. Many dock laborers have enlisted and others are earning such high wages that they are independent. Commerce is not running in accustomed lines. Strange boats are on unfamiliar routes and require more attention than liners running on routine. If any Government should intervene, it is not ours. We are shipping full volumes of goods at our own prices, and the freight is paid by the buyer. They should worry, not we. We should worry only if those who are more eager than wise should thrust us into an experiment which is not only unnecessary in a commercial sense, but is obnoxious politically.

The same objections for the same reasons existed at the other ports. The papers state that on the same day over 50 vessels arrived at London, and also at Genoa, Italy, and were unable to unload for lack of docking facilities.

Not only would this bill, in my judgment, fail to relieve the situation for which its promoters claim that it is designed, but it would have a tendency to paralyze personal initiative and prevent private capital from entering the field and investing in a merchant marine in competition with the Government-owned corporation, which is exempt from taxation and insurance and where all losses are recouped from the Public Treasury.

Investigation has shown that it costs 50 to 100 per cent more to build ships in this country than it does abroad, and that it costs about $17,236 more a year to operate a ship of 3,000 tons under the American than under the British flag. These disabilities under which our foreign trade now labors must be removed before one can hope to establish a merchant marine that will thrive and grow and hold its own with that of the other nations of the world. Mr. President, I shall vote to have this bill recommitted, because I hope and believe that there is enough patriotism and statesmanship in this august body to handle this vital question in the wise and right way and not from the viewpoint of petty and partisan politics. My suggestion to the Commerce Committee, which will have the redraft-

ing of this bill, if recommitted, is to so revise our foreign navigation laws as to place our merchant marine on an exact equality with the merchant marine of Great Britain, France, Germany, Holland, Italy, and other countries. This will not be in the form of a protection or subsidy, but will appeal to the best efforts of American ability, which has never yet failed, and thus enable American shipowners to meet the competition of the other nations of the world and actually foster and encourage a real American merchant marine.

OTHER BILLS MORE IMPORTANT.

I am opposed to giving up all of the present session of Congress to the consideration of this shipping bill, which, in my judgment, is so unwise and will become so obnoxious to the people generally when fully understood, when we have other measures of real merit awaiting consideration, and in which the masses of the people are so vitally interested. The appropriation bills essential to the proper running of the Government must be passed. There is the rural-credits bill which might be discussed and passed at this session, and which affects the real interests of thousands of farmers and merchants of this country. I can not see wherein this bill is in the interest of the farmer or the producer, as is contended by some; his grain and cotton and other products have practically all been sold and are now in the hands of the exporter who purchased them, and if this bill would benefit anyone at this time it would be the exporter. These enormous freight rates will not be paid by the farmer, but by the purchaser across the ocean.

I am a farmer, and have recently sold my cattle and wheat at better prices than I have sold them for in years. The war is the immediate cause of these high prices—the high price of wheat as well as the high price of shipping. Wheat is to-day quoted at $1.65 per bushel. Would this fact justify the Government in investing the public funds in vast acreage in the West and to raise wheat in competition with the farmer in order to reduce the present enhanced price? While this may be far-fetched, what concerns us most is to determine where Government ownership and competition with the individual is to stop. Where is the line to be drawn if we once embark upon the project? I am opposed to establishing any such precedent.

Mr. President, I have endeavored to make plain my objections to this bill, and in a manner in keeping with the dignity of this body. I have not impugned the motives of anyone, realizing that it is a measure regarding the merits of which Senators may differ and are entitled to express their honest convictions. No Senator has a monopoly of wisdom and virtue that authorizes him to criticize and condemn another who differs with him as to what is for the best interests of the people of this country nor to read him out of the party because he will not violate his "clear convictions" at the behest of a conference, subsequently called a caucus, in which he did not participate. Ill-advised and ill-tempered remarks never won a cause, and I deprecate their use in this Chamber.

It is rather inconsistent for those who profess to be leaders here and to speak for the administration to criticize Democratic Senators for conferring with Republican Senators on this measure when President Wilson immediately calls into conference three Senators from that side of the Chamber.

Mr. President, in this connection and under the heading of "Rights of the States," I want to quote this plank from the Democratic platform of 1912:

> We believe in the preservation and maintenance in their full strength and integrity of the three coordinate branches of the Federal Government—the executive, the legislative, and the judicial—each keeping within its own bounds and not encroaching upon the just powers of either of the others.

I am convinced, and do not hesitate to state that, from my personal knowledge, quite a number of the Democratic Senators are at heart opposed to this bill, and but for the interference and pressure of the Chief Executive the measure would have been abandoned long ago.

It is highly inconsistent for the same leaders to criticize me because I will not violate my "clear convictions" and support a measure which I deem undemocratic and socialistic, and upon which the people have not passed, when the President vetoes a measure which passed the Senate by a vote of 50 to 7 because it is opposed to his "clear convictions." I honor and admire him for his courage; but is it possible that a Senator is not entitled to the same privilege? Must he surrender his "clear convictions" on a measure vastly more important, more revolutionary, and upon which the people have not rendered their verdict?

Mr. HARDWICK. Mr. President——

The VICE PRESIDENT. The Senator from Georgia.

Mr. WALSH. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Montana?

Mr. HARDWICK. Certainly; I yield.

Mr. WALSH. I merely want to call the attention of the Senate to a matter which will take but a moment.

Mr. HARDWICK. I yield to the Senator, Mr. President.

Mr. WALSH. Mr. President, the Senator from Kentucky [Mr. CAMDEN], who has just addressed the Senate, called attention to an editorial recently appearing in the London News concerning which some editorial comment was submitted yesterday. The article being rather important as reflecting the prevailing sentiment upon the important question of the purchase of belligerent ships, I send to the desk a copy of the morning Washington Post, which gives the editorial, and I ask that the editorial be made a part of the RECORD.

Mr. SMOOT. I believe the same matter was put in the RECORD last evening.

Mr. WALSH. I have examined the RECORD, and I find that all that was put in the RECORD was some brief editorial comment on the matter in the Washington Star. I send to the desk the editorial itself, which is copied in this morning's Washington Post.

Mr. SMOOT. Does the Senator from Montana now refer to the editorial in the Washington Post or to the report from London?

Mr. WALSH. I refer to the London dispatch giving the editorial in the London News, which, as I have stated, is copied at length in the Washington Post of this morning.

Mr. SMOOT. I thought it had been inserted in the RECORD on yesterday.

The VICE PRESIDENT. Without objection, the request of the Senator from Montana is agreed to.

The editorial referred to is as follows:

WANT SHIPPING BILL PASSED—LONDON PAPER DECLARES PURCHASE MEASURE IS INTENDED TO MEET PRESSING INTERNAL EMERGENCY—NOT AIMED AT GREAT BRITAIN—SUBMARINE ATTACKS ON ENGLISH OCEAN COMMERCE CITED AS PERIL.

LONDON, *February 3.*

The Daily News, in an editorial headed "President Wilson's problem," discusses the ship-purchase bill and says:

"So much misapprehension exists on the subject in this country that it may be useful to indicate the motives behind the President's action. That that action is intended to be inimical to our interests is a suggestion that may be dismissed as absurd. The whole purpose of the ship-purchase bill is to meet an internal situation of great seriousness. The United States, like this country, is suffering from a sudden and unparalleled lack of transport facilities. It has been chiefly dependent for its shipping on the mercantile marine of this country and Germany, and now the war has revealed the grave consequences of this dependence on foreign-owned shipping.

HAS EYE TO FUTURE ALSO.

"President Wilson's measure is not only an expedient to meet the present emergency, but a means for preventing a similar disaster in the future. Since it is clear that private enterprise can not meet the case and the method of subsidies is repudiated, he purposes to establish a State-owned merchant service and purchase ships for that purpose.

"There are obvious objections to the scheme, of course, especially in a country so individualistic in spirit and traditions as the United States. It is a development of State socialism that is without precedent, and could obviously not be conducted on lines which would make it directly profitable; but, as far as one can see, it is the only means by which the United States can recover its place in the world of shipping and protect its commerce against the consequences of dependence upon foreign shipping.

OPPOSITION NOT DISINTERESTED.

"The opposition which Mr. Wilson is encountering is, of course, not wholly disinterested. The Republicans are naturally attached to their own policy of subsidies, which fits in with the aims of very powerful interests, but the plain fact is that either State ownership must be adopted or the United States must remain without an effective shipping trade.

"We do not here discuss the bearings of this matter on our interests, but there is one point we ought not to overlook, and that is that the submarine has become in this war a serious peril to our food supplies. It will dominate our position unless science discovers an effective weapon of defense. Should it threaten our shipping with destruction and ourselves with starvation, it will not be an unimportant fact that a great neutral country, possessing a mercantile marine of its own, can send its ships into our ports unmolested and unafraid."

Mr. VARDAMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Mississippi?

Mr. HARDWICK. I yield to the Senator from Mississippi.

Mr. VARDAMAN. I desire to announce, Mr. President, that immediately after the conclusion of the speech of the Senator from Georgia to-morrow I shall submit a few remarks on the unfinished business.

Mr. JAMES. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Kentucky?

Mr. HARDWICK. I do.

Mr. JAMES. I appreciate the courtesy of the Senator from Georgia in yielding to me; and I desire to say that after the conclusion of the speech of the Senator from Georgia and the

speech of the Senator from Mississippi I shall try to make a few observations upon the pending measure.

Mr. HARDWICK. Mr. President, it seems to me that on yesterday the Senate of the United States and the people of the United States were treated to the most remarkable spectacle of incompetent leadership that has been exhibited on the floor of either House of the American Congress by any political party in many decades. The Senator from Missouri [Mr. STONE], the author of the pending bill, or its original author—who is its author in its present form no mortal man can say, for we have had at least four different and distinct revelations of the pure and undefiled doctrine in this one bill since it began its course in this Chamber—the Senator from Missouri, the author of the original proposition, one of its most ardent champions on this floor and a reputed spokesman of the administration of the party in power in respect to this particular matter, finding himself confronted with a situation that threatened at least a temporary delay or defeat of the measure in its present form that may have meant at least its delay and possibly its substantial amendment, because certain of his party associates on this side of the Chamber had grave objections, constitutional and otherwise, to the measure in its present form, and at least some of them considered themselves under direct and specific pledges to the constituencies which sent them here, had evidenced by their conduct a purpose to support the motion made by the senior Senator from Arkansas [Mr. CLARKE] to recommit this bill to the Committee on Commerce—confronted, I say, by that situation, the Senator from Missouri, finding this division in sentiment and in thought upon his own side of the Chamber, engaged in the exceedingly diplomatic and conciliatory course of attempting to set himself up as a censor morum and to read out of the Democratic Party Senators who are just as good Democrats, to put it conservatively, as the Senator from Missouri ever was.

I do not know whether or not such methods as that can be adopted with success in Missouri, but, unless I mistake both the character and the temperament of my colleagues, I think I can assure this great leader of our party that no such methods as that will be successful in the Senate of the United States; that Senators of the United States, who act under a solemn oath of office and who represent on this floor States just as great and constituencies just as great as does the distinguished Senator from Missouri, are not to be browbeaten, bulldozed, or intimidated by any rough-hand methods in this matter. Sad will be the day for the people of the United States and sadder still the day for this illustrious body when Senators who sit on either side of this Chamber are to be browbeaten in any such manner as this, and certainly it seems to me that if the Senator from Missouri possessed the very first element of leadership he would have left most of his speech of yesterday unsaid.

Mr. President, it is not my purpose to add to the already bitter feeling that has been engendered by this controversy and by this situation; it is far from my purpose to do so. I think those of my colleagues who know me best, who live closest to me, and who are best acquainted with me and with my life and character and career, understand full well that it is with extreme regret that I differ from any Democratic colleague in this body on any important matter. Certainly it is not my desire to add to the discord existing on this question; certainly it is not my desire to put the party in worse shape than that in which I found it when I came here, or by my speech to make the situation worse than it was before the speech was made. So that while I expect to answer with some frankness some observations of both the distinguished Senators from Missouri about this matter, I do not expect to go so far as these distinguished Senators have seen fit to go in their criticism of me and of certain other Senators on this side of the Chamber for the awful crime of having disagreed with them and certain others of our associates about a great question.

But the Senator insists that I and other Senators have been recreant in party fealty because of a so-called Democratic conference or caucus about this measure—which term ought to be applied to the meeting or meetings I am quite uncertain. In the beginning, being a new Member of the Senate, I was informed by certain of my colleagues that for many years Democratic conferences in this body had been held, without any precedent to the contrary, which did not seek to bind Senators, who were here as the ambassadors of sovereign States, to vote against their convictions on any of the great questions that might be pending. That was the information that I had originally on this subject; and I remember that at the first conference which I attended of Democratic Senators, in a spirit of harmony and good will, without the slightest jar or friction between any members of the conference, it was suggested and unanimously assented to, just after the President had made his opening address at the beginning of this session, that we should first of all, so far as the Democratic conference was concerned, make it our program to pass the great supply bills that were necessary for the maintenance and support of the various departments of this Government, and then, after that work was done, we would proceed, as far as we could, to try to carry out the program recommended to us by the President of the United States, so far as we might find ourselves able to agree and assent thereto. Unless my memory serves me incorrectly, that was the unanimous verdict of a Democratic conference, with not a voice raised in dissent.

Then this measure came on, offered originally, if I am correct, in another body, by a distinguished Representative from the State of Missouri, brought here by him, given—judging only by the fact that the language is identical—to the senior Senator from Missouri, and introduced by him and referred to the Senate Committee on Commerce. A conference of Democratic Senators was called to consider this subject, and it soon developed that it was the purpose of at least some Senators to attempt to make this conference a thing that it had not been in 13 years, without a break—a binding caucus—and to commit us to that policy, without even reading the bill.

For certain reasons that I will explain to the Senate and to the country in a later portion of my address, I felt impelled to object to that form of procedure. We then undertook to take up the bill in detail and read it in sections. During the preliminary stages of the conference I was attending, hoping that the measure might be modified in conference to meet the views that I entertained and the pledges that I had made on this great question, so that I might be able to confer with the balance of my Democratic brethren about the matter and finally support some kind of a shipping bill.

Senators, and particularly Senators on this side of the Chamber, I appeal to you. Unless I am incorrectly informed about the happenings in this body, not since the year 1903 has an attempt been made to hold what might be technically and accurately termed a caucus of Democratic Senators, and to bind Democratic Senators to vote, whether against their convictions or not, for public measures. Yet even the very resolution which was invoked as the basis of this action, as the warrant for this authority, on its very face and in its very terms affords justification for the action that each one of the seven Senators who sit on this side of the Chamber and expect to support the motion to recommit has taken. I will read it.

Mr. KERN. Mr. President, will the Senator from Georgia yield to me?

Mr. HARDWICK. I yield to the Senator from Indiana.

Mr. KERN. I desire to make a motion for an executive session.

Mr. HARDWICK. Very well.

EXECUTIVE SESSION.

Mr. KERN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 20 minutes spent in executive session the doors were reopened.

Mr. STONE. I move that the Senate adjourn.

The motion was agreed to, and (at 6 o'clock and 8 minutes p. m.) the Senate adjourned until to-morrow, Friday, February 5, 1915, at 12 o'clock meridian.

CONFIRMATIONS.

Executive nominations confirmed by the Senate February 4, 1915.

RECEIVER OF PUBLIC MONEYS.

Blair E. Hoar, of Orofino, Idaho, to be receiver of public moneys at Lewiston, Idaho.

ASSAYER IN CHARGE.

Ed Ryan, of Goldfield, Nev., to be assayer in charge of the mint of the United States at Carson, Nev.

APPOINTMENTS AND PROMOTIONS IN THE NAVY.

William E. Stevens to be an assistant surgeon in the Medical Reserve Corps.

Anderson C. Dearing to be a second lieutenant in the Marine Corps.

Ensign Ernest J. Blankenship to be a lieutenant (junior grade).

POSTMASTERS.

ARIZONA.

G. Lindley Gollands, Chandler.
E. F. Thompson, Kingman.

ARKANSAS.

Henry Clay Maples, Green Forest.
M. E. Sherland, McGehee.
John B. Thompson, Sulphur Springs.

HOUSE OF REPRESENTATIVES.

THURSDAY, *February 4, 1915.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Lord our God, in response to the invitation revealed in the written word and in the law of our being, we come asking that we may receive, seeking that we may find, knocking that the chambers of Thy councils may be opened unto us, that righteousness, truth, and justice may prevail in all our hearts that Thy purposes may be fulfilled in us; and we will praise Thy name forever. In the spirit of the Master. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed without amendment bills of the following titles:

H. R. 20933. An act extending the time for completion of the bridge across the Mississippi River at Memphis, Tenn., authorized by an act entitled "An act to authorize the Arkansas & Memphis Railway Bridge & Terminal Co. to construct, maintain, and operate a bridge across the Mississippi River at Memphis, Tenn.," approved August 23, 1912; and

H. R. 20818. An act to authorize the Brunot Island Bridge Co. to construct, maintain, and operate a bridge across the back channel of the Ohio River.

IMMIGRATION.

Mr. BURNETT. Mr. Speaker, I present a privileged report (No. 1368) from the Committee on Immigration and Naturalization.

The SPEAKER. The Clerk will read the report.

Mr. MANN. Mr. Speaker, I take it that it is not necessary to read the report.

Mr. BURNETT. I would like to have the report read.

Mr. MANN. It will be read in the gentleman's time. The report is not privileged.

Mr. BURNETT. There has been, Mr. Speaker, a time agreed upon for debate.

The SPEAKER. The gentleman from Alabama is entitled to an hour's time on his report.

Mr. HEFLIN. What is the agreement as to time?

Mr. MANN. I think the gentleman from Alabama should have the agreement as to time settled in the House.

Mr. BURNETT. And then have the report read, but not taken out of the time agreed upon?

Mr. MANN. I do not care about that.

Mr. UNDERWOOD. Mr. Speaker, I think the question is not before the House until a motion is made to accept the report. I think it is in order for the gentleman to have the report read in his time and then make the motion.

The SPEAKER. The Clerk will read the title to the bill.

The Clerk read as follows:

H. R. 6060. An act to regulate the immigration of aliens to and the residence of aliens in the United States.

Mr. FIELDS rose.

The SPEAKER. For what purpose does the gentleman from Kentucky rise?

Mr. FIELDS. Considering the importance of this matter, Mr. Speaker, I think there should be a quorum present, and I make the point of order that no quorum is present.

Mr. MANN. I hope the gentleman will not do that; there will soon be a quorum here.

Mr. FIELDS. Mr. Speaker, I withdraw the point of no quorum.

Mr. BURNETT. Mr. Speaker, I call up the report on the bill H. R. 6060, and move that the House pass the bill, the veto of the President to the contrary notwithstanding.

The SPEAKER. The gentleman from Alabama moves that the House, on reconsideration, pass the immigration bill, the objections of the President to the contrary notwithstanding.

Mr. BURNETT. Mr. Speaker, we have agreed upon 5 hours and 20 minutes for debate. One-half is to be given to the side of the proponents of the bill and one-half to those opposed to the bill; 1 hour and 20 minutes is to be controlled by myself and 1 hour and 20 minutes by the gentleman from Massachusetts [Mr. GARDNER]. For those opposed to the bill, 1 hour and 20 minutes is to be controlled by the gentleman from Illinois [Mr. SABATH] and 1 hour and 20 minutes by the gentleman from Pennsylvania [Mr. MOORE].

Mr. SABATH. One hour and twenty minutes is to be controlled by me and one hour and twenty minutes by the gentleman from Pennsylvania [Mr. MOORE].

The SPEAKER. The gentleman from Alabama asks unanimous consent that debate on this bill shall be limited to 5 hours and 20 minutes—one-half on one side and one-half on the other; that one half of the time for those in favor of the passing of the bill over the President's veto be controlled by himself and the other half by the gentleman from Massachusetts [Mr. GARDNER] and one half of the time in opposition to be controlled by the gentleman from Illinois [Mr. SABATH] and the other half by the gentleman from Pennsylvania [Mr. MOORE].

Mr. MANN. And at the end of that time——

Mr. BURNETT. I shall ask for the previous question.

The SPEAKER. And at the end of 5 hours and 20 minutes the previous question shall be considered as ordered. Is there objection?
